PORT ARTHUR & FORT WILLIAM.
Post Office Address, — — Port Arthur, Ont.

Mercantile Summary.

The Canadian General Electric Company have completed the purchase of another large site in Peterboro, and will this summer make large additions to their buildings.

The offer of 50 cents on the dollar, recently noted as being made by D. Goyer, jeweller, of Ottawa, has been declined, and the estate will be wound up by D. A. Cole, assignee.

We are glad to observe that, the sanction of the Ontario Legislature having been obtained, the name of the town of Rat Portage has been changed to that of Kenora.

The Nasmith Co., bakers and confectioners, Toronto, have bought the confectionery store of A. Beattie & Co., in Stratford, Ont., and will open business there. They will also manufacture.

We have received formal notice that the business heretofore carried on by the Polson Iron Works has been acquired by "Polson Iron Works, Limited." The new company has acquired all the assets of the business and has assumed its liabilities.

Messrs. C. Allom, J. Du Veen, of London, England, and Thomas Morrison, of Aberdeen, have discovered in Hastings County quarries of what they claim to be a marble fully equal to that from Carrara, which sells at a very high price for sculpture purposes.

Last month the sales of C.P.R. lands at the Winnipeg office amounted to 22,030 acres, the sum realized being $125,210, or an average of $5.66 per acre. Compared with April, 1904, the sales were 2,000 acres less, and the price realized $9,000 more.

The ratepayers of Listowel, Ont., have voted in favor of selling to D. Hibner & Co., of Berlin, the town's interest in that company's chair factory, and of fixing the assessment on the property for ten years at $14,000. Additions will be made to the factory.

Marc Aurele Gauvreau, after fifteen years' experience as a clerk in Quebec, determined to make a venture in business on his own account, and opened a moderate general store at St. Raymond, Que., in 1902. Within eighteen months he was before his creditors asking for an extension; now he has assigned, and his estate is to be wound up by Lefaivre & Taschereau, assignees, Quebec, and so ends the brief business career of this modern Marcus Aurelius, who is likely to have had no such philosophic Meditations as the great pagan after whom he was named.

FINANCIAL CONDITIONS.

Æmilius Jarvis & Co., Toronto, in their circular letter dated April 28th, say:

In the past two weeks there have been several reactions in the market, with no adequate change in the actual situation to account for them. It is not unreasonable that such reactions should come, and that they should be severe, after such a very long continued advance in prices as we have had. The drawing together of the Japanese and Russian fleets alarms conservative investors and induces many speculators to lighten their load. Speaking broadly, however, the whole of this continent is to-day at the highest point of prosperity ever touched. This great prosperity undoubtedly has a strong effect in keeping prices up, both on account of the increaserd earnings of the companies and the consequent increase in the value of their securities, and also on account of the increased income of individuals which must find investment.

With regard to conditions in the United States, Henry Clews & Co., New York, say:

The stock market has been demoralized and at times almost panicky. The demand for securities from investors has been very largely satisfied by the heavy flotations of the last six months. Several hundreds of millions of new bonds and stocks, chiefly the former, have been issued during that period; a considerable proportion of this amount, of course, being for refunding or merger purposes. Nevertheless, the new capital commitments for the past six months have been exceptionally heavy, and the fact that further issues are in contemplation can hardly be regarded as a bullish argument, although it may possibly oblige powerful banking interests to sustain the market in order to facilitate their flotation. A rather striking illustration of the diminishing appetite for bonds was shown in the low price of about 101 at which $25,000,000 of New York city bonds sold last week.

This was a decline of 2 points, due entirely to oversupply. If investors are becoming indifferent to such high-class securities as these, how will they feel towards other bonds of a less desirable quality so long as prices are maintained at such an abnormally high level? The weakest side of the situation seems to be strictly confined to the stock market, which has over-discounted all favorable conditions. General prospects continue favorable, the crop situation being promising in spite of the backwardness caused by cold weather. The industrial situation is also auspicious, and building is likely to be conducted upon an unprecedented scale during the present year, so that labor will be well employed; and, profiting by past experience, it is to be hoped there will be less trouble arising from strikes and disputes betwen employers and employees. The financial situation abroad is also satisfactory, foreign markets being generally on a sounder basis than for some months past and American securities steadily rising in favor. The great increase in gold production in South Africa is also having a stimulating effect.

* * *

TORONTO MARKETS.

Toronto, May 4th, 1905.

Chemicals, Drugs, Etc.—An average good trade is being done locally in drugs. Quinine has made no appreciable change since last report, while opium is stil dull. Chamomile flowers are firmer, and so is cocaine. Cod-liver oil is easier owing to reports of large catch off the Norwegian coast. Oil of lemon is firmer. Peppermint oil is easier. Ipecacuanha is tending downwards. Reports from the chief centres of chemical manufacture in Britain show that while prices keep fairly steady, the trade being done is not highly encouraging, particularly in the domestic branches, except in a few cases for the textile trades. Export trade, however, apparently is looking up.

Flour and Grain.—There is considerable divergence of views between buyer and seller, the former pointing to the slump in wheat and the latter retorting that that does not affect holders yet. Ninety per cent. patents sell at $4.35 or within a few cents of that basis, in buyers' bags, east or western freights. Millfeed shows an easier tendency owing to the approach of the grass season, but prices meantime remain much as they were. In Ontario wheat not much business is being done, buyers and sellers holding quite divergent views. Manitoba wheat inclines again towards firmness. Rye and barley are dull. Oats are very firm, and holders look for higher prices. Corn is easier, with the approach of warm weather. Peas and buckwheat are very firm, particularly the latter.

Hardware.—Scarcely any feature presents itself for comment under this heading at this writing. The opening of navigation has been followed by the rushing out of large quantities of goods for which orders were already in hand, and more of these are coming in all the while, but it is too early yet to say in what way the present season compares with those preceding. Prospects are for a good year's business, especially as farmers are hopeful, and the building trades seem rather more settled than usual. All seasonable goods, as well as the heavier metals are in good normal demand.

Hides, Skins, and Leather.—The market for hides is unchanged, and not a great amount of business is being done. In leather, something similar may be said. Prices do not go uniformly up, and yet at the present rates for hides there is small profit in the tanning business. Some tanners talk of ceasing operations until some improvement manifests itself.

Live Stock.—Another upward sweep has taken place in the cattle market, though the quality of offerings has hardly been up to that of last week. Exporters have bought quite largely for space on the first boats of the season from Montreal. Quotations have been distinctly higher. Not enough butchers' cattle were offered on last market day to go around, and values ruled very firm. Some really good ones sold at $5.75, and even low graders went a little higher to fill the gap. Some stockers and feeders of good build are being bought as exporters. Milch cows are steady with a good demand. Calves are ordinarily of poor quality just now, and the enquiry for such is poor. There is a good demand for sheep and lambs.

Provisions.—The advance in live hogs has been followed naturally by one in hog products. The general tone of the smoked meat market is quite firm, and demand is fairly good. The receipts of butter are quite large, and as a consequence the market is beginning to take on an easier tone. Cheese is steady with a good demand. Sales in Great Britain are reported light. Eggs are in abundance, and prices range about 13½ to 14c. Quite a large quantity of potatoes are coming forward and prices are easier.

Seeds.—Stocks of farm seed are becoming light, but the demand is lessening, and prices keep about as they were. Timothy sells at $1 to $1.75.

Wool.—Little is being done in the wool market just now. New clip is not expected in quantity for some time yet, and meanwhile prices are merely nominal.

* * *

MONTREAL MARKETS.

Montreal, May 3, 1905.

Ashes.—Though there has been some little enquiry there has as yet been no actual business leading to any material shipments by first outgoing steamships. There are, however, only 25 to 30 barrels in store, and prices remain steady at $5.50 for No. 1 pots; seconds, $4.95 to $5; pearls, $7.25 to $7.50.

Dairy Products.—Owing to more liberal receipts of new fodder cheese the market shows some decline, and the present limit of prices is 10¼ to 10½c. For butter there has been a brisker enquiry, and prices are firm at 18¼ to 18½c. for choice creamery; rolls are quoted at 15 to 16c.

Cements and Firebricks.—There are as yet no new stocks on the wharves, and we continue to quote prices from store as follows: Belgian cement, $1.70 to $2.10; English, $2.05; American and Canadian, $2.30 to $2.40, less rebate for returned packages; bricks, $18 to $23 per thousand.

Dry Goods.—Business in this line cannot be called brisk. Retail country stocks are said to be still pretty full, owing to the raw, backward weather, and some fair number of requests for renewal indulgence are reported in connection with payments due on the 4th, which is a fairly heavy day. The Colonial and Magog mills have issued their fall price list for printed cottons, which shows very little variation from figures of last list. British advices indicate generally firm markets.

Groceries.—The distribution can hardly be called an active one, such as is usual at the season, and the sugar refining companies complain of slack business for the past six weeks. A decline in refined sugars was announced last Friday, both refineries making a cut of 10 cents a cental, making $5.55 now the factory figure for granulated in barrels, with $5.05 the lowest for yellows. Since then there has been some recovery in the market for raws, but no advance is looked for in refined. Owing to the weaker market in Barbados for new molasses, the local jobbing price for single puncheons from stock has been reduced by 2c. to 38c.; barrels, 40½c.; half-barrels, 41c. Thus far, it is said, only one cargo lot of Barbados has been bought for this market; some small trial lots of Antigua molasses are reported as being ordered. The Milling Company has advised a reduction of 10c. a cental in standard B. and C. C. makes of rice.

Hides.—Lambskins are advanced this week to 15c. each; sheepskins remain at $1.20. Beef hides come in slowly, and are still bought by dealers at 9½c. for No. 1, but of calfskins receipts are liberal, with prices steady at 14c. for No. 1, and 12c. for No. 2.

Metals and Hardware.—The movement in these lines is very well sustained. In prices there are no marked changes. Ingot tin and copper are slightly easier at 33c. for the former, and 16c. for the latter in a jobbing way; antimony, 9 to 9¼c.; spelter, $6.50; lead, $3.40. Reports referred to last week of a possible combination among British manufacturers of galvanized sheets are not confirmed; the market is firm from 5s. to 12s. 6d. a ton on the other side, but local prices remain as they were at $4.10 for Queen's head and equal. Canada plates are also a little firm in Britain, but $2.35 is still the general quotation here; black sheets, $2.15; Ternes, $6.50; coke tins, $3.65, and charcoal ditto, $3.90. Summerlee No. 1 pig iron to arrive, $19 ex wharf; selected No. 2 ditto, $18.50; Middlesboro No. 3, $17.25. Bars are unchanged at $1.75 to $1.80; boiler plate, $2; iron pipe, $4.20 per 100 feet for inch.

Oils, Paints and Glass.—Linseed oil has made two advances since last report, and is now quoted at 53c. for boiled and 50c. for raw. White leads and putty are not advanced, though it is claimed they should be. Turpentine remains steady at 87c.; glass, firm at $3.75 per 100 feet for first break.

TEXTILES AND FASHIONS.

The Drapers' Record says that business in the linen market is steadily improving with values tending surely upwards. Yarns have sold freely. Spinners are in a strong position, being well supplied with orders, and with every prospect of a further increase in demand. Some numbers of yarns have advanced in price, and Continental spinners have also been quoting higher rates. There is an improved demand from the home markets, which bid fair to further expand. Prices keep very firm.

The shipping trade continues substantial and satisfactory. Orders from the United States are steadily coming forward, and the turnover compares favorably with last year. Cuban trade is maintained. The South American markets are buying freely, and there is a moderate business with Canada and with Australia. There is a slight improvement in Continental demand. Imports of flax for March show an increase above the average of 62.7 per cent. Yarn exports show an increase of 17.1 per cent. Shipments of linen piece goods show an increase of 17.5 per cent. in quantity, and 25.4 per cent. in value, and linen thread exports are gone up 33.6 per cent. and 18.6 per cent. in quantity and value respectively.

In Glasgow the outstanding feature of the market appears to be the increasing activity of the zephyr trade. For some time print cloths of a cheaper grade have enjoyed most favor, but now the taste is turning on to better-class stuffs, and, from the substantial samplings of the past ten days, there would appear to be no question that the zephyr branch is about to show a welcome return to activity. With reference to dress goods, enquiries are moderately good, but retailers will of necessity require to get off a goodly portion of their earlier purchases before they can come forward with repeat orders. The cloths most asked for are in light grey tweeds, coating checks, satin-faced habit cloths, while for dressed material voiles (spotted) and crépe de chine are in chief request. New blanketing tweeds have also found favor. All over, textures and colorings are more artistic than in any previous year.

A correspondent of the New York Dry Goods Economist in Paris, France, says that the present year may be described as a floral one, in the sense that everything is embroidered, painted, incrusted or appliquéd, and that the designs of all these modes of garniture are, as a rule, floral. We must even note the return of the vogue of hand-painted devices for dresses, parasols and—the latest novelty of all—for the pretty little Charlotte Corday fichus, which are one of the fads of the season. As regards material, these dainty kerchiefs are composed of batiste de soie or grenadine, more frequently white than colored. It is not, however, considered bad taste to construct them in one of these materials matching the color of the dress, which may or may not be of the same fabric—that is a secondary matter. In all cases, however, the fichu in question must be of some transparent material. It is generally bordered by a narrow frilling of the material or lace, and it is on the kerchief itself that the painting is carried out, reproducing rather large floral designs in their natural colors and a liberal addition of foliage. The said colors must either match those of the toilette or be a perfect contrast.

No further concessions in the raw silk market have been reported from New York during the week, and it is evident that the decline which has been reported for several weeks in nearly all markets has been stopped, for the time being at last. But the fact that in-

creased firmness is evident has made the manufacturers very cautious about purchasing, and, although evincing greater interest in the market, they have not been persuaded into operating with any freedom. Every one feels more sanguine about the future of the piece goods market, especially in view of the fact that the concessions made earlier to secure business have practically ceased, and buyers appear willing to pay full asking prices. Machinery is running full, and, with an increased production capacity ensured by new mills and additions to old ones, the consumption should show a corresponding growth. Interest centres in the prospect of the new season's crop, and opinions vary as to the outcome. European stocks are not particularly depleted, and there seems to be little likelihood of scarcity in this direction. The small stocks in Yokohama have meant that manufacturers have sought elsewhere for their material. As a consequence, Canton shows the effect in an increased demand for the sixth crop, which is generally admitted to be of very good quality.

* * *

IRON AND STEEL TRADE.

Some further broadening of the iron and steel markets has taken place during the week, says the Iron and Machinery World. All districts in the United States report good sales. The condition at mills becomes worse, and the tendency of prices is to advance. There is this exception. Scrap is weak. But for that weakness there are special reasons. All the winter there have been accumulations of scrap by the dealers, on the theory that the general brightness of the metal trades must favorably affect the prices of old material. These accumulations have now become so large and heavy that the holders are forced in some instances to let go. The offerings are much greater than a week ago, and prices have responded to the extent of fifty cents or a dollar. There are phases of the general activity that are specially significant. The engine builders are well loaded up with orders, denoting that manufacturers are increasing their capacities for production. This favors not only the engine builders, but sooner or later every seller of the material consumed at these plants. There is greater public attention in the trade just now to the large business. Heavy consumers have been purchasing, and there does not seem any branch of finished material that has not furnished some interesting transactions recently. The railroads are gradually coming into the market for steel rails, and the demand for bridges is reflected in the rapidly growing business of construction companies. Building material of all kinds is active. There is some renewed activity in the construction of producing plants. There has been talk of a number of blast furnaces to be commenced soon in the north and one for the Chicago district is definitely announced this week. So, in finished steel mills there are efforts being made to meet the present strain upon production by larger capacities. All perceptible forces for the moment seem to be working for greater activity.

A WITTY AUSTRALIAN BISHOP.

The Strand Magazine tells some good stories of a witty Australian Bishop, now retired. When one of the clergy described a wealthy parishioner as a careless, indifferent sort of man, who cared only for his garden during the day and his billard-room at night, he said:

NOW IS THE TIME

LUMBERMAN & CONTRACTOR
IN THE INTERESTS OF
BRITISH COLUMBIA, ALBERTA, SASKATCHEWAN AND MANITOBA.

You Need Go No Further

THE HUGH C. MACLEAN CO., Ltd,
Winnipeg. Vancouver

Established 1882
THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST.

A Montreal telegram of yesterday states that J. and T. Bell, shoe manufacturers, of that city, have signed a contract with the president of the International Brotherhood of Boot and Shoe Workers in preference to the Canadian boot and shoe workers. "A strong canvass had been made by representatives of both unions, but the International won. It is said the employees are satisfied."

Word comes this week from Windsor that the well-known merchant, Robert Henry, former M.P. for Brantford, will for the next five years represent the British Columbia Packers' Association, the big packers of canned salmon. He will have supervision of their business in Ontario, Nova Scotia, New Brunswick, Prince Edward Island and a part of the Province of Quebec.

Word has been received, says a wire of Monday last from Victoria, that the threatened strike at the Crow's Nest coal fields has been averted. A new agreement has been signed by Fernie union officials, agreeing to an eight-hour day. Both sides made concessions. The agreement is important, as it insures an uninterrupted supply to the mines and smelters of the Kootenay district of British Columbia.

The Great Northern Railway Company announces that it will extend a line from some point on its Republic branch to Princeton, B.C., a distance of eighty-six miles. Work has already begun at Oroville, in the Okanagan district. It is announced that the population of Brandon is 8,529, which represents an increase of 1,523 in a year. The total assessment of the town amounts this year to $4,134,820; in 1904 it was $2,657,123, an increase of thirty-five per cent.

M. J. Haney, contractor, Toronto, has arranged to take twenty acres of land in Ashbridge's Marsh, Toronto Bay, on which he proposes to erect an iron plant. The land will have to be reclaimed and cribbed at a cost of over $200,000.

The Ontario Government has granted a charter to J. J. Milliken and others under the name of the Cuban Realty Company, and they will carry on an immigration, colonization, land and development company business. The capital stock is placed at $200,000.

The Napanee Canning Company, Limited, has been granted a charter by the Ontario Government, and will manufacture, purchase and deal in fruits, vegetables, jams, jellies, poultry, etc. It will also acquire the concessions and grants made by the town of Napanee to W. A. Carson. The latter gentleman is one of the directors of the new company. Capital and stock authorized is $40,000.

A report from Chicago says that cold and stormy weather has prevailed during the week in the leather trade, yet the trade does not appear to be affected adversely. The general activity in all lines noted in our last report is still in evidence, and the volume of business well sustained. Orders from travelling salesmen are fully up to the normal, both for immediate shipment and fall delivery. On medium-priced staples the advance of five or ten cents that manufacturers are obliged to charge causes friction when the jobber attempts to get a remunerative price from the retailer. In some instances he is obliged to yield his profit or lose a customer. There is however, very little talk about prices of late. Under existing conditions in the hide and leather markets, prices on manufactured goods must remain firm. City retailers are having a lively trade on all goods for Easter. Colors and whites will be in brisk demand this season for men, women and children. Local manufacturers continue busy. Collections are reported good.

A GOOD POLICY

for policyholders is the 20 pay life guaranteed option policy issued by

Head Office - WATERLOO, ONT.

The Mutual Life OF CANADA

In this style of policy the Benefits conferred and the Premium rates charged are more liberal than those in any similar policy issued by other companies.

Be sure to examine it before insuring elsewhere.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391 per day in number of Claims Paid.
6,561 per day in number of Policies Issued.
$1,426,700.50 per day in New Insurance Written.
$114,060.67 per day in Payments to Policy-holders and addition to Reserve.
$73,326.8 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600,000.00

THE CANADA LIFE

holds Policy Reserves greater by $3,000,000 than the present Government requirement.

The business in force is three times as great as that of twenty years ago, while in the same period the Assets have increased four fold.

Each year with its increasing age, Canada's leading Life company

Shows Increased Strength.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

CANADIAN PRODUCTS IN BRITAIN.

In matters of farm products, the great competitor of Canada in Great Britain is nearly always little Denmark. This rivalry, or rather the present unrivalled position of Denmark in the race for favor in the highly important markets of the United Kingdom is due not to superiority of climate, nor probably to superiority in ability of producers, but simply to the greater care taken by the Danes in raising, grading, and shipping *the best.* This is a matter to which the Monetary Times, as well as many people connected with the trade, representing both Canadian interests and the British commission business, have repeatedly referred; but still the old methods of shipping and the old carelessness as to the details which count so largely in the Old Country consumers' eyes, go on. And Canada loses millions of dollars annually as a consequence. It is not only that Denmark exports into Great Britain a larger quantity of several lines of produce each year than Canada, but that the prices realized for the former are so much better. Last year the Mother Country imported from abroad, roughly speaking, £20,000,000 worth of butter; of this £8,760,000 worth came from Denmark, and £1,200,000 worth from Canada. The importation of ham was £12,500,000, of this Denmark sent £4,500,000, and Canada only £1,166,000.

In the matter of butter, Denmark, of course, has the advantage of nearness to the market and consequent quickness of transportation, while the Canadian article has to be put into cold storage, a factor which does not conduce to the best flavor. But these disadvantages can probably be rectified in time with care. In fact, it is only some thirty years since the Danish makers were confronted by more or less analogous difficulties, which by hard thinking and careful attention to detail they have succeeded in overcoming. They studied the taste of the English consumer, than whom, perhaps, there is no one more fastidious in such matters, and finally they hit upon the style and flavor which exactly hit John Bull's taste and eye. One thing—this we learn from Mr. MacNamara, the Canadian trade agent at Manchester—is that the Danish butter is almost entirely devoid of salt. To a Canadian taste, perhaps, it would prove insipid, but then, as Canadian producers need not be reminded, it is, in respect to export, to the Englishman's taste he should cater and not to the Canadian. Good fresh "saltless" butter should be the aim of Canadian dealers to send to Great Britain, and they should ship it in casks weighing one hundred-weight, not in 56-pound boxes. Another drawback to the Canadian article is its unevenness in quality, a drawback which was referred to as late as our issue of 28th April. This irregularity of quality is such that the purchaser never knows what he is getting in the way of butter from Canada, until he has tasted it, which in the case of Danish is seldom thought of. Complaint is also made that Canadian speculators buy quantities of June-made butter and keep it in store until prices have gone up, say in October or November, the result being that when the butter eventually reaches the retailer's counter it quickly goes bad on the outside. The opinion of Mr. W. A. Mackinnon, Canadian Trade Agent at Bristol, is interesting, inasmuch as he sizes up the discrepancies in value between Canadian and Danish butter in a practical manner, and argues that this difference would disappear:

(a) If all Canadian were brought to the level of best Canadian.

(b) If every creamery catered carefully for the requirements of a particular market in the matters of color and salting.

(c) If uniformity were secured in the matters of quality and weights.

(d) If the butter were always landed in the best possible condition.

(e) If best Canadian were invariably sold as such, so as to establish the reputation it deserves, instead of sometimes contributing to the reputation of a competitor.

The explanation of this last contingency is that Canadian butter of the very best quality is at present scarce and in bad repute so that retailers can only realize its genuine value by passing it off as "Best Danish."

This latter clause sheds surely a sufficiently discreditable light upon the status of Canadian produce in England.

Similar remarks apply to bacon, the favor extended to Danish, compared with other makes, being even more strongly marked than in the case of butter. The great secret of the success of Danish bacon in the British market is its keeping quality. The Danish exporter also takes pains to understand thoroughly the requirements of the particular market to which he caters, and ships accordingly. It is pointed out that one blemish to Canadian bacon in the eyes of the British dealer is the cutting of the large knuckle bone out of the shoulder in order to assist the process of "fast curing." This apparently trivial thing alone is sufficient to cause Canadian hog products to sell cheap.

It will be seen that practically all the slowness and remissness of Canadian trade with the British Islands in these products is the result of comparatively easily remediable defects—matters such as want of attention to details, lack of knowledge, or else of putting knowledge into practice. It is to be hoped that a pointing out of these defects will be followed by improvement, for the importance of that market of the British Islands to the future development of this country cannot be exaggerated.

* * *

THE RADIAL RAILWAY PROBLEM.

The action of the various municipalities surrounding Toronto in coming together last week and trying to do something definite in the direction of obtaining access for the radial railways to the centre of the city only draws attention in a forcible manner to what intelligent people have been thinking for a long time past. That is to say, the absurdity of the present status on this important matter. Detroit, Toledo, Montreal, and other cities on this continent are the centres of converging systems of electric railroads which act as an incalculable blessing both to the cities themselves and to the people who are, by those roads, brought into easy connection with them. Thousands of farmers are enabled with the aid of such systems to ship their produce at cheap rates and in a fresh condition to the city markets; thousands of families resident in the city have the advantage of being able to buy such produce. Citizens get cheaper and better produce; farmers get more for their labor. Moreover, people in the cities can get out into the country without trouble, and people in the country can more easily visit the city for pleasure or for purchasing. Is any argument needed to show the great advantages which must accrue to both city and surrounding country from such an arrangement?

Yet here is Toronto, the second city in the Dominion, surrounded by a countryside which for fertility and wealth-production is second to none, standing in its own light. Here are the radial electric railways, converging from the East, from the North, from the West. But instead of those lines delivering their burdens of passengers and freight in a central part of the city, as they should, in order to be the benefit they could be, they have to stop at the outskirts, thereby ruining their facilities as freight-carriers and spoiling their passenger-carrying advantages as well.

Of course, we know that the city of Toronto defends its attitude in the matter by an allusion to ultimate aims on the part of the urban street railway company, which also controls the various radial lines. Deep in its heart the city believes that this corporation's idea is to make of the entrance of radial roads a means for practically compulsory extension of the main franchise sixteen years hence. And we cannot fail to recognize that past experience shows forth only too clearly the grasping nature of that corporation. But it may be pointed out that at the present time the Toronto Railway Company distinctly denies that it wants, or at least is asking for, a franchise for radial roads which will overlap the present city franchise. All that the radial roads want is "that the city shall allow the parent company to lay down three lines on streets now occupied by it, and that, when the radial cars reach these streets, they shall be taken possession of by the said parent company and brought to the centre of the city, where they can discharge their passengers and freight." In other words, all the radial lines want, is *access* to the centre of the city, to be continued at the expiry of the Toronto Railway Company's franchise from the city, on mutually advantageous terms which they are willing shall be settled by arbitration. This condition of *continued* access can hardly be deemed unfair, seeing that very large expenditures are contemplated in the near future, in the way of terminal facilities, etc.

Timid people in Toronto are afraid that this arrangement may prove a loop-hole if able men use unscrupulous methods for the benefit of the Toronto Railway Company, looking to a forced extension of the franchise. Is the Toronto Street Railway to be a constant *bete noir* to the corporation of this city? And is there not ingenuity enough among the legal advisers of the city to prevent its getting unfair advantages? But surely the city can afford to have a little more confidence in the ability of its legal representatives than this attitude betokens. And surely it is a discreditable thing if the second city of the Dominion and one of its most important corporations cannot get together and make mutually advantageous terms on a matter upon which depends so much to both.

* * *

MUNICIPAL BANKING.

There is another side to the question of municipal ownership in Great Britain, which has been so highly praised in recent days, and this is a side which has not received over-much attention. The London Economist draws attention to the hardships which are apt to follow such a large demand as exists for money by towns and cities, under the caption of Municipal Banking. Many of the English municipalities have taken to borrowing for what are called reproductive undertakings, such as gas or waterworks and tramways—of course upon the credit of the ratepayers. The result is that the interests of the latter have become very complex, and many of them are beginning to ask themselves where it will end?

A tremendous increase has taken place in the national debt during the last ten years or so, and when to this is added the great growth of corporation loans, they are beginning to fear that before very long Britain may become one of the most heavily taxed countries in Europe.

Some of the municipalities find it increasingly difficult to borrow in the ordinary way, and are now advertising their desire to borrow direct from the public on mortgage and to receive loans subject to notice varying from a few days to six months; thus competing with the banks for deposits at interest. This proceeding tends to raise the rate of interest which, while no doubt beneficial to bank depositors, is hardly beneficial to the ratepayers, nor ultimately to the interests of trade.

Some people claim that this course of the corporations, in accepting loans direct, is drawing away money from the banks, but it is to be remembered that to a certain extent the money goes back, as a rule, to the banks, except that which is actually spent in the carrying on of the "reproductive" enterprises. At the same time, it must be admitted that individual banks may suffer and that there is a constant transference of deposits, which in itself is an evil. Some banks profit at the expense of other banks.

It may be argued that this borrowing on account of municipalities tends to stimulate production, and is thus good for trade. This is only true, however, provided the reproductive undertakings are carried on at a profit. But, asks the Economist, are they? If not, as undoubtedly some are not, the ratepayers will some day have to make good the deficit, when the increase in rates will reduce their profits, and also add to the number of unemployed during some cycle of depressed trade.

The position of these borrowing corporations is somewhat analogous to that of the "merchant bankers" of old days in England, who, when their credit received a blow, were seldom in a position to meet a determined run upon them by depositors, for the former do not consider it necessary to accumulate cash reserves.

Another side of the question is that the British credit system enables the merchant and small trader to borrow cheaply and discount his bills at reasonable rates. Were the municipalities, by their competition, to force up the deposit rate, it would be the depositors, not the banks, who would suffer, for the latter would simply add to the borrower's rate a percentage to equalize their profit to what it had been before competition compelled them to raise the interest on deposits. Dear capital means dear goods, and so the ratepayer is allowing the municipality to tax the ordinary borrower for the benefit of the lender and to increase the cost of commodities to the consumer.

⁂

FIRE-WASTE FROM A BRITISH STANDPOINT.

For years the subject of fire-waste has been brought, month after month, to the attention of readers of the Monetary Times. We have observed with pain the too general carelessness among the people on the subject of fire; the neglect of precautions against it; the persistence in habits of negligence that encouraged its extension; failure to procure appliances to combat it when it came, and a general disregard of the conflagration hazard. We have endeavored, besides, to show Canadians how vast and increasing was the extent of this form of waste, which caused the absolute loss, in the United States and Canada, of from one hundred millions to one hundred and seventy-five millions of dollars *every year* for many years past. Our illustrations and arguments on this topic have in the main been based upon what occurred on the North American continent.

It is interesting, therefore, to find underwriters and economic observers elsewhere becoming aroused to the subject. The city of Glasgow has suffered of late from fires to an extent which caused the city council to look into their causes and to confer with the insurance companies about these scourges. And some weeks ago a paper was read before the Insurance Actuarial Society of Glasgow, the title of which was "Fire-Waste." The writer of this paper is Mr. James Allan Cook, general manager of the Scottish Union and National Insurance Company, Edinburgh. The lecturer began by remarking that fires consumed annually throughout the world not less than £50,000,000, that is to say $250,000,000 of realized wealth. This figure excluded such special incidents as conflagrations and was a growing amount, year by year; indeed it was becoming so serious as to call aloud for the attention of every economist. Fire-waste, he affirmed, is a true loss to the community, and it is a fallacy to assume that it falls upon insurance companies. Fire-waste varied in its destructiveness in different countries and different cities, the lecturer went on. In America the average loss per head of a household per annum is about £2; in Glasgow, where it is probably about the highest in this country, the average is about 21s. per annum; in Manchester it is about four-fifths; Bristol, three-fourths; Edinburgh, Dublin, and Belfast, one-half; Leeds and Birmingham, one-third; and Sheffield, one-sixth of what it is in Glasgow.

Proceeding, then, to consider the principal underlying causes of the increase of fire-waste, Mr. Cook finds one of them to be culpable carelessness, under which head may be classed defective fireplaces and defective electric installations, and another and more serious one is the crowding together of large buildings in the centre of cities.

Mr. Cook further stated that the time had come when this subject should be taken up seriously by the national and city authorities, and that in endeavoring to saddle insurance companies with charges for fire protection municipalities were but fighting the shadow of the trouble, while the trouble itself grew and the community suffered. "It is no more the duty of a fire insurance company to pay for fire extinction than for a life insurance company to pay for drainage systems and a marine company to pay for lighthouses."

⁂

THE APRIL FIRE-WASTE.

It is good news that fire losses for April in the United States and Canada were so light. According to the records of the New York Journal of Commerce and Commercial Bulletin, they were $11,901,350, which shows them to have been the lightest for years. They were double this amount in the previous April, and $13,549,000 in April, 1903. The following table gives a comparison of the losses for the first four months of the year, and the same period in 1903 and 1904:

	1903.	1904.	1905.
January	$13,166,350	$21,790,200	$16,378,100
February	16,090,800	90,051,000	25,591,000
March	9,907,650	11,212,150	14,715,400
April	13,549,000	23,623,000	11,901,350
Total, 4 mos.	$52,703,800	$146,666,350	$68,585,850
May	16,366,800	15,221,400	......
June	14,684,350	10,646,700	......
July	12,838,600	11,923,200	......
August	8,428,350	9,715,200	......
September	9,939,450	14,387,650	......
October	10,409,800	12,866,200	......
November	13,589,550	11,515,000	......
December	17,224,700	19,422,350	......

The totals of these figures for the two years last past show that the fire-waste of the whole year 1903 was $156,185,400, while that of 1904 was swelled by conflagrations to $252,364,000, an excess of $96,000,000.

* * *

GLAMOUR WEARING OFF.

The affairs of the Independent Order of Foresters, despite all the recent wholesale initiations of members, obtained under free dispensations by the Supreme Chief, seem to be taking on a somewhat serious aspect. Eight or ten years ago, when it was without any of these special means of filling out the year's quota of business, the society grew sometimes to the extent of twenty or twenty-five millions of increased insurance the one year over the other. But in 1904, as the new Blue Book from Ottawa tells us, the growth has almost ceased, both of certificates in force, and of "surplus," as its funds are erroneously called. In fact, a discerning public seems to be coming to understand that the boasted surplus is no surplus at all, but a mere accumulation of a comparatively small fund of about eight millions of dollars towards an immense liability of nearly two hundred and fifty millions of dollars. To show the amount of invested funds deemed necessary by the regular companies for about the same amount of insurance as that carried by the I.O.F., we put together the figures of six of those companies, as follows:

Companies.	Insurance.	Assets.
The Canada Life	$78,059,150	$29,064,599
" Confederation	37,922,880	10,352,122
" Montreal Sun	43,562,268	17,851,760
" Mutual of Canada	40,006,344	8,220,530
" North American	31,061,948	6,231,000
" Federal	15,649,346	2,148,773
Total	$246,261,936	$73,868,784
" Foresters	242,896,000	8,265,201

The disparity between resources of the companies which make proper provision for their members and the one which has only $34.03 yet in hand toward each $1,000 it has undertaken to pay, is very striking. The little $8,265,201 will have to start and grow up most surprisingly hereafter, if it is ever going to overtake the big $242,898,000. Does any one think it likely to do so?

Let us assume that the average age of the members of the I.O.F. is now 35, and that the whole amount of the certificates now in force has to be met only at age 75, and that no one dies in the meantime. How much per annum must the fund grow to cover the difference between the eight millions and the two hundred and forty-two odd millions? Dividing forty years into the latter sum shows that about $6,000,000 each year must be added to give every man now on the books his expected $1,000, or $3,000, or $5,000, as the case may be.

Nor does it improve the appearance of things if we suppose that one-third or one-half of the sums mentioned, or more, will become claims by death long before the members reach the age of 75. So much the slower will the fund grow.

Now, if it will take $6,000,000 a year, added to the present $8,265,201, to meet the certificates already on the books, not to mention the new ones that may be put on during the forty years, let us see how much is being actually added of late. The following table shows the total so-called surplus, and its annual increase during the past ten years, as also the total membership and the annual increase thereof:

Year.	Surplus.	Increase.	Certificates.	Increase.
1895	$1,656,385	....	$106,219,500	....
1896	1,961,978	$305,593	126,995,000	$20,775,500
1897	2,513,880	551,902	154,510,000	27,515,000
1898	3,283,137	769,257	178,311,500	23,801,500
1899	3,889,095	605,958	194,792,500	16,481,000
1900	4,441,398	552,303	206,564,500	11,772,000
1901	5,449,273	1,007,875	217,027,500	10,463,000
1902	6,223,789	774,516	226,849,500	9,822,000
1903	7,453,308	1,229,619	238,124,000	11,274,500
1904	8,265,201	811,893	242,896,000	4,772,000

The rapid decadence of the high hopes that were once entertained for the success of this bold co-operative enterprise of Dr. Oronhyatekha and his associates, is plainly visible in the above figures. What boasting there was when the so-called surplus grew by leaps and bounds of twenty and thirty per cent. of its previous self. And when the certificates increased one year by $27,515,000, and the next year by $23,801,500 what congratulations, and what big public demonstrations occurred! And how small the business of the regular companies was made to appear by comparison in whole page editorial advertisements in dailies at so much per line. But how is it now?

Last year the bottom seems to have partly fallen out of both the surplus and the certificate pile. Looks like a leak somewhere, whether it be at the bottom, or a little here and there all round. Instead of the $1,229,619 of the previous year being improved upon, at least to the amount of the interest earnings, there is a drop of $417,726, fetching up with only $811,893 of an increase. What a long distance from the $6,000,000 that must be added, on the average, for the next forty years, as above shown, to meet the $242,896,000. And how can the dwindling of the $27,515,000, of 1897, to only $4,772,000, in 1904, be accounted for, otherwise than that public confidence is waning?

Nor is there any consolation to be had by turning to the exhibit of death losses of the past year. The claims by death in 1903 were heavy enough surely, for so young a society, at $1,658,100, which was an increase of $89,473 above those of the previous year. But here comes 1904 with only a slight increase of certificates, and $2,003,869 is required to meet the claims of Old Mortality. Instead of an increase of $89,671, as in 1903, this shows a real jump of $345,760 in the one year. And then there is an item of $273,121 of "unsettled claims," of which $67,327 are resisted, or in dispute. This latter is a very much larger sum than ever before.

Nor, again, is the outlook relieved by glancing at the economy of the society in the matter of expenses. These were $444,009 the past year, compared with $401,468 for 1903. The increase of expenses in 1903, when there was a good growth in business transacted, was $22,935, but in 1904 the increase is $42,541 or nearly double, for less than one-fifth of the growth in certificates which took place in some former years.

The growth during the past year in the business coming from outside of Canada was only $1,381,000. In 1897 that growth was no less than $18,572,000, and a year later it was $18,717,500. And now it is fallen to $1,381,000. What can the matter be?

The title we give to this article seems quite appropriate to the condition of the assessment or co-operative life insurance enterprises generally. Nearly every one of them is in serious trouble of one sort or another, mostly from inability to procure "new blood" for sacrifice. The glamour is nearly worn off. The great Northwestern National of Milwaukee, after acquiring about 40,000 members, and swallowing up some nineteen smaller co-operatives, is now found unable to meet its heavy claims, its former surplus of $5,199,634 having practically disappeared. The Ancient Order United Workmen, of both the United States and Canada, are also at a standstill as to membership increase, and can no longer be called desirable for young men to join, so heavy have their assessments become, despite all that has been done to put new life into the Ancient Order. In Canada, one year ago, the membership was 43,959. To-day only 40,636 respond to the call. Only 1,924 new members joined in 1904 in place of the 5,295, of 1897, and the 4,848 of 1901. The old men are hereafter to pay $2.69 at each monthly call, instead of $1.30, as last year, or the easy 90 cents of previous years. The difference is great, and its effect is palpable.

* * *

THE PUNISHMENT OF BANK OFFICIALS.

So high is the standard in Canada of bank managers and bank staffs generally as to personal integrity, and so rare the instances in which trust in these officials has been violated, that it gives a Canadian business man an unpleasant shock to read, as one might have read in half a hundred daily newspapers on May 7th, the following head line of a press despatch from Columbus, Ohio: "One Jail Holds Ten Bankers." The first we noticed of the bad pre-eminence of this particular place of punishment in this regard was in a despatch on 19th of last month from Elyria, Ohio, where it is stated that E. F. Kaneen, former cashier of the closed Citizens' Savings Bank, of Lorain, was sentenced to seven years in the penitentiary for embezzling funds of the bank, to which he pleaded guilty. H. B. Walker and Dana Walker, teller and bookkeeper, respectively, of the bank, also pleaded guilty, and were each sentenced to two years and six months in the penitentiary. Judge Washburn, in sentencing the prisoners, said it was the hardest task of his official career, Kaneen being a close and lifelong friend. What is worst about this case is that the cashier admitted himself to be the cause of the Walkers' downfall. While it is not so stated in as many words, the inference is natural that either one or all three had been speculating. The case looks like one wherein a cashier used the funds of the bank to gamble on the stock exchange and either inoculated two of his staff with the fatal virus of getting-rich-quick or bribed them not to "peach" on him when they discovered that he was doing so with the bank's money.

A sad feature of the more recent telegram relating that A. B. Spear, late cashier of the Oberlin Bank, which Cassie Chadwick swindled, was received at the same penitentiary last Saturday to enter upon his seven years' term, is that "Spear took his imprisonment with rare good humor and laughed and joked with the officials." Instead of being crushed to the earth with a sense of his shame, this bank cashier made light of his offense against good business morals and treated his folly and disgrace as a joke. It is further to be noticed that the telegrapher or reporter who made up the item evidently regarded it as a part of the internal economy of this prison-house that such distinguished inmates should be given "a soft job." For he says that there are already ten bankers in the penitentiary, "all of whom have been assigned to clerical work," and Spear cannot get an easy task at once! In England or in Canada such malefactors would likely have been put to hard labor, and properly.

* * *

MONTREAL LETTER.

There has been a slight improvement in general trade during the past week, but several of our large wholesale houses report the volume of transactions scarcely up to expectations, and there are quite a number of complaints of slow remittances. There would seem to be a need for caution on the part of traders against the tendency to speculate, which so often results in over-trading and over-production. In times of prosperity there is the danger of merchants becoming too sanguine as to future requirements, with the result that old stocks have to be carried over. Money seems to be in good demand, and all surplus funds are wanted for legitimate commercial requirements. Call loans are steady at 4 to 4½ per cent., lenders having refused new business at the inside figure. Discounts on mercantile paper are also steady at 6 to 6½ and 7 per cent.

The wonderful influx of immigrants to this country continues, indicating that the "spring rush" this year will exceed the record for former years. The passengers on the "Victorian" and "Ottawa," which steamed into this port a few days ago, were undoubtedly some of the finest ever landed in this city, and apparently had sufficient means to give them a fair start in the new world. This is the first visit of the new turbine steamer "Victorian" to Montreal, and a large crowd greeted her arrival. Messrs. Allan, who within the last decade have placed many large and handsomely equipped vessels on the St. Lawrence route, have reason to be proud of their latest enterprise. The "Victorian" has created a very favorable impression in this city. She is a handsome vessel, with a passenger accommodation for about 350 saloon, almost the same number second class and about 1,000 third class. Her decorations are charming, and the accommodation for all classes is beyond reproach. A visit to the engine-room of the new vessel is particularly interesting because of her new method of propulsion. The "Victorian's" turbine engines contain 750,000 blades, varying in length from ⅜ inch to about 8 inches, the smaller blades being nearer to the high pressure steam. In addition to the above number of moving blades there are a similar number of fixed blades, making a total of 1,500,000. The weight of each low-pressure turbine is nearly 100 tons, whilst the high-pressure one weighs about 60 tons. The average speed of the "Victorian" on her trip to Montreal was seventeen knots per hour, which is equal to almost twenty miles.

Mr. J. J. M. Pangman, of Burnett & Co., stock brokers, has resigned his position as secretary of the Montreal Stock Exchange. Owing to the rules governing stock exchange elections a secretary can only hold office for two years, hence Mr. Pangman's resignation from that position.

During the past two years Mr. Pangman has worked indefatigably in the interests of the Stock Exchange, and his services have won for him golden opinions from the brokers throughout the city.

Mr. Robert Reford has resigned from the Montreal Harbor Board. Mr. Reford has represented the Shipping Federation on the Trust for many years, during which time he has proved a capable representative. It is stated that the Shipping Federation will make a request to Mr. Andrew A. Allan to become their representative on the Trust, to succeed Mr. Reford.

The Montreal city council, on Monday last, by a vote of 20 to 14 extended the contract of the Montreal Gas Co. for fifteen years. The price of lighting gas is to be reduced five 'cents a year per thousand feet for five years until it shall be one dollar, and the price of stove gas at the same rate for two years until it shall be ninety cents.

Some people here, policyholders in the Equitable Life Society, of New York, are to my knowledge anxious about their policies in this and other big American companies. I have had enquiries, as doubtless you have also. My reply has been that the company has ample assets, but that its management needs overhauling. I should be glad to see in the Monetary Times a further and fuller reference to the company's affairs than that of 28th April.

MOUNT ROYAL.

Montreal, 10th May, 1905.

[In reply to the suggestion of our correspondent, there has been issued on Monday last by Mr. Hendricks, superintendent of insurance for the State of New York, in consequence of enquiries as to the solvency of the society, a statement in these words: "I am at this date sufficiently well informed as to the condition to unhesitatingly state that it is financially sound, and that all its contracts with policyholders are fully and satisfactorily guaranteed." Various conferences of officials of the society have likewise been had. Whatever else is done, it ought to be made impossible for any group of men to speculate with the funds of an insurance company, and to profit by such speculation. —Editor Monetary Times.]

BRIGHTENING DINGY BUILDINGS.

When, as a consequence of the erection of the King Edward Hotel, the comparative dullness and languishing of Adelaide and King Streets east of Toronto Street began to be succeeded by activity, among the first to furbish up an old building and to make it attractive were Eastmure & Lightbourn. They bought last year a portion of the former County of York buildings on Adelaide Street, made a new stone front for it, put up a handsome sign, and erected a flagpole with a set of flags. Not only this, but the grime and weather stain of sixty years was rubbed off and the brick shone yellow again. The effect was instantaneous. The whole block looked the better for it, to say nothing of the revolution in the interior.

Next, the tomb-like facade of the old County Courthouse was taken in hand by the York councillors, the entrance improved and the interior refitted for offices. Now, by an operation known as sand-blasting the dingy mud color of the exterior has given place to the warm cream color of Ontario gray sandstone, and the antique pile becomes a delight instead of an eyesore. Again, the sensible people of the Union Life Company have used the chisel and the sand-blast on their building across the way, and made it bright as a new pin. And further, the walls of the National Life building, corner Toronto and Adélaide, formerly the Trust and Loan Company's headquarters, begin to show the brightening effect of the same process, while the inside is being modernized for office accommodation.

Anyone who passes from Church Street to the door of the post-office cannot but be struck with the improvement of the locality which all this furbishing-up produces. We respectfully suggest to the Toronto Guild of Civic Art that they bring pressure to bear upon the Government to have the handsome front of the post-office similarly polished. That building was long regarded as a satisfying close to the pretty vista of Toronto Street seen from Catto's; but it has grown tarnished by thirty years' weather-wearing, and its architectural beauty is dimmed. So, too, the sand-blast or the chisel might with advantage be used to burnish the quaint front of the sub-Treasury building on Toronto Street, with its sturdy if inaccurate fluted Ionic pillars and fierce lion and unicorn, thus rendering that "old-timer" worthier of it lofty neighbor, the Canada Permanent home office, and the graceful Gas Office across the way. We may still hope that no sky-scraping structures shall offend the clouds in that neighborhood, to destroy the proportion of things and increase the fire hazard. But the business district we have mentioned contains a range of buildings of modest height and reasonable pretensions to becomingness if not to architectural perfection. Provided always that they are cleaned and the signs of wear-and-tear removed. Let us use the sand-blast where we can effectively, and paint or putty where the structures are of wood or iron. Fancy the illuminating effect upon the whole market block of the cleaning of the old-fashioned but stately stone front of the St. Lawrence Hall, the putting in of large panes of glass, and the taking away of the iron railing which disfigures rather than decorates the second story.

* * *

HARD WORK VERSUS SOFT JOBS.

A man in a Canadian Atlantic port writes thus on the subject of life openings for youths or young men: "Did you hear that our hopeful had left school and has been now for nearly a week in the C.P.R. steamship office. Active as the lad is, the work is almost more than he is willing to stand. He has to open all the mail—register the letters in a ledger—put on a backing sheet and attach the current number—mention the subject, fish out and attach all correspondence referring to the same case, etc., etc. The other day, when an English mail came in, he was fairly overwhelmed, could not get out to lunch, and did not reach home for his tea till a quarter to eight. This sounds like hard work, and so it is for an unaccustomed youngster; but I think there is nothing like hard work for a boy to start on. If he sticks to it, he can show what stuff there is in him. All around him are examples of successful men who have risen largely by means of their hard and steady work. Young America, and Young Canada, too, is too much disposed to look for a soft job. I doubt if it is a good thing to let them have it. Hard work kills nobody. Our chap will get on, I think."

* * *

QUARTZ GOLD IN PLENTY.

It is known that gold has been produced in Nova Scotia for many years. Hers is quartz gold, for she does not profess Pactolian streams with auriferous sands, as in the rivers of the North-West. In forty years up to 1902, Nova Scotia had produced 795,306 ounces of gold, valued at $15,110,820. Of this total, which was the output of sixteen districts, Sherbrooke yielded the largest single contribution, namely, 153,263 ounces, valued at $2,911,998, an average yield of $10.41 per ton of ore crushed. This Sherbrooke field is in the east of the Province, not far from the Gut of Canso. Wine Harbor, close by, which yielded 36,302 ounces, showed even a larger percentage per ton of ore; but the largest yields per ton were made by Oldham and Montague districts, farther west, which gave $20.36 and $29.29 per ton of ore crushed.

Putting down the calm and prosaic report of the Geological Survey of Canada for 1902—the latest we have at hand—and taking up a newspaper of 8th May, 1905, one experiences a sort of start, for here are alleged discoveries of gold in Eastern Nova Scotia, which may well surpass, as a means of exciting the gold fever, the fabled hidden treasures of Captain Kidd in Mahone Bay west of Halifax. Not wishing to arouse the gold-loving spirit of adventure in the breasts of young men prematurely, we shall dole out slowly and with great care the items which this special to the Toronto Star from Sydney gives. Why Sydney, we wonder, since Antigonish and New Glasgow are so much nearer, and Halifax itself is scarcely farther away? Here are the first sentences of the telegram: "Experts at the Seal Harbor gold belt, at Goldboro, Guysboro County, Nova Scotia, which was discovered last fall, estimate the value of the property at between forty and fifty millions dollars. They say it is the richest find in Nova Scotia, if not on the continent of America. Leads show magnificent sights for every foot of them. An almost incessant search was being made for this belt for upwards of thirty years before it was discovered in September last, when Percy White made the discovery." Then the names of the members of the company which owns this wonderful property are given, most of them belonging to Glace Bay; a mayor, a bank manager, a barrister, a coal engineer, an auditor, and a doctor being named. Further on we discover that these gentlemen mainly compose the Beaver Hat Gold Mining Co., of Glace Bay, C.B., and this in a measure explains why this splendid telegram emanates from Sydney rather than from some place nearer the "find." May they all make fortunes out of it. But why should these respectable men make so free with tens of millions as this telegram does; or has somebody used their names to "fake" a despatch?

* * *

AREAS OF CANADIAN CITIES.

A subscriber in the Province of Quebec writes us as follows on 3rd May: "You published between two and four years ago a short article giving the areas of the different cities of Canada, commencing with Winnipeg and ending with Moncton, and I enclose the clipping in a rather dilapidated form, for I have carried it in my pocket for a long time and it has interested a great many. Would be glad if you would publish it again."

The paragraph was in the main as follows: It will surprise many to know how Winnipeg, Fredericton, and Toronto loom up above the others when tried by that standard; that Montreal city plot has less than half the area of that of Winnipeg seems strange indeed. And the figures of acreage of the former city include Maisonneuve and Hochelaga. Here is the list. Halifax does not find place in it, but we should think it will rank about with Hamilton or London in area:

	Acres.
Winnipeg	12,750
Toronto	10,797
Fredericton	10,790
St. John	9,169
Montreal	5,772
Vancouver	5,091
London	4,378
Hamilton	3,990
Ottawa	3,365
Brantford	2,977
Charlottetown	2,400
Kingston	2,177
Quebec	1,921
Victoria	1,874
Moncton	1,650

* * *

CHIMNEY FIRES.

The Fire Marshal for the State of Ohio gives some useful pointers for the extinguishing of a chimney blaze. Soot, being an aggregation of fine particles of pure charcoal, burns, as he says, with an intense heat. When accumulations of it in a chimney ignite, the strong current of air rushing in from below, to supply the oxygen necessary to unite with the carbon to form carbonic acid gas, makes a draft strong enough to carry the burning material out through the chimney-top and disperse its glowing particles over the roof. For the extinguishing of soot fires nothing which is usually obtainable is so effective as common salt, which produces hydrochloric acid gas, a non-supporter of combustion. Many of us have seen its efficiency tested during the burning out of the ample mud and stick chimney of the old home. If sulphur is obtainable, it, rather than salt, should be used, for the burning of sulphur produces sulphurous oxide which extinguishes fire by greedily taking up all the oxygen in the chimney. A fire may be extinguished in this way even after it has extended to the woodwork of the building. The firing of a pistol up the chimney will bring down the burning soot extinguishing it.

* * *

LIFE ASSURANCE MATTERS.

A word of encouragement is a tonic that urges men to do better work, says Sunshine. Whereas a word of discouragement is apt to quench the fire of ambition.

An English exchange informs us that the directors of the Equitable Life Assurance Society, of England, have received with great regret the resignation, owing to ill-health, of Mr. H. W. Manly, F.I.A., as actuary and secretary of the society.

During the month of March, 1905, the experts of the Fidelity and Casualty Company inspected 2,867 boilers internally and 6,748 externally. During the same period 2,754 elevators were tested.

Following the resignation of Mr. James A. Turnbull, as secretary of the Connecticut General Life, Mr. George C. Bulkley, actuary of the company for several years past, was elected his successor, retaining the actuaryship as well.

Three companies, the United States Fidelity and Guaranty, Illinois Surety and the Title Guaranty and Trust, joined in issuing the $1,000,000 bond of indemnity to the guarantors of the city treasurer of Chicago.—Chronicle.

We are informed that Mr. C. T. Gillespie, general manager for Canada of the Provident Savings Life, who was in Vancouver last week, has appointed Mr. T. A. Cross, of Victoria, manager of that company for British Columbia, with headquarters in Vancouver; and has also appointed Messrs. Seymour, Marshall & Co., of Vancouver, as city agents. The Provident Savings have leased and fitted up a branch office at 557 Granville St., Vancouver.

"I took out an accident policy the other day," said the melancholy man, brightening up, "and if I never make a claim I shall still have got my money's worth. Till now there has been no one in the world who cared a penny whether I died a clean death or finished up in a fragmentary way at the foot of a precipice; but, since I have been insured, every word and look of the secretary of my accident company shows a tender regard for my safety which is very refreshing to a lonely man. It is quite worth the premium! I strongly advise you to try it yourself—and, if you don't mind, you might send in your proposal through me."—African Insurance Gazette.

* * *

FIRE INSURANCE MATTERS.

Peterborough ratepayers have turned down the by-law to raise $25,000 to erect a new fire hall, provide extra equipment, including a chemical engine, steam engine, telegraph alarm system and additional hose.

The Sun Life Assurance Company, of Canada, has executed a trust deed, appointing the Fidelity Trust Company, of Newark, N.J., one of their trustees and depositories in the United States, and has made a deposit, amounting to $500,000, in first-class interest bearing bonds, to protect and secure all policyholders of the company in the United States. With an equal amount deposited with the Insurance Department of the State of Michigan, the company now has in the hands of trustees in that country $1,000,000, and will increase it shortly.

An inspection of the business section of Detroit, made by a committee of field men during April, covered 107 blocks and revealed some very serious fire hazards. Those most frequently reported were ashes in wooden receptacles, accumulations of dirt and rubbish, open stove pipe holes in chimneys, carelessness in the use of inflammables, and defective electric wiring. These characterize many places besides Detroit, and should be sought out.

Electrical fires are not decreasing in the United States according to the quarterly report of the electrical bureau of the National Board. It shows 134 electrical fires with a loss of $855,000 during the first quarter of 1905. Losses are reported of $1,482,000 in 193 other fires believed to have been due to electricity, but in which the fire itself destroyed the proof of its origin. Forty-three short circuits occurred in interior wiring, thirteen of which were in flexible cords and four were caused by moisture in flexible tubing installed along damp brick walls.

The plans for a comprehensive new system of fire protection in Winnipeg would now appear to have been finally decided on. There will be installed a high-pressure water system, the estimated cost of which is $380,000, the annual sum to be levied each year for a period of thirty years to pay interest at 4 per cent. per annum, and to provide for sinking fund to pay the debt at the end of thirty years, interest at 3½ per cent., being $32,534, which sum shall be loaned for each of the thirty years, beginning with the year 1906 and ending with the year 1935 upon the said properties benefited by a rate upon the assessed value (from year to year) of all of said properties according to the assessment rolls of the city (lands and buildings); for illustration, they estimate a levy per $1,000 assessment on the basis of the year 1904 being $1.47. The city is to issue debentures for the amount of the cost of said works bearing interest at 4 per cent. per annum.

REGINA AND CALGARY BUSY.

All branches of industry are busy at Regina, which expects new population daily, and Calgary, too, is making preparation for the influx. The prediction that this year's immigration would greatly exceed all former years is being verified. At the Dominion Lands' Office, the large staff of officials and clerks is kept constantly busy, and overtime work is a necessity. The homestead entries for April were 1,111, which means that 177,760 acres of land were taken up by actual settlers in the Regina lands registration district. In April of last year the entries numbered 573. No fewer than 8,968 settlers passed through the Regina land office, 4,639 in and 4,329 out. Calgary district is getting settlers, too. At that place during the month of April 247 homestead entries were granted by the Dominion Lands' Office. And in the ten months ending April 30th, the total number of entries granted was 1,792.

TRADE NOTES.

The Montreal Packing Company has established a new packing house at Point St. Charles, and will turn out all kinds of prepared meats, cure hams, bacon, etc.

Something like a flurry in prices of seal coats and other garments is occasioned by the news from Newfoundland that the catch of seals this season is forty per cent. less than last. A despatch of Tuesday last from St. John's says that the total catch of the seals for the season is 177,206, valued at $240,890 against 284,473 seals, valued at $403,794, last year.

At the annual meeting of the Dominion Cotton Company, held in Montreal a few days ago, there was an animated opposition to the merger by those who did not favor it. The leaders of this section complained that they, together with other stockholders, had been treated with unfairness, the stock having been taken into the combine at a figure which was much lower than it should have been. Senator L. J. Forget, who acted as chairman, said that they had obtained all the Dominion Company's stock was worth, and that the actual valuation of the plant was 42½ cents on the dollar, while it had been able to enter the merger at a valuation of fifty cents on the dollar in secured stock. He declared they had no recourse but to accept the new conditions, on pain of losing their dividends.

* * *

—The Vancouver Power Company's tunnel through two miles and a half of rocky mountain to connect Lakes Beautiful and Coquitlam for the generation of electric power has at length been completed after over two years' incessant labor and the expenditure of more than $320,000. It is an important step in the development of the hydro-electric power scheme to generate 30,000 horse-power for distribution in the municipalities of Vancouver, New Westminster and Steveston.

—In the ten months ended April 30th last the Dominion Government paid out in bounties on iron and steel $941,007; on lead, $407,165; on crude petroleum, $243,148, and on binder twine, $9,167. For the same period last year the bounties on the first-named item amounted to $679,322.

* * *

—Word comes from Medicine Hat, Assiniboia, that the ratepayers of that place voted on May 6th upon the money by-laws, and carried them almost unanimously. One was, it may be remembered, for the erection of a civic building to cost $30,000; another for $10,000 for waterworks; the third for $12,500 to develop gas wells.

* * *

—A report made to the New York Produce Exchange shows that the world's crops of hops in 1904 and 1903 respectively, were as follows. England, 282,000 cwts. in 1904, and 420,000 in 1903; the continent, 758,000 and 730,000, or a total deficiency last year in Europe of 100,000 cwts. The crop in the United States last year was 260,000 bales compared with 223,000 in 1903. Altogether, making due allowance for the different-sized bales used in the various countries, the shortage throughout the world would appear to be about 20,000 bales.

* * *

The shareholders of the People's Bank of Halifax are satisfied to accept the offer of the Bank of Montreal to take over its assets. At Halifax on Tuesday last, out of 50,000 shareholders of the People's Bank of Halifax 46,891 recorded themselves in favor of amalgamation with the Bank of Montreal, and as soon as the legal formalities are complied with, say about 20th June, the People's Bank will become a part of the Bank of Montreal, the shareholders receiving 115 per cent. on their stock. The resolution authorizing the amalgamation was carried by a unanimous vote.

* * *

—Another of Andrew Carnegie's remarkable gifts to mankind takes the form of a ten-million-dollar grant for university and college professors in the United States, Canada and Newfoundland. It is in United States Steel Corporation 5 per cent. mortgage bonds. The purpose of the trust fund thus created is to provide annuities for professors, who, from old age or other physical disability, are no longer, in a position to render the most efficient service. It is Mr. Carnegie's belief that this fund will not only provide a dignified pension system for a body of most worthy, self-sacrificing and poorly paid men, but that it will be of distinct value to the cause of education in offering an opportunity to the trustees of a college to retire members of the faculty who have faithfully served the institution for many years, and to replace such men with young, vigorous, and efficient professors. The bonds which Mr. Carnegie has donated have a market value of $11,000,000, and will produce an annual income of $500,000. The corporation which is being formed to accept and utilize the gift will be styled: "The Carnegie Foundation."

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, May 11th, 1905, as compared with those of the previous week:

	May 11.	May 4.
Montreal	$25,658,990	$27,034,639
Toronto	19,964,453	22,243,886
Winnipeg	6,084,925	7,405,054
Halifax	1,879,153	1,789,976
Hamilton	1,189,786	1,417,350
St. John	1,121,466	1,080,123
Vancouver	1,784,256	1,605,413
Victoria	807,917	811,113
Quebec	1,670,554	1,843,879
Ottawa	2,172,272	2,310,797
London	1,102,343	977,561
Total	$63,436,115	$68,519,791

MANAGER AND CUSTOMER.

Banking is an exacting business. It is based upon certain principles, and its conduct requires to be conformed to those principles. Laxity is dangerous, but perfect compliance with rule and precept is not always possible. Bank manager and bank customer are both human; the manager is trained in system and method; the customer often despises both. How is the one to get the other to comply with regulations he does not understand, and cannot see the need for? The manager must use self-control; it will be well if he possesses tact—and some managers do not. He should be able, if he cannot get his customer to comprehend bank regulations or the reason for them, to "jolly him along" in such a way as to effect the purpose of the moment.

Some very curious things occur where the party of the one part is a gentlemanly but unyielding piece of mechanism of a bank, and the party of the other part an unbusiness-like farmer or mechanic, who hates red-tape, and has a distrust of the superfine clerkly air. It may be that one thing which has helped the success of private bankers in Canada in getting business has been their happy way of keeping red-tape out of sight and making the farmer or the drover or the artisan feel at home in the banking-room. Formality or routine is abhorrent to some men, who do not wish to be made to feel, as one man phrased it, "like as if I was in church, b'gosh! an' I didn't ast him fur anythin' but a hunderd in small bills. Dog on the feller; he might a ben civil."

It is well for a bank manager or accountant in case of complaint by customers not to be too certain that his records or his memory are always right and the customer wrong. In such a case he might well recall Davy Crockett's maxim: "Be sure you're right, and *then* go ahead." I remember hearing of an instance where a country manager lost an account by being too sure that his customer was wrong. A draft on his client, Mr. S——, was presented one day at the bank and refused payment because there were not funds enough at the credit of S——. Down comes Mr. S——, two days afterward, to ask why this draft had not been honored. "Because there were not sufficient funds," said the manager."

"But there are funds enough."

"No, not by twenty dollars."

""I tell you, yes."

"I tell you, no."

"You are mistaken."

"It is you who are mistaken."

"Do you mean to tell me," said the now angry customer, "that you deny your own bookkeeper's word?"

"Nonsense; my books tell me that your account is short twenty dollars."

"But your pass-book *shows* me that there is enough at my credit to pay this draft, and more; look at it."

And the too-confident banker found that the pass-book, showing S—— to have sufficient funds, was right, and his ledger wrong. He apologized for the mistake, but it was too late; the customer was mad through and through at being subjected to the indignity of having his draft dishonored, and took away his account.

In country places, people who have to do business with banks are often impatient of delay and do not understand or care for routine. A drover went into a bank branch one day at the lunch hour and found the clerk with his mouth full. "Say, look-a-here, about them there bills I was to hev—I'm in a hurry, and you was to hev them ready two hours ago." The clerk mumbled something and pointed to the accountant's desk. Away goes the drover, only to find the accountant absent, and back he comes to the clerk, still munching away at his lunch.

"Well, you folks don't seem to care whether I catch my train and pay for my cattle or not. All right. I reckon I can find a bank that will keep their promise and give me what I want. And then you'll hear from *me*, you d——d graven image of a dude."

And he flounced out at the door to almost run into the returning and regretful accountant, whose forgetfulness or delay had nearly cost him a customer.

"Obey orders, if you break owners," may be a good enough motto for captains of sailing vessels. But it hardly implies that owners' orders must in all cases be literally obeyed without those owners being told of exceptional circumstances which might justify a departure from general orders. Head offices of banks frame rules for the general government of their branches, but it is understood that long-established managers in places remote from head office have discretionary power to go beyond the strict bounds prescribed by ordinary rule. Young and comparatively experienced managers in small places, however, cannot so safely be given such discretionary power.

An instance is related of a manager in a good-sized Canadian town, who, while a good office man, was not of a sort to deal tactfully with customers. He was grumpy in manner; and besides was hampered by being held tightly to the ordered limits by warnings from head office and from his inspector. One of his customers was a flour and feed merchant of moderate means and good repute, who also dealt in coal and cement. This merchant had a note coming due on the bank for several hundred dollars, and was $140 short. It also chanced that the bank manager owed him $60 for goods. On the morning when his note was due, the customer went to the bank and said:

"Mr. Blank, I am a little short to-day, and will ask you to let me overdraw to protect my note." The manager's reply was a refusal. "Why," pleaded the customer, "it is a small matter; I am only $140 short and you know you owe me $60; if you pay me that, I will give my note at 30 days for $80." The manager was obdurate, and said, in his snappiest way: "I will not allow overdrafts; it is your place to provide for your note." "Well, I did not expect to be turned down so sharp, when I have been dealing with this bank for ten years." All that the banker would say was: "You go and raise $140 to cover your note. If you don't, I'll protest it." Turning to leave the bank the merchant called back over his shoulder:

"All right; I'll raise the $140, and I'll put your bill in a lawyer's hands for collection, and you can go to Podunk, you and your bank, I'm done with you."

Now this manager was right, in a sense, for he was obeying orders. He was not right, in another sense, for it is part of a banker's business to assist a decent customer and to keep him—there are ways and means by which a man may do this and still hold the bank protected. We are not told whether the manager lost this customer, but the probabilities are that he did, and all for want of tact and a little "give and take."

⁂

CITY AND DISTRICT SAVINGS BANK, MONTREAL.

This excellent savings institution held its fifty-eighth annual meeting last week, having been founded in 1847. The amount of funds it handles has risen to large proportions, for the totals of assets and liabilities reach $18,427,906. Of the assets, there is $1,660,510 in cash; Canadian Government stock ,$2,037,012; provincial bonds, Montreal bonds and other municipal bonds and debentures, $5,271,431; call and short loans secured by collaterals, $6,399 518. It owns head office building and seven branch buildings, valued at $450,000. The remainder is in sundry securities. The amount of deposits is $16,643,365, and that due shareholders ($2,000,000 subscribed), is $600,000 in paid capital and $800,000 in reserve.

Very remarkable is the number of accounts open for depositors. Ten years ago they were only 48,145, but to-day there are 74,487, some five thousand having been added during the calendar year 1904. And the average sum due each depositor is $222.44, where in 1895 it was only some $177. We take the following from the report: "The net profits for the year were $148,378.12, and the balance brought forward from last year's profit and loss account, $77,708.37, making a total of $226,086.29. From this amount have been paid two dividends and bonus, and $100,000 has been carried to reserve fund, making the latter $800,000, leaving a bal-

ance at the credit of profit and loss account of $25,086.49, to be carried forward to next year."

The progress of this important bank illustrates well the growth of Montreal. The report and balance sheet were adopted, on the motion of Sir William Hingston, the president, seconded by Hon. Robert Mackay. The retiring board of directors was re-elected, viz.: Sir W. H. Hingston, R. Bellemare, Mr. Justice J. A. Ouimet, Michael Burke, Hon. R. Mackay, H. Markland Molson, Chs. P. Hebert, Richard Bolton, G. N. Moncel, Robert Archer. Sir William Hingston was re-elected president, and Mr. R. Bellemare, vice-president.

⁂

ATLAS ASSURANCE COMPANY, LIMITED.

In considering the circumstances of the Atlas Assurance Company, we shall have regard only to the fire underwriting department of the company's business, since it does no life insurance in this country. The last report, we may remark, was the ninety-seventh annual, the company having been founded in 1807. In the fire department of the company's business the net premiums were £831,423, and the losses £394,222, being 47.4 per cent. of the premiums. The balance of the year's revenue is £148,090, of which the sum of £127,738 has been added to the fire fund as a further reserve for unexpired liability under current risks, and the remainder of the surplus, £20,351, carried to profit and loss account. If these sums are translated into our currency they become: premiums, $4,157,000; losses, $1,971,000; balance of revenue, $740,000; added to fire fund, $638,000, in round figures.

Rather less than a year ago the company took over the business of the Manchester; the claims payable on the Manchester policies and the expenses of the amalgamation have been charged against the funds taken over, such funds being held in reserve against possible future claims. The former £50 shares of the Atlas have been divided into shares of £10 each, with an increase of 100,000 new shares of £10, credited with 24s. on each share, which rank equally with the original Atlas shares. The present accounts are the first since the amalgamation, and the results of this move are striking in regard to increase of income and low loss ratio sustained during the year. Only the last six months of the year are included in these amalgamated accounts, but notwithstanding this we find the fire income now reaches $4,157,117, an increase over the previous year of $1,560,231. On the other hand, the losses sustained have been exceedingly low for a conflagration year. Mr. Hinshaw is to be congratulated on the fact that the Canadian business has kept pace with the general progress of the company, the income from Canada for 1904 amounting to $385,000. The general progress of the Atlas is shown by the following comparative table:

At the Accession of	Income.	Funds.
King George IV.	$ 385,000	$ 800,000
King William IV.	655,000	3,033,000
Queen Victoria	785,000	4,575,000
King Edward VII.	3,500,000	11,185,000
Present time	5,455,000	13,370,000

The Toronto agents, Messrs. Smith & Mackenzie, tell us that business is in a very healthy condition so far as their office is concerned. They have no complaints to make, but speak quite hopefully as to the outlook. This old and strong company has always been well managed at head office, and the results of the Canadian business indicate good management here, too.

⁂

INGENIOUS ENGINEERS AT SEA.

A remarkable instance of repairing a broken shaft at sea in heavy weather is given by the Marine Review of 4th May, which takes it from the Engineer, of London. A steamship, the "Milton," was on her way from Capetown to Bunbury, Australia, and when 1,600 miles out her shaft, 13½ inches diameter, was found to be broken. The ship's engineers proceeded to mend it. A hole was cut in the steel tube surrounding the shaft and the break was overcome by sinking six fish-keys into the ends of the two parts of the shaft disconnected by the break. Then clamps were made (out of stanchions) to hold down the fish-keys, and by this means the steamer proceeded at the rate of four miles an hour 1,184 miles to the Mauritius. When it is considered that the work (which occupied, day and night, twenty-five days) could be done by only one man at a time by reason of the confined space to work in, the job seems a marvellous one, and reflects credit upon not only the skill, but the pluck and endurance of the men who did it.

⁂

BANKING AND FINANCIAL.

We are advised that a branch of the Royal Bank of Canada has been opened at Vernon, British Columbia.

A branch of the Canadian Bank of Commerce was opened on the 1st instant at Port Arthur, Ont., under the charge of Mr. A. W. Roberts, who has been in charge of the Sault Sainte Marie branch of the same bank five years.

Winnipeg ratepayers have authorized by a large majority of votes in favor of issuing $250,000 debentures for the erection of new schools and for purchasing sites.

Kingston city council has decided to issue $20,000 debentures to cover capital expenditure since the city took over the light plant last August, and for further extensions of gas mains.

We are advised that the Sovereign Bank of Canada has opened a branch at 394 Richmond Street, London, Ont. It will be under the management of Mr. F. E. Karn, formerly of the Exeter branch.

Announcement is made that Mr. W. C. J. King, for three years accountant, and since 1900 assistant manager of the Montreal branch of the Canadian Bank of Commerce, has received the appointment of manager of the Simcoe branch of that bank.

A banker in Winnipeg writes on 2nd May: "In the Statement of Banks for the month ending 31st March last (pages, 1458-9, Monetary Times) I notice amongst the liabilities of the Bank of Yarmouth an item of $39,307, 'Loans from other banks in Canada.' Some bank has omitted to include this amongst its assets."

The statement was made on Saturday last in St. Thomas by Mr. Moore, manager of the London and Western Trusts Company, Limited, liquidators of the Elgin Loan and Savings Company, to shareholders and creditors of that company: "There is still unpaid to ordinary depositors and other creditors 12½ per cent. of their claims amounting to $36,000, and to shareholders who are depositors about $25,000, in all, some $62,000. The liquidators have on hand $24,500 in cash and other assets, which, valued low, amount to $71,300, making with the cash on hand $95,800. In addition to this there are other assets from which the company will likely realize a considerable amount." It appears, therefore, that there will be no further call upon shareholders who have paid 50 per cent. of their stock, but that after payment of all liabilities there will be something left for distribution amongst the shareholders.

The Ontario Bank.

Toronto, 20th April, 1905.

H. S. STRATHY,
General Manager.

There might be worse devices than that installed at the branch office of the Standard Bank at Stouffville. It is an electric alarm system, for protection against burglary. The system includes a powerful gong fixed to the front of the building for the purpose of calling in outside assistance should an attempt be made at robbery.

The Ontario Government is introducing a bill to permit of the creation of a permanent Provincial stock, to be known as Ontario Government, at not more than 4 per cent. It is intended to meet the provisions of the Imperial measures, the colonial stock acts of 1877 and 1900. Inscribed stock, which is preferred in Great Britain, is inscribed and transferred in Great Britain, while France and the United States prefer bonds, with interest coupons, payable to bearer. Section 6 of the bill meets the Imperial Act, which required the colony to prescribe by legislation for the payment of stockholders. All money raised is to be paid into the Consolidated Revenue Fund, and the public debt cannot be increased under the provisions of the bill.

We are told that the Italian Government, acting through the Bank of Naples, has appointed the Sovereign Bank of Canada its financial agent for the Dominion. By this appointment the Canadian Bank named is authorized to issue orders and letters of credit, payable at every post-office in the kingdom of Italy. This arrangement is of convenience to Canadians travelling in Italy, as well as to Italians coming to Canada. At the present time it is possible to obtain letters of credit payable in Italy, but it is generally necessary to have these letters reviewed in London. Even then they are payable only in the large cities and the banking centres. Under the present arrangement, however, "the smallest village in Italy will accept the orders issued by the Sovereign Bank here."

The United States Supreme Court, in a case involving the question as to the right of private concerns to use the continuous quotation of the Chicago Board of Trade decided in favor of the board and against the bucket shops. Summing up the points involved, Justice Holmes stated that the board supplies its quotations to the telegraph companies under a contract not to deliver them to bucket shops, and said the cases were instituted to prevent the use of the figures by the private houses without contracts with the Board of Trade. He added that a majority of the court was not prepared to say that the transactions of the board constitute gambling, and the decision was that the injunction against private concerns should be granted as prayed for.

When a place between Binghamton and Albany, in the State of New York, can be raided by masked robbers, it is time that the residents of the southern part of that State asked themselves if they live in a civilized country. In broad daylight a band of masked robbers rode into the village of Gilbertsville, near Oneonta, blew open the supposedly burglar-proof safe in the private bank of E. C. Brewer, and escaped with a sum estimated at between $5,000 and $10,000. When the startled villagers were awakened by the muffled roar of the explosion and had been halted by the pistol fire of the retreating bandits, they found that the robbers had isolated Gilbertsville from the outside world by cutting all the telegraph and telephone wires, and when the pursuit was finally taken up the robbers had gained a lead which could not be overcome. Shade of Jack Sheppard! Is this the twentieth century? And is the United States a law-abiding place of residence?

The death of Mr. George Gooderham has caused a number of important changes in connection with different financial institutions in Toronto. Mr. W. H. Beatty, who was vice-president of the Bank of Toronto, has succeeded to the presidency, Mr. Albert Gooderham becoming a director in place of his father. The eldest son of the late George Gooderham, Mr. W. G. Gooderham, becomes vice-president of the bank. Mr. Albert Gooderham succeeds his father as president of the Dominion of Canada Guarantee and Accident Insurance Company. The Gooderham & Worts Distillery Company has been reorganized by the election of Ross Gooderham, Mr. Gooderham's youngest son, as a director, and William G. Gooderham becomes president, W. H. Beatty remaining vice-president. The present board consists of W. G. Gooderham. William H. Beatty, Albert Gooderham, Geo. H. Gooderham, Ross Gooderham and T. G. Blackstock. The presidency of the Canada Permanent Mortgage Corporation, of which the late George Gooderham was president, will be filled, we are informed, at the next regular meeting of the full board on Wednesday, 31st May instant.

* * *

—A recent assessment census of the town of Moosejaw, Assiniboia, shows that the population is 5,300, which indicates a good rate of increase. The total assessment of the town for the year 1905 is $2,926,150, of which $2,180,125 is taxable property.

* * *

—It is stated that the Ontario Government will refuse to ratify the recent agreement made between the Electrical Development Co., of Ontario, and the Niagara Falls Park Commission to the effect that the company should have power to develop 125,000 extra horse-power over and above the 125,000 for which it already is authorized. In the Legislature at Toronto on Tuesday Hon. Adam Beck attacked and Hon. G. W. Ross, the former Premier, defended the concession. Several Conservative journals have raised the cry that "Power concessions must cease."

Progress as a Standard.

A Progressive Life Insurance Company is the kind to carry your insurance if you want good results.

A Company that can in ten years increase its Income from $296,468.00 to $1,659,107.00 is certainly progressive.

This is the record of The Manufacturers Life during the last ten years.

Write to any Agent of the Company, or direct to Head Office, for a copy of the last Annual Report.

The Manufacturers Life Insurance Co.,
HEAD OFFICE, TORONTO.

ATLAS ASSURANCE COMPANY, LIMITED.

Report of the Court of Directors for the Year Ending 31st December, 1904.

The directors have pleasure in submitting their 97th annual report to the proprietors, together with accounts and balance sheet in statutory form for the above period.

In the fire department the net premiums were £831,423 10s. 4d., and the losses £394,222 2s. 1d., being 47.4% of the premiums. The balance of the year's revenue is £148,090 4s. 10d., of which the sum of £127,738 12s. 5d. has been added to the fire fund as a further reserve for unexpired liability under current risks, and the remainder of the surplus £20,351 12s. 5d. has been carried to profit and loss account.

On the 24th June last pursuant to resolutions of the shareholders the goodwill and undertaking of the Manchester Assurance Company were acquired, and the business of that company since midsummer last is included in the foregoing figures. Losses under policies of the "Manchester" current at that date, and expenses in connection with the liquidation of that company have been charged against the funds taken over, the balance of such funds being shown in the balance-sheet and held as a reserve for risks not yet run off.

The profit and loss account shows a balance of. £55,000 0 0

which the directors have resolved to apply in payment ot a dividend of 5s. per share for the year 1904 free of income tax, on account of this the sum of £22,000, being 2s. per share, was paid on 30th September last; the balance, £33,000, being 3s. per share will be paid on 29th inst.

The funds of the company will then stand as follows:—

	£	s.	d.	£	s.	d.
Reserve fund	58,465	13	6			
Fire fund	665,585	12	5

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The first shipment of pig iron by the Nova Scotia Steel and Coal Company from the Sydney Mines furnaces this season was made last week by the steamer "Micmac" for Philadelphia.

The Metal Shingle and Siding Co., of Preston, has decided to increase its capital stock from the sum of $50,000 to the sum of $200,000 by the issue of one thousand five hundred shares of new stock of one hundred dollars each.

An arrival of Mediterranean fruit at Montreal is made known. On Saturday last the Thomson liner "Jacona," from Sorrento and Messina, Italy, with 41,397 boxes and 4,194 half-boxes of fruit, docked at the Jacques Cartier pier. Ice in the Gulf delayed her.

The Krupps' immense contracts, partly for the re-armament of the German artillery, and partly for Russian, Japanese and Turkish orders, have required the company to increase the number of workmen from about 24,000 to more than 30,000. So says a cable from Essen, Prussia, which adds that the company has had to erect temporary barracks for the workers, dwelling houses being scarce in Essen.

Advices from St. John's, Newfoundland, dated 2nd May, state that the Lower House of the Legislature has confirmed a contract granting the Harmsworths, the English publishers, the pulp concession on 2,000 square miles of the interior of the island for the establishment of pulp mills. The Harmsworths paid $50,000 for the property, and undertake to expend $1,000,000 in sixteen years.

A well-known designer of steamers, who has lived for thirty-three years in Detroit, is removing to New York in the person of Frank E. Kirby, consulting engineer of the American Shipbuilding Company. Mr. Kirby has designed practically every successful fast side-wheel boat and hundreds of freighters on the lakes. Russia consulted him on ice crushers for Lake Baikal, and he superintended the transport service for the Government during the Spanish war.

There is to be a big new hotel in Ottawa, and not before it was needed. A million dollars is talked of as the probable cost of the new structure, which is to be placed on the present site of the Grand Union Hotel, facing City Hall Square, and to extend from Queen to Albert Streets, containing 350 rooms. The walls, roofs and facings will be of reinforced Portland cement concrete. All the decorative and finishing work of cement, mixed with crushed marble. New York, Chicago and London capitalists are said to be interested in the enterprise, as well as Mr. J. K. Paisley, of the Grand Union Hotel; A. F. Maclaren, M.P., of Stratford, and Mr. J. S. Irvin, of Ottawa. It is expected that work will be begun on the structure by 1st July, and there is a prospect of its being occupied by 1st January, 1907. The architect is to be Mr. Bradford Lee Gilbert, of New York, who has a reputation as a builder of large hotels.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

THE haste to get rich often leads many a person who has money to invest to speculate in bonds and stocks ground out by speculators during good times when everything is on the boom, and which, when times are hard and the investor is most likely to need his money, must be sold at a great loss. We would advise you not to speculate with this class of stock, but to invest your money in the Debentures of The Standard Loan Company, which bear interest at the rate of five per cent. per annum, payable half yearly; interest coupons are attached to debenture made payable to bearer. 8

Total Liabilities	2,033,757

Debentures issued for 3 or 5 years. Debentures and interest can be collected at any agency of Molsons Bank without charge.
WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

Three artesian wells have been drilled for the town of Dalhousie, N.B., in the hope of supplying a sufficiency for domestic, fire, sanitary and milling purposes. The prospects for success look bright.

Mercantile Summary

Julius Peters purposes to establish a stove foundry in Vancouver, B.C.

Contracts have been let for a new six-story block in Winnipeg to cost about $100,000. It will be occupied mainly by the J. H. Ashdown Hardware Company.

It is reported that the Chicago, Milwaukee and St. Paul Railway Company contemplates extending the northern branch of their line to Winnipeg, or at any rate to the international boundary, if satisfactory arrangements can be made for connection with the Canadian Pacific and Canadian Northern.

Seattle capitalists are negotiating for the acquirement of all the Crown timber grants in the Capitano valley in British Columbia. They propose to build an electric railway from tidewater to the head of the valley, and, after the removal of the timber, to colonize the land with agricultural settlers.

A troublesome fire occurred in Toronto on Tuesday last at the factory of the Canadian Feather Mattress Co. The walls of the building, which is next to that of the Bank of Nova Scotia, remain standing, but the interior is practically destroyed. The damage to the building, which belongs to the Ross Estate, is estimated at $8,000, with insurance of $5,500, while the loss on stock is about $6,000, covered by insurance.

The London, Chatham and Western Railway proposes to build an electric railway from London to Windsor, Ont., passing through London, Lobo, Caradoc, Ekfrid, Glencoe, Mosa, Bothwell, Thamesville, Chatham, Raleigh, Tilbury, East Tilbury village, Tilbury North, Rochester, Maidstone and Sandwich. The capital stock is $2,000,000, and the head office at Chatham. Detroit and Leamington people are on the provisional board.

Montreal city council has agreed to extend by fifteen years the franchise of the Montreal Gas Company, a subsidiary company of the Montreal Light, Heat and Power Co. The old franchise has yet five years to run. The present price of gas in that city is $1.20 for lighting and $1 for cooking. The company have agreed to reduce the rate for lighting five cents each year for five years, so that thereafter it will cost one dollar. Cooking gas is to be reduced five cents a year for two years, so that at the end of that time it will cost 90 cents.

Mr. Ivey, of London, Ont., and Dr. Ball, from across the line, represent a company which is endeavoring to secure a franchise from Galt to establish a plant for the supply of gas and electricity. They promise an all-day and night electric service and gas for lighting at $1.50 less ten per cent., and for other purposes at $1.25 less ten per cent. The rates of the present company are $2.50 and $1.25 less twenty and ten per cent., and they supply only a midnight electric service for 300 nights in the year. The proposition was considered favorably by the council.

In May a year ago J. B. Clouthier, of La Macaza, north of Montreal, began storekeeping in a small way without any previous experience, having been formerly a farmer. Already he has approached his creditors with an offer of compromise, it is said, and it is considered doubtful if same will be accepted. It is probable that "Back to the Land" will be his motto now, as it is of so many who see that the middleman has grown too numerous.

Mercantile Summary.

A. H. Gordon's dry goods store at New Westminster, B.C., has been damaged by fire and water to the extent of $8,000.

A letter from Montreal under date 8th May says that Mr. Robert Reford has resigned from the harbor board, and will probably be replaced by Andrew A. Allan.

J. Boucher and others have taken up their option on the Beatrice mine, near Camborne, B.C. The property, which is now shipping 150 tons of high-grade silver ore, is to be further developed.

The assignment is noted of Charles Merrier, dry goods dealer at Valleyfield, Que., but no particulars as to liabilities are yet available. His lack of success is attributed in same degree to a want of proper attention to business.

News has just arrived from the Yukon of a rich strike of placer gold on Highet Creek, about 250 miles from Dawson. Hector Morrison, it is declared, has struck six feet of pay that will average, probably, five cents to the pan, or over $600 to the cubic yard.

The Jewel Company, of London, Eng., has bonded a half interest in the Denero Grande mine in the Boundary district of British Columbia, owned by J. C. McArthur. The mine is contiguous to the vein which has been successfully developed by the Jewel Co.

It now appears that, contrary to former announcements, the Imperial forces are likely to remain in Halifax for two years longer, owing to the difficulty experienced by the Dominion Government in recruiting a sufficient number of men to take their places.

Charles Thibault, general dealer, St. Armedes Monts, in Gaspe county, Que., is reported insolvent, and his affairs are in the hands of V. E. Paradis, accountant, Que. He is said to owe $4,500, on which he recently made an offer of 60 per cent., which was declined, and unfavorable impressions regarding the failure appear to be entertained in some quarters.

Toronto capitalists have purchased the large Hamilton property on St. Catherine Street, Montreal, running through to Dominion Square. The area of the site is something like 19,000 square feet, and the price $340,000. Options have, it is understood, been obtained on adjoining lots. The purpose of the investors, who acted through the National Trust Co., is not stated, but it is surmised to be in connection with a large new palace hotel.

A shoemaker bearing the rather classic name of Pantaleon Trepannier, of St. Stanislas de Champlain, Que., who has also been carrying, Heaven knows why, a small grocery stock at an out-of-the-way location, three miles from the village, has fallen on evil days. A suit for $246 was entered against him by a Montreal house a fortnight ago, and his assignment is now reported. One would hardly expect him to sell $246 worth of merchandise in a year.

PORT ARTHUR & FORT WILLIAM.
Post Office Address, — — Port Arthur, Ont.

Mercantile Summary.

A small general dealer named E. S. Levesque, at Ste. Flavie Station, in Rimouski county, Que., has assigned, owing $1,675. He only started in the fall of 1903, and was previously clerking.

An extension is to be built of the "Soo" line's Thief River Falls branch into Canadian territory. It is believed that the new branch will be a highly valuable property, and it certainly will prove a boon to Assiniboia.

The affairs of J. H. Douville, who has been doing a limited store business at St. Ferdinand de Halifax, Megantic county, Que., for the past five years, are in the hands of V. E. Paradis, assignee, Quebec. He owes about $1,200.

The affairs of L. Getz, general dealer at Lambton, in Beauce county, Que., recently reported as embarrassed, have been put into the hands of the assignee. He owes $6,200, and shows stock of $3,500, and book accounts of $2,400—a small deficit, but still a deficit.

An assignment has been made to the court by Godfrey Lachance, saddler, of Beauceville, Que., upon the demand of P. Anger, who has been named provisional guardian.—J. K. Milford, of Buckingham, Que., who has been carrying on business in the same line for the past twelve years, has also assigned. He owes about $800.

Plans are being prepared for a fine and well-equipped new convent in Montreal for the Sisters of the Notre Dame Congregation. The new building will be situated on Sherbrooke Street. It will be 578 feet long by 50 deep, will cover 57,416 square feet, and will be five stories high. The building is expected to cost over a million and a half, exclusive of equipment.

W. D. Davidson, of Rowden, Que.; Major Lawlor, of Haileybury, Ont., and others are negotiating with the Ontario Government for a large timber concession. They represent a Montreal syndicate, which proposes to build a large factory in Haileybury, on Lake Temiscaming, for the manufacture of pulp and wooden articles. Some $200,000 would probably be spent for machinery, etc.

Edouard Clark, a small grocer, of Quebec, has assigned, and his estate will be closed out. He has been in business some twenty-five years, but with a very limited measure of success. Originally he was in partnership with a brother, but they failed, Edouard compromising and continuing alone. He was again unfortunate in 1902, when he compromised liabilities of $5,300 at 25 cents on the dollar.

From $10,000 to $12,000 are the estimated liabilities of Lussier & Durocher, carriagemakers, of Valleyfield, Que., who have been doing business in quite an extensive way since 1896. They are reported insolvent. Probably their difficulties have been hastened by the decline in population of Valleyfield in the last year or two by reason of the cotton mills there reducing staffs because of the competition of English textiles.

A telegram of Monday last from St. John brings tidings of the death of George McLeod, for years one of the most prominent men in New Brunswick as lumberman, ship owner, and politician. He died on Sunday from apoplexy. He was born in 1835 in Richibucto, N.B., and his name was a familiar one in the lists of lumber and timber shippers annually.

The Railway Committee of the Ontario Government has reported the bill in favor of the Western Central Railway Company, the proposed route of which road is from London to Guelph, through the Zorras and Nissouris, and equidistant between the C.P.R. and G.T.R. Two branches are asked for, one to Stratford and the other to Woodstock, making, with the main line, about 93 miles of track.

For seven or eight years past Almeric Saurette has been doing a moderate general store trade at St. Jean Baptiste de Rouville, not far from St. Hilaire, Que. He could probably have done fairly well there had he been prudent, but he has trusted his goods out too freely, having $4,000 to $5,000 in credits on his books, and has naturally been found slow pay for some time past. His assignment is now reported to A. Lamarche, Montreal.

The total catch of Norwegian codfish up to date this year has been 28 9-10 millions, against 24 9-10 for the same period of 1904. The manufacture of medicinal oil therefrom this year has amounted to 24,783 hectolitres compared with 9042 last year. It should be stated, however, that the fish this year run larger in size, and altogether the prospects for a fair total catch are pretty good.

Mercantile Summary.

The Canadian Pacific Railway is looking into the question of utilizing the great natural gas wells at Medicine Hat, Assa., for the smelting of low-grade ore.

The Northwestern Colonization Company, of St. Paul, has sold some 100,000 acres of its lands in the Canadian North-West to the North-West Trust Company, of Peoria, Ill.

The Kootenay Ore Company's zinc plant at Kaslo, B.C., is now complete and carrying on operations. It is said to be proving of great value owing to its accessibility to the zinc-producing mines of the Slocan district.

The Dominion Government will invite tenders for a service of steamships, fitted with refrigerators, to run from St. John and Halifax to London, the primary object being to develop the trade in Canadian fruit and other produce.

Among recent important hotel changes Mr. Robt. Gardiner, chief clerk of the King Edward Hotel, Toronto, has purchased the Waldorf, in Hamilton, and Mr. Fred Bain, cashier of the King Edward, has become proprietor of the Elliott House, Toronto.

The total shipments of ore from the Boundary District for the week ending Saturday last were 20,635 tons, of which the Granby mines shipped 12,390 tons; "Mother Lode," 4,064, and the "Brooklyn," 2,555. The total for the year up to date has been 20,635 tons.

The output of the Dominion Coal Company in the month of April was 221,541 tons, or about 7,000 tons less than during the preceding month. Colliery No. 3 was idle for general repairs and improvements. The total shipments were 139,266 tons, while nearly 100,000 tons are now banked.

A Canadian Associated Press dispatch from London states that the Western Canada Pulp and Paper Company is issuing 300,000 six per cent. participating accumulative shares at £1 each at par. The company proposes to obtain leases of 163,000 acres of forest at the mouth of Powell river, British Columbia.

Strong objection is being taken, especially by interests of Fort Frances, Ont., to the bill recently brought up in the House of Commons giving the Ontario and Minnesota Power Company the right to develop and use the water-power on Rainy river, and to use all but 4,000 horse-power of it on the United States side, which is only one-eighth of its capacity.

The Parrsboro Board of Trade is urging the Dominion Government to build a loop line on the Intercolonial from some point between Amherst and Athol to Truro, so as to avoid the difficult curves and heavy grades lying along the present sections. Such a loop line, too, it is contended, would give the important coal mines of River Hebert, Maccan, and others in the Cumberland basin a winter port at Parrsboro.

Tenders For Debentures.

Sealed Tenders addressed to the undersigned, marked "Tenders for Debentures," will be received up to and including June 30th next for the following debentures:

$60,000.00 debentures of the City of Calgary, Alberta, of $1,000.00 each, bearing interest at 5%, with coupons attached, payable in thirty years from January 1st, 1905, interest payable half-yearly at Calgary, and principal at same place at the end of thirty years.

$8,000.00 debentures of the City of Calgary, Alberta, of $1,000.00 each, bearing interest at 5%, with coupons attached, payable in twenty years from July 1st, 1905, interest payable half-yearly at Calgary, and the principal at the same place at the end of said period.

Debentures delivered at Calgary.

Dated at Calgary, May 3rd, 1905.

H. E. GILLIS,
City Clerk.

Tenders for Government of British Columbia 3½ per Cent. Debentures.

Tenders will be received up to the 15th of June, 1905, for the purchase of $365,000 Government of British Columbia Dyking Debentures, in denominations of $1,000, issued under the authority of the "Dyking Assessments Adjustment Act, 1905," bearing interest at the rate of 3½ per cent. per annum, payable half-yearly at the Government Treasury, Victoria, on the 1st of January and 1st of July in each year; the principal redeemable in thirty-two years from the 1st of July, 1905.

Tenders to state the price net, the amount to be deposited at the Canadian Bank of Commerce, Victoria, on the 30th of June, 1905.

Tenders to be addressed to the Honourable the Minister of Finance, Victoria. Right of acceptance of any tender reserved.

May 5, 1905.

OLD-TIME COASTAL LAWS.

Editor Monetary Times:

Sir,—A friend has sent me your Monetary Times of 5th May with a letter in it from Alex. Hackett. The story he tells about coastal laws of fifty years ago, which required that all freight carried on the rivers separating United States and Canada must be put off at any port touched en route and put on the boat again before she could resume her journey is true, however absurd it may seem. I remember an incident that illustrates it fully.

One day, about 1858, the captain of an American boat was watching his cargo being carted by negro and French Canadian deck hands on to the wharf of a Detroit river Canadian port and then carted back on to the boat again. All at once he burst out with some strong language about the stupidness of such laws for hampering trade, and the pig-headedness of any people who made them. A merchant of the port, who was standing on the wharf, heard this remark, and, calling a custom house officer, introduced him to the captain:

"Now, Mr. Hamilton," said the merchant, "tell this good American sailorman who made these laws he is finding fault with."

"The Yankees, of course," was his reply.

"Well, sir," rejoined the captain, "I vow I did not think our Government would do such a foolish thing. You've got one on me; and if you'll come to my cabin I'll treat. And then I propose to tell the Collector of Customs at Detroit what I think of such a consarned and twisted arrangement."

The troublesome artificial arrangement did not last long, for the American Government learned by experience that arrangements based on pique do not assist international trade. Also, that reprisals might be adopted by Canadian authorities which will teach even the great United States nation a thing or two.

Yours truly,
INTERNATIONAL.

Windsor, Ont., May 8th.

⁂

TORONTO MARKETS.

Toronto, May 10, 1905.

Chemicals, Drugs, etc.—A satisfactory trade is being carried on locally in drugs. The position of camphor is a feature of interest, it being very unsettled, some refiners having advanced prices and others having lowered them. Menthol is a little firmer, but quinine is becoming even duller. Oil of peppermint is easy. Opium remains about as it was. Payments to wholesalers are very fair. In the New York market nothing is transpiring worthy of particular interest on this side. English chemical markets remain very much as they were last month, with demand about normal, though the home trade shows some sign of improvement.

Dry Goods.—The wholesalers report that conditions are quite satisfactory in most branches of the trade, with nothing of a remarkable character happening. Prices for woolens and cotton staples are still firm, and the enquiry continues about average for this time of the year. Orders of a sorting character through out-of-town travellers are quite numerous, and indications point to a good season's total trade. Payments have been very fair.

Flour and Meal.—There is great diversity of opinion among buyers and sellers as to the intrinsic value of flour. The former claim concessions owing to the decline in wheat, but the latter hold that the flour was milled when prices yet continued high, and that, therefore, they cannot afford to sell at lower quotations. The result is a practical cessation of business. Ninety per cent. patents nominally range around $4.35. Millfeed is still quite firm, as, though the demand is growing less with the increase of pasture, yet there is a scarcity which keeps prices up. All grades of wheat registered a decline of two or three cents during the week. Other grains remain about the same as to price. In oats there is a difference of opinion as to the supplies, some believing that there is a good deal still held back waiting for better prices.

Canadian corn is easy, as deterioration of quality is now feared.

Groceries.—Some improvement in general business has taken place during the last few days, but even now no great volume of trade is going on. All grades of sugar have dropped 20 cents since our last quotations, and the movement is not brisk. Corned beef has dropped ten cents. Corned beef has in the primary market. In other lines practically no changes are reported.

Hides and Leather.—The supplies of hides are somewhat scanty, and the market is taking on an improved aspect. Prices, however, nominally remain as before. In leather nothing new has developed, the question of prices apparently remaining more or less unsettled so far as the general market is concerned.

Live Stock.—All the cattle offered at the market this week were cleared out early, but there was hardly such briskness as characterized it last week. Prices, however, remained quite steady. Some extra choice exporters sold at $6 per hundredweight. The general run, however, was of a more medium character. Butchers' cattle of really good grade sold well. The market for stockers and feeders is holding up well. The supplies of sheep and lambs have been on the light side, and all offerings sell easily. The market for calves is active.

Provisions.—As is natural at this time of the year the receipts of butter have largely increased, and prices are much easier. The shipments of butter this year to England show a considerable increase over last year. The demand for cheese keeps up well, and promises to increase. Shipments of Canadian cheese this year to England have fallen off about 341,000 pounds, compared with last year. Eggs are firm. Smoked meats and all hog products are firm.

Seeds.—The feature of the seed market now is the business in corn. Demand for timothy is about over.

Wool.—Some new-clip wool is coming forward now in small quantities, and more will no doubt come within a week or two with the warmer weather.

* * *

MONTREAL MARKETS.

Montreal, 10th May, 1905.

Ashes.—The demand is still light for the season of the year, but owing to the paucity of receipts values hold very steady, and dealers are reported buying first quality pots at $5.50, and seconds at $4.90 to $5 per cental. A nominal quotation for pearls is $7.25 to $7.50, but there is an entire absence of current business in this article.

Dairy Products.—The shipping season opened last week with the steamer "Ionian" taking out 10,891 boxes of cheese, as against 3,995 for the opening week of last year. Cheese values are easier than a week ago, 10⅛ to 10¼c. being about the idea for fine, new Westerns, and 9⅞ to 10c. for new Quebecs. For butter there is active enquiry, with comparatively light offerings; 19 to 19¼c. is quoted for finest creamery; dairy butter is really scarce, and firm at 17 to 18c.; rolls are quoted at 15 to 16c. per pound.

Dry Goods.—The 4th of May, a crucial date, passed off better than was generally anticipated, there having been an expectation that there would be more or less renewing of paper, and some leading houses report that the proportion of customers' paper provided for on that day reached as much as 85 per cent. The prevalence of cold winds has proved hurtful to the retail spring trade, and commercial travellers recently returned to have their samples revised report that stocks on the shelves of stores in the country are not reduced

as they should be at this season. Wholesale trade, however, shows up rather better than last week, and a fair number of buyers are in town this week, principally from the Midland sections, who are said to be making moderate selections of goods in person.

Groceries.—A further weakening has developed in refined sugars, a decline of 10c. per cental having taken effect on the 8th inst., and the factory price for standard granulated in barrels is now $5.45, with low-grade yellows down to $4.95. Owing to the weak market refiners report but a slack demand from jobbers, a state of affairs which has continued for a couple of months, and it is figured that stocks in consumers' hands should now be very light. A cable from Barbados to-day regarding molasses reports the season as drawing to a close, with available supplies in narrow compass, but the market does not seem to be appreciably firmer. In other lines under this heading nothing new is reported, and business cannot be termed active.

Hides.—General conditions are unchanged since a week ago. Beef hides are comparatively inactive, but quotations remain steady at 9½c. per lb. for No. 1. Calfskins are moving freely at 14c. for No. 1, and 12c. for No. 2. Lambskins are steady at the advance to 15c., and sheepskins at $1.20 each.

Leather.—The demand from local boot and shoe manufacturers is rather slow, and Quebec manufacturers are also reported very light buyers. Export demand for sole is, however, maintained. Prices are well sustained. Manufacturers' No. 2 sole is firm at 24c., and slaughter at 27 to 29c. In black leather there have been no recent changes.

Metals and Hardware.—New supplies of iron and iron products are now coming to hand freely, and a notable feature is the importation of quite considerable lots of English bar iron, which has been practically out of the market for some time past, and which, it is said, is being offered under current prices of the domestic product, which is still quoted at $1.75 to $1.80. No 2 selected Summerlee pig iron is quoted, ex wharf, at about $18.50, and No. 3 English iron at $16.50 to $16.75; ordinary scrap is quoted at $13 to $14. Boiler plate and sheets generally remain at old figures. Ingot tin is easier at 32½ to 33c., and antimony at 8¾ to 9c.; lead, $3.35 to $3.40; the discount on lead pipe is now 30 and 5; spelter, $6.25 to $6.50.

Oils, Paints and Glass.—Quite an active business is maintained in these lines. Linseed oil continues firm at the advance, being quoted at 53c. per gallon for boiled, and 50c. for raw. Turpentine is lower at 85c. White lead firm at $4.50 for No. 1 pure. Some new supplies of window glass are at hand, but prices are stiff at $3.75 per 100 feet for first break.

Wool.—Salesmen in this line report a very slack demand indeed, and the few sales reported are of very small proportions. Capes are quoted at from 17½ to 22½c., as to quality; B. A., 37 to 42c.; pulled domestic, 30 to 31c. There is practically no Australian wool here.

* * *

MANUFACTURES OF GREATER BRITAIN.

Mr. C. F. Just read a paper a few days ago before the Society of Arts of London on the manufactures of Canada, being the first of a series of addresses on matters appertaining to the Empire across the seas, which should do much to make the resources of the colonies better known to the people of the Mother Country. He said in part: "Canada is unquestionably the most advanced industrially of the self-governing colonies. The popular view here is that at best Canada's manufacturing resources are as limited as her population is limited—I hope to show you the contrary—least of all is the idea entertained of her future as a competitor with other countries in great industrial tournaments; and yet nothing less than this is certain within the immediate future. Living alongside the most progressive and industrial nation of the world, Canadians have seen what manufactures can accomplish in the building up of the State within a short span of time; they have rightly felt that, with no meaner country than that of their neighbors, the same destiny must be theirs in good time, and, as events are proving, rather sooner than later. Canada has successfully provided herself with the great basic industries of a modern State, and with a multitude of important subsidiary industries deriving from them, so that there is scarcely an article connected with these great fields of manufacture which is not made well and cheaply in Canada. Obviously, Canada's manufacturing industries are almost entirely situated in the eastern half of the Dominion. A striking feature also is their wide distribution throughout that region, carried on in a multitude of generally small centres, of which they form the raison d'être. This distribution is possible owing to the general distribution of raw material necessary for the industries, to the supply of cheap power, and transportation facilities by water and rail which permit the cheap assembling of material and the distribution of the finished product to the home market and for export. This situation in a country of great distances is highly favorable to the success of industrial undertakings generally, and to the prosperity of agriculture, and, indeed, of all local interests."

After a brief and rapid survey of some of the chief lines of manufacturing production in Canada, Mr. Just went on to speak of what he considered this country's greatest asset, namely, its unequalled water powers scattered prodigally throughout a vast territory. An idea of the general distribution and of the volume of the power available in Eastern Canada may be gathered from the statement of the distinguished engineer, Mr. Thomas C. Keefer, who

estimates Canada's share of the St. Lawrence basin water power—between Lake Superior and Montreal—at no less than 10,000,000 horse-power. The value of Canada's water power has been immensely increased by the introduction of electro-chemical and metallurgical industries, by the extension and expansion of the wood pulp industry; for all of which the country possesses the raw material, and further by the success achieved in the transmission of electrical energy over long distances. High

pressure currents of 50,000 volts have already been transmitted a distance of 200 miles. Lord Kelvin is reported to place the profitable limit at 300 miles. Thus the future industrial development of Canada will undoubtedly be closely associated with the utilization of her water falls. It is chiefly, however, in connection with electro-chemical works that Canada may look for the greatest return from water power, as here it is a question in which intense electricity has the monopoly for the production of aluminium, calcium, carbide, carborundum, and other products, for the generation of which abundant and cheap power is indispensable.

LIGHTNING INSURANCE.

The journal of the German Federation for Insurance Science has a paper dealing with Lightning Risks in connection with Fire Insurance, given by Dr. Phil. Steffens, of Berlin. The statistics of the subject are not all that might be desired, yet such as exist permit of many deductions of high value. Those relating to Bavaria are certainly to be placed in the first category, especially in view of the fact that they have been so searchingly discussed—in which connection the name of W. von Bezold may be honorably mentioned. Lightning risk in Germany has greatly increased during the past sixty years, and a study of this and its causes should be most instructive. Thus, in the years 1833 to 1842, 309.8 buildings per million were struck by lightning; say, 31 per annum; while in the period 1888-1897 the rate increased to 1,895.6 per million, or 190 each year.

Numerous works followed the Bavarian investigations dealing with the three aspects, the meteorological, the practical, and the actuarial, which, in spite of their different points of view, had each the same object, viz., to gain an understanding of the actual circumstances as regards lightning danger in Germany and its subdivisions.

Among these efforts, those dealing with the statistics of fire insurance rest on a sure basis, and have already yielded important facts, e.g., the double storm maximum in the summer months and an analogous course of the temperature, as also the minimum at the end of the thirties and commencement of the forties of last century in the curve representing many years' experience. In spite, however, of these results, much material remains undealt with, and, viewing Germany as a whole, the picture obtained of this risk is far inferior to that for the Kingdom of Bavaria.

An important result obtained by Dr. Steffens is that the distribution of lightning strokes mainly depends on the distribution of the buildings—on their density in a given area, and not on the area alone. By means of the analysis followed, Dr. Steffens was able to show, for example, that Bavaria, with 183 as an annual average number of absolute lightning strokes between 1876 and 1891, and Württemberg with but 73, the risk for each was the same, viz., .13 strokes per 1,000 buildings per 1,000 square kilometres, or 130 per million.

The whole subject receives full treatment in an interesting way, and many statistics and diagrams are given—it will not be surprising to learn that the sunspots are brought in here.

By the way, it may be observed that several other papers of note appear in the same number. An actuarial one by Dr. Phil. Hugo Meyer, of Berlin, supplies formulas for reversionary annuities, taking account of the state of health of the "provider" or counter-life which is to fail before the reversioner comes in. One formula worth practical consideration is that exhibiting the value of an annuity to a man during the time he survives as an invalid jointly with his wife. Published by E. S. Mittler ü Sohn, Berlin.—Insurance Record, London.

* * *

The Trenton Potteries Company, of Trenton, N.J., have established a plant at St. John's, Que.

Great activity in mining is being experienced in the Similkameen Valley, B.C. Claims on the Copper Mountain are to be briskly developed at once. The British Columbia Copper Company have recently acquired a controlling interest in the "Sunset," an important claim in the mountain series. In agriculture, too, the Valley is progressing speedily, and the coming construction of a railroad through the district is bound to assist greatly in the work of settlement.

A GOOD POLICY

for policyholders is the 20 pay life guaranteed option policy issued by

Head Office - WATERLOO, ONT.

The Mutual Life OF CANADA

In this style of policy the Benefits conferred and the Premium rates charged are more liberal than those in any similar policy issued by other companies.

Be sure to examine it before insuring elsewhere.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

B. HAL. BROWN.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over **$2,600,000.00**

GOOD COUNTRY ROADS.

The annual convention of the Ontario Good Roads Association will take place in Brockville, Ont., on the 28th and 29th prox. The subjects which will be discussed will include the county system of macadamized roads, road building and the construction of bridges. One of the leading speakers will be Mr. James McDonald, of Hartford, Conn., who is State Highway Commissioner of Connecticut. There will also be present representatives from other counties in Western Ontario, which have expended large sums of money on stone roads, who will explain the experiences of their counties in carrying out this work. The question of improving our high roads is almost of more importance to the general welfare of this country, even than the construction of new railroads, so far-reaching are the results of their present inefficiency, and so great the relief and economy that good highways would bring. It is greatly to be hoped that the convention will draw a large amount of public interest. Every township and county council in Eastern Ontario is invited to send delegates.

* * *

THE EGG TRADE.

The present unsatisfactory state of the Canadian egg trade with Great Britain, due mainly to too high a price in the primary market and to lack of uniformity in quality, renders timely a brief discussion of how the business is managed in Denmark. Previous to the year 1895 there had been much dissatisfaction in that country with the manner in which the sales of their most important farm products, butter and eggs, had been conducted by commission agents, which had caused consumers to question the quality of the articles and indisposed them to give the prices which Danish farmers considered warranted. With the object of creating a sounder condition of affairs, several prominent egg-producers in Denmark came together and formed what was known as the Co-operative Export Society, the aim of which was to insure delivery in England of eggs in an absolutely fresh condition, and to receive the high prices obtainable only under such security.

The society began operations with five egg-collecting districts, but in 1903, it comprised 33,000 members, all producers, and this number is constantly increasing. The total exportation of eggs from Denmark, in 1901, was 31,700,000 dozen, valued at $5,910,000, which in 1903 had increased to 38,741,400 dozen worth $7,610,000. The receipts of the Co-operative Society are divided among the producers in proportion to their deliveries, with a small deduction for expenses. Heavy fines are inflicted for the delivery of eggs more than seven days old. As soon as received in the central station, they are carefully examined, sorted, and shipped at once, irrespective of the chance of obtaining a higher price by waiting. Each egg is stamped with the producer's and collector's numbers.

It is not too much to say that such an organization would be of immense benefit to Canadian farmers. Something certainly is needed whereby the honest shippers of good goods will be helped, and those inclined otherwise shall be discouraged. The possibilities of Denmark in the way of food products are limited by her area and population, while those of Canada are practically unlimited. Denmark, of course, is much nearer the market, an important advantage, but with a good system of cold storage this may be almost completely counterbalanced by Canadians. Dairymen's and other farm associations might take the matter up and consider whether they could not form a co-operative concern of this kind, which has already, in Denmark, had such remarkably beneficial results, which in view of the assured position of Danish farm products in Great Britain and the extra good prices they uniformly realize, have certainly been brought about.

In connection with this, it may be noted that the Canadian Commercial Agent at Leeds, Mr. J. B. Jackson, asserts that in the near future Canada's strongest competitor in these lines in the markets of the Old Country will be, not Denmark, but Australia and New Zealand. But these countries are already forming associations on the Danish model.

* * *

THE LUMBER TRADE.

Prices of lumber in the Ontario market have shown very little actual change since our last report on the subject, but they retain their steadiness in a marked degree. In fact, the under-tone to the market is so strong that the general feeling is that should any change at all be made, it will be one in the direction of higher prices. These, of course, are already very high, but probably not more than the extra cost of cutting, by reason of large stumpage fees, dear labor and supplies, and other increased expenses would warrant. The demand for lumber for building purposes throughout the Province of Ontario generally has probably never been greater than it is now. New buildings are very numerous in Toronto, and the prospects are that the activity will continue as long as it is safe to prophesy. Montreal, too, is active in the same direction.

Reports from Fredericton speak of the lumber prospects in New Brunswick as having been greatly improved by reason of recent much-needed rains. Some of the drives in the upper St. John River have now some chance of reaching safe water, as our St. John letter shows. In some places, new logs are even now running with the booms.

As to conditions in Great Britain, which naturally affect the market for pine in this country, a recent report says it calls for no particular comment. A steady market prevails, with but little fluctuation in values. Imports into the United Kingdom have not been excessive lately, but deliveries have been a little disappointing. Stocks are in moderate compass. The situation, according to the circular of Farnworth and Jardine, Liverpool, May 1st, is as follows:—

> Of waney pine there has been an import of 3,000 cubic feet; consumption fair, but the stock is still too heavy. There is not much demand for square pine at present. Very limited enquiry is noted for red pine, and the stock is almost exhausted. Oak logs are not in active demand, there has been a light consumption, and stocks are not excessive. Elm continues in fair demand, stocks are light and prices are well maintained. Pine deals have only arrived to a nominal extent, the deliveries have been satisfactory, and some further impression has been made on the stock, which, however, is still too large. Red pine deals are not in much demand, stocks are ample, values are slightly easier. Of New Brunswick and Nova Scotia spruce and pine deals the import to Liverpool and Manchester Canal during the past month was again on the light side, viz., 3,050 standards, the deliveries have been satisfactory, and the moderate stock has been further reduced; there is a steady demand and values are well maintained. Pine deals go into consumption very slowly, and stocks are too heavy. Of birch logs, the import has been chiefly from St. John and Halifax; this wood continues in good demand and values are firm. Planks have reached the market in fair quantities, but have met a good demand and the stock is moderate; values firm. One cargo of British Columbian and Oregon pine, containing 168,000 cubic feet, has arrived on merchants' account, and as the consumption during the past month has been very poor, the stock is considerably increased.

THE CHICAGO STRIKE.

Without a doubt President Roosevelt is to be congratulated on the attitude he took in connection with the teamsters' strike in Chicago. It is but an indication of the extraordinary arrogance to which the new-found strength of unionism has led its devotees that they should even dream of asking the interference of the President in such a case of mere common turbulence against business and against law and order. In some strikes there has at least been a show of reason on the side of the men; they have had to protect themselves against conduct on the part of their employers which might at any rate bear a little explanation. But in Chicago this can hardly be hinted at even. The teamsters, of course, had a perfect right to cease work if they desired to; but they most emphatically had no right to prevent others doing the work they themselves refused to do. And equally bereft of right and justice were they in adopting, or trying to adopt, a boycott of certain firms who carried on their business in the way that seemed best to them. For this is what the "teamsters' strike" amounts to—not a mode of complaining with the conditions of their own employment, but an organized and violent protest against firms (with whom primarily they had no connection), managing their own concerns in a way they deemed fit. The teamsters' demands, too, were so absolutely unreasonable on their very face that they would have had no chance at all of being acceded to without the committing of violence and outrage such as have been the order of the day latterly in Chicago. And this violence is the very feature of their case which renders, or should render, any compliance with their demands absolutely out of the question. The President showed himself to be of the right mould when he refused to listen to the teamsters, but told them first to change their methods, and be peaceable, law-abiding citizens.

* * *

ORGANIZATION OF THE EMPIRE.

There are many loyal Britishers all over the world who look forward fondly to the time when some scheme may be devised which shall tend to, if not accomplish, the federation of the British Empire. The proposal bristles with difficulties, so diverse are the opinions upon its feasibility and so various the interests to be reconciled before it can become an actuality. But the idea, the concept, persists in the minds of many. And it is a grand idea, worthy the persistent study of able minds. A month ago, there was read before the Royal Colonial Institute in London, a paper by Sir Frederick Pollock, on "Imperial Organization." Having read this paper with some care, we have decided that it is well worth while to give to the readers of the Monetary Times an abridgment of what it proposes. The paper is not the expression of Sir Frederick's opinions alone, but of a number of gentlemen of distinction and experience, whose position does not in all cases permit of their names being mentioned. In fact, the only names he mentions of all those whom he has been consulting, are those of Mr. G. R. Parkin, Mr. Haldane, and Mr. W. Pember Reeves.

For three years, the author of the paper tells us, about fifty persons have been associated in the consideration of this question of a possible working basis for the British Empire. And for a year and a half these persons, or most of them, holding various opinions in politics, and of many different professions and interests, have taken active part in discussion. Therefore, says the author, these suggestions "are no crude project of doctrinaires or amateurs." Passing by many interesting references to existing conditions and quotations from competent observers, set forth in charming English, we pass to the suggestions made, premising, however, with the author, that "we have to look for some plan which will avoid elaborate legislation and formal change in the constitution;" * * * "we must distinctly renounce the invention of any new kind of executive or compulsory power," and must be "content with a council of advice which will have only what is called 'persuasive' authority." The scheme which Sir Frederick outlines negatives any formal constitution for an imperial body, because "it assumes the consent of several independent legislatures and involves a considerable modification of their existing authority." But admittedly we want a more systematic method than we possess of preparing the way for profitable consideration of many kinds of affairs touching imperial interests. And the idea which recommends itself to the author of the paper is that of a secretariat, which should have at its disposal both the best and most recent information, and the conclusions of expert committees. "In other words," the paper goes on, "we suggest a standing Imperial Commission to serve as a general intelligence department for matters *outside the technical functions of the Admiralty, the War Office, and the Committee of Imperial Defence.*"

Supposing such an Imperial Committee to be formed, to be placed in direct communication with the cabinet, and to be normally presided over by the prime minister of Great Britain, the objection is heard that this merely places another burden upon duties which already touch the limits of any one man's capacity. To this the paper makes reply that "if it be said that the present burden of the cabinet, and of the prime minister in particular, is tolerable (if it is) because many matters are left to take care of themselves until they become urgent, then we reply that this is exactly the weak point in the harness of the Empire which we want to see mended; and here is our suggestion for mending it, the best we can think of."

Quite evidently, the secretary of such a body as is here indicated must be a man of uncommon qualifications. He is to be the keeper of records which will be confidential for the most part, and therefore must be trustworthy and discreet; he must be a person of standing and acquainted with public business; he must devote much of his time to acquiring and systematising knowledge of many kinds for the use of the Cabinet and the Imperial Committee. Here we quote again from Sir Frederick Pollock: "But we think the best living information ought to be at the service of the Imperial Committee through its secretariat; and we think this can be most effectively done, without ostentation and with very little expense, by the constitution of a permanent Imperial Commission whose members would represent all branches of knowledge and research, outside the art of war, most likely to be profitable in Imperial affairs. Not only learned and official persons would be included in such a body, but men of widespread business, travellers, ethnologists, comparative students of politics might all find scope for excellent work. It need not, and I think should not, be paid work."

As instances of the sort of needed work to be done by this committee the paper cites as urgent the question of a single final court of appeal for the Empire, and adds the opinion: "but we shall never get a plan for it properly worded out with our present make-shift ways." Another topic, not less urgent, though of less ample scope, is copyright law; the statutes in force in various parts of the Empire being, in Sir Frederick's opinion, "incongruous, ill-arranged, and for the most part ill-penned. * * * And there is danger of real conflict between home and colonial statutes." What is equivalent to what the Americans call inter-state commerce is another subject which might come within the purview of this Imperial Committee. The conclusion of the paper is that such a body could be advantageously put in action without revolutionary change, at no great cost, and with very moderate labor in proportion to the probable results. The submission of the paper caused a discussion which appears to have occupied more time than the delivery of the able paper itself; but we have no space to-day for more than this brief reference to it.

⁂

LIFE ASSURANCE CANVASSING.

For a man to be a successful life assurance canvasser, he must possess a peculiar equipment. He needs to have, not exactly all the virtues—for we have known men who were money-makers at this business no more virtuous, rather less so, indeed, than other people—but many valuable business qualities, which we need not at the moment enumerate. And strange to say, there are good men, to all appearance well equipped for the business and representing good companies, who do not reach the goal. Whether the lack is in their mental or their physical make-up does not always appear.

An interesting, if not profitable, enquiry is whether insurance business is harder to transact in America generally than in the United Kingdom. We have recently had occasion to hear from an English correspondent on this subject, and here is what he says: "No doubt opposite opinions prevail on the opposite shores, and quite honestly. It is decidedly the case that advertising people here labor under the delusion (?) that advertisements are more easily to be got in Canada and the States than in England. The two branches of work are dissimilar in perhaps all respects save one. Pursuit of either insurance or advertising in England makes a man somewhat of an Ishmael, and a really extraordinary fund of geniality is necessary if a person is to convince potential assurers that the agent is not an unmitigated nuisance to be avoided by any means."

The pace in life insurance writing, since the advent of the Americans and Canadians in the United Kingdom, has quickened there considerably. Very large demands are made upon the energies of those who accept salaried appointments and very short shrift is given to those who fall below the standard as bringers of business. While this may be for the best in the long run, it has its objectionable features. "Certainly," says our English correspondent, "the high-pressure driving disgusts some capable young men, who, having exhausted their connection of old friends, are discharged before receiving an opportunity to manufacture new connections. And the driving of local managers has its tragedies. Quite recently an acquaintance of my own took his life in despair on being dismissed by an exigent American office, whose returns could not be maintained by a man so genuinely capable and popular as even my deceased friend."

OUR AUSTRALIAN LETTER.

Up to the beginning of this month, there was very much concern over the fact of the absence of the usual monsoonal rains in January, February and March. In the state of Victoria, the churches proposed a general prayer for rain. In New South Wales the railway commissioners, after making a trip of observation to the west, thought that in that section not one-fifth the area put under crop last year would be seeded this year. However, a change set in, and over a large portion of New South Wales there has been an unusual downpour. The other states have had some but not so bountifully. The Australian farmer is accustomed not to plough until after the rains have softened his land. With the poor ploughs he once had, this was a necessity in many places, but with the implements supplied, largely from Canada, he can do his work at any time. Unfortunately, he has not yet risen to his opportunities. It is not too late even now to cultivate and get a good crop, if the after conditions should be favorable.

The rains ensure a pretty good pastoral season. It is a little too late for much effect on the herbage in the elevated districts, but plenty of water is ensured, and there is fair feed for the stock which the country holds.

The number of sheep in New South Wales on 1st January last were returned as 33,838,571, an increase of 5,182,070. This is gratifying, but is not a remarkable increase, and the total number is but little more than one-half of what is was in 1891, but then the land was overstocked, and the overstocking accentuated the effects of the drought. Queensland, too, is gradually strengthening its herds and flocks, and the pastoralists of a large part of the state have fair prospects before them.

With the exception of wool and wheat, the exports are being well sustained. The decrease in wool was due to shipments being pushed last year, and that of wheat to the lesser yield of the last harvest. The imports are declining, the collection for this state for the first three months of 1905 show a decrease of eight per cent. as compared with a similar period of last year.

The Pacific cable is reported to have another deficiency last year of nearly ninety thousand pounds. This is scandalous. Sir Horace Tozer, the Agent-General of Queensland, at London, who has been home on a visit, has been talking plainly upon the subject and says the deficit is due to the absence of management. It is claimed that the Pacific cable gets but one-fourth the Australian business, and that while it did more work in 1904 than in 1903, yet the rival line's increase was more than three times as much. The loss to Australia is about thirty thousand pounds, but it more than recoups itself by charging an extra terminal rate of three pence per word over and above the ordinary rate and calmly pocketing it. In addition, Australian business is saving nearly two hundred thousand pounds per annum in the reduction in the price of its cable messages effected through the laying of the Pacific cable. The United Kingdom and Canada are out of pocket fifty thousand pounds per annum. The worst of it is that the small share of the business done by the Pacific cable is due in a large measure to the scandalous agreement made by a Government of this state with the rival Eastern Extension Company. In addition the Commonwealth also levies a fee on all cable addresses, though it does not touch most of the messages sent over the Eastern Extension. The patience which Canada displays under these circumstances is angelic.

Dr. Montague, of your city, is getting a little more notoriety. He is represented to have delivered a speech in Vancouver in which he is reported to have sneered at the Australian Federation, said that the Australians spoke music hall English and walked with short steps because their fathers were convicts. As they can't get at the Doctor, the papers are coupling him with the Independent Order of Foresters, in whose employment he is said to be, and raking up reminiscences that the Order wishes should be buried. There is, however, a more serious aspect which has been called to my attention by one interested in Canadian business. He said: "No one would mind what that man may say, but if it were believed here that decent Canadian audiences would listen to such malicious rubbish, it would not tend to strengthen the sentiment that helps us to sell Canadian goods, and I tell you we need all the sentiment to help us just now; for what with disappointments, delays in filling orders, when they are filled at all, and poor goods, some of us are getting pretty well filled up with Canada." The Canadian Commissioner refused to criticize the speech, as he has not evidence of the correctness of the report. Perhaps stirred up by this incident, the opponents of Dr. Montague are again urging the Victorian Government to have a full enquiry into his conduct of the I.O.F. affairs, while he was in charge, and claim they have a promise that this will be done. This is very doubtful. The Government is disinclined to reopen the matter.

One of the unhappy occurrences of recent date is the conviction of the Hon. Mr. Slattery of fraudulent conversion of his client's money, and his sentence to imprisonment for three years and a half. He was Minister of Justice in three Governments and an ex-speaker of the New South Wales House of Assembly. His downfall was due to racing and betting. Three days afterwards, the treasurer of a powerful labor union was sentenced for fraud. The union's money went in the same way. These incidents have stirred up a demand for repression of one of the worst evils of Australian life. A Melbourne man, who has been writing upon a recent visit to Canada, said that one of the things there that struck him with special force was the comparatively little attention paid to racing. Canadians will do well to keep it so.

Mr. Larke, the Canadian Commissioner, has arranged to leave for a trip to Canada in June next. The State Governments are furnishing him with lantern slides of the beauty spots of Australia, which he will take over, as he has intimations that he will be expected to speak upon Australia and its people.

The Australian Chamber of Commerce, at its recent session, has taken up the Pacific cable deficit and demands better and more energetic management, but it did not include in the demand better treatment on the part of its own Government.

Sydney, N.S.W., 17th April, 1905. F. W.

* * *

HALIFAX LETTER.

A proposition of much interest and importance to the fishermen of this Province is contained in the arrangements now being made by the French firm of Beust et Fils. They are preparing to put in operation at North Sydney a bait-preserving plant, such as is operated by the same firm in France. Their system is claimed to have great advantages over the cold storage plan, as vessels can remain on the fishing grounds as long as necessary, and keep the bait fit for use. The trouble and expense of carrying ice is also by this means avoided.

The well-known Halifax book and stationery firm of Connolly & Davidson has dissolved partnership; the business will be conducted at the present premises, on Barrington Street, by J. L. Connolly. Mr. Davidson has purchased the Ruggles bookstore on the same street.

The Nova Scotia Milling Company, Limited, will take over the business carried on by the late D. Gunn, they having secured the lease of Matheson's mills from the owner.

Blanchard & Co. offer for sale their dry goods business, which they have carried on in Windsor for the past nine years.

M. Scanlon, Sr., has disposed of his interest in the dry goods firm of M. Scanlon & Sons, to M. Scanlon, Jr. The business has been long established here, and will be continued in the same place.

It was generally expected that the meeting of shareholders, held last week to ratify the merger of the People's Bank with the Bank of Montreal, would present some interesting developments, but the meeting proved to be entirely devoid of excitement. As we have already stated, out of the 50,000 votes, 48,891 were polled in favor of the merger. One of the leading shareholders had announced his intention of registering objections to the deal, but before the meeting took place he was pacified. The president, J. J. Stewart, was chairman of the meeting, and he made a lengthy statement showing the desirability of the merger. Under the agreement, the Bank of Montreal will take over the People's at once, but the branches in this city will be maintained by the bank for a year.

It is expected that the Halifax and Southwestern Railway, of which eighty miles remains to be built, will be completed this year. There has been some delay as to a question of route, but the decision has now been reached that the line will run through Liverpool following the shore and crossing the river Mersey at the town. It is confidently expected that the entire road will be open for traffic this year.

The blooming mill at the Sydney Steel Works has been closed for a week or ten days by an accident to a cylinder in the main engine. The bricklayers at Sydney, employed by the Dominion Iron and Steel Company, who created a sort of strike three weeks ago by demanding 45 cents an hour, have been given an increase of from 38 to 40 cents. The advance was voluntary on the part of the company.

W. H. McBeth, contractor, of Sydney, who left that city and was reported to be in financial difficulties, has returned, contrary to the expectations of some of his creditors, who had taken action against him, and he now threatens to sue them for damages.

The Government of Nova Scotia is issuing a pamphlet on the resources of the Province for distribution both at home and abroad. The article on "Nova Scotia as a Manufacturing Field," has been given to the press in advance, and illustrates strikingly the great possibilities of this Province. An alphabetical list of items consumed, but not manufactured in the Province, is appended. It shows in a concise way the things we should make here but do not make. This pamphlet would be extremely serviceable to manufacturers or capitalists.

The Halifax Tram Company is double-tracking its line on Spring Garden Road. The receipts of the company which fell off so much during the winter, have not yet assumed normal proportions, and weekly decreases are still announced. The earnings, for the week ending May 7th, were $2,372.22, a decrease of $222.82, compared with the same week last year. The comparative total receipts for the railway and lighting departments for April, this year and last, were:

	1905.	1904.	Decrease.
R. R. Dept.	$10,515 93	$11,144 71	$658 78
E. Lt. Dept.	11,963 81	12,115 71	151 90
Gas Dept.	4,061 55	4,590 60	529 05
	$26,541 29	$27,851 02	$1,309 73

The reports from the Lunenburg "bankers," up to date, are not very satisfactory, and it seems the spring catch of fish will not be very large. Ice, bad weather, and dogfish are all militating against a large trip. Some vessels, however, have done very well.

The Board of Trade has been discussing terminal facilities here, and in conjunction with the City Council have telegraphed to the Minister of Railways asking that immediate steps be taken to provide increased yard room, double track the line from Deep Water to Richmond, and construct flour sheds and warehouses.

Halifax, 15th May.

* * *

MONTREAL LETTER.

General trade, whilst not as active as many of our large wholesale houses expected to find it, continues fair for the season. There have been quite a few small failures, and applications for compromises and extensions have been received during the past week. Remittances are still somewhat disappointing, a number of renewals having been asked for. There has been quite a demand for call money, which has been put out at 4 to 4½ per cent., several large blocks having been placed during the past few days at the outside figure.

By a vote of twenty to fifteen, the Montreal City Council on Monday last reaffirmed the resolution of a week ago to grant the Montreal Gas Company an extension of their contract for fifteen years from the expiration of the existing contract, which has five years yet to run. The decision has caused the greatest stir in municipal circles known in recent years. Mayor Laporte, whose veto was overruled by the majority, expressed himself as astonished at the result, and it does seem somewhat inexplicable that, despite the legal aspect of the case, which shows that a by-law should be passed before any extension of contract or extension of franchise could be made with the Gas Company, the majority should decide to make an offer to the company upon a mere resolution of Council. What will be the ultimate result of this action of the majority in the City Council is difficult to say. It certainly puts the Mayor in a very trying position, to have his decision and vetoes overruled in such a manner, and a definite pronouncement from His Worship as to his future policy is awaited with interest.

A special general meeting of shareholders of the Bank of Montreal was held on Tuesday, the 16th inst., to consider an agreement for the purchase by the Bank of Montreal of the assets of the People's Bank of Halifax. Sir George A. Drummond, vice-president, occupied the chair. Mr. Aird, the secretary, read the notice convening the special general meeting, after which the vice-president produced and laid upon the table the draft agreement for the purchase of the assets of the People's Bank of Halifax, which was read to the meeting.. The vice-president, then moved, seconded by Mr. A. T. Paterson, the adoption of the draft of agreement of purchase. This was carried unanimously and the meeting adjourned.

A serious fire, resulting in a loss of upwards of thirty thousand dollars, broke out in the Mercer block on Notre Dame St., in this city, occupied by P. E. Bourassa & Son, furniture factory; A. Gladu, restaurant and a boarding-house. The factory, which stood in the rear of the block, was almost totally wiped out. The almost tragic utterance of Mr. Bourassa, when he saw the flames issuing from his premises, are worth repeating from the fact of their terrible significance: "My God, thirty thousand dollars and twenty years' work going up in smoke, and not a cent of insurance." The factory contained a valuable stock, which included rare wood from South Africa. Besides household furniture, he manufactured bar and store fixtures.

Montreal, May 17th, 1905. "MOUNT ROYAL."

* * *

OUR SAINT JOHN LETTER.

Death has claimed two of the most prominent citizens of St. John within the past few days. These were Samuel Hayward, head of the S. Hayward Company, wholesale hardware merchants, and George McLeod, retired lumber king. Mr. Hayward succumbed to cancer, after an unsuccessful operation in Montreal. He was a native of the Province, and in his youth went to California for his health. He spent two or three years prospecting and mining and it has always been understood returned strengthened in body and with his pockets well filled. Wise management of his business interests greatly increased Mr. Hayward's wealth, and he is believed to have left a large fortune. He had travelled extensively in foreign lands, was well informed, a keen sportsman and a general favorite. Mr. McLeod's death has already been briefly referred to. He was one of the brainiest men this Province has produced, took a keen interest in politics, and was a debater of the first rank without a superior in this section, and perhaps in the whole of Canada, for these Maritime Provinces think they supply a very fair share of the debating power of the country. Mr. McLeod's earlier years were lived in Kent County, where were his milling interests, but his later life was spent in St. John. He was one of those speakers, rare in any country, who can deal with financial questions and present his facts and figures so that they are interesting and hold the attention. The city is poorer because of the death of these two citizens.

Mr. J. N. Sutherland, of the C.P.R., has just prepared his report of the export and import business through St. John in the winter port steamers. The figures show that the exports were not as great as in 1903-1904 by 34,071 tons, but this is entirely due to the falling off in the grain shipments. In general merchandise there was a greater business than ever before. The total outward tonnage was 209,608, of the value of $15,000,000. The inward business shows a tonnage increase over the previous winter of 2,452 tons. The package business outward, and this is the profitable business so far as the steamship companies are concerned, was 7,250 tons greater than in 1904. Generally, the trade was good and the belief is that it was profitable to the railroad and steamship companies interested.

The outlook to-day is that one additional berth for the winter port steamers will be ready by next winter. Hon. Mr. Hyman has given his consent to the Government dredging the berth if the city builds the wharf and warehouse. The plans are now being prepared, and an early call for tenders is expected. If all goes as arranged one berth can be ready next winter and several for the winter following.

In connection with the winter port trade, it may be of interest to state that the shipments of cattle and horses were greater than in 1904, but there was a decline of several thousand in the sheep shipments, so the total trade was for the winter just passed 46,273 animals, against 49,864 in the previous season. A branch of the business that showed an actual and substantial gain was the immigrant trade, 15,925 persons coming through St. John on the winter port boats, an increase of 4,075 over the previous year. Halifax in the same time increased only 1,233. The two ports handled 36,270 immigrants.

The Provincial Government was approached last week in the interest of an Ontario syndicate, and asked if it would guarantee, to the extent of $75,000, the principal and interest of an expenditure of $100,000 on a big cold storage warehouse at St. John. The building projected is of eight stories and an important branch of the business is to be the shipment here in bulk of Ontario apples, which will be kept in the warehouse and barrelled and shipped to England as the market demands. The Government has taken the subject into consideration.

Announcement is made to-day that James L. McAvity, proprietor of the foundry business of McLean & Holt, has purchased a large property on Erin street, which he will convert into a factory for the manufacture of stoves. Mr. McAvity will also open a retail store on Union street in which to market his wares.

There have been some heavy rains during the past week, and to-day the lumber outlook is much brighter than it was a few days ago. Some large drives have reached safe waters, and others are coming along. If the existing conditions hold for a few days more, the drives will all come out.

Saturday night there was a very severe frost, and it is reported that considerable damage was done throughout the country, particularly to early vegetables, hot house and hot bed plants. Many farmers, who had hoped to put early crops on the market, will be disappointed.

Recently the ship laborers at this port decided to increase the scale of wages to 40 cents an hour for summer work. The shipping men have protested vigorously against this new rate, and have endeavored to convince the laborers that it is exorbitant, and will drive business away. In fact, they have told of vessels that would have come here but have gone elsewhere. The laborers for answer say they do not average $400 per man for their year's work, and they do not think it possible to get along with less than they are asking. When the shipping men say the rate is higher than in other ports, the laborers reply they don't know or care about other ports, it is impossible to live in St. John on less. To-day it looks as if the rate will stand, and the shipping men will have to face it. The men declare the threat of vessels leaving the port is only a bluff.

St. John, N.B., 16th May. * * *

* * *

LA BANQUE NATIONALE.

Speaking generally, the figures presented by this bank in the report of the year ended with April bear a close resemblance to those of the year preceding. True, there is some growth; circulation is a little larger, and deposits show half a million increase; current loans are greater, in the proportion of $8,497,000 to $7,839,000, and the totals of assets and of liabilities are swelled to $10,535,000 each, as compared with $9,866,000 in 1904.

The earnings of the year are very little below the average of the last five years; that average was $147,924, and those of last year were $140,684. The appropriations were the same, namely, $90,000 for dividend at the rate of six per cent., and $50,000 added to reserve, which is by this means made up to $500,000, equal to one-third the paid capital. And there remains $83,166 to carry forward at the credit of profit and loss. This is the forty-fifth annual report.

The business of the bank is increased, it is true, but we observe that the aggregate of the discounted bills overdue, real estate held, and mortgages on real estate sold has increased in greater ratio than the increase in current discounts. The items of bank premises, furniture and stationery, are increased from a total of $244,619 to $262,046 this year. The bank does but little in call loans on stocks and bonds.

* * *

CORNWALL BOARD OF TRADE.

The Cornwall Board of Trade, which has been in a distinctly quiescent state for some years past, has been revived. There was on the 11th inst. a largely attended meeting of Cornwall's business men having that aim, and they elected the following officers: President, P. E. Campbell; vice-president, N. J. Fraid; secretary-treasurer, D. Monroe; council, G. W. Armstrong, W. Hodge, J. A. Chisholm, J. A. Cockers, J. G. Harkness, P. J. Lally, C. H. Barber, J. E. Chevrier, A. Evans, D. J. Gillies, E. O. Callaghan and A. McCracken.

* * *

WELLAND BOARD OF TRADE.

The business men of Welland have concluded that an association of themselves for purposes of deliberation upon their local interests is desirable, and have formed a board of trade. The officers and council are as in the following list: President, D. Ross; vice-president, G. C. Brown; secretary, John McCaw; treasurer, James O'Neil. Council—George Sutherland, O. H. Garner, J. H. Crow, L. B. Duff, J. Goodwin, W. H. Crowther, J. H. Burger, J. J. Sidey.

* * *

INSURANCE INSTITUTE OF MONTREAL.

The annual meeting of the Insurance Institute of Montreal was held on Tuesday evening, the 16th inst., Mr. T. L. Morrisey, the retiring president, occupying the chair. In his address to the members, Mr. Morrisey urged the necessity of greater interest on their part, if the Institute was to achieve the hope of its founders. From the Toronto Institute had been received a telegram extending fraternal greetings to their Montreal confreres, and Mr. E. F. C. Smith had written expressing regret at his inability to attend the meeting, but assuring the members of his continued personal interest in the work of the Institute and all connected with it. The report submitted by the council showed a slight increase in the membership of the Institute during the year, and stated that Mr. Wm. Chubb had won the prize of $25 offered by Mr. R. Wilson-Smith for the best essay by an associate member.

The report was unanimously adopted, as was also that of the treasurer, after which it was announced that for the coming year, Mr. R. Wilson-Smith had offered prizes amounting to $25 for the two best essays by associate members—$15 for one on subjects connected with fire, and $10 for one on a life insurance subject. After the election of office bearers, the usual votes of thanks were accorded, after which a very enjoyable smoking concert was held.

The election of office-bearers for the ensuing year resulted as follows: President, Mr. Sergeant P. Stearns; vice-presidents, Messrs. J. Gardiner Thompson and Charles C. Hole; secretary, Mr. A. R. Howell; treasurer, Mr. W. B. Colley; members of council, Messrs. T. F. Dobbin, A. B. Wood, W. Jackson, Harold Hampson, George Lyman, Percy R. Gault, C. H. Turner, Henry Timmis, W. Kennedy, John Jenkins, Joseph Rowat, W. A. Wilson, Trevor A. Evans, H. W. Wonham, and H. R. Holland.

* * *

BANKING AND FINANCIAL.

In Montreal on Friday last Mr. A. A. Wilson was elected president of the Montreal Stock Exchange, and Mr. Rudolphe Forget vice-president.

It is announced that the Royal Bank of Canada has opened a new branch at Vernon, British Columbia, and one at Mount Pleasant, in the same Province.

The Montreal City and District Bank has opened a new branch bank at the corner of Pine Avenue and St. Lawrence Street, in that city. The building, which is of two stories, with a stone front, has been newly fitted up. Mr. Maurice

Jones, who has been fourteen years in the employ of the bank, has been appointed manager.

Mr. A. H. Campbell, Jr., Toronto, has been elected to fill the place on the board of directors of the Consumers' Gas Company, formerly occupied by the late Mr. George Gooderham.

From the report of the Colonial Investment & Loan Company we learn that negotiations are taking place with the Ontario Building & Savings Society, of Kingston, looking to the taking over of the assets of that company.

The directors of the Imperial Bank of Canada, at their board meeting, of 16th May, decided, we understand, upon the issue of the remaining $1,000,000 of authorized capital. The shares will be allotted to shareholders as of the 30th June next, pro rata, and at a premium of 100 per cent. The instalments are payable at intervals extending over to October of 1906.

We hear of a purchase by the Canadian Bank of Commerce of property on Yonge Street opposite the Eaton department store, for banking purposes. The lots are those on which are the shops of Thomas Claxton and A. Bollard, Nos. 197 and 199 Yonge Street. It is the intention to have a two-storey building, of forty-six feet frontage, covering the whole depth of the property, and the bank intends to occupy the entire premises.

* * *

FIRE INSURANCE MATTERS.

In Fernie, B.C., a by-law will be submitted to the ratepayers to authorize the borrowing of $100,000 by the municipality for the purpose of installing a system of waterworks.

The steel boat "Firefighter," which is being built for the District of Columbia, was launched at Wilmington, Del., last Saturday. The vessel will be employed in the fire and police service on the Potomac river at Washington.

Many good wishes follow J. J. Kenny, of the Western, on his trip across the Atlantic. He left Toronto on Monday night last, to sail by steamer "Majestic," from New York. It is his intention, we understand, to remain in the United Kingdom till about the 20th June.

The Canadian Fire Protection Company, Limited, of Toronto, is the name of a newly incorporated company which has a share capital of $100,000. It proposes to make and deal in fire proofing and fire preventive materials. It will also carry on the business heretofore conducted under the name of the Cortland Electric Manufacturing Co., J. W. Marsh, and J. A. C. McCuaig, of Toronto, are charter members in the company.

In the Ontario Legislature, on Tuesday last, the member for Lincoln brought in a bill to provide for some compensation to volunteer fire brigades, the same to be raised by a tax on fire insurance companies. The Premier had the good sense to see and the pluck to say that to pass such a measure without notice to fire underwriters and without allowing them to be represented before the cabinet or a committee would be unjust. He therefore prevailed upon the author of the bill to withdraw it.

Montreal is providing itself with more fire engine hose. Five thousand feet was bought in the early part of the year, and at the meeting of the fire committee last Friday it was decided to purchase five thousand feet more. It will be the Perfection brand, made by the Canadian Rubber Company, the decision of Fire Chief Benoit being in favor of this brand, as against the cheaper article of another tenderer. Tenders were opened for wall ladders. What is known as the Pirsch ladder was discussed. Chief Benoit informed the committee he was not quite satisfied with these ladders, at least the longer ones, but he thought those of twenty feet and under would give good service. The committee decided to buy six Pirsch ladders under twenty feet in length at $1.25 a foot. A dozen Seagrave ladders, varying in price from $1.10 to $1.75 a foot, and in lengths from 24 to 32 feet, were also ordered.

LIFE AND ACCIDENT ASSURANCE.

When the storm of life is over, a life insurance policy is a rainbow in the sky of life for the bereaved family.

We understand that the Manufacturers Life Insurance Company, needing more room for their head office business, have decided to remove to the Eastmure & Lightbourn building on Adelaide Street, near Church.

An American paper gets off the following equivocal paragraph: "This truth prevails: Mr. M. was a good citizen. He lived uprightly. He exhibited his prudence by insuring his life, and died with perfect resignation. He had recently been married."

The National Life Assurance Company of Canada, Toronto, have issued an additional $500,000 worth of stock, making the total subscribed capital one million dollars. The whole issue was underwritten, we are told, by a syndicate of the present directors and shareholders, at a premium of twenty-five per cent. This increases the surplus to policyholders by a considerable sum.

A phase of the situation brought about by the strike of teamsters in Chicago is presented in the following despatch to the United States Review: "The teamsters' strike in Chicago is likely to involve the liability insurance companies in heavy losses, especially under the teams insurance policies. The Fidelity and Casualty Company has already received a death claim, and a number of injury claims have been filed. The policy contract does not exempt the companies from liability for injuries received during strikes."

The embezzlements for the month of March last in the United States have been collated by the Fidelity and Casualty Company, of New York. They amount to $887,113, which is by no means so large as in some previous months. There are none, we perceive, from either insurance companies or municipalities, and the largest item in the list is stealings from court trusts. Here is the list:

Banks	$214,300
Building and loan and other associations	26,000
Benevolent societies and institutions	15,649
Court trusts	500,100
Federal and State	13,366
Firms and corporations	112,575
Transportation companies	4,123
Miscellaneous	1,000
Total	$887,113

* * *

DRY GOODS NOTES.

John Kay, Son & Company, Limited, Toronto, are authorized by Government to increase their capital stock from $300,000 to $500,000.

The R. J. Devlin Company, Limited, Ottawa, has been granted a charter by the Dominion Government, to carry on a general and wholesale business as furriers, haberdashers, milliners, hatters, clothiers, etc. Capital, $100,000.

The value of wool, as indicated by the London sales, continues firm. At the sale held on Monday last, there was a good tone prevailing, and all the offerings of 13,000 bales odd were sold. Americans bought good lines of fine and medium crossbreds, and good greasy merino at advancing prices. Home buyers took large quantities of coarse stock.

The stock of the Montreal Cotton Company has made two or three very pronounced jumps upward during the last week, and the opinion prevails in some quarters that this betokens a coming merger with the newly organized Dominion Textile Company.

The Galt Knitting Company, of Galt, is erecting a new and enlarged factory, which is to be of concrete construction, the builders being the Woodruff-Robins Co., Limited, of Toronto. The dimensions of this new mill will be 120 by 132 feet, and four stories high; it will be fitted throughout with the most modern appliances. A gang of forty men is now at work on the construction, and the building is intended to be ready for occupancy about November next.

—Parrsboro, N.S., Board of Trade is agitating to have the Government construct, on the Intercolonial Railway, as part of the system, a loop between Amherst and Athol, to a point on the I.C.R. at or near Truro, by way of Southampton, Parrsboro, Economy, and other important villages. The scheme finds quite a number of adherents.

* * *

—In a debate in the Imperial House of Commons the other day, one member, in the course of a debate on the West Indian Islands, suggested that negotiations should be carried on with Canada with a view to this country conducting the government of those colonies. If, said he, they were attached to Canada, they would form something like a southern zone for the Dominion. Reorganizing and revitalizing the West Indies would add enormously to Imperial strength on the strategic highway of the world, and in the commercial centre of the new world.

* * *

—The Ontario Government's action in placing at the disposal of the trustees of Toronto University a sum of no less than $465,000, is to be commended. And perhaps not less so is its decision to conduct a full enquiry into the administration of the University, an enquiry, however, which, it is stated, will not necessarily affect the teaching organization. The buildings on which the money will be expended will, it is estimated, cost in all $1,600,000. They include a new General Hospital, towards which there is reason to believe the city will give $200,000; a physics building, a convocation hall, a museum for the science building, four men's residences, an addition to the women's residence, glass houses for commencing practical teaching in botany and forestry. The Premier, in announcing the grant. said that $250,000 in subscriptions from private parties would be forthcoming as soon as the bill was passed.

* * *

—An extraordinary case has occurred in Newmarket, the town a few miles north of Toronto, where a well-known barrister, Mr. Thomas Hiram Lloyd, was arrested for having refused to account for money which he had received in trust for the J. A. Weddell Estate. Since the arrest, dozens of farmers and others living in the vicinity of Newmarket, who claim to have money in Lloyd's hands, have taken alarm, and a very ugly state of things is developing. It is supposed that Mr. Lloyd, who is quite well known in Toronto, got behind in his accounts owing to his extensive dealing in British Columbia mining stocks, which did not prove satisfactory pecuniarily. His liabilities amount to $33,750, while the assets comprise several properties in the town and neighborhood. Some of the creditors seem to be disposed to abandon criminal prosecution if by so doing they can get their money back sooner, but another meeting, we understand, is to take place to-day.

* * *

LA BANQUE NATIONALE.

The forty-fifth annual general meeting of the shareholders of this institution was held at the office of the bank in the city of Quebec on Wednesday, the 17th May, 1904, at 3 o'clock p.m.

Mr. Rodolphe Audette, the president, took the chair, and Mr. P. Lafrance acted as secretary.

The president then presented the following report of the affairs of the bank:

Statement of the Bank's Business for the Year.

The balance at credit of profit and loss, on 30th April, 1904, was		$82,481 67
The profits of the year, after providing for accrued interest on deposits, and for bad and doubtful debts, amounted to		140,684 59
Forming the sum of		$223,166 26
Which was appropriated as follows:		
Dividend No. 80%, payable 2nd November, 1904	$45,000 00	
Dividend No. 81%, payable 1st May, 1905	45,000 00	
Transferred to reserve fund	50,000 00	
		$140,000 00
Leaving at credit of profit and loss account a balance of		$83,166 26

GENERAL STATEMENT, 29th APRIL, 1905.

Liabilities.

Notes in circulation		$1,483,861 00
Deposits bearing interest	$5,727,346 84	
Deposits not bearing interest	1,025,762 31	
		6,753,109 15
Unclaimed dividends	$646 88	
Dividend No. 81, payable 1st May, 1905	45,000 00	
		45,646 88
Due to other banks in Canada	58,730 55	
Due to agencies of the bank in the United Kingdom	96,230 38	
		154,960 93
Total liabilities to the public		$8,437,577 96
Capital paid up	1,500,000 00	
Reserve Fund	500,000 00	
Accrued interest and exchange	15,000 00	
Profit and loss account	83,166 26	
		2,098,166 26
		$10,535.744 22

Assets.

Specie	$119,204 02	
Dominion notes	530,726 25	
		649.930 27
Notes of, and cheques on, other banks in Canada	463,476 23	
Balances due from other banks in Canada	49,234 31	
Balances due from agencies of the bank in foreign countries	128,372 79	
		641,083 33
Deposit with Dominion Government for security of note circulation	75,000 00	
Call loans on stocks and bonds	289,232 40	
		364.232 40
Total assets immediately available.		$1,655,246 00
Current loans, discount and advances to the public	8,497,809 58

MARINE PROGRESS ON THE LAKES.

In the papers which have thus far appeared in the Monetary Times concerning Old-time Lake Craft nothing has been said about an intermediate stage of navigation on the Great Lakes of America, which may be called the tow-boat stage. This has got rather to have a distant, antique flavor, too.

When, about 1855 or 1860, the grain and coal traffic had become enormous, and that in ore showed rapid growth, sailing vessels were numerous, and detention in the intervening straits by reason of adverse winds came to be a serious matter. In the open lakes, 200 to 500 miles long and proportionately wide, advantage could be taken of wind from any direction by tacking if the wind proved contrary. But in rivers like the St. Clair, or the Detroit, or the St. Mary there was no room for large vessels to tack, and they had to remain in numbers at either end of these busy straits until the direction of the wind became favorable.

A lady who spent sixty years of her married life on the river Detroit reminds me of the great fleets which used to lie at anchor at the western end of Lake Erie, waiting for the "down river wind" to change so that they might pursue their way northward. On one occasion, Mrs. MacLeod says, her husband counted 125 sail of vessels from Kingston, Buffalo, and Cleveland thus detained outside the mouth of the river for a day and a night. They were detained in some cases for days and nights at a time.

In such circumstances something had to be done to overcome delay and demurrage, and tow-boats or tugs came into use to drag the vessels up stream or down. The writer, then a wee chap, remembers well the steamer "Gore," Captain John Sloan, being used among the first for this purpose. An old-fashioned British built paddle craft she was, with dark-colored hull and with a single funnel. The method then pursued was to lash the sailing vessel alongside the steamer, or to lash one on each side. Later on, this plan was abandoned, and vessels to the number of one or two at first, four or more later, were towed astern of the steamer, with intervals of several hundred feet between each. It was soon found that screw-propelled steamers were the handiest for this purpose, and these were built in great numbers in various ports from Chicago to Buffalo. Between 1865 and 1875 a Tug-boat Association or trust was formed for the adjustment of prices and regulating or facilitating traffic. Tugs were used, too, for rafting timber down the rivers from both the Canadian and the American sides of Lake Huron.

Not swiftness so much as pulling power was required in these boats, and some of them were remarkable in this respect. Among the earliest to make a reputation and to induce imitators was the screw tug "John Martin," built in Cleveland with the latest engine, and fitted with "a Philadelphia wheel," as the then novel form of curved blade was called. She drew about ten feet water, had a screw perhaps nine feet diameter, and performed the incredible feat of towing seven laden vessels against a two and a half mile current. Just before her, the favorite of the rivers of the chain was the bewitching little propeller "Hamilton Morton," a low, sharp, swift boat, reputed to be able to make eighteen miles an hour. Painted black, she resembled greatly in outline and style the torpedo boats of the present day, and some vessel captains competed for the honor of being towed by her. Marvellous pullers some of the little craft were. Only 70 to 100 feet in length, they would saucily hitch on to as many as four to six schooners or barkentines at one trip if vessels were plentiful enough or tugs happened at that end of the route to be scarce enough. The route was usually from Lake Erie to Lake Huron; and sometimes if the north wind rose or increased a tug would have to drop one of her vessels so as to make headway against the current with the rest. Vast would be the indignation of the skipper whose vessel was so dropped. "Rude Boreas, blustering railer," was but a summer breeze compared to his blasts of profanity. These tug-boat captains and mates had to be good navigators; but if through the negligence of the man in charge of either tug or tow one of the deep-laden ships ran aground—as might happen not unseldom at night or in a fog—imprecations would follow of an international width and fulness, for they could be heard all the way across the river. It seemed as if, to quote Milton:

> It was that fatal and perfidious bark,
> Built in the eclipse, and rigged with curses dark.

After this stage came that of the tow-barge and consorts, which means that a screw steamer, herself of considerable carrying capacity, would be provided with one, two, or three "consorts," which she would tow between upper lake and lower lake. Americans and Canadians were yet in the wooden age of vessel-building when this method was the vogue. These "barges," dragged behind a governing steamer, were of various sorts. Some of them fully-rigged sailing vessels of two, three, and four masts; others "razeed" (from the French word *rasé*, shorn); which is to say, with top masts cut down, leaving only the lower masts, fitted with fore-and-aft sails. Old hulls of steamers were likewise made into barges; their engines and cabins and top-hamper being removed they made roomy carriers of grain if their hulls were not so ancient as to be leaky.

Still, the acme had not been reached—there was a constant pressure for larger boats instead of more of them. Competition from the railways in grain-carrying and the growth of export demand was opening up a large future; therefore owners and masters of floating craft proposed to themselves to "keep up their end." Iron and next steel boats began to be built, consorts as well as steam barges. Cleveland, Chicago, West Superior, and Wyandotte on the River Detroit were presently turning out boats of 300 or 400 feet, whose sternposts and stems were forged in Pittsburg, their steel sides made of Clyde plates. The tow-barge and consort system was continued, a large proportion of the new steamers built being designed for tow-steamers. But this was a dozen years ago and more, and the increase in the size of freight boats on the lakes has gone on since as fast as, or faster than, Uncle Sam would deepen the waterways and harbors. Washington officials and Congress itself must have often wondered at the stubborn insistence, year after year, of vessel owners and grain merchants, backed up by individual Congressmen from the Lake States, upon more and more millions for lake and river and harbor dredging. Doubtless they have asked many a time and oft: "What sort of traffic is it that so eats up millions upon millions of our appropriations, and still asks for more?" But people as far away as Washington equally with people much nearer the lakes can have no idea of the enormous tonnage of lake traffic until they see it. Very likely the bringing once in a while of a Congressman west to see the unending procession of Detroit river has done good. He could go back and tell the East and South what he had seen, and so educate them about their own country. We know that—

> "The Congressman, once on his talking legs,
> Stirs up his knowledge to its thickest dregs."

But we once heard one of these garrulous dignitaries, enlightened by the sight and by some predigested thinking over irrefragible figures and palpable facts, launch into a panegyric of that strait which seemed for the moment to make the Suez Canal seem as out of date and commonplace as Baalbec or Palmyra—its traffic as trivial as the trade of Tyre and Sidon. "Thou say'st an undisputed thing in such a solemn way," was the commentary of one auditor of that most A-merican speech (delivered in the United States language). He was only saying in a florid and senselessly boastful way what was quite true, though by no means generally known, namely, that the annual tonnage steam and sail through the River Detroit greatly exceeds that of the Suez Canal. And the former is only an eight months' traffic, while the latter is twelve.

An ingenious shipbuilder on Lake Superior, Mr. McDougall, designed a type of lake carrier known at first as the cigar boat, and later as the whaleback, which, when loaded is almost wholly under water. These boats are found economical, are unaffected by wind and almost unharmed by wave, having everything on their curved and

TOWN OF MEDICINE HAT

Tenders Wanted.

The Town of Medicine Hat has the following **four** lots of Municipal Debentures for sale, for which tenders will be received up to nine o'clock on the **19th day of June, 1905:**

$12,000.00—Natural Gas.

$10,000.00—Water-works.

$30,000.00—Municipal Building.

$2,600.00—For the purchase of the New Edinburgh Natural Gas Well, Gas and Water Plant. These four lots of Debentures all date from the **1st of August, 1905,** bear interest at 5 per cent., and are repayable in twenty equal annual instalments of principal and interest. For particulars address the undersigned. The highest or any tender not necessarily accepted.

W. N. ADSIT,
Sec.-Treas. Town of Medicine Hat.

City of Kingston Debentures.

Sealed Tenders will be received by the undersigned up to three o'clock p.m. on **Thursday, May 25th, 1905,** for the purchase of the whole or any portion of the following Debentures, bearing interest at the rate of 4 per cent. per annum, payable semi-annually on the 1st May and 1st November:

$82,000—Light Debentures, payable by annual instalments within thirty years from 1st May, 1905.

The highest or any tender not necessarily accepted. For further particulars apply to

F. C. IRELAND,
City Treasurer.

WANTED

The Agency of a good Fire Insurance Company for the City of London.
Apply Box 13, Monetary Times.

TOWN OF DAUPHIN

Debentures.

Sealed Tenders, marked "Tenders for Debentures," addressed to the undersigned Secretary-treasurer will be received up to the **20th of June** for the purchase of Debentures amounting to **$35,000,** Debentures of the Town of Dauphin, viz.: **$25,000** for electric light plant, erecting power house, and purchasing site; **$10,000** for completion of Town and Fire Hall.

Debentures payable in twenty years, on the **first day of August, 1925,** divided into bonds of $1,000 each, and bearing interest at 5 per cent., payable on 1st day of August in each year, the principal provided for by sinking fund. Debentures to be made payable at the branch of the Bank of Ottawa, Winnipeg, Man. Purchaser to make payment at the branch of the Bank of Ottawa, Dauphin, Man.

WM. RINTOUL,
Sec.-Treas. the Town of Dauphin.
Dauphin, 9th May, 1905.

water-washed deck, battened down, as it were, and showing hardly more above water than the "conning-tower" of a submarine. A good many of them have been built, and they have been found to pay, for they are cheap to construct—the consorts, of course, for the whaleback steam barge is a more expensive proposition.

Toronto, 13th May.

⁂

AN ALBERTA DISTRICT.

In a far west corner of our northern and western territory of Alberta is a district of which not much has hitherto been heard in Eastern Canada, but which, unless the commercial body which advertises it is misinformed, is an especially important and inviting section. This is the District of Lacombe, so named after a distinguished pioneer missionary. To reach it, the traveller takes a train at Winnipeg for Calgary, and changes to the Calgary and Edmonton Railway; going north, he crosses the Red Deer River (an affluent of the Saskatchewan) at the town of Red Deer, sees the Battle River, and finds himself in a well-watered series of valleys and slopes, with creeks, lakes, springs, and wells all about. This district, of something like four thousand miles in extent, which means two and a half millions of acres, shows coal outcroppings, has wood in abundance, and a rich soil, is characterized by mild winters and a light snow-fall; "blizzards are unknown, and the cold spells of short duration," the influence of the warm winds of the Pacific being there felt. Within the district are seventeen post-offices, ten churches, and thirty-six schools.

This information we derive in the main from an illustrated booklet issued by the Lacombe Board of Trade. If there is any exaggeration about the figures or the facts that body is responsible. But the certificates which are appended, emanating from cattle-ranchers, farmers and settlers thereabout during periods of from six to sixteen years, speak volumes for the character of the country. And the illustrations of dwellings and barns, of flocks and herds, of fields and streams in the district, to say nothing of school-houses and elevators, convince one that this must be an almost ideal country for a farmer or a rancher. The general appearance of the country from the Calgary and Edmonton Railway can be vouched for by the writer of this notice, who found it in September, 1903, much like other parts of Alberta, so much so that a paragraph he then penned, descriptive of the country along the main line of the C.P.R., may also answer to describe the surroundings of Red Deer and Lacombe:

"With an abruptness that is very striking, we leave such rocky fastnesses as have hemmed us in of late, and at noon are in a ranching district, with pasture slopes and vales of inviting green. Horses by the hundreds on one side the train, cattle by the hundred on the other. Trails, wire fences, occasional houses, cattle near and far, are the characteristics here. So wide is the landscape since the train left the passes that we no longer have to crane our necks and strain our throats to describe the wonders passed through. The prospect widens; mountains and foothills bound the horizon, but close by hay-cocks and ricks, farm dwellings, roaming cattle, and an occasional village tell of a region that is no longer of a scenic and mining nature. The sun is bright and warm; the clouds of a wondrous softness; the air balmy to a degree. In fact, the scene lulls one to a dreamy state after the excitement of grander surroundings."

Among the advantages claimed for the Lacombe district is that it is adapted to the successful raising of cattle, and there are many pure-bred cattle thereabout. Then again: "cattle graze out all winter, while steers are fattened on native hay without the supplement of grain, and with no shelter but bluffs of timber and scrub. This is hard to credit, but hundreds are thus fattened each year." It is argued that where conditions exist such as this district enjoys, the hog and the hen should be factors in a farmer's progress, and that a first-class quality of pork can be produced on the small grains so easily grown. As to poultry raising, it is most promising; the supply has not been equal to the local demand.

Dairying is an industry pointed out by nature for this locality. There is "luxuriant, limitless pasturage, abundance of good water, and a bracing atmosphere to give vigor and healthfulness to stock. * * * Winter dairying is exceptionally profitable. Lacombe has one of the best creameries in the West. It was built, equipped, and is owned by the farmers, at a cost of $6,000, and is operated by the Government." This prominent fact shows the modern practical spirit of the farmers of that neighborhood.

In case any one should fear lest his family or himself would become lonesome, we may re-assure him by saying that Gull Lake, some eight miles from the town of Lacombe, and having an area of forty square miles, is becoming a favorite resort. Already there are two small steamers upon it, and presently there will be a good hotel. "Boating, bathing, fishing, and shooting are pastimes that can be enjoyed amid surroundings as attractive and picturesque as any in the West. * * * Ducks, geese, rabbits, prairie chickens and partridge are plentiful." More information follows, but we have said enough, surely, to show that this specimen district of only one of our western provinces or territories possesses great charms.

⁂

NORTH OF ENGLAND LETTER.

These columns have already reported the expression of butchering opinion on the cattle embargo. It is proper, therefore, to give the reply of the York farmers to the York butchers. This is summed up in a resolution affirming pleasure because of the firm attitude of our Board of Agriculture on the importation question. One of the farmers said that the butchers wanted to see "Canadian beef in the York (cattle) market competing with British farming. It was ridiculous!" The same speaker declared that it would pay Canadians better to export fat beasts at £23 rather than store cattle at £8. Perhaps this comment on other people's business helps to redeem the selfishness of the other remark. But even farmers have heard on "competent authority" that the Canadian animals landed at Birkenhead are "sounder than English cattle." However, the author of that message was greeted with a cry of "Rubbish!" The York farmers have, therefore, closed their ears angrily, and a removal of the present restrictions can only be effected against the wills of them and their like. As has been indicated before, abrogation of the embargo is contingent on the amount of courage possessed by the administration which is to follow the present moribund Government.

Butter from Finland and Sweden is taking a front place in the estimation of Manchester dealers now. Finnish commands almost the price of the choicest Danish, and the fact that these butters are available in large bulk is helping them into favor. It is noteworthy, too, that Australian supplies are coming in more freely. Between July 1st last year and mid-April this year Australia has sent 20,000 tons more than two years ago. New Zealand in the same space of time has exceeded by 5,000 tons. Withal, the imports this year into this country run 360 tons a week less than a year ago. There is room, then, for Canadian butter of the requisite type.

The Ontario Bank.

Dividend No. 95.

Dividend No. 39.

Notice is hereby given that a Dividend of Three and One-half per Cent. upon the Paid-up Capital Stock of the Bank has been declared for the current half-year, being at the rate of Seven per Cent. per annum, and that the same will be payable at the Bank and its Branches, on and after

Thursday, the First Day of June next.

The Transfer Books will be closed from the 17th to the 31st of May next, both days inclusiv

The Annual Genera Meeting of the Shareholders of the Bank will be held at the Banking House, in Toronto, on TUESDAY, the 20th day of June next. The chair will be taken at twelve o'clock noon.

By order of the Board,

The Traders Bank of Canada,
Toronto, 20th April, 1905.

H. S. STRATHY,
General Manager.

During the Easter holidays pedestrians have been slain in unprecedented numbers by automobiles. The very young and the very aged are no longer safe in the roadways, for the rich man laughs at $50 and $75 fines, and observes no speed limits that are not imposed by his enemies. Our sociological prophet, Mr. H. G. Wells, tells us that motorists must eventually be provided with special roads. Meantime the poor pedestrian might well be provided with accident policies at the expense of the fiery automobilists.

Yorkshire has recently been upset by the railing of some Protectionist newspaper in Australia against goods made of shoddy. "Filthy fever-laden rubbish from the hospitals and slums of Europe" is alleged to carry to the colonies the undestroyed germs of disease. Some such accusations have been made, though doubtless not so recklessly in Canada; and, perhaps, they may be believed in. But shoddy-working Yorkshire has no sympathy with allegations that are belied by the disease and mortality returns in the rag-working towns. Surely it should be when the raw rubbish, with its slum filth and hospital fever germs is opened out, that its ill effects should be first and worst felt. Yet Batley and Dewsbury are sweetly oblivious of their dangers; they are as healthy as though no poisoned rag ever came within their precincts. The disease-germ that can survive the boiling, biting liquors of the dye-bath, the scouring, hot-pressing and steaming to which the rags are at one stage or another subjected has probably to be yet discovered. Short of their actual destruction by burning, our maligned shoddy cloths are, perhaps, sterilized more effectually than they could be by any means.

Farmers in this country are in the frame of mind to organize for joint protection, and to make their influence politically felt. The programme of the Central Chamber of Agriculture indicates the general aspiration fairly well. Almost the first of their demands is that all foreign stock should be slaughtered at the place of debarkation. Other aims are to obtain reductions in fire, employers' liability, as well as cattle insurance rates; to have research and experimental farms on a large scale; to obtain greater equality of rating in different districts; to obtain legal aid cheaply, and to organize co-operative systems of selling and buying. Perhaps it is only trite to say that in several of these particulars the farmer is his own worst enemy. But the farming intelligence is awakening, and it is well that agricultural Canada should be alive to developments to be expected.

Retailers in most lines can report a continuation of good buying. It is they and the stock broking class who are most positive that more money is about. The stimulus must soon be communicated to such manufacturing trades as have not been called on to respond to the increased demand. There are weak points in the commercial situation still, but the time is not an inauspicious one for the efforts of would-be exporters. Our official returns indicate that manufacturers of metal, machinery and the agglomeration called miscellaneous articles are being brought into the country at a rate greatly exceeding that of the two past, or any preceding years.

* * *

THE FUTURE OF RAILROADING.

Mr. Stuyvesant Fish, president of the Illinois Central Railway, made some suggestive remarks at the seventh session recently of the International Railway Congress at Washington. Incidentally, he compared the growth of railway traffic in the United States and Great Britain between the years 1889 and 1903. Passenger traffic in Great Britain, he said, increased 54.2 per cent.; in the United States, 47.2 per cent. Ton of freight in Great Britain increased 49.2 per cent.; in the United States, 141.7 per cent. Passengers carried one mile in the United States increased 81 per cent.; tons one mile, 152 per cent.; mileage increased 33.9 per cent. And then he went on to say that, vast as has been the growth of the railroad system on this side of the Atlantic, we in these newer countries may now look more and more to the experience of Europe for light in dealing with the problems which are beginning to confront us on account of our increasing population and civilization. This will involve a vast expenditure of capital, and it may be that, while we shall have met and overcome all the difficulties, the capitalization of our railways, which in the United States is now $63,186 per mile, may approach that of the railways of Great Britain, which is $277,475 per mile. "While," he said, "I hardly think we shall go that far, I am certain there must be a very great increase above the figures now prevailing. This is because we must now do what they did at the outset—provide second, third and fourth tracks, and separate, at least in the densely populated towns and cities, the plane of railway traffic from the plane of street travel. Nor is this by any means the only point on which we look to Europe for enlightenment. The preponderance in the older countries of passenger traffic in its relation to freight traffic presents a condition which is confronting us more and more. Already in the Eastern States the proportion of the revenue derived from the carriage of freight—to wit: 54 per cent. of the total receipts from operation—is as low as in Great Britain, although in the interior and in the West the receipts from freight still form upward of 70 per cent. of our total revenue."

* * *

INSURANCE INSTITUTE OF TORONTO.

On Friday evening last, 12th May, the sixth annual meeting of the Insurance Institute of Toronto was held in St. George's Hall, Elm Street, the retiring president, Frank Sanderson, F.I.A., in the chair. There was a good gathering of insurance men on the occasion.

The membership of the Institute has increased to 444, and the educational work among the younger members has proved both attractive and successful. Indeed, no less than fifty clerks wrote on the recent examinations held in connection with the Educational Syllabus. Mr. Sanderson and his associates in office were given a hearty vote of appreciation. The retiring secretary, Mr. Tarr, was presented with a substantial purse in appreciation of his labors during the session.

After the submission and acceptance of the annual report the officers and council for the incoming year were elected: Hon. president, C. C. Foster, Western Assurance Co.; president, J. B. Laidlaw, Norwich Union; vice-president, P. C. H. Papps, A.I.A., Manufacturers Life; secretary, H. S. Sweatman, Norwich Union; treasurer, Mr. Harvey, North American; curator, J. K. Pickett, Imperial. Council—A. Wright, London & Lancashire; T. Bradshaw, F.I.A., Imperial; C. H. Fuller, Continental; A. Kirkpatrick, Ætna & Phœnix; D. E. Kilgour, A.I.A., North American; F. J. Lightbourn, Ontario Accident; J. K. Macdonald, Confederation; J. Maughan, Hartford; G. R. Payne, C.F.U.A.; F. Sanderson, F.F.A., Canada Life; P. H. Sims, British America; E. R. Tarr, M.A., Canada Life; E. Willans, Imperial Accident.

The annual report shows a growth in membership of fifty during the year. A number of papers on insurance subjects were contributed and discussed. The subjects of the papers were specially selected so as to have a direct bearing on the examination syllabus. The report acknowledges the debt owed by the Institute to those gentlemen who have enriched its records by their papers during the present session, and among others, to Mr. Edmund Burke, president of the Ontario Association of Architects, who contributed an excellent paper on "Building Construction." Mr. John B. Laidlaw's public illustrated lecture in St. George's Hall, on "Lessons to be Learned from Conflagrations," was attended by a crowded audience, and did much to draw favorable public attention to the Institute's work. In addition to the monthly meetings, an interesting Fire Hazard Survey was made at Niagara Falls on Saturday, July 9th, 1904, under the supervision of Messrs. W. E. Fudger and H. A. Sherrard. The inspection included the various power plants and the National food factory. No fewer than fifty Toronto candidates went up for the written examinations, four more than a year ago. These examinations lasted a week, and covered 24 subjects. There were 25 candidates for the first examination, or parts thereof; 13 for the second examination (Fire Branch), or parts thereof; 11 for the second examination (Life Branch), or parts thereof; and three for parts of the third examination (Fire Branch).

"The council is gratified to be able to state that during the past year the work of the Institute in general has been well sustained, and that the beneficial influence of our organization is being felt at home and noticed abroad. It is not too much to expect that the successful local insurance officials of the future will be those who are now laying the foundations of their success while members of this Institute."

* * *

FOR GROCERS AND PROVISION DEALERS.

The price of cheese on the country boards continues quite high and firm. From 9½ to 10c. seems to be the prevailing quotation during the week, or rather the prevailing selling price, for in several cases a fraction lower was all that was offered, and the cheese remained largely unsold.

The report of the Land Corporation of Canada, for 1904, issued in London this week, shows a credit of £9,625, including £7,712 brought forward. The directors recommended a dividend of one shilling and sixpence per share, or 7½ per cent., also the carrying forward of £4,000. The farm lands sold realized $3,499.

Exporters of apples and other green fruit are still indignant at the treatment they receive from transportation companies in the matter of shipping tender fruits to the seaboard in summer and fall and to the home markets during winter. They complain that the freezing of apples in transportation during the last two or three winter seasons caused most serious losses to exporters and in many cases wiped out the profits of the entire season, besides bringing Canadian fruit into bad repute in the British markets.

The Ontario Wholesale Grocers' Guild held their annual meeting in Toronto on Tuesday last, and elected officers as follows: President, George H. Bristol, Toronto and Hamilton; vice-presidents, T. B. Escott, London; W. G. Craig, Kingston; Price Committee, J. F. Eby, Toronto; Thomas Kinnear, Toronto; H. C. Beckett, Hamilton; T. B. Escott, London; auditor, A. G. Osborne, Hamilton. One point raised was the margin of profit for retailers on proprietary goods, and it was agreed that this profit was altogether too small in proportion to the expense of handling the goods. It was recognized that the more prosperous the retailers, the more secure is the position of the wholesaler.

A dispatch this week from North Sydney, says that a new solution of the ever-pressing bait question was about to be offered to the fishermen of the Maritime Provinces. A French firm offers to supply free samples of preserved bait as used in France. Machinery for the operation of a bait preserving plant is now on its way to Halifax by the steamer Norden. When this arrives, the firm expect to preserve bait there on an extensive scale. The new system is claimed to have great advantages over the cold storage plan, as vessels can go to the fishing grounds and remain there as long as they wish with constant fresh material, instead of having to return to port frequently for cold storage bait. It also removes the trouble and expense of carrying large quantities of ice.

A correspondent of Commercial Intelligence writes as follows: "Most of the fruit growers to the south of Paris and in some districts of Normandy have combined. They work through a syndicate, whose agents receive at the railway stations their fruit and despatch it to the coast. Next season the syndicate will save the growers the trouble of bringing their produce to the railway station. The syndicate will provide its agents with automobile wagons which will go round their respective districts and collect the fruit, thus saving the time of the fruit growers. The working of this syndicate is about as perfect as it is possible to be. It manages everything; provides baskets, conducts correspondence, pays all traffic expenses, and so well has it arranged matters with the railway companies that transport charges have been reduced almost to a minimum. In return for this service the syndicate received 5 per cent. on results. The growers do not even know where their produce is sent to. That depends upon the telegrams received from the agents of the syndicate in England. One thing, however, the fruit growers do know, and that is, that once a month they receive better prices than they would have done had their produce been sold in the Paris market." And there can be little doubt but that some such plan as this will prove the salvation of the Canadian fruit-growers also.

* * *

ANSWERS TO ENQUIRERS.

J. C. R., City.—Wishes to know something about the projected Sterling Bank of Canada. In reply, an Act to incorporate a bank of this name was passed on 25th June, 1903. The chief office of the bank was to be at London, Ontario. The provisional directors were William Henry Wortman, Samuel Gregory Oren, Oscar Benson, Harold Lionel Atkinson, and Thomas Henry Luscombe. This charter lapsed on 25th June, 1904. A London correspondent says, on the same subject, "No prominent men here interested in the venture. Do not consider there is any likelihood of the scheme going ahead. The man last named, who is a lawyer, is regarded as the starter of the proposed bank." We have not heard that any Toronto parties have tried to resuscitate the venture.

Clerk, Ottawa.—In old English dry measure, three bushels are a sack, and twelve sacks a chaldron; whereas eight bushels are a quarter and five quarters one load. But the Standard Dictionary defines a chaldron as "in England generally 32 to 36 bushels, and in the United States 2,500 to 2,900 pounds."

* * *

—The total realty assessment for the city of Winnipeg amounts now to $53,714,430, which represents a net increase over last year of $12,607,560. The population of the city is estimated at 79,975, or a gain of 13,000 over last year. Some rash guessers have placed the population at a hundred thousand, but the above figures are probably more reasonable.

* * *

—Building in Vancouver is very active just now. Among the larger structures now on the tapis is a $60,000 one of eight stories, with a frontage of 125 feet, and a depth of 120 feet, for Kelly, Douglas & Co., wholesale grocers, at a cost of $60,000 to $80,000. Immediately adjoining, Robert Kelly and F. Burnett purpose to put up another eight-story building, to cost $50,000.

* * *

—British Columbia papers to hand teem with reports of combines. Among the latest suggestions are combinations among the lead producers on the one hand, and the shingle mills on the other. The purpose said to underlie the proposition of the former is to secure a good market in the Far East, that in Canada being limited, and that in the United States being closed owing to a duty of over $2 per ton. The London market, too, is for lead so low as to be unprofitable for our lead producers. In regard to shingles, it is said that ninety per cent. of the manufacturers of these have entered into an agreement as to prices, and an "Export Lumber and Shingle Company, Ltd.," been formed to market the product. Prices have already been raised.

* * *

—The Dominion Government steamer "Lady Laurier" is engaged in the work of conveying materials to Sable Island for the new Marconi station to be erected there. A wireless station is also being established at Camperdown, the outmost signal station at the entrance to Halifax Harbor. Vessels fitted with wireless apparatus passing Sable Island will send their messages in the direction of the island. Being received, they will be transmitted to Camperdown, 160 miles distant, where telegraph companies will have connection, and messages will be quickly transmitted to all parts of the world. Vessels having apparatus on board when as far as one hundred and fifty or two hundred miles south, south-east or south-west of Sable Island, will be able to communicate to the island station and have the news sent over the world.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST EAST TORONTO.

Mercantile Summary.

Consent to assign has been filed by J. Macbeth Taylor, produce merchant, of Montreal. He was formerly a partner in the once prominent firm of Geo. Wait & Co., who, however, after Mr. Wait's death gradually retrogressed, and eventually failed in 1902, after which Mr. Taylor resumed in his own name.

The American Radiator Company have taken a five years' lease of the Cockshutt factory plant in Brantford, with option of purchasing it at the expiration of that time. The former concern has eight factories in the United States and two in England, and they expect to employ 150 men at the Brantford branch.

We hear from St. John, N.B., of the suspension of Belyea Bros., retailers in the dry goods line. The brothers were long employed with the prominent firm of Manchester, Robertson & Allison in St. John, and started business under apparently promising conditions in the spring of 1904. Their liabilities are reported at about $20,000.

A brace of small failures are reported from Ottawa. Eugene Prieur was formerly in the flour trade, but for the past eight or ten years he has carried on business as a tailor. His affairs have now passed into the hands of W. A. Cole, assignee.—George Hood, in a small jobbing confectionery way, has also assigned to W. A. Cole, and his assets are to be sold by auction.

J. A. Bourget, general dealer, at Lacaux Sables, Que., on the Batiscan river, has assigned. He was formerly manager for a lumber concern, and began business three and a half years ago. His liabilities are shown at $5,237.—The estate of J. A. Fortin, general dealer, Sherrington, Que., has been put into insolvency. Recently he was reported as offering his creditors 75 cents on the dollar, which offer was apparently declined.

The Canadian Pacific Railway has awarded contracts for the construction of the line from Toronto to the Magnetawan river. Grading on the sixty miles from the Magnetawan to Sudbury has just been completed. A number of surveying parties are at work locating a route from Walkerton to Flesherton, on the Owen Sound division of the C.P.R., and construction is expected to begin very soon. Priceville, Durham and Hanover, centres of a rich agriculture section of country, will be served by this branch. Surveying parties, who shall map out a new road from Victoria Harbor running east, and to the north of Lake Couchiching to Sharbot Lake, are to be started on 1st July next. This is the C.P.R.'s latest move toward securing a direct grain route from Georgian Bay to salt water in competition with the Canada Atlantic. This route will cut 150 miles off the present course from Lake Superior to Owen Sound, and east to Montreal via Toronto, which will indirectly afford relief to the congestion of traffic on the Ontario and Quebec division.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Debentures issued for 3 or 5 years. Debentures and interest can be collected at any agency of Molsons Bank without charge.

WILLIAM F. BULLEN,
Manager.

London, Ontario, 1905.

The insolvency is noted of L. Onesime Cotnoir, grocer, Coaticooke, Que. He was formerly a farmer, and bought out one C. Fournier only last summer, so that his mercantile enthusiasm has been soon quenched.

Mercantile Summary

The R. McKie Buggy Company, of Plattsville, Ont., are about to remove their factory to Hamilton, where they have secured a site in the Annex. The Canadian Meter Company, of Windsor, Ont., is also about to build a factory in the same locality.

It is expected that the output from the Dominion Iron and Steel Company's iron ore properties at Bell Island, Nfld., will this year reach 500,000 tons, which is some 25 per cent. in excess of the production last year. Most of this will be used at the works in Sydney.

Lieut.-Col. Anderson, chief engineer of the Dominion Marine Department, has been elected a member of the council of the Institute of Civil Engineers of Great Britain. He is the only Canadian on the council. The first colonial engineer to be a member of this distinguished body was Mr. T. C. Keefer.

It is officially announced that the Halifax and Southwestern Railway Company has succeeded in settling all difficulties as to the route, and that construction work will be rushed ahead and completed this year. The route is to follow the shore, and will run through Liverpool, crossing the river at the town. Eighty miles of the road remain to be built.

A report from Greenwood, B.C., says there is a probability of the Great Northern Railway Company purchasing the charter of the Vernon and Midway line. There are, says the Province, an immense number of valuable properties lying idle in the Kettle River country for lack of transportation, and it is a foregone conclusion that enough ore tonnage alone could be secured to make the road pay its way from the start. Again, the charter permits the company to expropriate lands for right-of-way for branches and terminal purposes, and if the Railway Committee at Ottawa decides that the V., V. and E. charter has expired, this charter can be used to build a connection with Midway from Greenwood.

A New York despatch under date of 13th inst. states that the plans for constructing an international railway tunnel under the Detroit river, between Detroit, Mich., and Windsor, Ont., have been completed, and work will be inaugurated soon. The undertaking will cost from $10,000,000 to $20,000,000, and will probably require two years to complete. The Canadian Southern Railway, now controlled by the Michigan Central through a 999-year lease formally ratified by the Dominion Parliament last year, will be the holding company for the international tunnel enterprise. It will either issue new securities outright or will guarantee the securities of the tunnel company. Arrangements are said to be under way whereby the Grand Trunk will use the tunnel on a rental basis, while other roads in the future will be allowed the use of the tunnel on a like basis.

Mercantile Summary.

Messrs. C. Stephens & Co., of Collingwood, are having built a concrete elevator.

The city of Kingston is asking tenders for four per cent. debentures to the extent of $82,000. They are payable by annual instalments within thirty years.

Geo. Clark's warehouse, D. Menzie's butcher shop and other buildings in Amherst, N.S., were last week consumed by fire at a total loss of about $10,000, with only partial insurance.

The Guelph Windmill and Manufacturing Company, capital $50,000, has received a charter to manufacture and deal in windmills and farm implements. G. A. Black, of Guelph, Ont., is interested.

Westmount, Montreal, ratepayers have voted in favor of the town's issuing bonds for $250,000 for the construction during the next five years of permanent sidewalks, macadamized roads, drains, etc.

The Fairbanks & Morse Co., Chicago, manufacturers of gas engines, pumps, etc., are about to establish a large factory on Bloor Street, Toronto, and, it is said, have already secured a site of ten acres.

A demand having been made upon Bernard Rosenfield, of Montreal, who has been doing a small jobbing dry goods business under the style of the Canadian Commission Co., he has consented to assign. He has been in business since 1901.

The concentrator at Le Roi mine has, says a report just to hand from Rossland, B.C., been partially run for the purpose of testing the machinery and making a few experiments. Several electric motors are still to arrive from Peterborough, Ont.

A small building in Toronto, occupied by Scholey Bros. Co., wholesale lumber merchants, was a few days ago damaged to the extent of $2,000 and the stock of lumber to the extent of $4,000; insured. Chief Thompson fell down a manhole and barely escaped serious injury.

The Duplex Hanger Company, which has a charter under the laws of Ohio, is authorized to manufacture and deal in joist hangers and all kinds of hardware building materials and fixtures in the Province of Ontario. Its capital (for use in that Province) is limited to $40,000.

—The Colonial Construction Company, Limited, Montreal, capital stock $2,000,000, has received a Dominion charter. It will carry on general contracting and constructing work, and the various forms of business connected therewith. J. C. Macdiarmid, of Montreal, is one of the leaders in the enterprise.

The Dominion Government has granted a charter to the Explosives Company, of Canada, Limited, whose capital is $500,000, and chief place of business at Montreal. It will manufacture explosives, ammunition, etc. W. J. Lewis, of Montreal, and J. M. Lynch, of Lachine, are members of the company.

PORT ARTHUR & FORT WILLIAM.
Post Office ddress, — — Port Arthur, Ont.

Mercantile Summary.

The Fort William Dredging and Harbor Improvement Company, capital stock $150,000, has been incorporated. It will build dry docks and breakwaters, etc. Among the charter members are W. Stevenson and E. R. Wayland, of Fort William.

The large summer hotel at Burleigh Falls, Stoney Lake, Ont., belonging to Thomas Darcey, has been destroyed by fire at an estimated loss of over $8,000; insurance, $5,000. The hotel, which is a favorite one, is to be rebuilt immediately.

The Northern Navigation Company's steamer, "United Empire," has been thoroughly overhauled, and is now, under the new name of the "Saronic," being placed on the company's route between Sarnia and Sault Ste. Marie, Port Arthur, Fort William and Duluth.

Weir & Co., of Glasgow, the Scotch firm of shipbuilders, have been unable to make satisfactory arrangements with the Mexican Government for a steamship service between Mexican and British Columbian ports, and the proposal is understood to be off for the present.

The Canadian Northern Railway Co. will extend their Oak Lake branch northward this summer, crossing Lake Manitoba at the Narrows, and connecting with the main line at Ochre river. It is supposed this branch will form a section of the proposed road to Hudson's Bay.

The Calumet and Algoma Mining Company, Limited, of Sault Ste. Marie, has been granted an Ontario charter empowering it to carry on a mining, milling and development company. F. Roehm, contractor, of Calumet, Mich., is one of the prominent provisional directors. The capital stock is placed at $1,000,000.

It is the intention, we are told, of the Intercolonial Railway authorities to put on the Ocean Limited train earlier than usual this year from Montreal to Halifax, with connection at Moncton for St. John. About June 4th is the time set. This train will probably leave Montreal in the evening at 7.30, whereas the Maritime Express on the same road leaves Montreal at noon. Both trains will make connection at Moncton for St. John, while the usual connection will be made at Truro, Sydney and Prince Edward Island.

Canadian goods continue to make progress in some quarters outside the Dominion. The Ontario Wind Engine and Pump Co. tell us of an order received for two Canadian air-motor outfits from Paris, France. In speaking of previous shipments the agent says as follows: "Have just finished erection of 12-foot air-motor sent me last fall. This outfit is a remarkable one. It is on the bank of the Mediterranean Sea, at Monte Carlo. It pumps water from a river, and elevates 180 feet to a distance of 1,275 feet, and is a complete success. The two present outfits go to Marseilles."

Mercantile Summary.

Mr. W. A. Clements, assistant engineer to the city of Toronto, has been appointed city engineer for Vancouver at a salary of $3,000 per year.

The renewal of the $6,000,000 loan for the Temiskaming and Northern Ontario Railway for six months, goes into effect this week. Treasury bills to the amount of the loan and exchanges to the amount of £21,000 for interest and £600 for the stamps required to be affixed thereto under the English law governing such transactions were forwarded some time ago to the London firm that made the original loan and the renewal.

Electrical machinery continues to make progress. We are told that the Newcastle Portland Cement Company, of Newcastle, Pa., has placed an order with the Westinghouse Electric and Manufacturing Company for two 175 kw., three-phase, alternating-current generators, two exciters, and the necessary switchboard for the control of this apparatus. These machines are intended to supply current for operating a number of induction motors, ranging from 10 to 100 h.p. each, which were also included in the contract.

The third annual report of the Temiskaming and Northern Ontario Railway Commission shows that for the year ending December 31, 1904, the expenditure on Division No. 1, between North Bay and New Liskeard, was $1,988,219.03, and on account of the extension northerly from New Liskeard $496,026.16, a total of $2,484,245.19. From this was deducted $19,019.63, received for the sale of cordwood and car rentals, leaving the net expenditure at $2,465,225.56 for the year. The total expenditure on the road from its commencement to the date named, as given in the summary, was $4,485,317.98. This included $4,111,262 for construction, $266,904 for rolling stock, $6,317 for exploration, $17,536 for water tanks.

The annual general meeting of the Quebec and Lake St. John Railway Company was held in Quebec City on Friday last. The report shows that the number of passengers carried during the year 1904 was 266,459, compared with 247,905 in the previous year, and the tons of freight numbered 321,391 against 318,730 the year before. The average earnings per passenger were 58 1-3 cents, as compared with 59 1-3 the previous year, and per ton of freight 97 cents, as against 86 1-3 in 1903. A pleasing indication of the agricultural growth of the Lake St. John region is afforded by the fact that the cheese carried by the railroad last year was 2,693,077 pounds, as compared with 1,711,000 pounds in 1902. The company will shortly begin constructing a branch to La Tuque, on the River St. Lawrence, for which and other purposes of improvement it is issuing in London £300,000 ot 4 per cent. Prior Lien bonds. Mr. Gaspard Lemoine was elected president, and Wm. Hanson and J. T. Ross vice-presidents of the company for the current year.

A large deposit of fire clay has been discovered on a farm at Sydney Forks, C.B.

Mercantile Summary.

The Canadian Electrical Association will hold their annual convention in Montreal on the 21st, 22nd and 23rd prox., when it is expected that some 200 delegates will be present.

The Fidelity Gas and Oil Company, Leamington, Ont., has been incorporated with a capital stock of $100,000. It will do a mining, milling and development business. A. S. Holmes, of Leamington, and J. W. Rosendale, of Buffalo, are members.

The Breitung Iron Company, a corporation incorporated under Michigan laws, has been granted power by the Ontario Government to carry on an iron and other mineral mining business in certain townships in Algoma, with a capital not exceeding $1,000,000.

Incorporation has been granted J. Rattray & Co., Limited, Montreal, for the manufacture and dealing in cigars, cigarettes, and all kinds of tobacco. The capital stock is $100,000. It carries on the long-established business of J. Rattray & Co.

The citizens of Fort William, Ont., last week carried by an overwhelming majority the by-law to grant a bonus of $300,000 to the Grand Trunk Pacific Railway for the purchase of the mission property, on which the company is to locate its principal works, docks, elevators and offices in that town for the Superior division.

The Hamilton, Grimsby and Beamsville Electric Railway Company have decided to abandon the Vineland extension, which was only completed a year or so ago, owing to the demand of the Lincoln county council that the track should be moved in certain places further back from the highroad. It is claimed the line does not pay.

The Municipal Committee of Halifax, N.S., consisting of an equal number of members of the city council and Board of Trade in that city is asking that the Dominion Government take immediate steps to provide additional yard room at the Intercolonial terminals there, and a double track from Richmond to Deep Water, in accordance with the report of General Superintendent Price, of the Intercolonial Railway, requirements there. The committee also ask that a new flour pier and shed be provided this summer.

⁂

WANTED TO GET EVEN.

A correspondent sends us the following extract from the pious petition of a good old colored brother in a Georgia settlement:

"Lawd, we wants a blessin' for ever' one, 'cept one; en dat one is a yaller nigger, what boarded de railroad train, en runned off wid de whole collection what wuz took up ter pay my salary wid! Lawd, please make de train jump de track—don't hurt de yuther passengers, but take off one leg from dat nigger.—Atlanta Constitution.

TORONTO MARKETS.

Toronto, May 18, 1905.

Chemicals, Drugs, etc.—No new development in the local drug market has taken place since last report. Quinine and opium both continue unsettled and a little on the dull side. Camphor, too, is unsettled as to the future, but prices are fairly steady. Menthol is firm. An English report says that the business in chemicals for export has been somewhat better during the past month. Orders are, however, mostly for moderate quantities. Values are well maintained. The general tone of the market is fairly satisfactory.

Dry Goods.—The changes in general dry goods are few and far between. Values in practically all lines continue very firm, woolens particularly so in sympathy with reports from abroad. A good sorting order trade is being carried on, and prospects for the fall season seem promising.

Flour and Grain.—Values are not so steady as they were, and some sellers are making concessions in a greater or less degree. Some dealers expect, however, a steadier tone to the market before long. Millfeed is a little easier, owing to the natural increase of good pasturage at this season of the year Oatmeal remains as before. Not much trading is going on in wheat, and prices remain nominally the same.

Groceries.—Some further improvement has taken place in grocery conditions this week, and business has had a brisker tone. Sugar is still very easy at the recent declines, and it is by no means improbable that further changes will ensue in the same direction, the statistical reports from beet-growing centres showing large increases in the acreage. Canned goods are exceedingly strong; and tomatoes, except a few from the other side the line, can scarcely be obtained at all. Currants are firm, while other dried fruits are meeting with a seasonably good demand.

Hardware.—Except that business is very good, and that orders are coming in very satisfactorily, there is little to report this week under the above heading. Such hardware as is needed in building operations is particularly in good request, owing to the satisfactory building conditions obtaining at present in many cities. In the country, too, there is good demand for all kinds of goods. Travellers report the prospects to be very bright.

Hides, Skins and Leather.—A better tone prevails in the hide market, and offerings are being sold at steady prices. Receipts, however, still remain on the light side. In the leather market, too, an increased demand is making itself felt, especially in the North-West Territories, where last season's heavy stocks have now probably been all disposed of. Prices are steady, but show no tendency to a settled higher basis.

Live Stock.—Receipts of cattle this week were heavier than usual, and exporters sold a little lower, in sympathy with a slight decline cabled from the Old Country. For butchers' cattle the demand has kept fairly brisk. Active enquiry was noted, too, for feeders and stockers. The quality of the calves offered was not very good, and prices kept on the easy side. Sheep and lambs were in poor request.

Provisions.—Notwithstanding large receipts, butter keeps at steady prices. New cheese is now arriving in some abundance. Prices are firm at 10½ to 10¾c. for new large, and 11c. for new twins. Eggs are in good demand, partly in consequence of high cost of meat. Prices, however, are a little unsettled, and packers not always being able to get eggs at prices as low as they anticipate. Hog products are steady in spite of a 15c. decline in live hogs.

Wool.—Very little new clip is coming in, owing, perhaps, to the continued cool weather. Prices for unwashed continue unchanged from 14c.

DELAYS ARE DANGEROUS.

The Accident and Sickness Policies

City of Winnipeg.

PROPOSALS FOR SUPPLY OF ELECTRIC POWER AND WATER POWER LOCATIONS.

The City of Winnipeg invites proposals for the supply of Electric Power upon certain conditions, a copy of which may be obtained upon application at this office, and also proposals from parties who own Water Powers for the sale to the City of such Water Power.

The proposals shall be addressed to Ald. J. W. Cockburn, Chairman of the Special Power Committee, and will be received at the office of the undersigned up to 12 o'clock noon on Monday, June 12, 1905.

Electric Power.

The maximum quantity of power to be used at any time will be 1,500 horse power.

The power is to be delivered to the city at a point to be agreed upon, east of Main Street, and will be paid for by the City monthly, the quantity used will be determined by Watt Meters placed on the City's incoming switchboard. Any party or company tendering for the right or franchise in the City under the conditions herein referred to shall submit with such tender a deposit in cash or marked cheque of $5,000. In case of acceptance of such tender the contractor shall deposit an additional $20,000 within thirty days; said two sums to be retained by the City as security for the completion of the company's works to develop the Water Power and for the works and plant necessary for the transmission of same to the City.

Water Power Locations.

In addition to the above the City will receive proposals from parties who own Water Powers for the sale to the City of such Water Power, such proposals to be accompanied by plans showing the location of such Water Powers and any works of development which may be done upon them.

The City reserves the right to reject any or all tenders or to accept any bid which appears advantageous to the City of Winnipeg.

C. J. BROWN,
City Clerk.

City Clerk's Office,
Winnipeg, Canada, May 13th, 1905.

Tenders for Government of British Columbia 3½ per Cent. Debentures.

Tenders will be received up to the 15th of June, 1905, for the purchase of $365,000 Government of British Columbia Dyking Debentures, in denominations of $1,000, issued under the authority of the "Dyking Assessments Adjustment Act, 1905," bearing interest at the rate of 3½ per cent. per annum, payable half-yearly at the Government Treasury, Victoria, on the 1st of January and 1st of July in each year; the principal redeemable in thirty-two years from the 1st of July, 1905.

Tenders to state the price net, the amount to be deposited at the Canadian Bank of Commerce, Victoria, on the 30th of June, 1905.

Tenders to be addressed to the Honourable the Minister of Finance, Victoria. Right of acceptance of any tender reserved.

May 5, 1905.

TANNERY FOR SALE.

The Tannery, known as the Beaver Tannery, in the Town of Aurora, in good repair; capacity, 600 sides per week; equipped with latest machinery and in good order. For further particulars apply to the Daville Tannery, Aurora, or P.O. Box 128, Aurora, Ont.

---

ceed 150 barrels. Quotations are about steady at $5.50 for first pots; seconds, about $5; pearls, nominal at $7 to $7.50.

Dairy Products.—Last week the shipments of cheese to Britain were 26,282 boxes, divided among eight steamships, some 16,000 boxes going to London, the balance going to Liverpool, Manchester, and Glasgow. Butter exports are as yet light, only 1,299 packages being shipped last week. The Liverpool Cheese Cable shows an easier market there, but locally quotations are fairly steady at 9¾ to 10c., for finest Ontarios, and 9⅝ to 9⅞c. for fine Quebecs. The butter market is little changed, 18½c. being about the idea for best creamery.

Cements and Firebricks.—New stocks of British and Belgian cement are now to hand, and wharf prices are now quoted at $1.80 to $2 for Belgian, and $1.90 to $2.10 for English. American and Canadian kinds remain at old figures. The demand for cements is of a very fair jobbing character, and firebricks are moving quite freely at $17 to $22 per thousand as to brand.

Dry Goods.—Preparations for stocktaking are now on with a good many of the larger wholesale houses, and a fair number of outside retail buyers from the larger centres are observed going the rounds of the warehouses looking for bargains in clearing jobs. Apart from this there is no great activity in business, and a good many commercial travellers are at home having their samples revised. Nothing new is reported regarding values of textiles.

Groceries.—Jobbers generally report a comparatively moderate movement, the majority of the orders coming in being of a "hand-to-mouth" character. The feature of the moment is the continued decline in sugars, a further cut of 10c. a cental having been announced, making a total decline during the past few weeks of 40c. a hundred. The present factory prices are for standard granulated, $5.25 in barrels; ditto, in half-barrels, $5.40; phoenix, $5.20; bright coffee, $5.10; No. 1 yellow, $4.75; extra ground, $5.65; Paris lumps, $5.80. A cable from Barbados to-day advises an advance of about half a cent in molasses, first cost being quoted at 22c., equal to laid down cost here of about 34½c. Teas do not show much animation. Canned goods are all firm. Dried fruits are dull; evaporated apples in fair request at about 7c. in a jobbing way, dried apples slow of movement at 3½ to 3¾c.

Hides.—Nothing new is reported in this line. No. 1 beef hides are being bought by dealers at 9½ to 10c. per lb. Calfskins are steady at 14c. for No. 1, and 12c. for No. 2; lambskins, 15c. each, and sheepskins, $1.20 each.

Leather.—Most of the larger boot and shoe manufacturing concerns are taking stock, consequently being partly shut down, and as Western jobbers of boots and shoes are holding back from placing their orders, the demand for leather is not at all brisk. Sole leather remains firm, and some dealers claim to be getting 24½c. for selected lots of mfrs.' No. 2. Some Western tanners of black leather are said to be curtailing their output, claiming that prices are not satisfactory.

Metals and hardware.—With reference to the somewhat large importations of English bar-iron noted in our last issue, it is reported that owing to representations made by local rolling mill men the Customs authorities are considering the matter with the probability of enforcing the "dumping" provisions of the tariff. Domestic bars continue steady at $1.75 to $1.80, and mild bar steel, $1.95 to $2. Boiler plate is unchanged at $2, and iron pipe at $4.20 for inch. Tinned sheets are reported firmer in Britain, but local quotations for these and other similar lines show no material variation. Nails, wire, etc., are steady at old figures. Ingot tin is quoted at 32½ to 33c.; copper, 16 to 16¼c.; lead, $3.35; spelter, $6.25 to $6.50, antimony, 9c.

Oils, Paints, and Glass.—The only noteworthy change in these lines is an advance in turpentine to 88c. a gallon, in single barrels. Linseed oil is steady at 50 and 53c. for raw and boiled respectively. Some dealers claim to be getting more than $4.50 for pure white lead. Window glass continues to be held at very firm prices.

MONTREAL AND HULL.

Good & Sons, of Hull, Yorkshire, are establishing a direct steamship service between that port and Montreal. Hull is a very important distributing centre for all the north-eastern part of England, and such direct communication will be a great boon to all classes. As a grain importing centre, says an English newspaper, Hull stands in one of the finest positions in the kingdom. In 1903 6,002,904 qrs. of grain passed

THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST.

through the port from foreign countries. All discharging is done on the overside system into keels, lighters and river craft, and beyond the ordinary vessel's dock dues there is no further charge, lighters being admitted into dock free. A Hull provision merchant tells the Canadian Gazette that there are thousands of tons of Canadian provisions passing through the port yearly, yet none of these come direct, the greater part of them coming via Liverpool. The fruit merchants would welcome a regular service of direct steamers, inasmuch as it would enable them to extend their trade. There are buyers who attend Hull fruit market from the West Riding, who have to go to Liverpool if they want Canadian apples, etc., and if they could obtain them in Hull much expense would be saved, and the port would benefit. At present Hull is very much dependent on the Baltic for her supplies of mining timber; but if a direct trade were opened out with Canada, and the class of mining timber grown there (for which, by the way, there is a difficulty in obtaining a market) was of a suitable character, a very much larger business might be done.

⁂

MINING MEMORANDA.

Five different concerns are working on leases at the Whitewater mine, Boundary district, B.C. About ten or twelve cars of ore are being shipped per month.

C. F. Doyle, of Chicago, has obtained an option on the one-quarter interest in the Yankee Girl, Canadian Girl and Yale Fraction mines on Yale Creek, for the sum of $125,000.

The Duncan claim on Wallace Mountain, in the Kettle River district, has been bonded to Thos. Henderson, D. M. Currie and others. The Duncan is believed to be a valuable property, containing three leads.

Development work on the Centre Star mine, in the Rossland district of British Columbia, is said to be proceeding very satisfactorily. It is being pushed chiefly on the second to ninth levels. New finds of ore of a good grade continue to be made from time to time, and the mine as a whole has never looked better than at present, nor held out more probability of a large and profitable tonnage. The shipments for the past week were 1,767 tons. This is less than last week, the shortage being the result of a small breakdown, which prevented shipments from being made for one day. The same authority says that at the War Eagle also development goes steadily on, and good results are being obtained. The shipments for the past week aggregated 1,230 tons, which was an increase over the preceding week. There promises to be a considerable increase in the tonnage before many weeks.

⁂

On Wednesday last in Utica, N.Y., there was a fire in the dry goods establishment of Robt. Fraser, which spread to other buildings, and caused a loss of $453,000.

A GOOD POLICY

for policyholders is the 20 pay life guaranteed option policy issued by

Head Office - Waterloo, Ont.
The Mutual Life OF CANADA

In this style of policy the Benefits conferred and the Premium rates charged are more liberal than those in any similar policy issued by other companies.

Be sure to examine it before insuring elsewhere.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600,000.00

THE CANADA LIFE

holds Policy Reserves greater by $3,000,000 than the present Government requirement.

The business in force is three times as great as that of twenty years ago, while in the same period the Assets have increased four fold.

Each year with its increasing age, Canada's leading Life company

Shows Increased Strength.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

THE C.M.A. ITINERARY.

A paragraph in our Manchester's correspondent's letter of 12th May, deserves some comment. It is there suggested that the English trip being arranged by the London Chamber of Commerce for the members of the Canadian Manufacturers' Association will not include Manchester in its itinerary. And the reason alleged by our correspondent for this remarkable omission is the lack of interest on the part of Manchester in Canadian affairs in consequence of protective measures passed or contemplated by the Dominion Government. We do not believe that Manchester merchants care so little for Canada that they have no wish to have a visit from a body consisting of hundreds of Canadian merchants and manufacturers. And we submit that for the London Chamber of Commerce to profess to show their guests the commercial centres of England, and to leave out Manchester would be doing very little credit to either the courtesy of the hosts or to the intelligence of their guests. Manchester is the third city in England, and the fourth in the United Kingdom. It is the distributing point for the most densely populated part of the British Islands, and a place of intrinsic interest to both visiting manufacturers and merchants. Besides, it possesses the Manchester Ship Canal and system of docks. We prefer not to believe the story referred to by our correspondent. Whatever the individual views of the members of the visiting party on protection or free trade, or whatever the sentiments in this regard of the officers of Manchester's Chamber of Commerce, it is incredible that the latter would not be willing to receive members of a body which is out of politics, and many of whose members are as much imbued with free trade ideas as any Cobdenite of old. There is just a possibility that the dissimilar attitudes of the London and the Manchester chambers on the present fiscal situation in the Old Country may have had something to do with differences between committees of those bodies which have arisen in planning the trip. But we cannot think that either body would from any local bickerings spoil the visit of the Canadian visitors. It is, of course, too early to say exactly what the itinerary may be, for it will be three or four weeks before it begins. And this will afford time to harmonize dissensions if there are any.

* * *

MONTREAL FIRE APPLIANCES.

An appeal which ought to have some effect on even a body so hard to move upon occasion as the Montreal City Council, has been forwarded by the Board of Trade of that city to Mayor Laporte. It premises that the council of the board continues to be greatly concerned regarding the fire protective service of the city, the improvement of which is not receiving from the council the urgent attention its importance demands; and cites memorials forwarded to the council on this subject in May and December last. Incredible as it may seem, the much-needed extra pump, which was said to have been ordered on the 7th March last, has not yet been ordered, because the city council cannot make up its mind whether it shall be steam or electric.

Recalling the devastating fires of several past years in Montreal, there is little wonder that the Board of Trade are anxious that the city's supply of water shall be increased for fire purposes. Indeed it is stated by that body, we believe quite truly, that the fire-fighting equipment and the water supply of Montreal are altogether inadequate to the proper protection of the city from fire. But there are other reasons which should stimulate prompt increase of pumping capacity—only the city council appears to be oblivious of them: "The possible shortage of water supply in a city the size of Montreal involves another risk from that of fire, namely, that to the public health; for the consequences of water shortage in the summer months, with the attendant unsanitary conditions caused thereby, would be most serious and involve wide-spread sickness and a large increase in the death-rate." Still another consideration is urged, looking to the necessity for more water-pumping power, and that is that the whole pumping force of the city is required *day by day and every day* to keep up the supply of water to the city's ordinary needs, quite irrespective of any demands upon it for fire-fighting purposes. Therefore, any accident to the existing machinery must cause a shortage in the daily supply of water for householders. This would be not only an inconvenience, nay, a menace, to the citizens in the respect of cleanliness and health, but if a conflagration should break out there would not be water enough to quell it. There is force in the Board of Trade's contention that, "in view of the rapidly increasing growth of the city a very considerable increase in pumping power should be obtained; for a city of the importance of Montreal should have a reserve power of at least 50 per cent. of its daily consumption."

Civic apathy is unhappily common; but is especially dangerous when it takes possession of a body responsible for the promotion or defence of the health and safety of a community. The Montreal council has done queer things in its time, and it has been unhappily remarkable, too, for not doing necessary or desirable things at the right time. Perhaps when it learns from this strongly-worded memorial that a body like the council of the Board of Trade, representing as it does all kinds of interests in that great city, is unanimous in the feeling of urgency in the present state of water supply, the council may be aroused out of its apathetic state. Still more likely is it that the closing paragraph of this memorial may prove a stimulus, since it declares that "the council is convinced that all its efforts to obtain a reduction in insurance rates will be futile so long as the city council fails to meet the demands of the citizens for improvements in the city's fire protective service."

* * *

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian Banks for April, 1905. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, and average holdings of specie, Dominion notes, etc.:

LIABILITIES.

	April, 1905.	Mar., 1905.
Capital authorized	$101,046,666	$100,546,666
Capital paid up	81,613,513	81,562,880
Reserve funds	54,908,009	54,783,403
Notes in circulation	$ 59,941,648	$ 58,721,173
Dominion and Provincial Government deposits	10,091,060	9,854,681
Public deposits on demand in Canada	127,213,044	128,964,734
Public deposits after notice	332,326,292	326,974,471
Deposits outside of Canada	39,418,720	40,318,548
Bank loans or deposits from other banks, secured	1,054,309	952,748
Due to other banks in Canada.	4,652,182	4,841,100
Due to agencies or other banks in Great Britain	4,324,056	3,991,549
Due to banks or agencies in foreign countries	1,963,580	1,344,714
Other liabilities	10,572,123	10,679,233
Total liabilities	$591,557,014	$586,643,034

ASSETS.

Specie	$ 17,271,357	$ 17,276,859
Dominion notes	37,708,768	38,043,257
Deposits to secure note circulation	3,328,771	3,328,771
Notes of and cheques on other banks	19,257,223	20,399,333
Loans to other banks, secured.	924,601	913,440
Deposits with other banks in Canada	6,546,212	5,992,749
Due from agencies or other banks in Great Britain	10,739,430	11,733,054
Due from banks or agencies in foreign countries	16,024,306	20,112,257
Dominion and Provincial Government securities	8,622,764	8,587,577
Other securities	58,385,956	57,507,151
Call and short loans on stocks and bonds in Canada	37,924,720	37,014,787
Call and short loans elsewhere.	44,523,606	46,032,561
	$261,157,714	$266,941,796
Current loans in Canada	431,405,314	422,351,186
Current loans elsewhere	22,781,157	21,797,171
Loans to Dominion and Provincial Governments	2,711,486	2,353,198
Overdue debts	2,329,459	2,382,835
Real estate	657,274	644,778
Mortgages on real estate sold.	626,495	735,296
Bank premises	10,609,869	10,376,842
Other assets	6,275,325	6,116,232
Total assets	$738,654,287	$733,699,510
Average amount of specie held during the month	16,995,368	17,162,660
Average Dominion notes held during the month	37,293,138	37,989,885
Greatest amount notes in circulation during month	62,226,126	61,206,767
Loans to directors or their firms	8,829,777	10,007,294

The liabilities for April show an increase of $5,114,000 over those for March, a marked contrast to the figures for April last year, when the liabilities were reduced during the month by $6,230,000. Notes in circulation increased by $1,220,000, as against a decrease last year of $1,110,000. For several years past, outstanding circulation has shown an increase in March and a reduction in April; this year the order has been reversed, and the increase in April merely makes up for the unusual reduction in March, the increase over the amount outstanding at the end of February being about normal. Public deposits in Canada now amount to $459,539,000, as against $455,938,000, in March, a growth of $3,601,000. This is distinctly better than last year, when the increase during April was only $759,000, but it falls short of the growth made in either 1902 or 1903. Deposits outside Canada fell off about $900,000, as compared with a reduction in 1904 of $5,843,000. Balances due to agents in Great Britain, the United States and other foreign countries increased by $951,000.

In the assets the chief change to record is that current loans in Canada are $9,054,000 more than they were in the previous month, an increase which is greater than usual at this time of the year, and, so far as it goes, tends to show that after the slackening in pace which, as we pointed out last month, was the note of 1904, a more rapid rate of progress is again setting in. The total increase during the first four months of the year is, however, appreciably below that which took place in the corresponding period of each of the two previous years, as the following figures show:

Current Loans in Canada.

	December.	March.	April.
1901-02	$289,158,000	$300,066,000	$302,160,000
1902-03	322,879 000	346,292,000	353,170,000
1903-04	384,419,000	403,566,000	409,196,000
1904-05	413,779,000	422,351,000	431,405,000

	Increase by 30th April over December.	March.
1901-02	$13,002,000	$2,094,000
1902-03	30,291,000	6,878,000
1903-04	24,777,000	5,630,000
1904-05	17,626,000	9,054,000

With an increase during the month of $994,000 in loans outside Canada, the banks had to find about $10,000,000 in April for their discount customers, while about $1,000,000 more was advanced on call loans in Canada. Of the $11,000,000 thus advanced, about $5,000,000 was supplied by the increase in liabilities, which has already been noted; of the balance, $1,500,000 was withdrawn from call loans outside Canada, while demands were made upon British and foreign agents for $5,082,000, reducing the balance due from them to $26,763,000. These balances, however, are still unusually large. In April, 1904, they amounted only to $12,762,000, and in April, 1903, to $15,936,000.

Taking the country as a whole, the outlook for the coming summer could hardly be brighter, and unless some unexpected reverse overtakes us, the banks are not likely to experience any difficulty in employing their funds. To forecast even the immediate future from a study of the bank reports would only be possible, if at all, if accurate information could be obtained regarding the nature of the changes in the figures of the individual banks. But the figures for April certainly show indications of a return to the activity which characterized 1903. If this should prove to be the case, the demands upon the banks will certainly not be small, but—thanks in some measure to the comparatively quieter period through which we have just passed—the latter are in an exceptionally strong position. The assets upon which they first rely to meet demands stand as follows, a comparison being made with the figures for the same month in 1903:

	1903.	1905.	Increase.
Cash	$40,365,000	$54,980,000	$14,615,000
Balances due from agents outside Canada	15,936,000	26,736,000	10,800,000
Call loans outside Canada.	38,267,000	44,523,000	6,256,000
Securities	64,671,000	67,008,000	2,337,000
Total	$159,239 000	$193.247,000	$34,008,000

In the controversy which in a more or less intermittent fashion is always being carried on in the United States between the supporters of the National Banking System and those who advocate the introduction of branch-banking and an assets currency, a favorite argument of the upholders of the small bank, locally owned, is that by its means banking facilities are more freely provided for the inhabitants of the country districts, and that local needs are more fully met. If those who use this argument were aware of the rapidity, not to say recklessness, with which new branches of our Canadian chartered banks are being established, they would probably change their views.

Observe the figures for the last three or four years.

Dec. 31st,	No. of Branches in Canada of Canadian Chartered Banks.	Total Liabilities Chartered Banks.	Average Liability for each Branch.
1901	740	$449,091,000	$606,000
1902	897	499,508,000	556,000
1903	1,048	525,924,000	501,000
1905 (30th April) ...	1,215 (about)	591,557,000	486,000

Taken absolutely, these figures are not quite accurate, as the number of branches includes those in Canada only, whilst the liabilities are those of the branches both in Canada and abroad. But as a means of comparison between different years, they are sufficiently near the mark.

The exhibit is certainly a curious one. Since 31st December, 1901, the total foreign trade of the country has increased by about 18 per cent., the population by possibly 7 or 8 per cent., and the liabilities of the banks by 31 per cent. Yet the banks have thought it wise to increase the number of their branches by about 475, an increase of 64 per cent., with the result that the average liability per branch has been reduced from $606,000 to $486,000. This means that a large proportion of the new branches are doing very little business, and that the banks, taken collectively, must have on their hands a very considerable number of unprofitable branches. A deliberate policy of building for the future can no doubt be justified when, as in the case of the Canadian North-West, the future is ensured beyond reasonable doubt, and if branches are established with due regard to the requirements of each particular district. Even in the North-West, however, it is obvious that this has not always been done, while in Ontario new branches have been opened in places where banking facilities were ample, and where it was evident that practically the whole of any business which might be obtained would have to be enticed away from the banks already established.

For the banks as a whole, the question is a serious one. At the moment, profits are good, and the burden of a certain number of unprofitable branches can doubtless be borne. But by and by will come a time when business will be less active, when profits will decrease, and when the fact that a certain proportion of these new branches will never pay expenses will have to be faced. Branches will then have to be closed, and out of profits already reduced will have be written off, not only the operating losses of the different branches, but also the losses sure to be incurred through accounts secured by the offer of terms inconsistent with sound banking. In a time of expansion, it is the easiest thing in the world to lend money. In the period of contraction which sooner or later is sure to come, it will be by no means so easy to get it in again. The public cannot afford to ignore the matter, for in great measure the ultimate loss will be theirs. To whatever extent the business of banking is rendered less profitable and its operation more expensive, to that extent customers will in the long run have to pay more for their banking facilities; and it is not to their interest to encourage undue competition among banks, even if the manager of the new bank, in order to obtain business, is ready to approach the customers of the old bank with offers to "give them all the money they want."

The agreement for the sale to the Bank of Montreal of the assets of the Peoples' Bank of Halifax has now been confirmed by the shareholders of both banks, and the transfer will doubtless take effect as soon as the necessary legal formalities have been completed. It has not hitherto been the policy of the Bank of Montreal to maintain many branches in small places, and a bank of its standing will hardly be able to carry on its new branches as cheaply as the Peoples' Bank of Halifax could. It will consequently be interesting to observe whether they will keep open those branches of the Peoples' Bank of Halifax, situated in places which, judged from an Ontario standpoint, can hardly produce enough business to maintain a bank.

The Bank of Yarmouth has been formally declared insolvent, and Mr. W. E. Stavert, who has been in charge on behalf of the Canadian Bankers' Association, has been appointed liquidator. In the course of the proceedings counsel confirmed what had been the general expectation that shareholders will have to meet a large proportion of their double liability. The bank's statement for 28th February, six days before it suspended, showed notes in circulation, $50,000; deposits, $276,000. The principal assets were cash, $12,000; current loans, $267,000; over-due debts, $382,000. During the two months which have elapsed, the curator has collected $83,000 of the loans, and with this amount and the cash which was on hand, has redeemed circulation to the extent of $30,000, leaving only $20,000 still outstanding, and has accumulated a cash balance of $61,000 on deposit with other banks. So that, disgraceful as the failure is, ample funds for the redemption of the total note issue have been provided within two months. The figures for the advances still outstanding are certainly very suggestive. Current loans are now $20,222; over-due debts, $546,287.

* * *

THE CHICAGO LABOR SITUATION.

The labor situation in Chicago is this week more menacing, if possible, than before. Monday's dispatches tell of the continued refusal of seven different express companies to reinstate any of their striking former employees; and other large employers of teamsters are resolved to stand by the express companies. On the other hand, the Teamsters' Union is quite as stubborn, President Shea declaring that the Union will not call off the strike until the express companies come to terms. Thus, a deadlock still exists, and an extension of the strike seems imminent: for the Lumbermen's Association has 2,400 teamsters thus far unaffected, but who will, it is said, go on strike if they are ordered to deliver goods, and any of them is discharged for refusing such delivery. The sheriff of the county, Mr. Barrett, declares that if the strike extends he must ask for troops, because his police and deputies are already overworked and insufficient for wider duties.

A letter of Sunday last from Chicago to this journal helps to make us understand the situation as it affects business men. Says our correspondent: "The principal item of interest and conversation here for some weeks past has been the strike, and its disastrous effect upon the business of the city. So far neither side appears willing to give way, and there is much apprehension that it may spread, and thus many innocent people may become involved in a struggle in the origin of which they have no interest at all. The police force, which under ordinary conditions is regarded as much too small a body to maintain proper respect for and observance of the laws in a city of the size and population of Chicago, is unable to control the mob, and the result has been the loss of some lives and the wounding of several persons. It has been a common sight to have wagons passing through the principal business streets with men sitting upon them carrying loaded rifles in full view of the public; and acting under the plea that the law only provides against the carrying of "concealed" weapons, and therefore no authority is necessary to act in this manner as a matter of self-protection. It has frequently been dangerous to pass along the streets in the business quarter of the city."

This is bad enough, surely, but what if the industrial warfare should spread, and other avenues of trade be congested or blocked altogether? The effect of a paralyzed freight delivery service to and from the railways of Chicago would be felt sorely throughout the United States, for the commerce of the city is enormous and widespread. Here are some figures concerning it, compiled by Mr. Finn, the British Consul, and issued by the British Foreign Office. Says this document written with respect to 1904: "The city of Chicago is growing rapidly as a factor in financial matters, for it has £121,000,000 ($605,000,000), deposited in its banks, and is becoming the centre and clearing-house of all the western country. It is stated that Chicago is only surpassed in manufacturing by London, as in 1904 its estimated output was placed at £275,000,000 ($1,375,000,000). The total imports from the United States alone were valued at £207,181,839 ($1,035,905,000), the largest ever recorded, while those from the United Kingdom amounted to £33,182,970 ($165,910,000), or £2,000,000 less than in 1903."

* * *

CANADIANS' VIEWS OF LIFE ASSURANCE.

That a people of six millions should have almost six hundred millions of life assurance ($587,873,000) almost a hundred dollars per head, men, women and children, is proof that they acknowledge the beneficence of the business. This is the position of Canadians to-day, or rather at the end of last year, to speak correctly. The total new life assurance granted by life companies in Canada during 1904 amounted to $104,016,862. The Government returns indicate the different systems under four broad headings. The policies issued under the

			Per Cent.
Life system amounted to	$59,498,915	or	57.2
Endowment system amounted to ..	37,032,683	or	35.6
Term system amounted to	7,247,956	or	7.0
Bonus additions amounted to......	237,308	or	.2

The life system includes, in addition to the ordinary whole life assurance with premiums payable until death, all forms of limited payment policies such as 10, 15, and 20-payment life contracts; the endowment class embraces endowment assurances with limited payments as well as with payments, which are payable throughout the endowment term.

Term assurance class represents chiefly contracts providing for temporary assurance of from three to ten years, mostly taken out for business purposes and to provide temporary protection.

That endowment assurance should represent over one-third of the whole applied for is an evidence of the spirit of intelligence and thrift which pervades the Canadian rising public. They perceive that such a contract as an endowment policy gives them is eminently business-like, and they are willing to make economic sacrifices in order to carry out its provisions.

* * *

INDEPENDENT ORDER OF FORESTERS.

In our article of 12th May on fraternal societies entitled "The Glamour Wearing Off," reference was made to the disquieting lack of progress made by the Independent Order of Foresters. We have since obtained some further information which points in the same direction. Comparing the statement of the I.O.F. for December 31st, 1903, with that of December 31st, 1904, some features appear which ought to cause the members to reflect seriously as to the ultimate result. The new members admitted decreased in number from 36,316 to 28,730—a decline of 7,586, or twenty per cent.; the amount of new certificates also decreased from $29,685,000 to $23,500,000—a falling off of $6,185,000, or nearly twenty-one per cent. The amount of certificates terminated in 1904 was $18,728,000, or about 80 per cent. of the new issue. The claims by death, etc., increased from $1,658,109 to $2,003,869, that is to say, by $345,760 in one year. The chief will have to organize some more grand functions—nobody can do it like himself. Free rides, processions, flags and banners, songs and orations, tinselled uniforms—these are his most successful stock-in-trade whereby he ropes in new members. Now let us hear of another grand rally. The daily newspapers will presently want something to fill their pages when the Woodbine races are over.

* * *

DRY GOODS NOTES.

The cool weather up till the last day or two has tended to retard the sales of some lines, and sorting orders as a consequence have been rather scanty. In Montreal, as our market correspondent tells us, there have been sales to large-buying retailers of jobs to a round amount in anticipation of June half-yearly stock-taking. Light flannel outing goods have been particularly affected by the backward spring. There has been a good demand, however, for homespuns, and greys, with a not too prominent green check, seem to be the favorites. Prospects for such lines as these are believed to be very bright, and trade will no doubt become really brisk with a little genuine summer weather. The feature of the past week was the coming of the Montreal Cotton Company into the recently formed merger of cotton interests. It was understood that a great deal of opposition existed among the shareholders of the former concern to the combination as good dividends were being realized under existing arrangements; but an agreement seems to have been reached without any great difficulty. To the Dominion Textile Company the completion of the merger is of importance, because the Montreal Cotton Company products were largely of a different class from those of the other mills, and its works were extra well equipped. Chief among the goods it manufactured are sateens, silicias, and Italian stuffs. Formerly, it made also dress linings in large quantities, but these were dropped to some extent, owing to a change in fashion.

Contrary to the expectations so confidently held by some, the price of raw cotton is still high. Last year's big crop has been offset by unsatisfactory reports as to this one. Values of finished goods have a decidedly upward tendency, and one grade of textiles, grey cottons, has already been advanced ¼c. The fact would appear to be that during the period when cotton was so abnormally high as almost to preclude purchasing altogether, the production was placed such a long way behind consumption, or rather behind the real needs of the consumers in every country in the world which uses that fabric, that even now, when manufacturing has become more than normal again, the supply fails to keep up with the demand.

In woolen goods, no marked change has taken place since last report. Values both of raw wool and of finished products continue quite high, and reports from various important textile centres indicate no coming change in this respect. At the last London sale prices were very firm, though no appreciable advance took place in coarse wools, while from Bradford comes word of great activity in the demand for its staples at high prices. The new clip of domestic wool is not coming in in noticeable quantities yet, but will no doubt do so with the first settled warm weather. For woolen goods the local demand in Toronto and Montreal has, as said above, not been particularly brisk for the lighter grades of late, owing to the backward season, but for the staples, it has been very fair.

In the miscellaneous smaller articles comprised in the category of general dry goods, trade has been good, and the demand for those of good quality is especially marked.

* * *

—President Young, of the Fort William Board of Trade, has just received a communication from Mr. F. W. Thompson, managing director of the Ogilvie Flour Mills Co., Limited, assuring the former that the company would proceed immediately to develop the Kakabeka power. The initial development will be between twenty and thirty thousand horse-power. This development of the power will no doubt bring to Fort William manufacturing establishments for the western markets. The situation of the port is such that raw material can be landed at a nominal cost, and shipments can be made direct to western points by any of the three routes, C.P.R., C.N.R., and G.T.P. Wholesalers are also looking to this point for sites for warehouse purposes.

* * *

The twelfth annual convention of the International Association of Chiefs of Police took place in Washington last Monday. Mr. Pinkerton's paper was on the subject of "Forgers and Their Fate." He said that until recent years there were many bands of professional forgers operating throughout the United States, realizing thousands of dollars yearly, whose leaders were practically immune from arrest because of the insufficiency of the evidence necessary to convict them. "By the support of the Bankers' Association, aided by the police officials," he added, "we have practically put the old-time professional forger out of business, until to-day there are occasional forgeries, mostly by amateurs and for small amounts. In the past twenty-five years we have had to do with the conviction of possibly that many hundred forgeries, and to-day I do not know a single one of them out of prison who has any money."

THE TRADE OF THE WORLD.

Interesting comparisons of the share of the world's trade done by various nations are afforded by the returns issued at the 1st May by the British Board of Trade. These returns show that the trade of the United Kingdom for the year 1904 reached the great total of £781,858,000, as against £573,174,000 for Germany and £512,845,000 for the United States, her nearest competitors.

Details of imports and exports of the various countries are given below, together with the figures for 1903:

Imports.

	1903.	1904.
Germany	£300,134,000	£314,549,000
Belgium	101,689,000	104,758,000
France	192,048,000	181,458,000
Switzerland	46,366,000	48,406,000
Spain	33,971,000	33,355,000
Italy	74,478,000	74,325,000
Austria-Hungary	78,213,000	85,211,000
Egypt	17,189,000	21,096,000
United States	207,395,000	215,814,000
Japan	32,102,000	37,588,000
British India	54,646,000	63,652,000
United Kingdom	473,027,000	481,040,000

Exports (Domestic).

Germany	£250,732,000	£258,625,000
Belgium	79,875,000	82,211,000
France	170,090,000	179,020,000
Switzerland	35,276,000	35,334,000
Spain	33,437,000	33,913,000
Italy	60,697,000	64,608,000
Austria-Hungary	88,741,000	86,220,000
Egypt	20,048,000	21,353,000
United States	303,677,000	297,031,000
Japan	28,994,000	38,011,000
British India	95,392,000	105,007,000
United Kingdom....	290,800,000	300,818,000

United Kingdom imports show an increase in 1904 of £8,013,000 over 1903, while in exports the improvement is only £1,018,000, a total increase of £9,031,000.

In Germany, on the other hand, the improvement in imports during the year reached £14,415,000, and in exports £7,893,000, a total increase of £22,308,000.

The United States had a bad year in this respect. While her imports increased by £8,419,000, exports declined by £6,646,000, her total increase of trade being only £1,773,000.

* * *

BANKING AND FINANCIAL.

When a Philadelphia broker told his daughter recently that his Stock Exchange seat could be sold for $13,750 she replied: "I'd stand rather than pay more than $1 for any seat."

A meeting of the shareholders of the defunct Bank of Yarmouth was held at Halifax on the 16th inst., and Mr. W. E. Stavert, of the Bank of Nova Scotia, the curator of the bank, recommended for liquidator.

The British Columbia Government is inviting tenders for the purchase of $365,000 worth of Dyking Debentures, bearing interest at 3½ per cent. per annum, the principal redeemable in thirty-two years.

All has not been serene in the councils of the Birkbeck Loan Company, of London, Ont. There have been proposals of its merger with another company which were not agreeable to some of the shareholders. The other day proposal was made by the president, Mr. Wortman, of scrutineers of a vote for liquidator, and his right to do so was questioned by Mr. C. H. Ivey, who wanted the Canada Trust Company appointed. Another motion proposed the London and Western Trusts Company. Finally, an adjournment was agreed upon until to-day. It is probable that the company will be wound up.

The man who has been chosen to manage the Eastern Townships Bank branch in Vancouver is, according to the Montreal Gazette, Mr. W. H. Hargrave, who has been assistant manager in the Montreal office. We learn that Mr. Hargrave is well known in the Eastern Townships of Quebec, and used to be manager at Bedford.

The Milwaukee Chamber of Commerce is taking action whereby, it is believed, corners in corn will be rendered almost impossible. It is following closely the plan adopted by the Chicago Board of Trade immediately after the collapse of the big Gates wheat deal. The plan is to amend the rule so as to permit the delivery of No. 3 corn on contracts at a discount of five cents a bushel.

The statistical abstract of the United States for 1904 shows that in the year the amount of money in circulation increased by $151,450,691, a gain of upward of $2 per capita. The gain in gold circulation alone was more than $28,000,000. The total deposits in banks in that country increased by $446,853,405, and the number of persons who deposited money in savings banks alone was 270,215 more in 1904 than in 1903.

Some recent interesting statistics show that France possesses fewer than 20,000 persons who have property valued at a million francs ($193,000) or more. About 14,000 of these have fortunes of from $193,000 to $380,000; of the remaining 6,000 only about a hundred have from $2,000,000 to $10,000,000 each, while in France there are not more than ten persons whose property is valued at $19,000,000 or over. These figures are based on current tax returns, and in France taxation is thorough and searching.

Another resignation among the bank managers of Toronto is to be noted, that of Mr. F. J. Gosling, of the Bank of Hamilton Toronto branch. Mr. Gosling's health has not been good, and he retires about the beginning of June, intending probably to return to England. He has had long experience in banking in Canada, and has upheld in a high degree the honorable and conservative traditions of the service. It is understood that his successor will be Mr. Kilvert, who has occupied prominent positions in both the Winnipeg and Toronto branches of the bank.

* * *

CENTRAL LIFE INSURANCE COMPANY.

We observe that a license to transact the business of life assurance throughout the Dominion has been granted to the Central Life Company, which has for the last four years been writing policies in Ontario alone. The company was organized in 1901, largely through the efforts of Mr. J. M. Spence, the managing director, and for these four years it has been laying out its agencies and making plans for the future, writing in the meantime a moderate volume of business. The subscribed stock is $500,000, of which $75,000 has been paid up. The amount deposited with Government is $54,000, consisting of Winnipeg securities, $20,000; Vancouver securities, $19,000; Victoria securities, $15,000, all bearing 4 per cent. interest. An agency has been opened in Manitoba, and an energetic effort will be made to write risks in various parts of Canada; and, as the agency staff is in very fair condition, there is a prospect of the company's receiving its reasonable share of current business. The president of the company is Thomas Crawford, M.P.P., of Toronto; the vice-presidents, Torrance E. Bissell and James Dow, M.B.; the medical referee, A. Groves, M.D.

* * *

LIFE ASSURANCE MATTERS.

Here are three fragments of ready-made wisdom from T. I. P.:

Ships that drift cover a greater distance than vessels on a regular course, but they never reach port. Agents, ditto.

It is better to be a plain policy-holder in a regular insurance company than the Supreme Grand Chief D F in a fraternal order.

The sum of $2.50 a month saved on house rent would pay for a $1,000 insurance on the average man. Live in less style now so that your family may live in fair style when you are dead.

On Tuesday last the Executive Committee of the National Fire Protection Association held a meeting at the Hotel Manhattan, in New York, at which the policy of the association was considered. The opening session of the convention was held in the meeting-room of the New York Board of Fire Underwriters in the Mutual Life Building. The attendance was large.

Circumstances formulate attitudes, says the Union Mutual. Sometimes money is put aside for premiums reluctantly, but it is never a hardship for a family to accept an insurance company's draft in payment of a claim.

The Crown Life Insurance Co. intend to remove to new offices about the 15th of June. These are to be situated in the rear of the Boisseau building, on Yonge Street. They will be on the ground floor of the building, having an entrance on Temperance Street.

There was a session of the Supreme Council of the Royal Arcanum in Atlantic City last week, when more than a hundred delegates from all parts of the United States and Canada were present. Supreme Regent A. S. Robinson, of St. Louis, presided over the meetings. It continued in session this week. The financial secretary in his report says that the organization assets are in excess of $3,500,000, while the gain in membership during the year had been approximately 25,000, making the strength of the order 315,000.

"Is your father well now, Johnnie?" "Oh, yes; pa got well all on a sudden like, yesterday." "Did he take—" "No, he didn't take no physic. He just heard my mother's mamma asking if his life insurance policy was in a safe place, and he was up in a pair of minutes."—Equitable News.

Compliments are being paid by various insurance journals in the Old Country to Mr. H. W. Manly upon the occasion of his retirement from office as manager and actuary of the Old Equitable of London. The Post Magazine has the following: "Although we take this opportunity of presenting to our readers a brief sketch of the career of this distinguished actuary, we are glad to think that it is only a preliminary instalment, and that from time to time we shall still have to chronicle his further achievements."

FIRE INSURANCE MATTERS.

The city council of St. Catharines have taken steps to constitute a regularly paid fire department. They have discharged a chief, assistant chief and engineer, who were paid a small lump sum for the three, and have appointed Electrician Early chief of brigade at a salary of $750.

The water supply of Hull, Que., has been the subject of consideration by a citizens' committee. They recommend the council to obtain expert advice about repairing the present concrete intake pipe. By junction with a steel pipe at Eddyville bridge it is believed the supply can be improved.

The Fire Marshal of Ohio has this to say about gasoline: "The products of petroleum are not liable to spontaneous combustion as are the animal and vegetable oils, because they have no affinity for oxygen, but the explosive vapor from gasoline burns one Ohio house for every day in the year."

Mr. Davis, the State Fire Marshal of Ohio, tells us that in the United States at large, as shown by 50,955 fires, tabulated by Mr. F. C. Moore, kerosene lamps cause 6 per cent. of all fires. In Ohio, owing to a "flash test" ten degrees higher than in any other State being absolutely enforced by oil inspectors, they cause less than three per cent. of the fires, and less than one per cent. of the total property loss. Unfortunately, there is no falling off in the number of persons injured by using coal oil to encourage stove fires. Putting a small quantity of oil on kindlings in a cold stove, or on a blaze, is unattended by danger, but pouring it on hot embers showing no blaze, or on hot iron, results in the development of a mass of gas which explodes. Of the 225 coal oil fires in Ohio last year, 158 resulted from the explosion or overturning of lamps, 24 from oil stove accidents, 11 from lanterns, 27 from reckless handling of the oil.

The Government of Austria is taking action against foreign insurance companies doing business in that country, with the exception of German concerns. This renders business almost impossible, and the matter is bringing out diplomatic exchanges from the representatives there of the United States, Great Britain, Belgium, and Holland companies of which countries are concerned. Laws under which foreign life insurance companies may do business in Austria provide that they must invest and keep invested in Austrian Government securities a sum equal to their total liabilities.

TRADE NOTES.

The Federation of Master Cotton Spinners' Association draws the attention of its members to the urgent necessity for greater financial support for the schemes of the British Cotton Growing Association. A plan for undertaking cotton culture on a large scale in Northern Nigeria is being considered.

The Queensland Government is undertaking an important experiment in the shipping of poultry to the British Islands. Poultry is collected in Queensland from producers by agents specially employed by the Government, and shipped under adequate conditions of refrigeration. One consignment has been disposed of in the British market at prices yielding a satisfactory return.

A telegram from Halifax, dated May 22nd, said that mackerel have struck in on the Nova Scotia coast, and that the fishermen are active. A fleet of forty American vessels are now on the coast waiting for the schools, and the fishery cruisers Canada and Osprey are ready to prevent fishing inside the three-mile limit. Six mackerel were taken in one trap at Yarmouth to-day. Ten American seiners are at Liverpool, several are off Lunenburg, and eighteen arrived here to-day. It was expected they would all be busy by the middle of the week.

At the first sale of the season, at the Montreal fruit auction rooms, held on the 12th inst., the cargo of oranges and lemons, ex-steamship, "Jacona," was offered, and was generally in first-class condition; only one buyer was present from the United States, which was unusual, yet the attendance of the Canadian buyers from all over Canada was very large, and bidding was brisk throughout the sale, and very satisfactory prices were realized. Messina lemons sold from $1 to $2.30. Choice Maiori lemons from $1 to $3.10 per box. Messina oranges sold at $2.40 to $2.65 per box, and at $1.10 to $1.80 per half-box; fancy ovals, in boxes, brought from $2.15 to $2.90, and in half-boxes, $1.60; Catania blood oranges sold at $1.60 to $1.80 per half-box, and one line of the fancy stock, in boxes, put up in cartons, sold at $4.50 to $5 per box. This is the highest figure oranges ever realized here at the spring auction sales. Sorrento oranges, in boxes, sold at from $2 to $2.90, and in half-boxes, at $1 to $1.85.

* * *

Some time ago it was announced that the Eastern Trust Company, as trustees for the bondholders of the Cushing Pulp Mill, at St. John, had begun suit for the foreclosure of the mortgage. This action is believed to have been instigated by Capt. Partington, of England the chief owner of the mill and the heaviest bondholder, to bring about a sale of the property when he could bid it in. Now there is a new turn in affairs, George S. Cushing, the former general-manager, having started suit to put the property in liquidation. This is regarded as a counter move to that of Capt. Partington. The court is considering legal objections to the proceedings. The mill was promoted by Mr. Cushing and was built on land adjoining his lumber mill. Unfortunately, there were early differences of opinion between Mr. Cushing and Capt. Partington that led to a rupture. The lumber mill and the pulp mill are both believed to have been financial losers, and to-day it looks as if there is to be a fight to a finish when a pooling of interests would be so much more advantageous to all interested.

* * *

—For some time past negotiations have been going on for the consolidation of some of the largest mining interests in the Rossland district of British Columbia. A Great

North Western press despatch, however, stated last week that they were "off" for the present owing to some disagreement in the estimate of the figures at which some of the properties were rated. It still seems likely, however, that the negotiations will be resumed.

* * *

—"Canada First," the popular magazine of the Canadian Preference League, announces a remarkable feature to begin in the June issue. It is sending Mr. J. F. Laycock as a special commissioner into the wilds of Northern Ontario and (probably) of the James Bay district, and he will write for our contemporary a series of illustrated articles describing his experiences and the country through which he passes. Mr. Laycock has some reputation as an explorer, we are told, and as a writer on Canadian subjects in the British magazines, and this, together with a growing recognition of the vast importance of our Great North Land, should render "Canada First's" new enterprise a markedly interesting one.

* * *

—Moosejaw, Assiniboia, is in a rather more hopeful frame of mind during the last few days. On Monday last the secretary of the Moosejaw Board of Trade, Mr. Seymour, received a letter from Mr. Wm. Whyte, second vice-president of the Canadian Pacific Railway, containing the information that the president of that railway has recommended a survey of the proposed road from Moosejaw to the elbow of the Saskatchewan, and that there is prospect of the road being built at an early date. If this is really the intention, it is certain that a considerable district of good farming land will be made tributary to the town.

* * *

Apropos the report that the Dominion Government is considering a bill to amend the present terms of the jurisdiction of the Exchequer Court of Canada regarding railway debts, the Financial Times has the following to say: "We cannot see any occasion for alarm, having regard to the strong opposition which the bill has aroused, especially on the part of the Minister of Justice, which makes it very doubtful whether the measure will ever become law. But even supposing that it takes its place on the statute books, so far as the prosperous railways of Canada are concerned, bond-holders remain practically unaffected, while, on the other hand, the effect is in one way calculated to benefit the bond-holders in weaker corporations, inasmuch as the sale of a defaulting property would be made easier than under the present legislation. The people really injured would be the Canadian public, as the new legislation would certainly tend to create a sentiment of distrust among British and foreign investors."

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, May 25th, 1905, as compared with those of the previous week.

	May 25.	May 18.
Montreal	$21,927,717	$25,805,055
Toronto	16,154,159	20,358,913
Winnipeg	4,729,776	6,080,221
Halifax	1,219,411	1,612,686
Hamilton	1,110,476	1,181,875
St. John	844,679	946,965
Vancouver	1,277,285	1,483,706
Victoria	610,274	729,900
Quebec	....	1,519,542
Ottawa	2,176,516	2,277,711
London	746,593	900,044
Total	....	$62,896,618

Vault doors in Bank of Montreal and Royal Trust Company, Montreal. Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

PIG IRON IN THE STATES.

Reports from the chief distributing centres of the United States, says The Iron Age, state that the buying movement in pig iron has been almost arrested. Many producing interests take the ground that a time like this is not one to force sales and are withholding. On the other hand, buyers are not being tempted by such concessions as are being made, such as, for instance, the recent lowering of Southern iron to $13 basis. While many consumers are well covered, in some instances into the fourth quarter of the year, others have all along fought the advance made, and are still purchasing some small parcels for very prompt delivery. Thus far on the whole the demand from the general foundry trade has not developed an increase at all in proportion to the swelling of the requirements of steel trade. This may be explained partly by the fact that the product of many foundries is in highly finished forms, for which the demand follows after industrial expansion has had full headway. Full demand for steel billets continues and there is still some scarcity. Volume of business in the heavier line of finished iron and steel is heavy, and the amount of tonnage in sight is large.

* * *

Early yesterday morning there was a fire in London, Ont., by which the Dyment Baker Co.'s planing mill and box factory, together with about 1,000,000 ft. of lumber and a part of the London Machine Tool Company's plant, were destroyed. The total loss is estimated at $75,000, of which about $35,000 falls to the Dyment Baker Co. The fire is said to have been caused by a rocket.

NORTH OF ENGLAND LETTER.

Yesterday the present Government gave their definite refusal to remove the embargo on the importation of Canadian cattle. So long as the Hon. Ailwyn Fellowes enjoys his $10,000 a year as president of the Board of Agriculture nothing is to be done. The plea is put in that there is "risk." Canadian cattle are healthy in a way, but there is just the fear that they may contract disease; therefore it is held politic to keep them out. The last outbreak cost a direct $12,500,000 to our farmers, and very many more millions in an indirect way to the trade of the country. So, until Canadian cattle lose their susceptibility to infectious complaints, or until the Hon. Ailwyn Fellowes loses office, Canada must be content to face the loss of trade. Candor compels the assertion that this second alternative may not be long deferred. It is now said that the general election will take place in June, but, of course, no date can be guaranteed, and no deep faith can be reposed in the intention of our somewhat bewildered Liberals.

The curious canard got abroad that Canadian manufacturers of the London Chamber of Commerce delegation were not after all to visit Manchester. It was said that Manchester interest in Canadian affairs had slumped below zero in consequence of the protective measures recently passed or now in making. So stupid a fable deserves to be crushed here and now. Canadian manufacturers and shippers will do themselves an injustice if they do not seek to understand Manchester's intrinsic importance as the great distributing centre for the North and Midlands. People concerned in any way with provisions, produce and fruit have especially some valuable hints to gain from a stay in this city. And those whose quest is limited to a search for the best market in which to buy may equally profit. London is no city to disparage, but in important respects the organization of business in Manchester makes this market more advantageous to dealers than the metropolitan.

Is Canada learning Chinese? The best-informed reports from the Eastern market show that Chinese trade is bound to go to those who have the vernacular. People with exporting ambitions can hardly afford to despise the advice of the British official reporters, the British non-official experts and the German consular authorities. All these are at one in saying that the immense business to be done is at the mercy of direct representatives who have, as the minimum, such a command of Chinese as comes from six months of steady application. You may learn Chinese now in Manchester, and at Shanghai the German consulate is providing teaching facilities for people of German race. Certain it is that for rubber shoes, cigarettes, hats, umbrellas, leather boots and soaps of certain specified kinds, not to mention cotton cloths, China presents unbounded possibilities. The immediate past, as well as the immediate outlook, are the guarantees of a continued success for the exporters able to handle the orders.

One of the impressions visiting Englishmen bring back from the Dominion is that there are numbers—disproportionate numbers—of promoters in Toronto and other city business society; that is to say, that there is a striking profusion of voluble gentlemen wielding, or professing to wield, incalculable power with the Government, with the municipality, and with the investing public. Granted that the Englishman is prepared to take a very real risk, these capable promisers are ready to ensure the likelihood of a remunerative rate of profit. It is noted that these fortune-makers are not always men of long residence in Canada, or even men in palpably high positions. On thinking over their propositions in the calm solitude of a steamer voyage, it not seldom occurs to the Englishman that the offers are not well enough secured, and are scarcely of that tangible order of merit that will assure them a favorable reception by partners at home. So the eligible opportunities fall to the ground, and it is impossible to prevent oneself from wondering whether the promoting fraternity waste time in vain regrets, or whether fresh openings are always at hand, and whether these ever lead to the fortune forecasted so enthusiastically.

The smoke nuisance is, perhaps, not the serious menace to health and enjoyment in Canada that it is at home. With us it is a real mischief, dimming sunlight, destroying vegetation, affecting eyesight, and otherwise acting prejudicially upon public health. Although we have a code of penalties to enforce, they can rarely be made operative against air-pollutors, and chiefly because no perfect means of preventing dense smoke is available. The newest expedient to meet with favor is the induced draught for boiler furnaces. The theory of the means is to provide the deficiency of

---

CENTRAL LIFE INSURANCE COMPANY,

OF CANADA.

Four years ago (to be exact, on April 1, 1901), the Central Life Insurance Company of Canada started out in the great business of life insurance. The work of organization was done by its present managing director, Mr. J. M. Spence, and he was fortunately able to gather around him a body of men whose personal worth and business ability have counted, and still count, much for the success of the company.

Economy in management is a most important factor in the surplus earning power of any insurance company, and from the outset the management of the Central Life has been characterized by good judgment and a watchfulness which is to be commended.

During the past four years the work of organization has been quietly but surely going on until to-day the head office and agency staffs are in a most satisfactory condition.

The character of the risks has been high, with the result that the mortality experience of the Central Life from its inception has been most favorable.

The issuance of liberal policies, coupled with the careful and excellent management of the company, has made the company a favorite among those looking for sound insurance.

It was perfectly natural that as the work of development went on a policy of expansion should be adopted. This has been done, and it is a pleasure to be able to report that a few days ago this vigorous young four-year-old company was granted its Dominion license giving it power to write life insurance in any part of Canada. The necessary securities put up by the company in order to have the power referred to were gilt edged. They consisted of the following debentures: City of Winnipeg, $20,000, running for thirty years; city of Vancouver, $19,000, running for forty years; city of Victoria, $15,000, running for fifty years. All of these bonds bear 4 per cent., payable half yearly. It will be conceded by all that these bonds would be hard to beat.

This step places the Central Life on a par with all the other Government line companies. It is believed that with the advantages of a Dominion license the subscribed capital stock of $500,000, on which $75,000 has been paid, and the opening of new agencies in Manitoba and the North-West the company will be able to secure a very liberal share of the insurance business to be written in the future.

The officers and directors of the company are as follows: President, Thomas Crawford, M.P.P.; first vice-president, Torrance E. Bissell, Esq.; second vice-president, James Dow, M.B.; medical referee, A. Groves, M.D.; managing director, J. M. Spence, Esq.

Naturally at this time there are a number of desirable agency openings, and applications for these are invited.

TOWN OF MEDICINE HAT

Tenders Wanted.

The Town of Medicine Hat has the following four lots of Municipal Debentures for sale, for which tenders will be received up to nine o'clock on **the 19th day of June, 1905:**

$12,000.00—Natural Gas.

$10,000.00—Water-works.

$30,000.00—Municipal Building.

$2,600.00—For the purchase of the New Edinburgh Natural Gas Well, Gas and Water Plant. These four lots of Debentures all date from the **1st of August, 1905,** bear interest at 5 per cent., and are repayable in twenty equal annual instalments of principal and interest. For particulars address the undersigned. The highest or any tender not necessarily accepted.

W. N. ADSIT,
Sec.-Treas. Town of Medicine Hat.

Debentures for Sale.

Sealed Tenders addressed to "The Corporation of the City of Regina" will be received up to and inclusive of Monday, the 19th day of June, 1905, till 5 o'clock p.m., for the purchase of Debentures of the city of Regina, issued in pursuance of a By-Law in that behalf authorizing the raising of $160,000 to be expended in the completion of the system of Waterworks, Sewerage, and Electric Lighting for the Corporation of the City of Regina.

These Debentures will be re-payable in equal annual instalments, and will bear interest at 4½ per cent. per annum, and are made re-payable within 30 years.

The highest or any tender not necessarily accepted.

J. Kelso Hunter,
Secretary-Treasurer.
Regina, 16th May, 1905.

WANTED

The Agency of a good Fire Insurance Company for the City of London.
Apply Box 13, Monetary Times.

TOWN OF DAUPHIN

Debentures.

Sealed Tenders, marked "Tenders for Debentures," addressed to the undersigned Secretary-treasurer will be received up to the **20th of June** for the purchase of Debentures amounting to **$35,000,** Debentures of the Town of Dauphin, viz.: **$25,000** for electric light plant, erecting power house, and purchasing site; **$10,000** for completion of Town and Fire Hall.

Debentures payable in twenty years, on the **first day of August, 1925,** divided into bonds of $1,000 each, and bearing interest at 5 per cent., payable on 1st day of August in each year, the principal provided for by sinking fund. Debentures to be made payable at the branch of the Bank of Ottawa, Winnipeg, Man. Purchaser to make payment at the branch of the Bank of Ottawa, Dauphin, Man.

WM. RINTOUL,
Sec.-Treas. the Town of Dauphin.

oxygen that results in black smoking, and, as a matter of experiment, it has been shown that dense smoke can be eliminated by adequate blowing of fires at the same time that 10 to 20 per cent. is saved in coal bills.

Briefless barristers in England are thoroughly in favor of the amalgamation of barristers' and solicitors' functions on the colonial model. The obstacle to such a reasonable reform is the successful barrister who depends now on solicitors' support. Clients can hardly make their wishes felt in the counsels of the hierarchy of the Bar. But the fact remains that not one barrister in six in England has even the prospect of a livelihood from pursuit of his profession.

The moisture present in Canadian wood pulp has long been a source of contestations between exporter and importer. Some trouble appears to have arisen out of the difference in methods of determining the proportion of water. With their usual practicality the Testing House Committee of the Manchester Chamber of Commerce are seeking to set dispute at rest. A former employee of the Testing House, now in the Dominion, is to test a consignment on your side by Manchester methods, and the same bulk will again be tested here. In this way, perhaps, an understanding will be come at. It is for exporting Canada to decide whether a Conditioning House would not be a useful adjunct to associations of traders. Shippers in England, and in most Continental countries, are able to accompany invoices of wool, oils, pulp, yarns and what not with a formal certificate of purity, composition or freedom from loading material. These are invaluable aids in preserving faith among customers or in deciding debatable technical questions that can only be indifferently decided at immensely greater cost in a court of law.

NORTH COUNTRY.

Manchester, May 12th.

* * *

A NEW "RISK."

In such days as these, our heading will surprise none of our readers. "Risks" of all kinds are among the common order of things in these times, and naturally belong to the peculiar forms of progress that in many respects the age has adopted without either counting the cost or taking the trouble to investigate these forms. To do an old thing in a new and, of course, a striking way seems almost enough now to win acceptance for the most empirical inventions, and as the ignorance of the general public is as dense as ever in regard to things belonging to the applied sciences, many of the new methods win apparently, a popularity only exceeded by the perils that their adoption condition.

Since we last wrote on the subject of new forms of fire "risks," it has been announced that in the Midlands a very large cotton mill is to be driven for the first time by electricity. Now, we wonder whether those responsible for the new installation have properly considered the fact—for fact it is—that as often as a heavy thunderstorm occurs near that factory, or an earth electric storm which is hidden underground, there will be a liability to the firing of the whole factory, to say nothing of the probability of violent electrical discharges from the machinery, working havoc among the operatives; and we suppose that in such a case claims could successfully be made under the Workmen's Compensation Act. Do we write without warranty? Hardly that. On April 16th, during a heavy thunderstorm, lightning came into contact with the electric lighting wiring of St. Matthias' Church, Richmond, Surrey, and worked great havoc. The glass doors of the switch boards were blown to pieces, and a considerable hole torn in the roof. At several houses in the vicinity the electric wiring was fused and the walls charred, but happily there were no fatalities.

This is but a type of the kind of thing that is "risked" by the increasing development of electricity. Perhaps the rage for lighting buildings (at times packed with people) by electricity may receive a wholesome check when some capital calamity comes to convince the public of the frightful "risk" incurred of sudden death—a thing, by the way, that ought never to be incurred in any church. These remarks have, of course, an equally practical application to public telephones, which will some day be the direct cause of a wholesale catastrophe. Electricity is in its infancy, but unless it can be brought under an equal control with steam or gas, it is certain that before long it will be answerable for a number of new and often deadly "risks."—Insurance Spectator, London.

* * *

BANK CLEARINGS.

The increased activity in commerce this year over last in both the United States and Canada is shown in a comparison of bank clearings in principal cities for the week ended 18th May. The American figures are given on the authority of Bradstreet's, and show percentage of increase and decrease as compared with the corresponding week last year:

New York	$1,743,492,296	Increase	41.8	per cent.
Chicago	184,585,598	"	15.3	"
Boston	146,049,850	"	10.2	"
Philadelphia	134,173,814	"	25.1	"
St. Louis	58,068,815	"	8.1	"
Pittsburg	49,249,964	"	30.9	"
San Francisco	34,428,902	"	13.6	"
Montreal	25,805,055	"	25.0	"
Toronto	20,358,913	"	13.2	"
Winnipeg	6,080,221	"	26.0	"
Ottawa	2,277,711	"	19.2	"
Halifax	1,612,686	Decrease	7.4	"
Vancouver	1,483,706	Increase	2.4	"
Quebec	1,519,542	Decrease	0.3	"
Hamilton	1,181,875	Increase	2.4	"
St. John, N.B.	946,965	Decrease	1.0	"
London, Ont.	900,044	Increase	6.3	"
Victoria, B.C.	729,900	"	13.2	"

There is nowhere a decrease among the United States cities, whose increase runs from 8 to 30 per cent., while the increased transactions in Canadian cities range from 2 to 26 per cent., with some trifling decreases at Quebec, St. John and Halifax.

* * *

DANISH AND CANADIAN BACON.

Editor Monetary Times:

Sir,—I have read your interesting article on "Canadian Products in Britain" in your issue of May 12th.

You tell us that the "favor extended to Danish bacon compared with other makes (which, of course, includes Canadian) being even more strongly marked than in the case of butter. The great secret of the success of Danish bacon on the British market is its keeping quality." You further state: "It is pointed out that one blemish to Canadian bacon in the eyes of the British dealer is the cutting of the large knuckle bone out of the shoulder in order to assist the process of 'fast curing.' This apparently trivial thing alone is sufficient to cause Canadian hog products to sell cheap."

To this I have to say, first, that Danish bacon above all other kinds that go into the English market is noted for its short-keeping qualities, and it must be sold immediately on arrival to prevent its ruinous deterioration. Hence, when there is a surplus over the week's consumption, the price often falls very seriously. Canadian bacon is noted for its

The Ontario Bank.

Dividend No. 95.

Notice is hereby given that a Dividend of THREE PER CENT. for the current half-year, being at the rate of Six per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and that the same will be payable at the Bank and its Branches, on and after

Thursday, the 1st Day of June next.

The Transfer Books will be closed from the 17th to the 31st May, both days inclusive.

The Annual General Meeting of the Shareholders will be held at the Head Office of the Bank, in Toronto, on Tuesday, the 20th day of June next. The chair will be taken at 12 o'clock noon. By order of the Board,

keeping qualities. Then as to the cutting of the large knuckle bone. This exists entirely in the imagination of, I suppose, Mr. W. A. McKinnon, Canadian trade agent at Bristol. There is very little bacon sent to England from Canada except what is known as Wiltshire sides, from which the knuckle bone is not taken. I do not believe that the veriest novice in Canada as an expert packer ever does this, so that our representative in Bristol will have to be quite sure that his statements are facts.

It reminds me of the would-be naturalist, who wrote a description of the lobster, describing it as a fish red in color, that moves backward. The author sent this to Frank Buckland, the celebrated naturalist, of world-wide reputation. In acknowledging it Mr. Buckland thanked him for his very interesting account of the lobster, but added: "It is not a fish, neither is it red in color, and it does not walk backward."

THE GROWING WEST.

A tribute to the remarkable progress of recent years in the Canadian North-West, and on the Pacific slope generally, is paid by a prominent gentleman of Montreal, who visited the west coast during April and May. This gentleman is Mr. H. Stikeman, general manager of the Bank of British North America. He had not been out west since 1902, and remarked great changes, especially in these three particulars: (1) The importance of the cities; (2) the rapid growth of the towns; (3) the tremendous increase in the quantity of land now under cultivation. Another thing he noticed was the high degree of contentment prevailing among the farmers and ranchers; this was the case in British Columbia as well as in the Territories.

A reason why not every one rushes to prairie farming is found in the following statement: While people are coming into the country east of the Rockies by thousands, one also sees the forest lands being cleared up, and when you ask why any one should go to the trouble to cut down trees and clear off stumps, when sections of land can be had on the prairie at such advantageous terms, the following sensible explanation is forthcoming:

"It is argued that where the forest exists the rainfall never fails, and many prefer to labor awhile and clear homes for themselves where there is no possibility of drouth; hence all sections of western Canada are being filled up with an excellent class of settlers."

There is to-day less distance between the farmer and the cities or good-sized towns. Indeed, the cities and towns want the farmer close to them, for the sake of what he produces on his land or on his fruit trees, or in his dairy. And cattle-raising is becoming a great source of riches to the North-West settler—likewise the price of cattle is going steadily up. While Mr. Stikeman lost no opportunity of talking with people of every class in the great West, he had naturally very close conference with the members of the banking fraternity, with the result that he returns to the money centre of the Dominion strongly of the opinion that the western Provinces are sound to the core. He considers that all the banking facilities the West requires are now at its doors.

As to the banking methods of the West, Mr. Stikeman, himself of decidedly conservative views, declares that "the conservative methods of the Canadian bankers have been pretty well sustained in the West, but in view of the fact that there are so many competing institutions in the country, a good many farmers have probably borrowed money to add to their holdings, instead of waiting and making the required sum out of farming operations." He believed, however, that the country is very prosperous, and its general conditions eminently sound.

As is generally known, the Bank of British North America does business in the Pacific United States, and has a branch in San Francisco as well as offices in British Columbia and the Yukon. The general manager brings satisfactory news from Dawson City. From their own representative and from other reliable sources he learns that, like all other placer mining districts, the amount of gold yearly obtained is receding, and the floating population has decreased; but that land must long produce gold. He likewise discussed mining conditions in British Columbia, where, he declares, that the wildcat methods have no longer their abiding place. "The attention of experts is now given over to the question of treating low-grade ore, because the future of the Province is bound up with its solution."

* * *

MUNICIPAL MOVEMENTS.

Two news items of great interest to the believers in municipal insurance were reported on the 18th inst.—very antagonistic in character. One was that the London (Eng.) County Council had decided to buy the North London tramways and electrify them; the council to spend $60,000,000 on the project, which will add another 100 miles to the lines already owned and managed by the people of London. The other item refers to some strange proceedings in Philadelphia. Here, says the despatch, amid scenes of disorder unprecedented in the annals of that city, the city council voted to lease the city's gas works to the United Gas Improvement Company for a term of seventy-five years for the total sum of $25,000,000, the money to be paid in various amounts before the end of 1907. The vote in common council was announced after three hours of debate, and a great uproar was started in the gallery, which was crowded to the door. From all over the gallery came hisses and cries of "thieves." The outburst was somewhat startling to the presiding officer, who made a vain effort to quell it. Finally he sent for a squad of police officers to clear the gallery. The crowd continued to hiss, and called the council thieves and other names until the police arrived.

At a joint meeting in Galt of the town council, board of trade, trades and labor council and citizens on the 11th inst. it was decided to recommend the council to establish a loan fund of $10,000 as an initial step for the purpose of assisting prospective builders of moderate-cost houses. The idea is that anyone who has a piece of land within the municipality on which he wishes to erect a dwelling-house will be loaned a sum not exceeding $1,000, for which the municipality will take a first mortgage on the property, said loan to be repaid in equal annual instalments, interest and sinking fund to be calculated on the price for which the municipality can sell the debentures, said debentures to run for a period of fifteen years. Possibly special legislation would have to be undertaken to authorize such an action, but no great difficulty is apprehended in obtaining it.

* * *

THE NEW TRANSCONTINENTAL LINE.

The first report of the Transcontinental Railway Commission has now been presented to Parliament, and would appear to confirm the favorable impressions previously formed with regard to the easy grade obtainable and the character and resources of the country traversed. It is stated that the board have decided in favor of taking over a portion of the survey work on the eastern division, which was performed by the Grand Trunk Pacific, and paying for it the sum of $289,863. As regards the route through the country east of Winnipeg, it is hoped that a better line will be discovered than that advised by the railway surveyors, though this is looked on as being very fairly satisfactory. Another point upon which settlement still remains to be reached is as to whether the line shall run north or south of Lake Abitibi in Ontario. It is now definitely asserted that the Abitibi region and the country to the west of it are very inviting in the agricultural and climatic sense. The districts around Clear Lake, Que., and from there to Moncton should also be quite valuable with railroad facilities. Arrangements to secure uniform specifications in the eastern and western divisions of the new Transcontinental Railway have been approved. It has been asserted that there are almost insuperable physical difficulties in the way of constructing a direct line between Moncton and Levis, but the route, as the surveys show, runs all the way through

H. S. STRATHY,
General Manager.

valuable country, part of which is settled, and the remainder most desirable for settlement. The opening up of this stretch will be of great advantage to the country. The probable length of this line, if the cross country route in New Brunswick is adopted, will be somewhat shorter than the Intercolonial Railway surveys. Using the same grades as the I.C.R., a saving of at least ninety miles would be effected, and nearly as much by the river route. The same motive power that will haul 660 tons on the Intercolonial will by the new line haul 1,260 tons going east and 990 tons going west.

* * *

—The by-law in which so much interest has been taken by the citizens of Ottawa, by which the city is authorized to spend $200,000 in buying out the Consumers' Electric Company, was passed on the 18th inst. by a large majority. The result of the voting is looked on as a direct rebuke to the efforts of the Ottawa Electric Company's attempt to over-ride the city's agreement with the Consumers' Electric Company, and to purchase the latter in spite of the clause forbidding it to sell out to any other company. The city's application to the Ontario Government for permission to buy out the company's plant was refused.

* * *

—The Commercial draws attention to the over-crowded condition of the labor market in the city of Winnipeg, and expresses hope that Eastern papers will oblige by emphasizing the fact. Too many people are crowding into the city and trying to make a living in it. Some prominent concerns, says our contemporary, have been obliged to hang out signs with the notice, "No Help Wanted," as a measure of protection against the innumerable calls of men looking for work. It cannot be too widely known that what the West needs, and is looking for to-day, is not men in the cities and towns, that is, unless they are the possessors of capital, but men who are agriculturists, or who will go into the country and work on the land.

* * *

—Arrangements are being perfected for the Dominion Exhibition, to be held next year in Halifax. A joint meeting was held last week representing the Board of Trade, the Manufacturers' Association, and the municipal council of that city to discuss matters. The chairman, Hon. J. H. Longley, Attorney-General of Nova Scotia, stated that among the several improvements necessary would be the enlargement of the grounds, extending the main building, the erection of a special building for the women's exhibit, and the enlargement of the machinery and transportation buildings. Ways and means would have to be devised also for the raising of money, in addition to the Dominion Government's grant of $50,000, to defray all these expenses.

* * *

—In order to obtain more united action during the coming summer in securing a due share of the tourist travel to and from the great Exhibition at Portland, Oregon, negotiations are under way for the amalgamation of all the tourist associations in British Columbia. The initiative in the matter was taken by the Executive of the Vancouver Tourist Association, whose secretary, Mr. Flumerfelt, was conspicuously active. The next move in the amalgamation scheme will be to hold a joint conference of representatives of the four tourist associations to consider the details of the scheme. The idea at present entertained is for the four associations to jointly bear the expense of having a representative stationed at Portland, Oregon, while the exposition lasts, who will distribute tourist literature and furnish information respecting the Province generally. It is believed that in this way a large number of tourists from the East will be induced to return by way of Vancouver or Victoria, after seeing the exposition. These tourist associations have already done good work in British Columbia, and it is to be hoped that the new plan will meet with full success.

LA BANQUE NATIONALE.

We printed last week an account of the proceedings of the annual meeting of this bank on Wednesday afternoon last, which was incomplete because of the non-arrival of the directors' report. We are able now to supply this omission, and to complete the account of the proceedings.

The following is a list of those present at the shareholders' meeting: Messrs. Rodolphe Audette, Alphonse B. Dupuis, Hon. Judge A. Chauveau, Narcisse Rioux, Nazaire Fortier, Victor Lemieux, Thomas Breen, Joseph Garneau, H Octave Roy, N.P.; Charles Granier, N.P.; Montefiore Joseph, N. Arthur Drolet, Elzéar Labrecque, M.D.; François Delisle, Joseph Huard, Rev. Herménégilde Roger, Rev. Chanoine P. N. Thivierge, Rev. Tancrède J. Pâquet, Rev. L. A. Grenier, Charles A. Chauveau, James McCone, Cyprien Labrèque, N.P.; Cyr. F. Delâge, N.P., P.P.; Henri Grandbois, F. X. Rainville, Arthur E. Scott, Joseph Archer, Cyr. Tessier, N.P.; Zotique Turgeon, Joseph I. Lavery, etc.

Mr. Rodolphe Audette was called to the chair, Mr. P. Lafrance was required to act as secretary, and Thomas Breen and N. Arthur Drolet requested to act as scrutineers.

The report of the directors is as follows:

Report.

Your directors have the honor of submitting you the forty-fifth annual report of the operations of La Banque Nationale for the year ending 30th April, 1905, with usual statement of assets and liabilities.

The profit and loss account stands as follows, say:

By balance to credit of profit and loss, 30th April, 1904		$82,481 67
Profits of the year, after providing for interest accrued on deposits, and for bad and doubtful debts		140,684 59
Forming a total of		$223,166 26
Which was appropriated as follows:		
Dividend No. 80, 3 per cent., payable 2nd November, 1904	$45,000 00	
Dividend No. 81, 3 per cent., payable 1st May, 1905	45,000 00	
Transferred to rest account	50,000 00	
		$140,000 00
Leaving a balance at credit of profit and loss account of		$83,166 26

During the year branches have been opened at St. Evariste, Amqui, Deschaillons, and at Ste. Anne de la Pocatière. We have closed the St. Lawrence St., Montreal, branch, which did not meet our expectations.

The inspection of the head office and of all branches has been made with care, and we mention with pleasure that a continued increase in the volume of business is enjoyed everywhere.

Your numerous employees have fulfilled their respective duties with efficiency and zeal, and we are glad to be able to render them this testimony.

All of which is respectfully submitted,

R. Audette, President.

Quebec, 17th May, 1905.

The president moved, seconded by Mr. N. Rioux: "That the report of the directors and the statement now read be adopted, printed, and published for distribution among the shareholders." Adopted.

The election being then proceeded with, the following gentlemen obtained the largest number of votes, and were consequently duly elected directors for the ensuing year:

Mr. Rodolphe Audette, Honorable Judge A. Chauveau, Messrs. Victor Châteauvert, V. Lemieux, J. B. Laliberté, Naz. Fortier, and Narcisse Rioux.

The president left the chair and Mr. C. Lebrèque being called thereto, it was moved by Mr. Jos. Archer, seconded by Mr. Chas. Grenier: "That the thanks of this meeting are due and tendered to Mr. R. Audette for his services in the chair, as also to the scrutineers and secretary for the fulfilment of their respective duties." Adopted.

Moved by Mr. Joseph Archer, seconded by Mr. Narcisse Rioux. "That the thanks of the shareholders of La Banque Nationale be offered to Mr. A. B. Dupuis for the services he has rendered to the bank as a director during the last fifteen years." Adopted.

Moved by Mr. Jos. Huard, seconded by Mr. Zotique Turgeon: "That the thanks be tendered to the president and directors for the services they have rendered to the shareholders during the past year."

The motion was adopted, and the meeting adjourned.

R. Audette, P. Lafrance,
President. Secretary.

Quebec, 17th May, 1905.

At a meeting of the directors, held on the same day, Mr. Rodolphe Audette was re-elected president and Hon. Judge A. Chauveau, vice-president of the bank for the ensuing year.

P. Lafrance, Manager.

Total Assets	3,926,918
Total Liabilities	2,033,757

Debentures issued for 3 or 5 years. Debentures and interest can be collected at any agency of Molsons Bank without charge.
WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

Thomas Mackie died at his residence, in Pembroke, Ont., on the 21st inst., of apoplexy. He was one of the most successful lumbermen in the Ottawa Valley, and entered politics in 1896, when he contested North Renfrew.

Mercantile Summary

The St. John Street Railway Company is making several important extensions of its system, and is also double-tracking the line to the Bay shore.

By order-in-council, the Ontario Government has revoked the license to do business within the Province issued to the Interstate Consolidated Mineral Company, a corporation incorporated under the laws of West Virginia.

The Canadian Fairbanks Company, Limited, which has offices and warerooms in Montreal, Toronto, Winnipeg, and Vancouver, intends to carry on the Canadian business of the Fairbanks & Morse Company, of Chicago, who are about to build a factory in Toronto, to employ 300 men.

The Canadian Ladder Company, Limited, capital, $40,000, has been incorporated. It will manufacture and deal in ladders, fire escapes, hammock chairs, etc., and will also take over the business carried on in Toronto by the Dominion Ladder Co. W. W. Stoddart and W. R. Pearce, of Toronto, are among the provisional directors.

It is announced that Messrs. J. W. Allison, and G. H. Meldrum, of New York, have secured control of the Canada Tin Plate and Sheet Steel Company, and will build large works at Morrisburg, Ont., with the help of Toronto and Montreal capitalists. Several other mills will be built in different sections of the Dominion as opportunity permits.

The Ontario Government has granted a license to the Gutteridge-Sullivan Company, Limited, of Sarnia, to buy, sell and make brick machinery, block machinery, dies, etc., and to carry on the business of brick, tile, earthenware and pottery manufacturers. T. P. Bradley and S. A. Armstrong, of Sarnia, are looking after the interests of the new company.

There was a special meeting of the executive of the Montreal Business Men's League, last Friday, the president, Mr. Henry Miles, in the chair, when it was decided to hold the annual meeting of the league on May 29th. It was announced that the new information bureau in the Leeming-Miles building, corner St. Lambert and Notre Dame streets, had been opened, and everything is now in running order.

Intermediate and final examinations of the Institute of Chartered Accountants of Ontario were held in the Y.M.C.A. building, Dominion Square, Montreal, last week, concurrently with those held in Toronto. Six candidates presented themselves for intermediate, and two for final examination. Results will probably be known about July 15th. Mr. John Walker, formerly inspector of the Quebec Bank, acted as presiding examiner at Montreal.

On Saturday evening last the Quebec Legislature prorogued. But few members were present. In the closing hours, the bills increasing the elementary school grant, and relating to licenses, also that imposing a tax on transfers of stocks and bonds were passed, the last mentioned after the proposed levy was reduced from 5 cents per $100 to 2 cents.

DOMINION SECURITIES CORPORATION LIMITED,
26 KING ST. EAST TORONTO.

Mercantile Summary.

Engineers have been out recently to survey the Pelican Lake district in southern Ontario, with a view to removing the silt deposits; and thus improving the run of fish, which are an important item in the food supply of the settlers.

A by-law carried in Orillia on the 18th inst. whereby the town binds itself to give to the James Bay Railway a right of way and also $30,000 when the line is open for traffic between Toronto and Parry Sound. The railway binds itself to run main line through Orillia in perpetuity, not to sell or amalgamate, and also to give a siding and flag station at the town's power plant at Ragged Rapids, on the Severn river.

The Dominion Government is being urged to station an ice crusher at Port Arthur, Ont., on account of the constantly increasing grain trade passing by that route. The season at Port Arthur has averaged 19 days less than at Sault Ste. Marie, and thirteen days less than at Duluth, and it is felt that this can be obviated. The Government will be petitioned also to have lighthouses kept in commission on the lakes until the last boats clear.

Dr. Ami, who has just made an investigation into the rock slides at Quebec, suggests to the Dominion Government that part of the overhauling rock should be removed and a talus or slope constructed. With a sodded slope further erosion by the action of rain or frost would be prevented. The report also recommends closing part of Dufferin Terrace, and strengthening the terrace by the construction of steel girders strongly embedded in the rock.

A bill has been under discussion in Ontario Legislature for the absolute prohibition of trading stamps or coupons by a provincial act. Finally, it was amended so that municipal councils may still legislate against the system by by-laws; such by-laws, however, are not to apply to merchants or manufacturers issuing tickets or coupons bearing upon their face the place of delivery, their cash or mercantile value, and which are redeemable at any time at the store or factory where the goods with which the tickets are given were purchased.

Messrs. Marion & Marion, patent attorneys, Montreal and Washington, report the following Canadian patents recently secured through their agency: 92,887, Stanislas Lemay, Windsor Mills, improvements in footwear; 92,889, Oliver N. Miller, Florenceville, N.B., chimney clean out; 92,899, Arthur B. Cruickshank, London, Eng., mouthpieces for telephone transmitters; 92,932, Alphonse D. Desormeau, Montreal, solder recovering machine; 92,975, James M. Brayley, Montreal, cushion heels; 92,983, Hugh A. Grant, Comox, B.C., machine for raking and cocking hay; 92,991, Samuel Hy. Parker, Montreal, boot; 93,120, Pierre T. Cantara, Montreal, composition which may be used in the manufacture of bricks, ornaments of all kinds, pavements, etc.; 93,137, Arthur J. Lafreniere, Montreal, apparatus to prevent accidents at hay presses, etc.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

According to figures compiled by the London Petroleum Review, the production of petroleum throughout the world during the past year was 28,577,900 tons, or 3,000,000 tons in excess of the quantity produced during the previous year. The above figure beats the record. Approximately the production of the various fields was as follows: America, 15,000,000 tons; Russia, 10,600,000 tons; Sumatra, Java and Borneo, 1,000,000 tons; Galicia, 827,100 tons; Roumania, 496,000 tons, and India, 804,000 tons.

The amount of taxable property in Vancouver, B.C., according to the last assessment returns is $22,524,435, compared with $19,564,895 last year. The gross increase is even more, amounting to over three millions and a half. This is made up of $1,346,060 in improvements, and $2,286,530 in real estate, but as certain exemptions are granted, the net increase, as indicated in the amounts upon which taxation is levied, is accordingly lower. In 1904, the total value of property in the city, both improvements and real estate, was $24,688,855, while this year it is $28,321,445.

The following were among the enquiries relating to Canadian trade received at the Canadian Government Office, 17 Victoria St., London, during the week ending 20th April, 1905: A cold storage company in the North of England wish to establish business relations with Canadian exporters of produce. A firm of manufacturers' agents selling joinery, wheelbarrows, skewers, roofing slate, etc., are desirous of representing a few Canadian houses. A Canadian firm of lumber exporters desire to hear from British and Continental buyers of maple flooring, bass broom handles, piano keyboards, bobbins, dowels, etc.

Dominion charters have been granted to the following: The Canadian White Company, Limited, to carry on the business of electrical, mechanical and civil engineers and contractors. Capital stock, $1,000,000. The Duncan Electrical Company, Limited, to make, buy, sell and deal in all manner and kinds of electric supplies, and apparatus; capital stock, $90,000. The Imperial Laundry Company, capital stock, $20,000. The Montreal Furniture Company, Limited, capital stock, $20,000. The Crescent Watch Case Company, Limited, with a capital stock of $20,000, will have its headquarters in Toronto.

Further details of the proposed Michigan Central tunnel under the Detroit river are now to hand. There will be two tubes running parallel under the river, about 30 or 35 feet apart, and each about two miles long. Work will be begun and be prosecuted from the Canadian side of the river. Electrical locomotives are to be used for hauling trains through, thus removing the danger from escaping gases that frequently has proven fatal in tunnels where steam locomotives operate. Each tube will have a single track, using the third-rail electric system. One of the greatest provisions for safety will be that trains will only go in one direction through either track.

PORT ARTHUR & FORT WILLIAM.
Post Office ddress, — — Port Arthur, Ont.

Mercantile Summary.

The Canadian Pacific Railway will shortly double-track the line between Winnipeg and Fort William, and expect to complete the work by the shipping season of 1908. It has also almost decided to give material aid in the shape of buildings, etc., to selected British settlers in the North-West.

L. Getz, general store, Lambton, Que., lately reported insolvent, is now making a proposition to pay 35 per cent. on liabilities aggregating about $6,000.——The liabilities of C. Thibault, general dealer, Ste. Anne des Monts, Que., whose failure was referred to last week, are figured at $5,200, with apparent assets of about $4,000. The estate will likely be wound up.

L. H. Resnik, a Montreal jeweller, is reported an absentee, and several jobbing houses of that city are mourning his departure. He came here less than a year ago from Philadelphia, it is said, and though quite a stranger of uncertain antecedents, he was able to secure some quite fair-sized bills on extended credit terms. It is said some of his stock has been found in second-hand stores.

Gold Bros. & Cohen, manufacturers of clothing in a moderate way at Montreal, are reported in embarrassed shape, and a meeting of their creditors has been called to consider their proposition. Two of the partners, Jacob Gold and Robert Cohen, formerly carried on business as Gold & Cohen, and were recently prosecuted criminally for alleged fraudulent practices in connection with that business, their conviction resulting.

Just about a year ago, Louis Vollman, Louis Goldberg, and J. Schwartz, of Montreal, started in the manufacture of clothing, on a limited capital. They had previously been well paid hands in a leading clothing factory, but while having a good practical knowledge of the business, they were men of little education and entirely without general business experience. They now owe about $6,000, which they are unable to pay in full, and ask creditors to accept 30 per cent. of their claims.

A country failure rather more important that the ordinary is that just reported of L. H. Chouinard & Co., of Matane, Que., who have assigned to V. E. Paradis, Quebec, and are estimated to owe somewhere about $20,000. Mr. Chouinard has been a number of years in business, but his record has been marked by rather a pronounced lack of success. In 1894 he was reported in trouble, and then arranged to pay 75 cents on liabilities of some $15,000. He apparently did not benefit by experience, going into lumbering operations, which did not result favorably, and being reported neglectful of his engagements, with the result that eight or nine years later he again became involved, offering 50 cents on liabilities of about $17,000. His proposition was declined, and the assets were sold. The stock was bought in for him by some friends, and he resumed business, using the name of a minor son as a cover, but again disaster has overtaken him.

Mercantile Summary.

The Wholesale Boot and Shoe Association gave a luncheon a few days ago to their treasurer, Mr. Charles Bonnick, and presented him with a silver tea service.

The suggestion is made to hold a Dominion Exhibition in Quebec in 1908, the third centennial of the founding of that city. Senator Choquette and others formed a company to take the matter up.

Upon the demand of the Gault Bros. Co., Montreal, an assignment has been made by J. A. Tremblay, of Shawinigan Falls, Que., who only engaged in storekeeping there last year, and who formerly was a hotelkeeper at Garneau Junction.

The National Transcontinental Railway Company is having two new trial lines surveyed in New Brunswick. One is from Chipman to Boyestone, and the other between Canaan River and Moncton, north of the St. John division of the Intercolonial Railway.

A curator has been appointed to the estate of Jean St. Hilaire, a small general dealer at Lyster, Que., who shows nominal assets of $600 to pay liabilities of $1,619. He was originally a farmer, and has been a carter and a sort of Jack-of-all-trades before commencing storekeeping exactly a year ago.

The Canadian Pacific Railway Co. is pushing ahead construction work on its line from Goderich to Guelph with all possible speed. The grading has to a large extent been completed, and fence-building gangs are busy. It is expected that the road will be ready for operation during the coming fall.

Another farmer gone wrong is Athanase Lavigne, of Maddington Falls, Que., who has recently been running a grocery and restaurant buisness, for which he is apparently quite unfitted. During the past few months he has been several times sued, and he has now assigned owing $2,300, with nominal assets of $1,500.

St. Boniface, the town across the Red river, from Winnipeg, is showing decided growth. In 1895, according to Lovell's Gazetter, it had 1,450 population; to-day its population is 4,308, and its assessed value of property, $3,322,000. One-fourth of the property in the town is said to be exempt. A forty thousand dollar town hall is being erected.

—The granting of a charter under the name of the Commercial Rubber Co. of Canada, and with Sir Montagu Allan, S. H. C. Miner, C. F. Smith, H. D. Warren and Jas. Robinson as provisional directors, D. Lorne McGibbon as general manager, and E. A. Wright, secretary, would seem to foreshadow an event which has often been talked about, namely, a merger of the chief rubber manufacturing companies of Canada. It would have a capital presumably of between $10,000,000 and $12,000,000. The new concern has purchased the late Boston Rubber Company's property at St. Jerome, Que. The rubber companies of the United States have been concentrating during the last year or two, and it is by no means unlikely that the Canadian should do the same.

DOES IT PAY

D. S. CURRY, City Comptroller.
Winnipeg, 18th May, 1905.

The Richelieu & Ontario Co.'s new steamer, "Montreal," just built at the company's yards, at Sorel, has now been placed upon her route. The engines and boilers were built by the Bertram Engine Works Company, Toronto. She is 340 ft. long, 44 ft. wide, over hull, 75 ft. 6 in. wide over guards. The total number of staterooms is 250.

Mercantile Summary.

Silverthorn's livery stable, at Lumsden, Assa., has been destroyed by fire at a loss of about $4,000, together with an implement warehouse belonging to Mathieson & Martin.

The Hamilton, Ancaster and Brantford Radial Co. has now succeeded in coming to a settlement with the Brantford Street Railway Company, and the road will enter Brantford over the present street railway tracks, which are to be provided.

Two hundred delegates from Europe to the International Railway Congress in New York have been this week entertained in princely style by the Grand Trunk Railway of Canada. The party left Washington last Sunday for a long tour of inspection, visiting Altoona, Pa.; Pittsburg, Cincinnati, St. Louis, and Springfield, Ill. They reached Chicago on Saturday, and remained there until Monday afternoon, when they left on the Grand Trunk for a tour over the company's lines. Niagara Falls power plants, Toronto and Montreal, the Lachine Rapids, etc., etc. There were three special trains of nine cars each. As the Grand Trunk is one of the few railways chosen for this special tour, publications describing the G.T.R. System have been prepared for the visitors. These are beautifully printed and illustrated productions, showing the Niagara bridge, the Victoria bridge, and various scenic features of this Canadian route.

* * *

THE IRON MARKET

Markets east, west and south seem to agree this week in possessing the quality of inactivity, says the Iron and Machinery World. It is a comparative dullness, for with the tremendous consumption that is now in progress, it would be impossible to shut off all demand. It is to be remembered also that for a month past the buying has been steadily in excess of the production. And that course of trade could not continue indefinitely. The reaction to date is a wholesome one, and unless unduly protracted will inure to the well-being of the trade in general, by putting the market on a more nearly normal basis. The slight decrease in the stocks of merchant pig iron is not regarded as significant. The daily output of iron in April was the largest on record, surpassing that of March, the previously best month. Within the past few days several iron furnaces have blown out for relining, and it would not be surprising if the severe strain to which the furnace capacity of the country has been subjected during the past six months would result in some further suspensions of production, to be only partially offset by new operations. Consumption remaining the same, it is therefore not unlikely for sales to again show an increase over the output. The chances are too evenly balanced to make probabilities clear. Some quiet buying of pig iron in the east is noted, pipe works being among the purchasers. This action, in the face of the drooping tendencies, is indicative either of urgent needs or to the conviction that iron is a purchase at present figures. The stubbornness with which the fractional decline in southern pig iron is met by the larger producers seems also indicative of an inherent strength of position among furnacemen. Considerable negotiation is in progress in respect to their supplies of mill product for the last half of the year by large consumers. Efforts are being made to establish a level somewhat lower than that now prevailing though with no announced results. From the present commercial conditions in the implement and other western machine shop trade, the consumption of finished material during the last half of the year promises to be very large. In structural shapes there is little buying, but the outlook has scarcely abated in its total or net rosiness of view. Steel rail buying continues more largely in the east, where the orders are now needed.

* * *

—"I want to complain of the flour you sent me the other day," said Mrs. Newliwed, severely. "What was the matter with it, ma'am?" asked the grocer. "It was tough. My husband simply wouldn't eat the biscuits I made with it."

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

TORONTO MARKETS.

Toronto, May 25th, 1905.

Chemicals, Drugs, Etc.—A fair trade is being done locally in drugs, but there is little worthy of special comment. Opium has not advanced on account of the damage to the crop so much as was at first anticipated, the stocks being sufficiently large to still keep prices on the easy side. Quinine has declined 2 or 3 cents. Carbolic acid is firm. Citric is quiet. There is a good demand for menthol. Bromides are about the same as before. A trade report from Manchester says that export business has been somewhat better during this month; the home trade has not improved, but allowance must, of course, be made for the Easter holidays. A fair number of orders have been placed all round, but mostly for moderate quantities only, and in scarcely any one article in particular has there been any considerable degree of activity. Values, however, are well maintained, and although the total volume of business is scarcely up to reasonable expectation the general tone in trade is not unsatisfactory. In the heavy alkali branch there is a moderate demand, and little, if any, change in values. Bleaching powder is perhaps offering a little more freely from second-hands. Caustic soda is not active, but remains steady. Ammonia alkali is in good request.

Dry Goods.—Business in general dry goods is about what may usually be expected at this time of the year. Sorting trade, perhaps, is not quite so heavy as it might be, owing to the backwardness of the season. Dress goods are finding a normally ready sale. Travellers throughout the country districts report that prospects for a continued good season are bright. Wholesalers report payments to be about average.

Flour and Grain.—Greater activity seems to be making its appearance in the flour market, and sales can hardly be long delayed in the face of the past continued cessation from buying. Prices remain nominally the same, ninety per cent. patents being quoted at $4.35 to $4.40. Millfeed is easier in price; in fact, it has declined to $14.50 or $15 for bran, and $17 to $17.50 for shorts. Not much business is being done in Ontario wheat, millers still having fair stocks on hand. It is expected, however, that very shortly they will have to re-commence buying. Barley is dull. No business is being done in Canadian corn. There is a firm market for oats, and it is believed in some quarters that the supplies will not be sufficient to meet requirements until the new crop comes in.

Fruits.—Southern fruits continue to sell well at fair prices. Strawberries are fairly plentiful. It is expected that the domestic berries will be rather late in arriving owing to the late spring. Some say they have been affected in certain districts by frosts.

Groceries.—A normal movement is going on. Sugars are dull, and little is passing in that commodity. In canned goods the scarcity of certain lines, of course, continues, particularly in tomatoes. Dried fruits are in moderate request. Currants are comparatively firm.

Hardware.—Wholesalers report conditions very brisk in practically all lines of small hardware. Nails, bolts, nuts, chain and farmers' hardware are all in strong demand. Metals, too, are experiencing a good movement. Pig iron is quite brisk. English advices speak of further improvement in this branch, and Cleveland iron is now 2s. 3d. per ton dearer than it was a month ago. Scotch iron, however, has only gone up 1½d. per ton in that period. Copper has declined steadily. Tin is not so strong as it was. Lead and spelter have both become firmer.

Hides and Leather.—Hides are quite dull, but prices are unchanged. Leather has shown improving demand of late, but prices are still a little unsettled.

Provisions.—The market for butter holds firm, supplies being about on an equality with demand. Cheese is in fairly good request, and the improving quality it likely to increase this. Eggs are quite firm, large quantities being now bought up, before the warm weather, for pickling purposes. Prices for hog products are firm, and trade is normally brisk.

Wool.—Prices are nominally the same, very little actual business being under way.

DELAYS ARE DANGEROUS.

⁂

MONTREAL MARKETS.

Montreal, 24th May, 1905.

Ashes.—The market shows little variation. Supplies continue light and values are very steadily maintained, buyers readily paying $5.50 for good tares of first quality potash; seconds, $4.95 to $5. There is still an absence of business in pearls, and from $7 to $7.25 per cental is a nominal quotation.

Cements and Firebricks.—The movement in cements is increasing, and firebricks are in very fair request. Receipts from sea have been quite liberal of late, and there are considerable stocks now on the wharves. We quote: Belgian cement at $1.80 to $2; English, $1.90 to $2.10. Firebricks, $17 to $22 per M.

Dairy Products.—The exports of butter last week were fairly liberal for the season of the year, reaching 4,338 packages, as against 2,010 packages for the corresponding week last year. Of cheese eleven steamships took out 31,512 boxes, mostly to London and Bristol. The butter market shows a somewhat firmer tone, supplies being comparatively light, and the demand good; for choicest creamery 19c. is about the figure, in some rare cases 19½c. is said to have been paid. Fine to finest Western cheese is quoted at 9¾ to 9⅞c. per lb., and from 9½ to 9⅝c. for fine Quebecs.

Dry Goods.—The attention of most of the larger houses is now being directed mainly towards the reduction of stock before the usual half-yearly stocktaking, and some considerable sales of clearing jobs are reported to leading retailers from the larger centres, who have been in town

City of Winnipeg.

PROPOSALS FOR SUPPLY OF ELECTRIC POWER AND WATER POWER LOCATIONS.

The City of Winnipeg invites proposals for the supply of Electric Power upon certain conditions, a copy of which may be obtained upon application at this office, and also proposals from parties who own Water Powers for the sale to the City of such Water Power.

The proposals shall be addressed to Ald. J. W. Cockburn, Chairman of the Special Power Committee, and will be received at the office of the undersigned up to 12 o'clock noon on Monday, June 12, 1905.

Electric Power.

The maximum quantity of power to be used at any time will be 1,500 horse power.

The power is to be delivered to the city at a point to be agreed upon, east of Main Street, and will be paid for by the City monthly, the quantity used will be determined by Watt Meters placed on the City's incoming switchboard. Any party or company tendering for the right or franchise in the City under the conditions herein referred to shall submit with such tender a deposit in cash or marked cheque of $5,000. In case of acceptance of such tender the contractor shall deposit an additional $20,000 within thirty days; said two sums to be retained by the City as security for the completion of the company's works to develop the Water Power and for the works and plant necessary for the transmission of same to the City.

Water Power Locations.

In addition to the above the City will receive proposals from parties who own Water Powers for the sale to the City of such Water Power, such proposals to be accompanied by plans showing the location of such Water Powers and any works of development which may be done upon them.

The City reserves the right to reject any or all tenders or to accept any bid which appears advantageous to the City of Winnipeg.

C. J. BROWN,
City Clerk.

City Clerk's Office,
Winnipeg, Canada, May 13th, 1905.

Tenders for Government of British Columbia 3½ per Cent. Debentures.

Tenders will be received up to the 15th of June, 1905, for the purchase of $365,000 Government of British Columbia Dyking Debentures, in denominations of $1,000, issued under the authority of the "Dyking Assessments Adjustment Act, 1905," bearing interest at the rate of 3½ per cent. per annum, payable half-yearly at the Government Treasury, Victoria, on the 1st of January and 1st of July in each year; the principal redeemable in thirty-two years from the 1st of July, 1905.

Tenders to state the price net, the amount to be deposited at the Canadian Bank of Commerce, Victoria, on the 30th of June, 1905.

Tenders to be addressed to the Honourable the Minister of Finance, Victoria. Right of acceptance of any tender reserved.

May 5, 1905.

TANNERY FOR SALE.

The Tannery, known as the Beaver Tannery, in the Town of Aurora, in good repair; capacity, 600 sides per week; equipped with latest machinery and in good order. For further particulars apply to the Daville Tannery, Aurora, or P.O. Box 128, Aurora, Ont.

looking for bargains. In one leading warehouse no fewer than thirteen buyers of this class were noticed the other day, and the aggregate of sales must have been quite considerable. For the city retailers the weather keeps discouragingly cool, but collections appear to be fairly maintained.

Groceries.—The sugar market appears to be assuming a rather firmer tone after the prolonged decline, and there have been several slight advances in raw beet sugars within the last few days. This has apparently caused a little improvement in the demand at the refineries, which has been quite slack for some time past, giving ground to the belief that stocks in the hands of both jobbers and retailers are very low, and that active buying must soon set in. The factory quotation for standard granulated is $5.25, with $4.75 the lowest figure for yellows. Barbados

A Comparison.

All Insurance Actuaries claim it is unfair to compare two life companies as to the ratios borne by their Expenses to their Premium Incomes.

Such a comparison, however, of the results obtained by the same company during two consecutive years, is not only legitimate, but is important to persons contemplating insurance.

Accordingly when the Manufacturers Life shows that in 1904 it decreased this expense ratio 1¼% as compared with the low rate in 1903, prospective insurers realize that there is no better company in which they can place a policy.

cables advise a firmer market for molasses, from 35 to 35½c. being now figured as the laid-down cost. The tea trade here is still a dull one. In Japan the market for new crop has opened on just about the same level as last year, but the quality of the leaf is said to be better. Samples of fancy first pickings are to hand, quoting at 28 to 30c., but the goods are almost too high-priced for this market.

Leather.—The demand from boot and shoe manufacturers is still somewhat slow,

DEBENTURES.

SEALED TENDERS, marked "Tenders for Debentures," addressed to John Smithers, Town Clerk, Moosomin, will be received up to and inclusive of June 10th, 1905, for the purchase of Debentures of the town of Moosomin, issued in pursuance of By-law in that behalf, authorizing the raising of $38,500, for the purpose of erecting a Town Hall and Fire Hall, combined, $23,000; drainage, $5,000; purchasing of fire apparatus, $7,000; paying up floating debt, $3,500.

Said Debentures bearing interest at the rate of 5 per cent. per annum, and repayable in 20 equal, consecutive annual instalments.

and owing to general quiet business in the shoe line, Quebec manufacturers are reported as operating only partially, while a large local shoe concern has temporarily shut down a plant it operates at St. Hyacinthe. Sole leather men claim to be doing a good export trade, and say that improvement in local trade will likely lead to some advance in prices. In black leathers nothing specially new is reported.

Metals and Hardware.—The movement in these lines is fairly sustained, and in heavy metals the railways are reported to be doing some active buying. Pig iron is steady at $18.50 to $19 for domestic brands; No. 1 Summerlee, $19; No. 2, do., selected, $18.50, ex-wharf. Bars, nails, wire, etc., are unchanged. Ingot tin and copper are easier at 32 to 32½c. for the former, and 15¾ to 16c. for the latter; lead, $3.45; spelter, 6¼c.; antimony, 9c. Plates and sheets show little change.

Oils, Paints and Glass.—Since last writing there have been pronounced advances in both turpentine and linseed oil. The former article was put up the end of last week to 90c., and again since to 93c., the single barrel, and it is prognosticated that the price will be 96c. before the week is out. Linseed oil is advanced a full 3c. per gal., being now quoted at 53c. for raw, and 56c. for boiled. Other lines have not undergone any recent change.

* * *

FINANCIAL CONDITIONS.

Henry Clews & Co., New York, in their circular dated May 20th, 1905, say:

Conditions have hardly favored stock market activity during the past week. Recent liquidation and change of attitude amongst the prominent leaders naturally checked speculative operations for the bull account, although an expansion of the short interest induced more or less buying to cover and consequent periods of strength. At present there are neither indications nor reasons for anything more than transient recoveries. The speculative situation has been somewhat improved by the elimination of weak accounts and through a drop of 10 to 20 points. General business conditions are satisfactory, and if security values were only at a more tempting level there would undoubtedly be renewed general buying, provided present disturbing issues could be promptly settled. The immediate outlook for the market, however, is for periodic rallies, followed by reactions which may result in ultimately bringing the market to a lower level. Speculative activity during the summer will probably be largely influenced by unsettled outside conditions, as well as by the fact that the season is approaching when many operators will be absent. For some time to come the political situation promises to be a disturbing element in the stock market. The rather aggressive attitude taken by the Administration upon railroad and tariff problems is somewhat unsettling to large financial interests. We are likely to see during the next three or four months a good deal of discussion regarding railroad rates; and when the public begins to appreciate the injurious consequences to all parties arising from the Government fixing the rate they will be less likely to sanction any such socialistic policy. Bank clearings are still showing large gains over last year at all principal cities, but the increases run in the neighborhood of about 25 per cent. over last year, which compares with increases of about 50 per cent. a few weeks ago. This diminished activity is largely the result of lessened speculation and the fact that many important financial deals which were in process of negotiation have since been completed. Railroad earnings continue large and generally average between 8 and 10 per cent. ahead of last year. These figures probably represent the real gain of business over last year more correctly than any other. Easy conditions exist in the money market and promise to continue until crop demands assert themselves in the autumn. Foreign exchange has been strong and in good demand, and there is still some talk of gold exports at no distant date. Towards the end of the month some heavy remittances will have to be made on account of the Japanese loan placed in this country, and whether this will be provided for by previous purchases of exchange or by gold shipments remains to be seen. Moderate gold exports will cause no concern, owing to easy money rates here, and our own abundant supplies of the precious metal.

A GOOD POLICY

for policyholders is the 20 pay life guaranteed option policy issued by

Head Office—WATERLOO, ONT.
The Mutual Life OF CANADA

In this style of policy the Benefits conferred and the Premium rates charged are more liberal than those in any similar policy issued by other companies.

Be sure to examine it before insuring elsewhere.

The Altar Of Friendship

Do not hazard your all on the altar of friendship. Thousands of men have been ruined by going surety for friends. Better far for you to pay a strong surety company the premium on the bond. It will pay you to enquire about our policies.

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

PROTECTION
is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

UNION MUTUAL Life Insurance Co. of Portland, Maine.

THE EDMONTON DISTRICT.

To keep up with the progress of our growing North-West one has to revise his geography and his statistics every little while. If he does not, he will be hopelessly out of his reckoning. Taking up a pamphlet just received from the Board of Trade of Edmonton, Alberta, the writer, who was out in that place less than two years ago, found some figures that caused him to rub his eyes. For instance, the population of the town in 1903 was said to be 4,000; to-day it is 7,850, and the assessment was $3,958,000 in 1904. We find on page 16 a list of towns in the Edmonton District, which comprises all the territory between Red Deer, on Red Deer River, 95 miles south, and Athabasca Landing on the Saskatchewan, about the same distance north, 50 miles from Edmonton west and 90 or 100 miles east.

Within these boundaries lie a dozen or more towns and villages, growing fast. Strathcona, with 3,000 people and some promising manufactories; southward thence and we come to Leduc and Millet, about 400 each; Wetaskiwin, a stirring place of 2,500, with two newspapers and three banks; Ponoka, on the Battle River; Lacombe, which claims 1,500 people. If we go eastward, there is Fort Saskatchewan, the headquarters of a division of the North-West mounted police; St. Albert, Morinville—all three connected by telephone with Edmonton. From the last-named town westward lies Lac St. Anne, a post of the Hudson's Bay Co.; while northward is Athabasca Landing, an important place, and a great fur-trading point on the Peace River and Mackenzie River systems, connected with Edmonton by a Government telegraph line. Recent visitors to Manitoba and Assiniboia were often surprised at the extent to which electric light, the telephones, and other appliances of public convenience were availed of in villages of but a few years' growth. The same is true to-day of Alberta, which has been looked upon as more remote. This Board of Trade pamphlet tells us that in the district north of Red Deer there are 118 post-offices, while "all towns on the railway are connected with Edmonton and Calgary by long-distance telephone."

Wonderfully rich is the black soil of the district just described. Crops are grown there of wheat, forty bushels to the acre; oats, a hundred bushels; barley, forty bushels—all without manuring. Whether it is possible to go on for twenty more years cropping such land without manuring, and whether it is wise to attempt it, we gravely doubt. But that the wealth of soil exists just now one cannot but believe. Roots and vegetables of great size and succulence are grown there, as we can testify, having seen them at Strathcona fair. The rich soil, with ample rainfall and summer warmth, produces tomatoes in the open air on August 1st, according to the compiler of this pamphlet; while "fine specimens of apples have been produced near Edmonton, but their culture is only in the experimental stage as yet." That other fruits can be successfully grown with such advantages as are above stated, there is surely reason to believe.

In case people should think the Edmonton district bleak from lying so far north, it may be well to cite some outstanding facts. 1st. During the fourteen years that the Calgary and Edmonton railway has been in operation the train service has never been stopped or even delayed by snow. 2nd. The average winter temperature, as recorded in the Government Station, for December, January, and February of ten past years, was 9.9 above zero. 3rd. There are no blizzards in the Edmonton District: the almost constant high winds which prevail farther south and west are very rare in the Saskatchewan Valley. 4th. At Peace River Landing, 300 miles north of Edmonton, a flour mill is in active operation—at Fort Vermilion, 400 miles north of that place, there are two, one of them a modern mill of the best equipment, fitted with its own electric lighting plant. Splendid wheat is grown there for their grinding. Oil, coal (lignite) and natural gas abound in the district, and white fish by the car-load taken in Lesser Slave Lake have been shipped from Edmonton to the Eastern States of America. Many more striking things about this wonderful north-land have been marked for copying, but we must be content with this much for the present. Any one who wishes to know more will do well to write for a pamphlet to the Secretary of the Edmonton Board of Trade. Our copy has been greedily taken from us by an English family bound for Calgary.

⁂

MUNICIPAL TREASURERS.

"To anyone brought into close connection with the municipalities [of Ontario], the great prosperity of the counties and townships cannot but be evident. Their freedom from debt, the slow but sure increase in the value of land and agricultural values generally, are most gratifying indications of the high standard of material advancement prevailing throughout the Province."

This valuable testimony, from a man of ripe experience, is taken from the recently issued report of Mr. J. B. Laing, provincial municipal auditor for this province. At the same time, Mr Laing takes occasion to refer in a cautionary way to a tendency which this journal has often remarked upon, and which the general manager of the Bank of Montreal referred a few years ago, namely, the too great disposition of municipalities to bonus new industrial or other enterprises. Says Mr. Laing:

"It is to be hoped that unless in very special cases, there will be a lull in the granting of municipal bonuses. During the past year it has been amply demonstrated that undertakings so fostered are not always attended with success. Municipal debts, so far as counties and townships are concerned, are on a very satisfactory footing; but in the case of cities, towns and villages, there has been a strong tendency to launch out, which it would be well to check. The municipalities have been most liberal as a rule in the assistance of companies and corporations asking aid for different enterprises, some in the way of loans, some in the form of bonuses, and it seems reasonable that they should have a little rest."

Before proceeding, as we hope to do, to remark somewhat in detail to the condition in which the Provincial Auditor found the accounts and financial affairs of the various municipalities, we shall make an extract or two from the generalization which he makes, on page 34, upon the unwisdom too often shown by towns, villages, and even counties in appointing men with inadequate knowledge of either book-keeping, banking, or financial affairs to positions which require an acquaintance with all three. While it is quite true that there has been an improvement in recent years of the book-keeping of municipal treasurers—much of which is due to the steps taken by the Provincial authorities in insisting upon more method and in providing officers with proper books of account—there is still room for more. And municipal councils are still culpably lax as to the type of men whom they appoint to such important offices. "I know," says Mr. Laing, "of one instance in 1904, of an important county treasurership going to a very worthy man it is true, but a man who knew absolutely nothing of accounts, and what is more, admitted that he did not." And he exclaims, "When will municipalities learn that there is no use in electing men to the office of Treasurer who have no knowledge of accounts or business methods of any kind? Even the county municipalities are not blameless in this respect. The fact of being an honest man and popular, does not constitute the only qualification for being elected a municipal treasurer. Some knowledge of accounts and business methods should be considered an essential."

To business men, the making of a man unacquainted with banking and accounts the custodian of tens of thousands of dollars in money, and the oversight of accounts involving hundreds of persons or corporations seems absurd in the extreme. And the result of such folly is seen in the delinquencies or serious defalcations which have already occurred in Ontario, and which it is the business of the municipal auditor to expose and if possible prevent. It should be made clear to the minds of councils that the credit of their municipalities in the estimation of bankers or dealers in securities is greatly affected by the manner in which their books are kept and the condition of their financial affairs from year to year as exposed by the investigation of competent officers. When the time comes that a selection has to be made (in the general application for funds to be secured by debentures) between municipalities which have competent treasurers and capable book-keepers, and those who have not, the difference will be made very apparent by means of a blank refusal or a rate of interest that is prohibitive of borrowing.

⁂

NEW GRADING FOR CHEESE AND BUTTER.

As a result of a conference between Mr. J. A. Ruddick, the dairy commissioner, and various members of the trade, several important changes have been made in the classification of standards and a clearer definition of grades in dairy products has been arrived at. Heretofore the classification of these goods has consisted practically of only two grades, "finest," and "under finest," the latter of which has been very indefinitely described. In future this will be subdivided into second and third grades. The first grade (for cheese) will be very similar in all essential features to that which has in the past been known as finest, and the standards will be as follows:—

Flavor.—Clean, sound and pure.

Body and Texture.—Close, firm and silky.

Color.—Good and uniform.

Finish.—Fairly even in size, smoothly finished, sound and clean surfaces, straight and square.

Boxes.—Strong, clean, well made and nailed. Ends to be of seasoned timber. Close fitting. Weights stencilled or marked with rubber stamp.

These standards are intended primarily to indicate the range of quality, and must not be understood to establish hard and fast rules to guide the grades.

The first grade for butter will be based on the following standards:—

Flavor.—Sound, sweet and clean.

Body and Grain.—Waxy; not too much moisture.

Color.—Even, no streaks or mottles, not too high.

Salting.—Not too heavy if salt butter. Salt all dissolved.

Finish.—Good quality parchment paper lining, neatly arranged. Package well filled; bright, even surface.

Packages.—Well made, of good material, and clean. Boxes to be of right size to hold 56 pounds of butter when properly filled. Parafined on inside. Neatly branded. Tubs to be lined with parchment paper of good quality.

An important feature of the new regulations is the provision that butter boxes must contain only 56 pounds, or half an English hundredweight. Formerly packages contained, and were marked 57 pounds, 58 pounds, or other quantity, much to the annoyance of importers in the Old Country.

The following scale of points will indicate the relative values of the different divisions of quality: Flavor 40, body and grain 25, color 10, salting 10, finish and packing 15, total 100. It is obvious that defect in flavor of a certain degree counts nearly three times as much in determining the grade as a defect in finish, or packing of the same degree, and so on.

Hon. Mr. Fisher, the Dominion Minister of Agriculture, has been paying close attention of late to a matter which has much interested all producers of cheese and butter who sell their products in Montreal, viz., the proper weighing of the same. The producers claim that the system which has been in use has been unfair to them, in that it charges them with underweight, but does not credit them with overweight. The effect of this, it is claimed, is that supposing a lot of fifty packages, five of which would be weighed, and supposing the first package showed a loss of one pound, the second a gain of one pound, the third O.K., the fourth a loss of one pound, and the fifth, a gain of one pound, a cut is made of two pounds in every five packages of the whole lot, that is to say, of twenty pounds, whereas the average shows no loss whatever. The practice is looked upon by factory men as little short of fraudulent, though the buyers explain that it is done for the purpose of avoiding cuts for short weight at the point in Europe to which the article is shipped.

In the Toronto market, the receipts of butter have not increased as much as might have been anticipated, and prices rule firm. Pastures throughout the country districts are in excellent condition, however, and it is altogether likely that deliveries will before long be quite large. Dairy pound rolls fetch 16c. to 17c.; tubs, 12 to 15c.; creamery, 19 to 20c. In cheese not so much business has been passing during the last few days, but prices keep steady. Not much fall make remains in stock. Eggs, while they still are coming in from the country in good supply, are firmer, owing to the demand for pickling purposes. They realize as a rule, 15½ to 16c. per dozen, and there has been a good deal of competition on the part of buyers. Hogs have shown an easier tendency for some little time past, and, in fact, declined 10c. per cwt. on this week's market. Nevertheless, smoked meats and hog products keep up in prices, and there is a good demand.

* * *

CANADA IN ENGLAND.

At the Canadian Club dinner in London on Empire Day, last week, there appears to have been in the speaking rather a surfeit of sentiment over Canada and Canadian relations. The Colonial Secretary, Hon. Alfred Lyttleton, describing the possible evolution of the Dominion said she could proceed along two lines: Either concentrate and centralize by federation, and work out her destiny in partnership with the motherland, or she might be one of an aggregate of independent nations, owing allegiance to one sovereign. In either case she would attain a great place in the world. And then Lord Minto, our late Governor-General, became still more effusive. But it is to be said that he spoke well, and showed himself an observer of current feeling and events, for he has lived here. He described the period of his vice-regal stay in Canada as an epoch-making time. The Empire in 1898 was very crude compared with 1905. Canada's sons had as an outcome rushed to arms out of British sentiment. Referring to the unveiling of a memorial to the colonial troops fallen in the late war, he called it the official seal to a magnificent page of imperial history. "His period of office had seen great prosperity and development of wealth, with it, too, a feeling of power and ambition of nationality linked with imperial feeling. He hardly knew whether the people of Great Britain grasped it all." It may be doubted whether Great Britain does grasp it all. The average dweller in Great Britain who is unacquainted with such communities as Australia or Canada is not likely to grasp the notion that "mere colonists" can have national ambitions or yet imperial ideas. He is brought up, as it were, to regard the colonist as some sort of strange, semi-alien, not to say inferior person who needs education and polish. But the sentimental portion of the evening was rather broken in upon by the blunt practicality of Lord Strathcona who, in replying to Mr. Lyttleton's toast of Canada said that Canada would greatly appreciate it if postage on newspapers to Canada were reduced in rate. He hoped the French convention would be a step towards union with Newfoundland and Canada. The London papers generally, so the cable says, emphasize the fact that the Empire Day first originated in Canada, and The Times devotes an editorial to the subject. The Times is very kind.

* * *

PRESIDENT ROOSEVELT ON LAW AND ORDER.

A subscriber in Western Manitoba, writing us on 24th May, on some other matters, takes occasion to make a suggestion which we shall print: "I was pleased," he says, "to see you come out with some strong words—not a bit too strong—on the subject of the strike of Chicago teamsters and their irrational doings and sayings. But I wish you had quoted President Roosevelt's words at the Iroquois banquet. They are historical words; or at least they will need to be quoted some day, when lawlessness breaks out again in the big American cities." We give below a few sentences of this address, made, it is true, to the Iroquois (Democratic) Club, but intended to furnish a reply to the intemperate written protest of the union labor men against the use of Federal troops to quell the riot precipitated by the strike:

"I am a believer in unions. I am an honorary member of one union. But the union must obey the law just as the corporation must obey the law, just as every man, rich or poor, must obey the law.

"In every effort of Mayor Dunne to prevent violence by mobs or individuals, to see that the laws are obeyed, and that order is preserved, he has the hearty support of the President of the United States, and in my judgment he should have that of every good citizen of the United States.

"In upholding law and order, in doing what he is able to do to suppress mob violence in any shape or way, the mayor of Chicago, Mayor Dunne, has my hearty support. I am glad to be able to say this to you, gentlemen, before I say it to another body."

"There need not be the slightest apprehension that ever the mob spirit will triumph in this country. Those immediately responsible for dealing with the trouble must exhaust every effort in so dealing with it before call is made upon any outside body; but if ever the need arises, back of the city stands the State, and back of the State stands the nation."

⁂

DROPPING DOWNWARD.

A copy of the "Pocket Register," a yearly chart of fraternal societies, just to hand from the New York Spectator office, shows that a considerable number of societies on this continent are now on the wane, and, like the Independent Order Foresters, unable to bring in anything like as much "new blood" as formerly. Among these, most of the state jurisdictions of the Ancient Order United Workmen appear to be in the most hopeless condition of disintegration. The following are a few of the indications standing out on the pages of the chart, respecting them and others:—

The United Workmen of Iowa had $24,309,000 of insurance in force in 1900, and have now only $23,552,000, though in the interval the society issued new certificates for over ten millions of dollars. All these new millions failed in keeping the total from shrinking by nearly a million.

The Illinois branch, likewise, had $28,054,000 in force in 1901, and has now only $18,770,224, though upwards of nine millions of new were put on in the intervening four years. Instead of the $4,567,000 of new certificates issued two years ago, only $453,000 was scored in 1904.

In Maine, the Workmen had $14,352,000 on the books two years ago, and now show only $9,898,200. The new business came to $1,911,000 in 1902, but in 1903 only $776,000, and in 1904, new certificates of only $69,000 were issued.

Massachusetts makes a very bad record of progress backward for the A.O.U.W. In 1900 that state had $117,325,000 in force, but to-day only $57,526,000. And its new issues, which in 1900 amounted to $8,045,000, have dwindled to less than two millions, and last year fell to only $331,000.

Michigan scores nearly as badly. In 1900 that branch boasted of a total business on the books of $38,548,000. Some six millions of new was obtained, but the total, nevertheless, has dropped to $28,084,291. Only $67,000—a mere nothing—of new was put on in the past year.

Minnesota shows an improvement of about ten millions upon the $46,915,000 total of the year 1900. About twenty millions of new certificates were issued in the four years, so that ten millions must have dropped out by death or lapse. Owing to such infusion of new blood its death-rate is only half that of the Michigan jurisdiction.

Nebraska shows an increase of certificates in four years of only about twelve millions out of over thirty-two millions of new entrants, its total now standing at $68,961,000.

New York State makes a very poor record for the past five years, in its branch of the same A.O.U.W. In 1900 it had $54,423,000 in force, but now has only $33,603,600, being a drop of $20,820,000, though about $11,351,000 of new was written in the meantime. The new blood in 1902 was represented by $4,229,000, and in 1903 by $2,551,000, but in 1904 by only the comparative trifle of $573,000. The cause of this decline is very apparent in the order's great increase of death-cost, which is from $17 per $1,000 in 1900 till now it amounts to $28 per $1,000. The outlook is gloomy in the extreme.

Pennsylvania's record of the past five years is very similar to that of New York. From $29,013,000 three years ago, and a death-rate of $19.80 per $1,000, its certificates have dropped to $18,300,700, while its death-rate has increased over 25 per cent., and in 1904 was $25.20 per $1,000. From $2,112,000 new certificates in one year, last year's in-take was only $176,000.

Tennessee Workmen took in new members for $821,900 in the year 1903, but only $77,000 in 1904, and ten times that amount disappeared from the books.

In Texas, new certificates for $2,444,000 were granted in 1903, and only $822,000 in 1904, and three times that amount lapsed during the year.

The state jurisdiction of Wisconsin makes a still worse showing. Its $14,418,000 in force two years ago has now dropped to $8,330,152. Also, its new business from being $1,687,000 has dropped to $489,000 in 1904.

What is called the Supreme Lodge jurisdiction, embracing all the different State sections of the Order, shows a decline in two years of the total business in force, from $799,039,000 in 1902, to only $556,593 in 1904. And the new in-take from $110,019,000 to only $25,897,395.

In the Province of Ontario, from a total in force of $72,388,500 one year ago, there is a drop to $69,471,500, the death-rate growing from $8.10 in 1901 to $10.70 in 1904. And the new entrants the past year took only $1,852,000 of certificates, as compared with $5,146,000 in 1901. The prospect for "new blood" in 1905 is exceedingly gloomy, the rates having been heavily increased.

The Iowa Workmen, like those of Ontario, broke away from the Supreme Lodge, of Meadville, Penn., some years ago, and in 1900 had grown to $3,141,000, the assessments being only $22.70 per $1,000. But in 1904 the three millions had dwindled to $726,193, while the death-rate had become double, scoring $45.40.

⁂

THE JAPANESE NAVAL VICTORY.

For months the world has been waiting for the conflict of the Russian fleet with that of Japan. And now that it has come no one is surprised, unless it be at the overwhelming character of the victory achieved by the latter power. Almost everybody expected Japan to win, indeed wished her to win; but hardly anyone thought it possible that such crushing defeat could be imposed upon the formidable combined fleets of Russia as that of Saturday and Sunday last in the Straits of Korea.

The first account of the affair from an eye-witness that we have seen appeared in the Toronto Mail and Empire of yesterday. It confirms the opinion generally formed of the superior tactics of Admiral Togo as well as of the skill and fighting qualities of the Japanese fleet. The naval battle of Monday resulted badly enough for the Russians, but the subsequent night attack of the Japanese torpedo boats was still more disastrous. Up to 30th May, the record is thirteen Russian ships sunk and six captured, but the total has since been alleged to be increased, while 3,000 prisoners were taken. It is not easy to understand how so vast damage could have been inflicted upon the Russian ships while, as is stated, the Japanese have suffered the loss of only three torpedo boats and no big ships. And we still incline to the belief that Japan's losses will prove greater than thus far announced.

However this may prove, Russia's naval power is paralyzed if not destroyed, while her prestige has suffered a shock from the loss of Port Arthur, the success of Oyama on land, and this latest disaster which is not likely to be recovered from. It is significant that immediately upon the receipt of news of the battle of the Korean Strait, Japan's credit went up with a bound. In both London and New York there was keen demand on Monday for her bonds, their price going up in London from 2½ to 3½ points for the 4½ per cents. and 6 per cents., while in New York the 4½'s went up 4 points and the sixes nearly as much. The same curious fatuity which prevented the Russian authorities from entertaining any proposals for peace after the surrender of Port Arthur seems to possess the minds of some of the governing body to-day, though a majority of her councillors are declared in yesterday's despatches willing to treat. Surely, in the face of such repeated demonstrations of the superior fighting ability of the Japanese forces on land and sea as recent events have given, it is time for other nations to bring pressure to bear on Russia to compel her to cease further waste of blood and treasure, and to give security for a cessation of her attempted spoliation of Japan. The telegram of thanks sent by the Japanese Naval Minister to Admiral Togo upon his victory is a model of brevity and reticence. Let one fancy, if he can, what a poem of effusive praise would have been despatched by, say, the United States Naval Minister, or the French, to a victorious admiral of either of these nations in like circumstances.

* * *

FIRE UNDERWRITING.

The address of the chairman, John H. Washburn, at the thirty-ninth annual meeting of the National Board of Fire Underwriters of the United States, contains some food for reflection. Referring to the outstanding fact that the fire losses of 1904 on this continent exceeded those of any year on record, not excepting 1872 and 1873, when the Chicago and Boston conflagrations took place, it is further recorded than in four months of 1905, seven conflagration fires, burning from $500,000 to $3,000,000 of property each, have occurred. Mr. Washburn goes on to say:—

> "Such a situation may well cause all interested in fire insurance to stop and consider well what they should do to save themselves from destruction. The Executive Committee of the National Board, at a meeting held shortly after the Baltimore fire, appointed a committee to examine the conditions in various cities and recommend such improvements as would lessen the liability to extensive conflagrations, and made an appropriation of $100,000 for the use of the committee, and their action was confirmed by the board at the annual meeting. Under this appointment, the committee has employed a large force of surveyors and engineers and made reports upon some twenty cities, as will appear in detail in their report."

We remark further upon this meeting that the report of the Board's committee of twenty has this to say, among other things, upon the conflagration hazard on this continent: "The conflagration hazard is the one great hazard the companies have to fear, as the loss by burning of an individual risk is never great. If this hazard can be eliminated, the business of fire insurance will be placed on a much more stable basis. Unless our congested districts are improved the companies will not be able to carry the business."

* * *

—That the officials brought from the United States into Canada to work for the Pere Marquette Railway have been ordered by the Government to be deported because they are aliens, is not a thing to be rejoiced over. In one sense it is a thing to be regretted, for the proceeding is based upon the *lex talionis*, inasmuch as we virtually say to the United States thereby, "we wish to show you that we can be just as narrow and bitter as you can be. You have been doing unfriendly, unneighborly things to us and now we do likewise." This sort of revengeful procedure may satisfy some Canadians who are haters of the American nation, but it cannot give general satisfaction because neither generous nor reasonable from a moral standpoint. And if we are to pursue these tactics in commercial and financial directions we are likely to lose more than we shall gain.

* * *

A NEW BRIDGE FOR ST. JOHN.

Among the various and extensive works projected by the Canadian Pacific Railway is a new bridge across the St. John river at the city of St. John, New Brunswick. Our correspondent in that city relates that Mr. D. McNicoll, of the C.P.R., paid a brief visit to St. John last week and created quite an excitement by his statement to a newspaper reporter that the authorities of the road are preparing to build a bridge across the falls at the mouth of the St. John harbor. The railway bridge now over the reversible falls with the two miles of track leading to the station is owned by a private corporation, The St. John Bridge and Railway Extension Company. For the right of crossing the C.P.R. has to pay tolls on every passenger and on every car. It is said these tolls amounted last year to about $60,000. This, coupled with the fact that the bridge is not heavy enough for the traffic of late years, is believed to have influenced the railway to decide on erecting a structure of its own. Surveys are understood to show that a new bridge can be built and all land damages met with an expenditure of about $1,000,000. The surveys were made for a bridge across the falls paralleling that already in existence and for a bridge lower down, at Navy Island. While Mr. McNicoll intimated that the bridge would be at the falls, there is a strong belief that the Island bridge will be constructed for this would give a better connection with the east and west side deep water terminals. For some time there has been agitation in favor of the city building a passenger and team bridge at Navy Island, and it might not be unwilling, in conjunction with the Street Railway Company, to share the cost of such a structure with the C.P.R.

As is not at all unnatural, there is speculation over what will become of the present bridge at the reversible falls of the St. John, when the C.P.R. builds. The bridge is too light for the train traffic of to-day, and the railway company has abandoned running heavy engines over it. The company which built the bridge issued the bonds, and while these have been a good investment, they would lose all commercial value if the C.P.R. withdraws its patronage. The Street Railway Company might buy the bridge, if it could be procured on any reasonable terms, for it is badly in need of some good way to maintain a service on both sides of the river. As things are just now, passengers are compelled to get out and walk about a quarter of a mile across a suspension bridge in order to get the cars that run to the seaside. This is a state of affairs that St. John people and tourists who want to bathe would like to see remedied.

* * *

OUR SAINT JOHN LETTER.

The city of St. John is now asking bids for a debenture issue of half a million dollars. The bonds are to run for forty years, and will bear 3½ per cent. interest, payable half yearly. The major portion of the loan, or, to be exact, $388,000 of it, is for water extension work, now being carried on, and to be completed before December. The sum of $55,000 is intended to be used in retiring 6 per cent. debentures falling due; another $50,000 will go to pay back to the C.P.R. the money it contributed towards the construction of a deep-water wharf in St. John harbor; and the remaining $7,000 will be used in the completion of the new steam ferry boat, to be launched in a few weeks. Bids for this loan are to close with the chamberlain on June 28th, and they will be received for the whole amount or for sums of $25,000 and upward. It is not unlikely that St. John people will take up a large share of these bonds, for, being non-taxable, they make a good investment, particularly for estate funds.

Messrs. Stetson, Cutler & Co., an American lumber concern, with a large mill at St. John, have secured a lease from the city of the Mispec pulp mill, so called, and now have an expert there getting it ready to operate. The company will convert into pulp logs cut on lands at Musquash burned over by fire last year. It is understood that an expenditure of upwards of $30,000 will be made in improving the mill plant. The company get the property for the moderate rental of $3,500 per year, and expect to make about forty tons of pulp per day.

Some time ago it was announced that there were legal difficulties concerning the Cushing pulp mill. Capt. Partington, the English pulp and paper maker, who put up most of the capital, is a heavy bondholder. Another bondholder is George S. Cushing, a local millowner, who furnished the mill site, and was for a time its managing director. The Eastern Trusts Company, as security for the bondholders, took action to foreclose the mortgage. Then Cushing moved to put the mill in liquidation. This has been before the courts during the past few days, and evidence given showed that the mill is being operated at a profit of $5,000 per month, but that nothing has been done towards paying off the interest on the bonds. There is a very strong feeling between the different parties, and it looks as if the litigation will be prolonged.

The catches of the harbor fishermen to date are said not to be within 35 per cent. of those taken up to the same period last year. The fishermen paid high prices this year for their privileges, and the practical total failure of the catch makes the outlook serious. Of course, there is still the summer fishing to come, and good catches of salmon and herring may make up to some extent for the falling off in the gaspereau and shad catches. It is to be hoped this will be the result.

Announcement is made to-day that the Canadian Bank of Commerce, which last year began the erection of a fine bank building on the corner of German and King Streets, will extend its new premises. The store of A. R. Campbell, merchant tailor, adjoining the bank building on German Street, has been secured. It is to be torn down and a building conforming to that of the bank erected, while the interior will be remodelled so as to give the bank the benefit of greater office space than was possible in the building first erected. The new bank is a low building, but it is said an extra story will now be added. This will be a great improvement.

The Bank of New Brunswick has begun the erection in Fairville of a new building that will be used by the branch to be established there. The building will be a wooden one, on the main street. The Bank of New Brunswick now has branches in Carleton and on Douglas Avenue, and the new one to be opened in Fairville will make the third practically in the city, for Fairville is a suburb. It is understood that the other branches have proved profitable, that their savings bank departments have secured many depositors from the working people living in the localities.

St. John lost one of its best citizens this week in the death of John McMillan, head of the stationery, printing and publishing business of Messrs. J. & A. McMillan. This firm has been in existence for upwards of seventy-five years, and Mr. John McMillan was a grandson of the founder of the house. He was a pleasant gentleman, prominent in social circles, and in years past was active in the councils of the Liberal party. Mr. McMillan held the position of Registrar of Probates, and it is likely he will be succeeded in this by George Robertson, M.P.P., who will find time to attend to the duties without abating his energetic efforts to secure a dry dock for St. John.

The Woodstock Board of Trade and town council are making strenuous efforts to secure the location of the Grand Trunk Pacific line down the valley of the St. John river. The choice is between this route and that through the centre of the Province. The latter would be seventeen miles shorter, but the Valley route is said to give better grades, and it certainly traverses a more settled country. Sir Wilfrid Laurier has told all parties that the matter will be settled after the session of Parliament.

Differences beween the Beersville Coal and Railway Company, the Imperial Coal Company, and the Canadian Coal Company have been satisfactorily adjusted. The coal companies have to use the railway to get out their product, and there was trouble over freight rates. The Provincial Government, which subsidized the railway, took a hand in it, and now it is said all three companies will be amalgamated. New York and Provincial capitalists are interested in the enterprises.

* * *

St. John, N.B., May 30th.

* * *

BANKING AND FINANCIAL.

Hamilton City Council has passed a by-law to issue $80,000 in debentures to cover the city's floating debt, and $20,000 for the extension of its waterworks system.

The public is cautioned to avoid a rather dangerous counterfeit ten dollar note on the Ontario Bank, which has made its appearance within the week. It has a dull, greasy look, and might deceive those not accustomed to handling paper money. They are said to be circulating from the Woodbine race track, Toronto. About a dozen of them have been detected by the bank authorities.

W. Holt, manager of the Seattle branch of the Canadian Bank of Commerce, who is an authority on the production of gold in Alaska and Yukon Territory, is reported to have made the following statement: "Conservative estimates place the Yukon or Klondike output at from $9,000,000 to $10,000,000. The Tanana product may be $4,000,000 or $5,000,000. The Nome output may be also from $4,000,000 to $5,000,000. The total receipts at Seattle from the north may be, thus, from $17,000,000 to $20,000,000. There has been plenty of water for mining purposes throughout the Alaskan winter. Gold will begin to arrive at Seattle early in June." The gold ore receipts at Seattle last year from the north were $13,432,026.

Dun's Review points out that, measured by bank exchanges, the volume of payments through the banks of the United States during the past six months has been the largest ever recorded, and in no month was the increase more marked than in April. A part of this high average no doubt was caused by unusual activity in the New York stock market, but it is not due to this cause alone. Our contemporary gives a tabulated summary of measured bank exchanges at the leading American cities, which will serve to show the increase, after reduction has been made for stock sales in New York City, and after allowance is made for the difference in commodity prices. In April, this year, the figures were $372,009,000, against $273,557,000 for April, 1904, or an increase of 36 per cent., and against $334,898,000 in 1903, or an increase of 11.1 per cent. Of course, during the 1902-4 period there was considerable depression in several prominent lines of industry, and it is better to make comparison with the 1902-4 period. In May, 1904, the measured bank exchanges amounted to $282,021,000, compared with $303,560,000 in May, 1903, a decrease of 7.1 per cent., or with $328,627,000 in May, 1902, a decrease of 14.2 per cent.

* * *

—A remarkable outcome has followed the fight of Mayor Weaver and the people of Philadelphia against the extension of the lease of the city gas works to the Union Gas Improvement Co. for seventy-five years. The company has formally withdrawn its proposition. The popular outcry against it was such that one by one the members of the municipal council who had voted in favor of such action veered round and showed themselves disposed to accede to the wishes of their constituents. General rejoicing has followed, the proposed sale being regarded as one of the most flagrant instances of malfeasance on a large scale that late days in the United States have witnessed.

TRADE NOTES.

The Royal Canadian Flour Mills Company, comprising Manitoba and Ontario capitalists, will, we hear, put up a 4,000 barrel flour mill at St. Boniface.

The steamer "Itauri," 2,941 tons, reached Vancouver last week, with 1,600 tons of raw sugar from Salavari, Peru, and consigned to the British Columbia Sugar Refining Co.

The North American Cotton Company, Limited, Montreal, capital $3,000,000, will erect or purchase and operate cotton and woolen factories of every description, also to buy and sell raw cotton, wool, etc., to generate power, for which purpose it has just acquired a Dominion charter.

The Saskatchewan Produce Company, of Prince Albert, has been organized to develop the extensive fish industries of the lakes north of that place. Fish will be taken from Candle Lake, Trout Lake, and as far north as Lac la Rouge. Some fifty men will be employed, it is said, when the industry gets well started.

The annual meeting of the Canadian Colored Cotton Company took place in Montreal on 25th May. The request for a 5 per cent. increase in protection was referred to, and the president, Mr. D. Morrice, said it was badly needed, as the United States were shipping into Canada large quantities of heavy fabrics, while the preference to Great Britain was giving that country a decided advantage in fine goods in the Canadian market. The company's profit for the year amounted to $111,000; $90,000 was carried to profit and loss account, which now amounted to $1,231,000. The total assets were $8,693,000, and open accounts payable amounted to $561,000. Other assets include stocks of goods, goods in process of manufacture, unexpired insurance, etc. These various items total up to $1,741,000. It was announced that the company is now controlled by Canadians.

⁂

LIFE ASSURANCE ITEMS.

The great Tom Lawson, of Boston, has been letting himself loose again. No doubt he is smart enough to make money, because the majority of people are fools enough to believe in anyone who can talk fluently. But the gentleman really talks too much. Mr. Lawson is like our eminent financial authority, Mr. A. J. Wilson, of London, in the impression that most things are unsafe. There seems to be some vague idea that gold, if put in a cellar and sat upon, will somehow breed and produce profits. But Mr. Lawson objects to insurance companies investing money in methods of which he does not approve—or, rather, out of which he gets no profit himself. We all know about his silly offer to Mr. James Hazen Hyde, of the Equitable, to buy his shares in that society at a preposterous price, but under absolutely impossible conditions. This was only another advertisement for Lawson. However, his head is full enough already. It is considerably swollen, and some day or another will blow up, or balloon-like, carry him away to the moon, which seems to be his natural abode.—London Review.

A remarkable experience has been that of the Scottish Temperance Life Company, which has been doing business for twenty-two years in the United Kingdom. A large portion of the business on the books is still of comparatively recent date, and the average age of the policies is small. Still, with nearly four millions at risk, claims to the amount of only twenty-four thousand pounds is a most favorable experience, says the London Insurance Spectator. But the feature we wish to remark upon is the showing made in the Temperance section of the company's business. For 1904 the ratio of actual to expected claims in the general department shows a slight increase; but the ratio of the last valuation period was only 72 per cent.—that is, though 164 claims were expected in that department, only 118 were announced. But in the Temperance section the claims have not amounted to one-half in number of those anticipated in the actuary's calculations. For the five years ending 1892 these claims intimated were just half the number expected, and for the five years ending 1902 the actual claims were 42 per cent. of the expected. Over the whole of the company's career claims in the Temperance section have not numbered half (45 per cent. only) of those expected, and in the general section not three-quarters (71 per cent. only) of the calculated number. There is something, then, in the claim of lighter mortality and consequent cheaper life assurance for teetotallers.

⁂

—The Canada Permanent Mortgage Corporation has declared a dividend of 3 per cent. on the paid-up capital stock for the half-year ending June 30th next, the same to be payable on or after July 3rd.

⁂

—The somewhat sudden death of Mr. F. B. Wade, chairman of the Transcontinental Railway Commission, was a shock to his many friends in Ottawa, and, indeed, to the whole country. His death, at the somewhat early age of fifty-three, was caused by cerebro-spinal meningitis. He had been acting as chairman of the Commission for the past eight months, and no doubt the confinement within doors did much to undermine his constitution, for he looked like a robust, as he certainly was an energetic man. His early death is to be regretted, for he possessed good qualities and an experience that would have made him a valuable public servant.

⁂

—The county of Simcoe, Ont., is making an additional claim for $37,500 as an additional contribution under the Good Roads Act toward the cost of roads built within its confines. In the last two years the county has spent $186,000 on its roads, and has received $25,000 from the Provincial Treasury toward that amount. A bill was introduced recently amending the Act, and making it clear that one-third of the cost of any county road system approved of by the Lieutenant-Governor in Council shall be paid from the Provincial Treasury.

⁂

—An annoying state of things to manufacturers in the Mother Country is revealed by a correspondent, residing on the Continent, of Commercial Intelligence: "Germans are laughing up their sleeves at the law of England requiring the mark, 'Made in Germany,' on all goods imported into England from that country. So much so in fact, that they are using it as an attraction for their own manufactures with a certain amount of success. This is how it is done. German commercial travellers procure samples of the most inferior quality of an English-made article which they take pains to mark, 'Made in England.' They then arm themselves with samples of the highest quality of the same article 'Made in Germany.' These samples are presented to customers with the remark: 'Examine the quality and the prices and choose for yourself.' The customer sees at once the superiority of the German-made article and the game is played. I have known of this being done not only all over Europe, but even in Great Britain itself. in the very teeth of British competition. This illustration of the keenness of German competition shows how wide awake our commercial traveller should be, and how every means should be exerted to overcome such tricks of the trade."

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, June 1st, 1905, as compared with those of the previous week:

	June 1.	May 25.
Montreal	$21,927,717	$.........
Toronto	16,154,159	19,415,662
Winnipeg	4,729,776	5.770,440
Halifax	1,219.411	1.507,275
Hamilton	1,110,476	1,386,838

Total	$51,976,784	$.........

Employers' Liability Assurance Corporation, Limited

HAMILTON HOUSE, VICTORIA EMBANKMENT, LONDON, E.C.

DIRECTORS' REPORT, 1905

The Directors submit to the Shareholders their Twenty-fourth Annual Report, together with the Audited Accounts to 31st December, 1904.

The premiums for the year are $3,193,685, against $3,191,985 for the year 1903, an increase of $1,700.

The balance of this year's account is $2,641,600. Out of this amount the Directors have already paid an interim dividend of 50c. per Share, and now recommend a further dividend of $1.25 per Share (free of Income Tax), making together a dividend of 17½ per cent. for the year on the Paid-up Capital. This will absorb $131,250, leaving $2,510,350 to be carried forward.

The following Directors, Mr. W. H. Maudslay, Mr. H. W. Maynard and Mr. R. Milburn retire, and being eligible, offer themselves for re-election.

In accordance with the resolution of the Shareholders, Messrs. Welton, Jones & Co., have audited the Accounts now submitted and offer themselves for re-election for the ensuing year.

By order of the Board,

16th February, 1905. S. STANLEY BROWN, General Manager and Secretary.

CLAUD J. HAMILTON, Chairman. S. STANLEY BROWN, *General Manager and Secretary.*

In accordance with the provisions of the Companies' Act, 1900, we certify that all our requirements as Auditors have been complied with. We have to report to the shareholders that we have audited the above Balance Sheet, and that, in our opinion, such Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the corporation's affairs, as shown by the books of the corporation in London. The securities and books at Boston (U.S.A.) have been examined by Messrs. Deloitte, Dever, Griffiths & Co., who have reported to us thereon to our satisfaction.

16th February, 1905. WELTON, JONES & CO., *Auditors.*

THE BANK AND THE TREASURY.

This is the title of a volume of 320 pages, published by Longmans, Green & Co., London and New York. Its author is Frederick A. Cleveland, Ph.D., Professor of Finance in the School of Commerce, Accounts and Finance of New York University. He is not unused to literature, for he has published interesting previous volumes and articles on business topics. An article referring to the difficulties in which Baring Brothers, of London, became involved as a result of a change in the character of their business from commercial to "modern financial banking" forms the basis of his discussion in this volume of the present conditions of banking in the United States, and the tendencies in banking operations. His preface says: "This is not a general treatise on money and banking. The intention is rather to contribute something to a single subject of national interest—the problem of providing a more sound and elastic system of current credit-funds. . . . Our financial superstructure rests on two distinct and widely separated pillars—the independent Treasury and the commercial bank." Among the useful documents to be found in the appendix are the Baltimore Plan of Currency Reform; the Carlisle Plan of 1896; the Fowler bills of 1897, 1902 and 1904, and Secretary Gage's bill.

⁂

A CANADIAN HANDBOOK.

We have already noticed, while it was in proof, the publication which now reaches us in completed form, entitled The Commercial Handbook of Canada, edited by Ernest Heaton, and intended to be published annually. The publishers are the Hunter, Rose Company, Limited of Toronto. The introduction to the work gives in brief space the reasons which induced the publisher to compile the book. He wishes to afford information to direct traders abroad, to investors in Britain, to intending settlers in Canada, and "to point out to those who wish to open up trade relations with the Dominion what to do and how to do it." First are given "Hints to Traders," such as advice upon Boards of Trade, trade lists, trade marks and brands, Customs tariff, legal weights and measures, rates of exchange, insolvency legislation, collection of accounts. A dozen pages are devoted to Canada's Progress, statistics being given derived from various Government sources. And a valuable as well as ingenious feature is the Distance Table, giving the number of English miles between important points in Canada and the rest of the world. Abridgments of special treaties are given and the Canadian Customs Tariff in full, as well as a postal guide, exchange tables and a statement of foreign money values in Canadian currency. The Directory contains serviceable information about leading boards of trade, newspapers, hotels, steamship lines, customs brokers, accountants and commercial lawyers in Canada, also commercial agents for Canada abroad. In short, the volume is a compend of serviceable information of many kinds, and deserves a wide circulation. It is not overdone with advertisements, as such books are apt to be, and we are glad to see that the Ontario Government statement of settlement lands and mineral lands occupies the first four pages. The statistics of mineral production are interesting and timely.

⁂

ONTARIO CROP PROSPECTS.

The Ontario Department of Agriculture has issued a statement as to the condition of crops and live stock on May 10th, based on reports of correspondents in numerous sections of the Province.

Winter wheat suffered less than usual from winter killing. It was planted rather late, owing to the lateness of last year's harvest, but there was an admirable catch. The county of Northumberland is an exception to the general rule, where the cold winds in April proved rather damaging to exposed fields. Most of the rye sown in Ontario is grown for green feed, and acreage at the most is not a large one. Where grown the crop is reported to be in good condition. Present indications are that there will be a full yield of clover this season, taking the Province as a whole. In the central and western counties clover fields are in a really first-class condition, having suffered but little from winter-killing of any form. In the more eastern counties prospects are not so bright, but the fields are rapidly recovering from the heavy check given the crop by the raw winds of April. Among fruit trees, a good many plums and peaches were killed during the winter, though not so many as during the previous winter, and, indeed, some of the damage noticed this spring should by rights be attributed to the severity of the winter before last. Great damage was done to young plum trees in a great many sections by field-mice, which girdled the trunks.

Live stock came through the winter in fair shape, though feeding had to be done carefully owing to the scarcity of corn and millfeed. Sheep are in good condition, and lambs are described as remarkably strong and active.

The sowing of seed grain this year took place a week or two earlier than usual, the seed-bed being in good condition notwithstanding the fact that the season on the whole has been backward.

⁂

THE BEAVER HAT MINE AT GOLDBORO, N.S.

Editor Monetary Times:

Sir,—In your issue of May 12th you treat with ridicule a Sydney press despatch telling of the Beaver Hat gold mine at Goldboro. The despatch, I will admit, is rather startling, and very apt to stagger the pessimistic Toronto mind; but, my dear sir, although I know that no stockholder in our

The FIVE per cent. Debentures issued by this Company afford the following advantages:

- The investment can be converted into cash at any time after two years by giving sixty days' notice.
- The issue of Debentures is limited to an amount not exceeding 75 per cent. of the Paid-up Capital of the Company.
- The total amount of Debentures to be issued will not exceed 20 per cent. of the value of properties under Mortgage to the Company.
- The Debentures issued by the Company will be a first charge upon the assets.

TOWN OF MEDICINE HAT

Tenders Wanted.

The Town of Medicine Hat has the following four lots of Municipal Debentures for sale, for which tenders will be received up to nine o'clock on the 19th day of June, 1905:

$12,000.00—Natural Gas.

$10,000.00—Water-works.

$30,000.00—Municipal Building.

$2,600.00—For the purchase of the New Edinburgh Natural Gas Well, Gas and Water Plant. These four lots of Debentures all date from the 1st of August, 1905, bear interest at 5 per cent., and are repayable in twenty equal annual instalments of principal and interest. For particulars address the undersigned. The highest or any tender not necessarily accepted.

W. N. ADSIT,
Sec.-Treas. Town of Medicine Hat.

Debentures for Sale.

Sealed Tenders addressed to "The Corporation of the City of Regina" will be received up to and inclusive of Monday, the 19th day of June, 1905, till 5 o'clock p.m., for the purchase of Debentures of the city of Regina, issued in pursuance of a By-Law in that behalf authorizing the raising of $160,000 to be expended in the completion of the system of Waterworks, Sewerage, and Electric Lighting for the Corporation of the City of Regina.

These Debentures will be re-payable in equal annual instalments, and will bear interest at 4½ per cent. per annum, and are made re-payable within 30 years.

The highest or any tender not necessarily accepted.

J. KELSO HUNTER,
Secretary-Treasurer.
Regina, 16th May, 1905.

TOWN OF DAUPHIN

Debentures.

Sealed Tenders, marked "Tenders for Debentures," addressed to the undersigned Secretary-treasurer will be received up to the 20th of June for the purchase of Debentures amounting to $35,000, Debentures of the Town of Dauphin, viz.: $25,000 for electric light plant, erecting power house, and purchasing site; $10,000 for completion of Town and Fire Hall.

Debentures payable in twenty years, on the first day of August, 1925, divided into bonds of $1,000 each, and bearing interest at 5 per cent., payable on 1st day of August in each year, the principal provided for by sinking fund. Debentures to be made payable at the branch of the Bank of Ottawa, Winnipeg, Man. Purchaser to make payment at the branch of the Bank of Ottawa, Dauphin, Man.

WM. RINTOUL,
Sec.-Treas. the Town of Dauphin.
Dauphin, 9th May, 1905.

company had anything to do towards inspiring that despatch, I assure you that its statements are moderate. We have a magnificent property, and it is owned by a close corporation. We have never sought newspaper notoriety. One of our directors owns two newspapers, and has discouraged publicity; and what news items that have been printed emanated from miners or owners of other mines. I would be glad if you would visit the property and verify the despatch, and I will deposit a sum sufficient to cover all your expenses with any responsible person, with instructions to pay it over to your order if you say the Beaver Hat mine is not the largest and richest gold quartz prospect ever discovered in Canada. If you do not claim my deposit I shall expect you to apologize for your article of the 12th.

Remember that Nova Scotia is part of Canada, and that particular part that has loomed large in the history of the nation from almost its settlement. Nova Scotia has produced the greatest scholars, statesmen, scientists, divines, lawyers, and even editors, and why should it stagger your small mightiness to hear that the Mayflower Province has added another wonder to her richness?

Yours truly,
Stuart McCawley,
One of the Directors.

Glace Bay, May 25th, 1905.

[We beg to assure Mr. McCawley that we have not forgotten that Nova Scotia is part of Canada, and a very valuable part. And we know enough of Nova Scotians to be aware that they are not usually apt to go into such rhapsodies over anything they have or do as characterized that startling despatch of 8th May about Goldboro. Therefore we took it with a grain of salt. We admit being cautious; not necessarily pessimistic. But not having been "staggered" (although much impressed) with the products of Nova Scotia up to the 8th May, we preferred to learn something more, and from a less rosy source. Now comes the above letter announcing the property to be the largest and richest quartz prospect ever discovered in Canada, and asking the editor to visit it. We regret being unable to do so, and are pleased to discover that the directors had nothing to do with the production of that May despatch. Since the proprietors are a close corporation, and feel that they have a magnificent property, they need not care what the public, or the Monetary Times think about it. It is difficult to see why Mr. McCawley gets so nettled at our discounting the press despatch about the Beaver Hat. We repeat what we said on May 12th: May they all make fortunes out of it.—Editor Monetary Times.]

FISH HATCHERIES IN NORTHERN ONTARIO.

We receive from the Sault Ste. Marie Board of Trade a resolution adopted by that board regarding the establishment of fish hatcheries in Northern Ontario, of which consideration and support is solicited. The resolution reads: "Extract from Minutes of Meeting of Board of Trade, Sault Ste. Marie, Ont., May 9th, 1905.—Moved by D. I. Miller, seconded by John McKay, and resolved, "that this board is of the opinion that one of the great resources is our fisheries; that Lakes Superior and Huron are among the greatest fresh water lakes, and produce large quantities of white fish, sturgeon and salmon trout equal to any fresh water fish known; that the said lakes are capable of supporting many times the present stock, and were the spawn, which is now wasted by fishermen, hatched and returned to the waters the supply could be naturally increased instead of reduced as is being done; that numerous water falls are distributed along the shores of the said lakes which are convenient for fish hatcheries; that this board would strongly urge and recommend the Government to place fish hatcheries at or convenient to fishing stations along the shores of the said lakes in such numbers as would hatch all the spawn obtainable from our fishermen."

It appears that the municipal councils, through their mayors, and the boards of trade of various places, have been asked to co-operate, and present the same or a similar resolution to Parliament through the member of the respective ridings at Ottawa and Toronto. The subject is an important one, for reasons which require no further elaboration, and we shall be glad to see the public spirit of the Soo Board rewarded by the consent of Government to what they advocate.

The Sault Ste. Marie Board of Trade is an active body with a considerable membership. We have not a list of its council, but its officers are: President, J. D. H. Browne; vice-president, F. A. King; treasurer, S. George Stone; secretary, J. B. Way.

SOCIETY OF ACCOUNTANTS AND AUDITORS.

We have received a copy of the twentieth annual report of the Society of Accountants and Auditors intended to be submitted at the meeting on 22nd May in Salisbury House, London. During the year 1904 new members to the number of 66 were admitted; 45 students qualified and were elected associates; while 15 associates were made fellows. The number of members on the roll at the close of the year was 2,066, namely: 793 Fellows, 1,149 Associates, 124 Students. The gold medal of the Society was won by William Seymour Turner, of Birmingham; while silver medals were awarded to James Patterson Logan, of Islington, and Arthur Collins, of Blackpool.

An account is given of the visit to America of the secretary, Mr. Martin, his addresses at the Congress of Accountants at the World's Fair, St. Louis, and the banquet in New York. Further, we gather from the report: "The secretary subsequently proceeded to Canada, where—although his stay was a short one—he met with a kindly welcome at the hands of the leading members of the profession." At a meeting of council held at the close of the nineteenth annual meeting Mr. William George Rayner, of London, was unanimously elected president, and Mr. Harry Lloyd Price, of Manchester, vice-president. The members of the society placed on record their sincere and hearty thanks to Mr. Charles Henry Wilson, of Leeds, for the valuable services rendered by him as president of the society for a period of over three years. This resolution was suitably engrossed and presented to Mr. Wilson.

CANADA PERMANENT MORTGAGE CORPORATION.

We are informed that at a meeting of the board of directors of the Canada Permanent Mortgage Corporation, held on Tuesday, 30th May, the vacancy created by the death of the late president of the corporation, Mr. George Gooderham, was filled by the election of Mr. W. H. Beatty to the presidency. Mr. W. G. Gooderham was chosen first vice-president, and Mr. W. D. Matthews the second vice-president. Mr. J. Herbert Mason, the managing director, who recently celebrated his and the company's jubilee, has retired from the general management, and is appointed chairman of the board of directors, in which position, while relieved from the details of active management of the company, of which he has been for so many years the chief officer, he will have a general supervision over its affairs.

We further learn that Messrs. R. S. Hudson and John Massey have been made joint general managers of the corporation, an appointment which is in pursuance of the

sensible policy of promoting trustworthy officials. Both these gentlemen are well qualified, and have had long experience in its affairs, the former as superintendent of the Canada Permanent Loan and Savings Company, and since the amalgamation as assistant general manager, while Mr. Massey was assistant manager of the Western Canada Loan and Savings Company, and since amalgamation has occupied the position of manager of the Ontario branch of the Canada Permanent.

Mr. Mason will doubtless receive many congratulations on the release from onerous obligations, which is implied in his change of position. He has had a long innings, to use a cricket phrase, and carries his bat out with infinite credit to himself and his side. To a man with his resources of mind, relief from the responsibilities which he has so long borne can hardly but be welcome, since it will enable him the better to enjoy the declining years of an unusually energetic life.

* * *

OUR HALIFAX LETTER.

Halifax has been busily engaged in antiquarian research during the past two or three weeks, in which occupation nearly all classes have been interested. For many years there has been conflict of opinion concerning the date on which the anniversary of the founding of the city should be celebrated, and sometime about the middle of last century the 21st of June was decided upon as the date of Lord Cornwallis' arrival. When another holiday, Dominion Day, was added to the calendar, this, with the 24th of May, made three holidays within a very short period. The 21st of June and the 1st of July have for some time dulled the edge of each other to such an extent that neither was properly celebrated, and Dominion Day in particular has never received the recognition here its national importance warranted. Recent investigations have shown that, taking into consideration the change in the calendar (which was not taken into consideration when June 21st was decided upon as Natal Day), the date would more nearly coincide with July 2nd. Thus Dominion Day and Natal Day might much more appropriately be celebrated together on July 1st than as at present. The retail merchants' branch of the Halifax Board of Trade recently met and discussed the matter thoroughly, the burden of sentiment being to celebrate on July 1st. This year, however, June 21st will be the great day, inasmuch as the city council has already made arrangements to that effect, but it will probably be for the last time.

A rather serious strike has been in progress at the Windsor Cotton Mills for the past week or two, by which about 250 hands were affected. The mill was started here in 1881, and this is the third time there has been trouble, but on the former occasions the difficulties were only slight, and were soon settled. The trouble now is over wages, and was precipitated by the weavers, who claimed that on a new quality of cloth upon which they were working their pay would amount to ninety cents less in a fortnight. The company claim they have been paying higher wages than any other mill in Canada, and that the order over which the trouble arose was taken at a very low rate simply to keep the mills running. Some of the strikers have gone to St. John to the mill there.

At a recent meeting of creditors of the Bank of Yarmouth held recently W. E. Stavert was recommended as liquidator. Ten days after this selection is approved of notices will be sent out to shareholders calling for twenty per cent. of the double liability. Another call of a like amount is to be made thirty days after, and so on as required.

The Dominion Exhibition is to be held in Halifax in 1906, and active steps will be taken to provide accommodation worthy of the occasion. The Exhibition Commission will look after the Fair and its belongings, but an effort will be made to do a little refurnishing and renovating of the city itself in order to present a good appearance to the visitors from other parts of the Dominion. It is unfortunate in this connection that a great part of the tram line runs through about the worst part of Halifax, a district through which visitors have to pass to or from the Exhibition grounds. Nothing less than fire would purify the sections referred to.

The Halifax retail grocers have organized again for the second or third time. Past efforts in this direction did not result in success, but they are now more hopeful, and have engaged a paid secretary. The officers of the body are as follows: President, Ald. W. H. Cawsey; first vice-president, E. W. Crease; second vice-president, Forsyth Junior. The above and the following comprise the board of control, which meets monthly: E. Hubley, Captain Allen, W. E. Crowe, W. J. Hopgood, R. N. McDonald, C. E. Choate.

Reports from the lobster fishing are not very optimistic. The past winter, as I have mentioned before, was all against the fishermen, and they lost a good deal, not only in lack of catch, but in gear destroyed. Since the spring opened it has not been much better, and all the factories report their receipts much smaller than usual. This, together with the fact that lower prices are ruling in the market abroad makes the outlook rather dismal. The spring pack this year will probably not be more than one-third of last year's pack.

The Scotch fish curers are again at work in this Province, and, with some adaptations in their methods which conditions here require, will undoubtedly be even more successful than last year. Nova Scotia herring, cured and packed by the Scotch method, brought such high prices in 1904 that everyone was much encouraged by the experiment.

A new steamship line is to run between Boston and Halifax in competition with the Plant Line, and the promoters have two waterfront premises in view here. These are Black's wharf and the West India wharf.

It is reported from the Pictou county coal mines that the famous Ford Pit seam of the Acadia Coal Company has been found. The Ford seam was the largest seam of coal in America, being in places thirty-eight feet thick, and the coal of the best quality. Twenty-five years ago or so there was a terrible explosion there, and the pit has been closed. If it is really the Ford seam that has been found, the fact will be of much importance to the business people of that county.

Halifax, 29th May, 1905.

* * *

MONTREAL LETTER.

The annual meeting of the Montreal Business Men's League was held on Monday, the 29th ult., in the council chamber of the Board of Trade, and was largely attended. The president, Mr. Henry Miles, occupied the chair, and in his annual address congratulated the members on the success of the league during the past year. He referred to the finances of the league, and said the revenue for this year would be increased, and, all things considered, the outlook was most encouraging. They had recently applied to the Provincial Government and to the city council for aid in meeting the disbursements of the association, and he was pleased to say that the council had voted the sum of $250, while a favorable reply was expected from the Quebec authorities. Mr. Miles spoke at length on the question of the proposed Montreal Industrial Exhibition Association, and said it was now in the hands of the Provincial Government to say whether or not this exhibition was to be held in Montreal. The city council had voted $10,000, and the civic authorities had guaranteed the interest on the bonds, so that the project was now at that stage where the Quebec authorities must decide. Mr. Robert Bickerdike, M.P., in moving the re-election of the Executive, remarked that he had come to the meeting to hear for himself what the league had done during the past year, and it gave him great satisfaction to know that much had been accomplished. He was ready to do what he could to promote the interests of the league, and he was hopeful that some day the business men of Montreal would be able to boast of one of the strongest Business Men's Leagues on the continent. The retiring officers were re-elected by acclamation. The Montreal Business Men's League, from the date of its organization in 1901, has grown in membership and importance,

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal—The Quebec Bank.

until to-day it occupies a position of great influence. Moreover, the league is deserving of every assistance, because it is playing an important part in advertising the city and Province. A Tourists' Information Bureau has been opened, where literature may be had for the asking, and great efforts are being put forth to increase the value of its work.

The Molsons Bank is to have a new branch office in Montreal. The site chosen is on the north-east corner of St. Catherine and Stanley Streets. The building, which will have a frontage on St. Catherine Street of 31 feet and a depth of 112 feet on Stanley Street, will be constructed of Indiana limestone, and will be three stories high, measuring 56 feet from sidewalk to cornice. Front and side elevations are to be of cut stone. The main banking room, which will be reached by a flight of stone steps from St. Catherine St., is to be 80 feet long, and the entire width of the building. There will be a ladies' banking room, reached from Stanley Street. This will measure 30 feet by 20, and will be handsomely furnished in white oak. The main room will have a handsome dado of marble, seven feet high, extending round the public space. The two upper floors of the bank are to be devoted to offices. The excavations for the building are well under way, and the bank will probably be ready for occupancy on March 1st next.

The death was announced on Sunday, the 28th inst., of Mr. James Cochrane, M.P.P., former mayor of Montreal, at the comparatively early age of fifty-four. As mayor of this city and as representative at Quebec of one of the most important divisions in the Province, Mr. Cochrane left a creditable record. The deceased was connected with most of the industrial companies of Montreal, and was a large shareholder in several electric railway companies. He was a director of the Hudson Bay, Pacific and Steamship Company, and director of the Laprairie Pressed Brick Company He was also connected with various charitable institutions, being a governor of the Notre Dame and Montreal General Hospitals, a member of the board of management of the Protestant Hospital for the Insane, and a life governor of the Western General Hospital. He was also a member of the Board of Trade, and a member of the Montreal Turnpike Trust. He was president of the Montreal Life and Aid Association, and he held a similar position in the Norwich Assurance Company, of Toronto.

It has been given out that Mr. Andrew A. Allan has been appointed by the Shipping Federation as their representative on the Harbor Board, to succeed Mr. Robert Reford, who has resigned. Mr. Allan was named at a special meeting of the Federation on Monday, the 29th inst., and the secretary was authorized to notify the Trust that Mr. Allan had been appointed to represent the shipping interests. The selection of Mr. Allan was well received on 'Change, as his experience in steamship business will make him a valuable member of the Trust.

Though trade in wholesale circles up to the present this spring has been fairly good, a few of our leading merchants have admitted that the volume of business done has not been as large as that of last year. During the past week trade has been particularly quiet, and we hear quite a few complaints of slow remittances, with requests for renewals by many who had previously met their obligations promptly. The concensus of opinion among our merchants, however, would indicate that future prospects are favorable. Call money remains steady at 4½ per cent., and a fair amount of mercantile paper has been presented at the banks for discount at 6 to 7 per cent.

"MOUNT ROYAL."

May 30, 1905.

* * *

EMPLOYERS' LIABILITY ASSURANCE CORPORATION.

More and more, employers of labor are getting to realize the advantage of organizations which will, for a stated sum, secure them against the contingencies of accidental injury to their work-people, whether in the factory or in pursuit of their employers' business elsewhere. A contract made with one of these insuring organizations transfers the onus of responsibility, in case of such accidental injury, from the manufacturer to the underwriter. In case of injury, the latter will attend to the claim made. This is a relief which, to men who employ hundreds or thousands of workmen, is very welcome. Of course it is desirable that the insuring company shall be reliable, not only capable of paying a claim if it prove well-founded, but able from experience and skill to detect false claims and defeat them. Otherwise the manufacturer or other employer may fall between two stools.

The company named above has had many years' experience in this sort of insurance. It has built up a business which yielded a revenue of $3,341,000 last year, which, after all losses, commissions and expenses were paid, yielded a profit of $432,625. This, added to the balance of revenue account of 1903 (special reserve included), made a balance of $2,641,000 at credit of revenue account last year, less dividend of $131,250. The subscribed capital is $3,750,000, of which $750,000 is paid up, and there is a reserve of $865,000 for outstanding losses, over and above the $2,509,750 mentioned above. The total assets shown per balance sheet amount to $4,380,505, of which $3,760,000 is in cash or securities. And the company, which is a strong and well reputed English one, pays a yearly dividend of 15 to 17½ per cent.

* * *

OCEAN FREIGHT RATES.

A correspondent in London sends us a clipping from an English daily giving a Reuter's telegram dated Sydney, Australia, 15th May, as follows: "Negotiations are proceeding between the New South Wales butter shippers and the Peninsular and Orient Companies for the settlement of future freight rates to England. It is understood that an agreement has been practically arranged for a rate of 1-16d per lb. The shipments of butter from Sydney last season amounted to 8,000 tons." He comments upon it thus: "This is equal to 11s. 6d. per ton of 2,240 pounds, or, say, 12½ cents per 100 pounds. Behold! how Australia gets the trade Eleven and sixpence per ton for her; while on a sample shipment I know of from Montreal 42s. 6d. was charged! The sum in simple proportion works out this way:

Australia to London, 13,000 miles, 12½c. per 100 lbs.
Canada to London, 3,000 miles, 46½c. per 100 lbs.

And yet Canada subsidizes ocean liners, and consequently throws away her money, getting nothing tangible in return." The facts and figures cited by our correspondent may well attract the attention of Canadian dairy exporters.

* * *

—The farmers and cattle breeders having brought complaint against the Grand Trunk and Canadian Pacific Railway Companies regarding discriminatory and excessive rates charged on carload lots of cattle to Montreal for export, the Board of Railway Commissioners has directed the companies to submit a proposition for rates, scaling down from 23½ cents from stations in Canada west of Stratford, London, and St. Thomas, and 25 cents from the territory north of Goderich contiguous to Lake Huron and the Georgian Bay, through reasonably graduated groups, to 15 cents from Toronto, the rates from the Niagara district not to exceed the rate from Brantford, the present rates in no case to be exceeded.

* * *

—A special commissioner to Siberia of the British Board of Trade, Mr. H. Cooke, has just issued his report, in which he severely takes to task British traders for the manner in which they allow foreigners to elbow them out of a promising market. "The American, Dane and German," writes Mr. Cooke, "are already there, and have captured some of the most fruitful fields of enterprise. These rich regions will be to Russia's increasing millions what the colonies are to the British Isles. Even now Russian immigrants in Siberia, peasants though they be, are supplying the London market with butter, and as they reap their crops with American harvesters, discuss with intelligence their preferences for machines from Milwaukee and Chicago." There is a hint in this for Canadians, too.

Manager.
London, Ontario, 1905.

The Montreal and Boston Consolidated Company has closed down its mines in the Boundary district, B.C., and a good deal of speculation is being indulged in as to the exact causes of the action.

Mercantile Summary

An assignment has been made by Geo. Audet, of Montreal, doing business as the Jap Paint Co. He owes only about $1,200.

The Robb Engineering Co., Limited, Amherst, N.S., has received an order from the Windsor and Tecumseh Electric Railway Company, of Walkerville, Ont.. for a 450-h.p. Robb-Armstrong Corliss engine and two 200-h.p. Robb-Mumford boilers, also for a large steel smokestack, condenser, and all piping complete.

With some experience as a clerk, C. A. Forbes began storekeeping on his own account some fifteen months ago at Barrington, N.S. He, however, has not apparently the qualifications for a successful merchant, for he is already asking his creditors indulgence on liabilities of $3,300.——C. K. Robbins, a general storekeeper in a small way, at Chebogue, N.S., has assigned to J. Horton.

A Montreal jobber in peddlers' supplies, named Carl Shiller, also engaged in the manufacture of costumes in a small way, under the style of the Canadian Costume Co., has become involved, and is proposing to pay his creditors 40 cents on the dollar. In February last he claimed to have a surplus of over $28,000, but a recent probing of his affairs by a professional accountant results in a very different showing.

W. H. O'Brien, operating a sawmill near Bathurst, N.B., against whom there has been a pretty steady record of writs for the past six months, has now assigned to P. G. Mahoney, for the general benefit.——Emery Sewell, a general dealer and tugboat owner, at Maugerville, in the same Province, has assigned to the sheriff, and is said to owe some $10,000, while showing practically no assets of consequence. He is reported to have failed before in 1894.

From Halifax, N.S., we hear of the embarrassment of a couple of somewhat prominent firms. W. B. Arthur & Co. have done a leading hardware business for some years past, but have apparently expanded beyond the limits warranted by their capital, and for a little time past have shown evidence of financial strain, which has been intensified by the policy adopted with regard to the account by their bankers. They have now found it necessary to go into a thorough investigation of their affairs, and it is expected they will make a cash offer of compromise, as soon as a statement can be completed.——In the matter of the Patillo-MacDougall Co., Limited, wholesale stationers, a winding-up order has been applied for by Moses Hatfield, their principal creditor. The company was incorporated in 1903, with an authorized capital of $60,000, and is an amalgamation of MacDougall & Co., Limited, and T. S. Patillo & Co. They have apparently been straitened for lack of active capital all along, and the outcome, as above, has not created much surprise. The liabilities are figured at about $39,000.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST EAST TORONTO.

Mercantile Summary.

Price Bros.' large sawmills, near Campbelltown, N.B., have been consumed by fire at a heavy loss. Several I.C.R. cars near by were also destroyed.

Sir Charles Rivers Wilson, president of the Grand Trunk Railway System, accompanied by Lady Wilson and a party of railroad men, is on a tour of inspection of the company's lines.

Notice now appears in the Canada Gazette of a charter having been granted to the "Canadian Rubber Company of Montreal." Its chief objects are to be to make all rubber goods, sell and deal in rubber boots and shoes and all the by-products thereof, and to manufacture, sell, and deal in mechanical goods and articles of clothing and personal wear and apparel; to carry on branches, factories, agencies, warehouses, sales rooms and offices in any Province of Canada or elsewhere. Wide powers are also given to buy out or amalgamate with other concerns, to produce, use and sell electricity. The capital stock is placed at $2,000,000.

The Canadian Pacific Railway is preparing to extend its Calgary and Edmonton branch across the river from Strathcona into Edmonton. The plans show the line beginning at Strathcona Station and running north-west to the river at Legal Ave., thence north across the river to the foot of Tenth street, and up to block nine, between Ninth and Tenth streets, across Jasper avenue to the unsubdivided block of the Hudson's Bay Company's land, lying north of Jasper and between Ninth and Thirteenth streets. While no mention is made in the plans of the bridge route, local authorities say it can only be followed by the erection of a high level bridge about 1,150 feet in length, and 220 feet above the river.

A destructive fire broke out on the 23rd ult. in a small store in White Horse, Yukon Territory, and demolished either wholly or in part the main business portion of the place. The following were the principal losers: Taylor & Drury, clothiers, $20,000; Seward's grocery, $12,500; G. McLennan, hardware, $15,000; Bennett news and book store, $10,000; Windsor Hotel, Mr. Racine, $25,000; jewellery store and drug store in Windsor block, $10,000; Whitney & Pedler, general store, $50,000; White Horse Hotel, $20,000; Mr. Nicholls' drug store, $5,000; Capt. P. Martin's grocery, $10,000; Dominion Hotel, $20,000; Unsworth's hardware store, $9,000; Hotel Grand, John West, $15,000; P. Burns' shop and cold storage plant, $25,000. Total, $246,500. Besides these larger buildings, practically every restaurant and public rooming house in the town was destroyed. Hundreds of people are stated to be homeless. The large warehouses of the White Pass and Yukon Company were barely saved. The fire is a double calamity to the merchants of White Pass, for, by the time their businesses can be reinstated, the short season will be over.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

"Whalebacks," as the cigar-shaped steel freight boats of the lakes are called, are being sent from Lake Erie to Montreal. The whalebacks "Bayport," "Baden" and "Britannic," corn laden, have passed here for Montreal. After discharging cargo there, they will proceed to Boston to enter the coastwise coal trade.

A despatch of Wednesday to the daily press states that the directors of the Imperial Steel & Wire Co., Limited, who met in their city office, decided to double the capacity of their works at Collingwood at once, making the output fifty gross tons of wire per day. The plant, it is stated, has been running steadily night and day since February last, when it was first put into commission. Additional boilers, engines and machinery will be ordered at once. The first interim dividend was declared.

The city of Windsor is growing in more directions than one, for it recognizes obligations imposed by increase in population and wealth. Last week Commissioner Black stated the assessable value of Windsor property in 1905 at approximately $9,000,000. The population is a little over 14,000. The city is about to issue bonds to the amount of $140,000, as authorized by the Ontario Legislature, to pay for improvements, mostly paving. In addition, bonds for $20,000 will be issued, as authorized by the by-law carried on the 12th ult.

The assessment valuation of two Eastern Ontario towns was made known on Tuesday. Iroquois, near Prescott, with a population of 1,033, has a total assessment of $341,000. Of this $90,000 is on lands, $217,000 on buildings, $24,000 on business assessment, and $7,000 on income. The exempted property amounts to $88,500, made up of town property, and $23,000 on four churches. The other town referred to is Alexandria, in Glengarry County, population, 2,270. Its assessment this year is $100,000 higher than last year. Taxable property is placed at $464,486; non-taxable, at $23,000; business assessment, $57,869; income, $13,012; Separate School, $279,381; Public School, $147,105.

Our Halifax letter of 15th May described the Halifax and Yarmouth Railway in Nova Scotia. It is now announced that the portion of this road already built has been transferred to the Halifax and Southwestern, a Mackenzie & Mann road. The plan of the purchase is to ultimately make a direct line in Nova Scotia between Yarmouth and Halifax, and when this is done the line will enter into competition with the Dominion Atlantic Railway, running now along the north shore of the Province. The road purchased is 51 miles in length and runs from Yarmouth to Barrington. The Halifax & Southwestern, 194 miles in length, runs from Liverpool to Halifax, leaving an unconnected section of about 80 miles. Building is to begin soon on a connecting line and thus a direct route to Halifax from Yarmouth will be in operation.

Mercantile Summary.

A company has been organized, in Montreal, under the name of the Canadian White Company, to carry on the business of electrical, mechanical and civil engineers and contractors. The capital stock is placed at $1,000,000. W. G. Ross, of Montreal, is a prominent man in the concern.

The Kensington Brandon Land and Development Company, capital stock, $100,000, has been incorporated. Its head office is at Montreal. It proposes to buy and deal in land and carry on a general real estate business. James Curry, of Toronto, and G. A. Forbes, of Montreal, are among the charter members.

A former Mayor of Montreal, Mr. Jas. Cochrane, died on Sunday last of diabetes in his 55th year. He came from Perthshire, Scotland, and in 1826 entered the employ of the Montreal Telegraph Company, rising to the position of night operator and chief operator; afterwards holding similar positions at Whitehall, N.Y.; Malone, N.Y., and Boston, Mass. Then he became a contractor, building railways under Heney, and C.P.R. telegraph lines under John Ross. Then he had contracts for paving in Montreal, and in 1891 got into politics and into Montreal municipal life. He was a genial and in most circles a popular man, of good intentions and moderate ability.

Mr. S. C. Blacklock and Mr. C. F. Kusia have opened an agency at 11 Colborne St. in Toronto. They intend to carry a full line of office furniture as manufactured by the Canadian Cabinet Co., Limited, of Gananoque, including desks, filing cabinets, sectional book cases, vault fittings, etc. They will occupy the basement and ground floor. The place has an abundance of windows, so that the goods on the floor can be seen to great advantage. Mr. Blacklock was previously for four years manager of the furniture department of John Kay, Sons & Co., while Mr. Kusia was in the furniture department of T. Eaton Co. Both are practical men, and it is pleasant to be able to report that the prospects for a satisfactory business being done are very bright.

Messrs. Marion & Marion, patent attorneys, Montreal, and Washington, D.C., report the following American patents recently secured through their agency: 787,432, Frederick E. Woodworth, Grafton, N.S., sawmill feed; 787,606, James C. Anderson, Victoria, B.C., preserving jar; 787,939, Robert Oliver, Portage la Prairie, shocking machine; 788,195, Percy H. Eaton, Newcastle, N.B., fire alarm; 788,633, George S. Cushing, St. John, N.B., process of making wood pulp; 788,634, George S. Cushing, St. John, N.B., grinding machine; 788,665, Richard Michell, East Selkirk, Man., potato seeder; 788,826, William Goetz, Winnipeg, harness tug securing and releasing devices; 788,841, Walter S. Morris, Halifax, improvement in manuscript holders and lighting appliance.

Mercantile Summary.

It is understood in railway circles that the Grand Trunk Pacific has applied for the expropriation of Kaiwan Island as its western terminal. Only such land can be expropriated for this purpose as is essential to a railway's actual needs, so that the Railway Commission will have to determine just what portion of the island will be granted.

It is annouced that E. R. Baconbridge, Chicago and Midland, has received the contract to build the Grand Trunk's elevator near Midland. The contract calls for an elevator of a million bushels' capacity to be completed next fall. Work is to be started early in June, and it is to cost $500,000.

The Maple Leaf Automobile and Electrical Manufacturing Company, Limited, capital, $50,000, head office, London, Ont., has received a charter. It will make electrical appliances, dynamos, motors, gasoline and marine engines. Donald Ferguson and H. S. Albertson, of London, are named among the provisional directors.

The J. W. Harris Co., Limited, Montreal, capital stock, $150,000, has received a Dominion charter to carry on a general contracting business, to improve lands, and sell or lease them to settlers, and to acquire and operate waterpowers, and convert same into electrical energy, to erect and operate elevators, work mines, etc. Among the parties primarily interested are J. W. Harris and W. B. Powell, of Montreal.

On the 25th inst. a disastrous fire, fanned by a strong south-west wind, occurred in Brussels, Ont. Several buildings were totally destroyed, includ-the American Hotel, P. Scott's blacksmith shop, F. Adams' agricultural implement store, Ross' grist mill, J. C. Cober & Son's carriage factory, etc. The electric light power-house was badly scorched. Loss, about $35,000, partly insured.

Canadian Prairie Lands Company, Limited, Toronto, capital $5,000,000, is the name of a concern which has just received a Dominion charter and in which the names appear of J. S. Lovell, and others, of Toronto. It will acquire lands and water privileges, etc., and develop them and sell or otherwise dispose of them to settlers whom they also propose to aid by means of bonuses or advances.

Work has already been begun on the construction of the large plant, at Morrisburg, Ont., of the Canadian Tin Plate and Sheet Steel Co. One of the directors, we understand, is to leave shortly for Wales with a view to obtaining the services of some two hundred expert metal workers from that country, who will teach Canadian workmen the trade. At the start a two-stamp mill is to be erected. It is said that an oil refining company will erect an oil can, tank and barrel factory near the tin plate company's works.

417,809.81	running 30 years
$1,209,875.42	

Purchasers to pay accrued interest to date of delivery. Tenders may be for the whole or part. No tender necessarily accepted. Further particulars furnished on application.

D. S. CURRY, City Comptroller.
Winnipeg, 18th May, 1905.

A fire which broke out in Abraham & Abound's general merchandise store, at Carleton Place, Ont., spread to Edwards Bros.' grocery and several dwellings, and caused a total loss approximating $20,000, of which the bulk was incurred by the first-named.

Mercantile Summary.

Winnipeg council will shortly prepare a by-law to provide for the running of Sunday cars in that city.

On the 23rd May, the first sod was turned in the construction of waterworks at Portage la Prairie.

The Canadian Shovel and Tool Company, Limited, Hamilton, capital, $150,000, has been incorporated to make and deal in spades, shovels, and field, railway, and mechanics' tools.

The Reid Wrecking Co., of Sarnia, proposes to build a floating dry-dock at that place. It has already begun the work of constructing a new 380-foot wharf on its property recently acquired there.

The Canadian Fence Manufacturing Co., Limited, Woodstock, Ont., has received an Ontario charter. C. A. Brink and Noah Stickney, of West Oxford Township, are directors. Capital stock, $250,000.

The report of the International Nickel Company, Sudbury, shows a surplus for the year ending March 31st, of $668,094, or an increase of $326,992 over the year previous. A large floating debt was also paid off.

Selby & Youlden, Limited, have received an Ontario charter empowering them to manufacture and buy and sell engines, boilers, and all articles made of wood and metal. The capital is placed at $50,000, and head office is to be at Kingston.

The Gurney Oxford Stove and Furnace Company, Limited, Toronto, capital, $40,000, has been incorporated for the purpose of dealing in and manufacturing metals and metal goods, and to acquire and carry on the business of the Gurney Oxford Stove and Furnace Co.

The Alberta Railway and Irrigation Company, of Lethbridge, has ordered a 175-h.p. Robb-Mumford boiler from the Robb Engineering Company, Amherst, N.S. This makes eight boilers of this type that the company has purchased during the past few years.

It is not yet certain whether the British Columbia Copper Company will build another smelter at Midway or Rock Creek, but there is no doubt, says the Phœnix Pioneer, that the smelter at Greenwood will be enlarged, and the above company will probably secure several new and important properties in the Similkameen district. It lately secured a controlling interest in the Sunset group of mines on Copper Mountain, near Princeton. The Sunset is a low-grade mine, with an immense body of ore which is alleged to run rather better than Boundary's low-grade propositions.

A British Columbia man has invented a device to make railway cars glide along without the clanking and jarring caused by the wheels going over the points between the rails fastened by fish plates. His device is a simple contrivance, consisting of a casting, into which the ends of the rails are inserted, a portion of the casting running alongside the rail and bridging the space between the ends, ample provision being made for supporting the bridge casting with a tongue or wedge and allowing for the contraction or expansion of the rails. It is stated that the United States Government is offering a prize of $50,000 for the best patent along these lines.

An extended service is to be inaugurated by the Canadian Pacific coasting steamers for northern British Columbia and Lynn Canal ports. The steamers Princess May and Princess Beatrice will alternate upon the route between Vancouver and Skagway, making calls at Northern British Columbia ports. Calls at Northern British Columbia ports will be made both north and south bound by the steamers. In order to furnish a service to Northern British Columbia ports off the direct line of travel which will be followed by the May and Beatrice, the company will operate the steamer Tees, which is scheduled to sail from Vancouver on the second and sixteenth days of each month. On the first trip of the month she will call at Skidegate, and on the second she will run into Bella Coola, besides touching at all the other ports. It has been arranged that the Princess Beatrice shall call at Alert Bay and at all the Rivers Inlet canneries northbound, and southbound she will make calls at Port Simpson, the Skeena River and Wadhams' cannery, Rivers Inlet.

WHOLESALE HOUSES.

TORONTO MARKETS.

Toronto, June 1st, 1905.

Chemicals, Drugs, Etc.—The market is locally very fair, while travellers in the country speak hopefully of prospects. Quinine is very easy, since the last decline. Opium is steady, but is not quite so strong as it was. Carbolic and citric acids are firm, especially the former. In New York the market is described as dull.

Dry Goods.—Greater activity has been the experience of the wholesale dry goods houses for the past week or two, due, it is to be presumed, to the warmer and more seasonable weather. For most lines of dress goods there is good demand. Prices for staples continue quite firm, both for cottons and woolens. Sorting trade is a little better than it was a week or two ago. There is no particularly new feature to report.

Flour and Grain.—Little change has taken place apparently in the flour trade since last report. Ninety per cent. patents sell around $4.40, in buyers' sacks, Eastern or Western freights, while extra choice grades fetch a little more. Bran and shorts are becoming easier by degrees, with the growingly good pastures throughout the country districts. Oatmeal is dull. Wheat is also dull at present, and little actual business is passing. In rye and barley there is little demand. Canadian corn continues nominally the same price as last week. In peas and buckwheat there is no change.

Fruit.—The wholesale fruit market is in about a normal condition for this season of the year. Strawberries from the South are fairly plentiful and so are pineapples. Oranges are not in great abundance and they sell at firm prices.

Groceries.—No change has occurred in sugars, and the movement is slow. The chances are that not much activity will be felt in that commodity until the fruit-preserving season. Considerable quietness still prevails in general lines, and some difficulty is experienced in accounting for it. Payments also are on the slow side, though at the same time industries throughout the country are booming. It must not be thought, however, that any anxiety is felt at this state of things; it is deemed merely a temporary reaction. Teas are selling at an average rate and coffees rather particularly well. Dried fruits are meeting an ordinary demand, and currants are on the firm side.

Hides and Leather.—Dullness prevails in both these branches, but prices continue unchanged. Not much actual business is being done in leather, though dealers believe it will improve before long.

Live Stock.—Prices at the cattle market for exporters this week remained stationary, though trading dragged quite noticeably, and hogs declined 10 cents. There was a rather large supply of exporters. but the demand was sufficient to keep up values. For extra good grades, there was no difficulty in doing this, but many of the offerings were poor and common. Stockers and feeders were in moderately active demand. Sheep were not plentiful, but in spite of their scarcity they, as well as lambs, showed a material decline. Poor calves were not in request.

Provisions.—The receipts of butter are not more than large enough to keep up with the demand. Cheese prices are steady, but the market is quiet. Eggs are firm. Smoked meats and lard are in fairly good demand at unchanged prices.

Wool.—The market is unchanged. New clip is beginning to arrive in larger volume, but nominally prices keep as they were.

* * *

MONTREAL MARKETS.

Montreal, May 31st, 1905.

Ashes.—The market is a quiet one, there not being the demand usual at the season, but as supplies continue light values rule pretty steady at the level which has prevailed for several months past. We quote first quality pots at about $5.50; second pots, $4.95 to $5; pearls, nominally, $7 to $7.25 per cental.

Dairy Products.—The shipments of cheese last week were 33.245 boxes, as against 32,502 boxes for the same period of last year, and the total shipments for the season to date are 101 930 boxes, as against 102,741 boxes at this date a year ago. Of butter the exports were comparatively large, reaching 7,415 packages, as compared with 2,448 packages for the same week of 1904. Cheese values have gone off about ¼c. since last writing, the extreme figure for fine Ontario makes being now 9⅝c., with fine Eastern ranging from 9¼ to 9⅝c. There has been an active demand for butter with firmer values prevailing, and fine new grass creamery is quoted at 20 to 20¼c., and good to fine grade at from 19 to 20c.

Dry Goods.—An unseasonable chilliness is still to be felt in the atmosphere, and retailers complain that sales of wash goods, ginghams, and other light summer fabrics are not as liberal as they should be for the end of May. In wholesale circles trade rules quiet. Remittances on the whole may be called fair. In fabrics of domestic production no changes of price are reported, and European markets are reported steady to firm. Repeat orders for crepalines have been subjected to an advance of a penny a yard.

Groceries.—Trade, which has been somewhat slow, shows a little freer movement this week, but collections are reported as not more than fair. In price there have been no recent changes of note. Teas show easiness and the demand in this particular line continues almost inexplicably slow. The raw sugar market has been a little "off" the past day or so, but refiners' quotations remain at $5.25 for standard granulated, with yellows ranging down to $4.75 The first cargo order for new Barbados molasses for this market, about 800 puncheons, was placed a few days ago at a figure equal to about 34½ to 35c. per gallon, laid down cost. It would look as if the importations of this article would be very light this season; so far only a consigned lot of 400 puncheons, via Quebec, has been reported. Canned goods are firm, and some fair orders for new pack of corn and tomatoes are reported as being already placed at open prices. It is reported that some five or six new independent canneries of vegetables will be in operation this season at Napanee, Bloomfield, Meaford, and elsewhere.

Tenders for Government of British Columbia 3½ per Cent. Debentures.

Tenders will be received up to the **15th of June, 1905,** for the purchase of $365,000 Government of British Columbia Dyking Debentures, in denominations of $1,000, issued under the authority of the "Dyking Assessments Adjustment Act, 1905," bearing interest at the rate of 3½ per cent. per annum, payable half-yearly at the Government Treasury, Victoria, on the 1st of January and 1st of July in each year; the principal redeemable in thirty-two years from the 1st of July, 1905.

Tenders to state the price net, the amount to be deposited at the Canadian Bank of Commerce, Victoria, on the 30th of June, 1905.

Tenders to be addressed to the Honourable the Minister of Finance, Victoria. Right of acceptance of any tender reserved.

May 5. 1905.

Hides.—Receipts of calfskins are now falling off, and values are stiffer, dealers paying 15c. per lb. for No. 1, and 13c. for No. 2. Lambskins are also advanced to 25c. each. Beef hides are not particularly active, but prices are very steady, dealers buying No. 1 at 9½ to 10c. per pound.

Leather.—There is comparatively little new in this line. Export business is not reported as brisk as it was, and the demand locally is not active, but Western boot and shoe jobbers are now reported as placing orders in fair volume with Montreal and Quebec manufacturers, and an improved enquiry is looked for in the near future. Manufacturers' sole is quoted at about 24c. for No. 2, and slaughter at 27 to 28c. In black leathers steady prices prevail, though cheap splits appear somewhat difficult to move.

Metals and Hardware.—In these lines a fair volume of trade is reported; in heavy metals particularly some good transactions with railways and other large consumers being reported. Moderate importations of Langloan pig iron are noted at about $18.25 for No. 1; No. 2, selected Summerlee, is quoted at, say, $18.50, and domestic brands are steady at former figures. The Londonderry furnace, which has been closed down for several months, was blown in again last week. Bars, nails and general hardware prices are without change. Canada plates sell at $2.35 in moderate lots; black sheets, $2.15; galvanized sheets, $4.15 to $4.25; Ternes, $6.25 to $6.50; coke tins of standard quality, $3.65, and charcoals, $3.90. Boiler plate is steady at $2. Lead is rather firmer at $3.40 to $3.45; spelter, $6.25; ingot tin, 32 to 32½c.; copper, 16c.; antimony, 9c. per lb.

Oils and Paints.—The movement in these lines is very well maintained, the demand being still quite active. The further anticipated advance in turpentine, referred to last week, has assumed an even more pronounced phase than was imagined, the present quotation for single barrels having reached the record figure of $1.05. Though speculation probably has something to do with the rise, still the crop is said to be undoubtedly short. Linseed oil is steady at 53c. for raw, and 56c. for boiled. In leads, putty, etc., there has not as yet been any advance as some seemed to prognosticate.

⁂

THE TEXTILE CENTRES.

Since the conclusion of the recent colonial sales the tone of the Bradford market has been exceedingly firm, and neither merinos nor crossbred wools can be bought to-day as well as they could have been a week ago. There is no special increase in the turnover of either wool or combed tops, but everyone is now convinced that holders of all classes had become unduly scared, and that prices were accepted then which must mean a good deal of unnecessary loss, as there is no prospect of getting hold of any cheaper wool either at the London sales or from direct importers for some time to come. The consumption of pure merino is increasing both in the worsted and woolen trades, and even after making full allowance for the increase in the Australian clip, there will be very little fine wool left in this country by the end of the year, when the new supplies will begin to arrive. In the coarser kinds of colonial crossbred wools the demand from spinners of worsted yarns for the export trade is at present only slightly improved. But manufacturers in Bradford and the dis-

Managers and Underwriters.

trict are running more machinery on this class, and report that there is an improved enquiry for both ladies' and men's wear goods made from crossbreds. There can be no doubt, says a correspondent of the Draper's Record, that the prices of the coarser kinds of crossbred colonial wools continue to be very high, when compared with the average prices of recent years, and the dress goods trade, at all events, would be in a much healthier condition if yarn prices could be reduced to the extent of 2d. to 3d. per lb. But there seems little probability of any decline of moment

DEBENTURES.

SEALED TENDERS, marked "Tenders for Debentures," addressed to John Smithers, Town Clerk, Moosomin, will be received up to and inclusive of June 10th, 1905, for the purchase of Debentures of the town of Moosomin, issued in pursuance of By-law in that behalf, authorizing the raising of $38,500, for the purpose of erecting a Town Hall and Fire Hall, combined, $23,000; drainage, $5,000; purchasing of fire apparatus, $7,000; paying up floating debt, $3,500.

Said Debentures bearing interest at the rate of 5 per cent. per annum, and repayable in 20 equal, consecutive annual instalments.

at present. There is only a quiet demand for either alpaca or mohair in the raw state at present, and the only class of mohair yarn in good demand is thick counts or numbers, for the purpose of making upholstery plushes.

The tone of the linen market of Belfast is very healthy, and there is a continued steady and general improvement in the turnover, while prices are fully maintained.

It is quite safe to say that, if every industrial district in Great Britain possessed such a good supply of orders as Lancashire, the drapery trade would revel in a period of prosperity such as has rarely fallen to its lot. The day has gone, says Draper's Record, when our genial, but somewhat misinformed, friends of the South looked upon clogs and shawls as the principal articles of clothing and footwear purchased by the cotton operatives, whose taste in matters of "going-out" dress has much improved, although one must, perhaps, award the palm in this respect to the factory lassies of Nottingham and Leicester. Travelers just now are apparently doing better, except in certain grades of heavy goods, which seem to drag in the home trade, although large orders could be secured in London and other centres if producers were more approachable. Retailers are with advantage showing a large variety of made-up articles for Easter wear, the ladies' and children's outfitting department being capable of repaying any special attention devoted to it at this time of the year, when plans are already being brought to the notice of pater-familias at the breakfast table as to the ways and means of enjoying the first holiday of the year. Skirts and blouses to wear with them receive attention, linen crash and Jap silk being included in the materials used for the former. Ladies' costumes for the seaside retail trade have moved off more briskly, and better orders from the Irish ground should now be coming forward.

* * *

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their circular dated New York, May 27th, said:

The stock market fluctuates in a fashion which is to be expected when outside conditions are generally sound, while the technical situation is weak and conflicting. First one set of influences and then the other dominates values, to the considerable satisfaction of nimble traders, who are fortunate enough to catch transient fluctuations. The outlook for the market is for a continuation of these movements. In the long run the drift of values promises to be downward, although, as in the past two months, frequent rallies are to be expected as a result of short covering and the support afforded the market by large interests who still have stocks to dispose of. Our general business situation continues satisfactory; the volume of trade being unusually large and as yet free from symptoms of general over-doing or overproduction. A great deal has been made of the lull in the iron trade. It should be remembered that for some weeks past the iron industry has been experiencing record-breaking activity. A moderate cessation, therefore, is both natural and desirable, if we are to avoid an injurious period of overproduction. All advices from the interior indicate that we are to have a large volume of trade during the next season. The technical situation of the stock market is not satisfactory. Prices are still evidently too high to attract general investment buying, without which a genuine bull market is impossible. It is true we have had a decline of from 10 to 30 points, and, compared with the recent high level, some stocks may seem cheap; but big holders, who sold at the higher level, are not yet ready to reinvest. Many of them still have stocks for sale, and until they are prepared to enter the market, of which there are no present indications, a permanent turn for the better can hardly be expected.

A GOOD POLICY

for policyholders is the 20 pay life guaranteed option policy issued by

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

In this style of policy the Benefits conferred and the Premium rates charged are more liberal than those in any similar policy issued by other companies.

Be sure to examine it before insuring elsewhere.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00

THE CANADA LIFE

holds Policy Reserves greater by $3,000,000 than the present Government requirement.

The business in force is three times as great as that of twenty years ago, while in the same period the Assets have increased four fold.

Each year with its increasing age, Canada's leading Life company

Shows Increased Strength.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

MORE ABOUT THE EQUITABLE LIFE.

The extravagances of a young man of the lavish disposition which characterizes American youth in wealthy surroundings, have been responsible for remarkable proceedings in the case of the Equitable Life Assurance Society of the United States. The young man who was "called down," as it appeared to us properly, by his superior for conduct unbecoming a prominent functionary of a great life company, had his friends and partizans. He refused to resign and in a measure defied his accusers, and even threw back accusations.

Next came investigation. A committee of influential members of the society, under the presidency of H. C. Frick, after consideration, reported in favor of the abolition of the deferred dividend policy of the Equitable. This is a far-reaching recommendation, for it is said that something like seventy millions of the Equitable's surplus has been built up through the adoption of the deferred dividend policy. Manifestly, if so large an element in the society's business is to be lopped off, it will mean a thorough revision, possibly an entire alteration, in the methods in use by the Equitable. It is significant that, as the papers inform us, the business of the Equitable Life Assurance Society for the month of May was $8,000,000 less than in May of 1904; also that the May terminations were larger than usual. It need hardly be wondered at, for people can hardly help losing confidence in a concern whose directors are quarrelling and calling each other names. There are assuredly factions in the directorate making charges and countercharges, speculation with the society's funds being one of the worst and most indefensible of the allegations made.

There have been various plans submitted for a solution of the difficulties, but in spite of occasional announcements, apparently official, that everything would presently be serene, troubles will not down. Some twenty or thirty of the rich and prominent men of the United States have figured for years on the Board of the Equitable, which was one of the companies the great American metropolis was proud of. But the directors began to leave the Board. In May, three of them resigned; on 5th June, a despatch from Boston announced that T. Jefferson Coolidge had tendered his resignation, and this was followed by the resignation of Jacob H. Schiff, head of the banking house of Kuhn, Loeb & Co., who has been a member of the board of directors for twelve years. In addition, an announcement came from Cincinnati that Melville E. Ingalls would also resign. Nor is this all. A New York despatch of 5th June announces the resignation of A. J. Cassatt, president of the Pennsylvania Railroad Company, which was followed by the resignation of John A. Stewart, chairman of the board of directors of the United States Trust Company, and of John Sloane, prominent in banking and trust company circles. The same despatch says the resignation of D. O. Mills will be handed to President Alexander to-morrow.

It is absurd, therefore, to talk about harmony in the society's councils. More sensible would it be to probe deeply and discover the origin of disturbances that are harassing this great concern; trace the growth of troubles; find out who initiated illegal practices; who they are that are now alleged to have played fast and loose with the society's funds. Let the guilty be punished by dismissal and worse, but let the house be cleaned and the smirch on the good name of life assurance, caused by this unhappy imbroglio, be removed.

THE HARDWARE TRADE.

Wholesalers, both in Ontario and Quebec Provinces, report the hardware trade to be in a very satisfactory condition, and activity may be said to have increased perceptibly since the first of the month. Such lines as are required mainly in the summer are being re-ordered to a large extent, which shows that the demand has been even heavier than was expected. A very strong feature in the shelf hardware branch is the briskness in articles required for building. In nails, both cut and wire, the activity is marked. Prices, which are very firm, continue at $2.25, f.o.b., Toronto, for the latter, and $2.40 for the former. The stocks of screws are fairly large, but prices are firm. Horse nails remain as before. Bolts and nuts are meeting with good enquiry, and the mills have such large orders in hand that they experience some difficulty in keeping up with the demand. Values of cement have stiffened owing to the keen demand for building purposes. The general quotation is $1.75 to $2, f.o.b., Toronto, while, when wanted in a hurry, more is sometimes given. A somewhat unusually small quantity is coming in from the States. There is a particularly brisk demand for building paper. Spring hinges are meeting with a good request. Wire cloth is in the same state, and it is said there is some scarcity. Another line for which there has been a particularly brisk enquiry is poultry netting and some meshes have been rather scarce.

Similarly good reports come to hand regarding the state of trade in articles required mainly by farmers. Cordage is already in very brisk demand and Manila rope has gone up half a cent. Shovels and other tools have met with good enquiry, though now this has fallen somewhat to the normal level prevailing at this time of the year. For lawn mowers there has been exceptionally good demand. Guns and ammunition are somewhat on the quiet side, but tents, hammocks, and fishing tackle are exceptionally favored this year.

The activity in building lines of hardware is felt also in plumbers' goods. Supplies at present are fairly plentiful, but should building operations continue all summer as brisk as they promise now to do, it is believed by some they will scarcely prove adequate. Large orders are coming in for galvanized boilers to fit on kitchen ranges, while copper boilers are also wanted. For lead pipe, soil pipe, general fittings, etc., there is a satisfactory demand.

With regard to metals, conditions are very much as they have been ever since the opening of navigation. Domestic-made iron would appear to be taking the place largely of the English, which is considerably dearer. At the moment there is a sort of lull in pig iron, but the factories have still orders in hand, and there is no anxiety. Bar iron is steady. Tin plates are very active, both in Montreal and Toronto. Galvanized sheets are in rather more than ordinarily good demand. Copper and lead fluctuate considerably from week to week, but on the whole are in a satisfactory condition.

The state of the metal market in the United States may be gathered from the following extract from the "Iron Age:"

> Some uneasiness was at first caused by the announcement that some time since the associations in steel rails, plates, beams and steel bars had been dissolved. It has not, however, affected the prices of the commodities involved. There has not been any of that savage price cutting which usually follows the termination of pools, with its readjustment of prices on undelivered balances of old contracts, which guarantee clauses bring with them. There are no indications anywhere that the deadlock between buyers and sellers of pig iron has been broken. Quite a fair tonnage is being placed to fill immediate requirements, and there is no indication in the form of demands to delay deliveries that consumption in the foundry branches is falling off. On the contrary, some of the jobbing foundries are confessedly doing a growing volume of work. Pig iron production is falling off, however. The United States Steel Corporation is blowing out some of its isolated plants. The steel market is easier, and some of the makers are hunting for orders here and abroad. This is in anticipation of the closing down of mills rolling the lighter lines, notably tin plate and sheets, either for repairs or for the adjustment of wages. Structural material continues in good demand, and some large-sized contracts have been awarded. Bars have been rather weaker, and in the west car-builders have purchased at least one large block at a concession. The season contracts for the agricultural implement interests are still hanging fire."

Advices from the United Kingdom say there has not been very much change in the iron situation this past month. The volume of trade is fairly large, and prices of Scotch warrants have shown an advancing tendency. Orders from the United States, however, which ordinarily bring great activity in British markets, have not been markedly large of late.

* * *

ACCOUNTS OF MUNICIPALITIES, ONTARIO.

Continuing our scrutiny into the report for 1904 of the Ontario Municipal Auditor, begun on 2nd June, we proceed to notice some of the particulars given as to the affairs of towns and villages in the Province. To deal with the hundred or more townships described would lead us too far afield. In cases where it is needful the auditor goes into detail, as, for example, in cases where citizens of a town have asked for an audit of that town's accounts, or where in the course of Mr. Laing's examinations or that of his deputies an official has been found behind-hand in his book-keeping or his balances, either consciously or unconsciously, full particulars are given. In most cases, however, the record is a condensed one, as for example, that of Durham and Glencoe. Thus:

> Village of Glencoe, County of Middlesex.
>
> Total receipts for 1903 were $9,992.69. Total payments for 1903, $9,892.40. Balance, $100.29. Total assessment, $307,435; collector's roll, $6,173.02, nearly all paid. Tax rate, 20 mills on the dollar; total assets, $20,929.55. Total liabilities, $11,205.26. Treasurer gets $50 per annum. Books well kept.
>
> Town of Durham, County of Grey.
>
> Total receipts for 1903, $24,565.18. Total payments for 1903, $21,932.46. Balance in Standard Bank, Durham, $2,632.72. Total assessment of municipality, $622,036, of which $259,550 is subject to school tax only. Collector's roll, $9,169.59. Paid in full. Tax rate, 21 mills. Total assets, $36,327.82. Liabilities, chiefly debentures, $50,693.96. Treasurer has been in office since 1892, and receives a salary of $85 per annum, which is much too little for the quality of work given. I found the books of the municipality correct and well kept.

We have found it interesting to compare the rate of mills on the dollar (ten mills equal one cent) of certain groups of towns and villages with other groups. Thus:

	Rate.	
Town of Petrolia	26	mills.
“ Goderich	25	“
“ Seaforth	25	“
“ Mount Forest	29	“
“ Prescott	25	“
“ Essex	28½	“
“ Fort William	27	“
“ Rat Portage	26	“
“ Amherstburg	27	“
Village of Port Colborne	15	“
Town of Thornbury	20	“
Village of Markdale	16	“
“ Glencoe	20	“
Town of Newbury	16	“
Village of Lucan	4½	“
Town of North Toronto	17½	“
Village of Clifford	13½	“

It is the custom of this provincial officer, in fact we presume it to be a part of his duty, according to instruction from his superiors, to report upon the condition of the book-keeping in each county or town office he visits. Specimens of his observations in this particular have been given above. And while it seems to give him satisfaction to report a clean and well-kept set of books, and to speak his mind when he finds a good man underpaid, he does not hesitate to score a slovenly or ignorant man. Here, for instance, is a township treasurer mentioned on page 27 in this wise: "Treasurer receives a salary of $55 and has been in office eighteen years. His books and accounts are poorly kept." (A case evidently of poor pay—poor preaching.) Again, the Auditor says of a village treasurer, page 26: "The books of 1904 were not written up at the date of my visit, which omission is clearly wrong."

Some municipalities have the advantage of possessing a resident who will keep their books or accounts well and truly without pay. Assuredly there are many who are well served for small pay. There is the village of Garden Island, near Kingston, whose treasurer "keeps his books without a fault. He does not appear," Mr. Laing adds, "to get any salary, however." Of a treasurer in Clifford—$130,000 assessment—who gets $20 a year, the Provincial Auditor says: "For a municipality in such an excellent position as this one, three times the present amount would be little enough, as he is a careful man and does his work well." And in the adjoining village of Elora, which is assessed at $300,000, the treasurer acts as clerk also, receiving for the dual office $75 per annum, which, comments the report, "is much too little." Residents of these places may possibly be disposed to say, if such small salaries for important posts are commented on: "Well, if these men are satisfied to do this work for the pay we give them, why should we pay them more?" To which we reply, that it is by no means certain that they are satisfied, though they may not care to grumble aloud. And in any case, it is unfair to compensate capable service at rates which a business man knows are too low.

* * *

Mr. G. P. Reid, general manager of the Standard Bank, has tendered his resignation, and his place will be filled by Mr. G. P. Schofield. The directors, in view of Mr. Reid's long and faithful services, have made him a liberal retiring allowance.

DROPPING DOWNWARD.

Continuing the analysis of the yearly chart of fraternal societies operating in the United States and Canada, taken from the New York Spectator, we proceed to give particulars concerning some assessment concerns other than the Ancient Order of United Workmen. Our first article dealt mainly with this body, but many other fraternal bodies are having a very similar experience. We give a few of them.

The Catholic Benevolent Legion, of Brooklyn, N.Y., had $65,608,000 on its books four years ago, but on December 31st, 1904, only $31,332,250. The yearly new business of this body, from being $2,179,000 was last year only $272,000.

The Catholic Knights of America have dropped from the handsome total of $53,143,000, to $25,051,080, the new being now only $285,500 instead of $2,243,500 in the former year.

The Court of Honor, of Illinois, instead of $16,369,000, as in 1900, last year captured only $8,647,500 of new certificates.

The Royal Society of Good Fellows, of Boston, had $16,859,500 in force five years since, and now shows only $7,503,000.

The Home Circle, of Boston, had $9,360,000 to $63,063,100, show a drop in the total number assessments having gone up from $12.30 per member three years ago to $22.20 last year. Only $165,000 of new business came in.

The Knights of Honor, of St. Louis, Mo., had $105,136,500 to assess in 1900, but now can exhibit only $82,334,000—a drop-out of $22,802,500, though about $14,000,000 of new was written during the four years. And the assessments very naturally grew from $28.10 to $33.30 through the younger and healthier members retiring.

The Knights of Pythias, despite a remarkable intake of new members the past four years totaling $63,063,100, show a drop in the total under assessment from $116,363,500 in 1900 to $109,787,000 in 1904.

The Modern Workmen of America, in 1900, issued new certificates for $226,295,000, and last year for only $80,902,000, while the total is also decreasing, though the order's assessments only cost $5.60 per $1,000—a very favorable rate.

Coming nearer home, we find from the Spectator's "Pocket Register" that the Independent Order of Foresters issued new certificates during the past four years for no less than $102,215,500, but nearly the whole of that immense amount went off the books without much delay. This is shown by the fact that during the same four years the total on the books grew from $206,564,500 to $242,896,000. Therefore, only $36,331,500 of the $102,215,500 now remains to be assessed, despite the alleged "surplus" which Dr. Oronhyatekha is so fond of calling attention to on public platforms.

The whole outlook is a very blue one for the people who still imagine that fraternal assessment societies can succeed in furnishing anything more than merely temporary, or what the regular companies call "short term" insurance. The worst feature of the operations of the assessment bodies is that so many millions of people are deceived by those fraternal societies until it is too late for them to get insurance that insures.

A gentleman, writing in the last number of the weekly Workman, expresses his gratitude, as an old man, that the increased rates now adopted for Ontario were allowed to apply upon the age at which he entered, seventeen years ago, because, he says, he only has to pay $17.28 per $1,000 as against the $53.10 that it would be in an old line company. The difference is $35.82 per year, which gives a lurid idea of what is going to happen to the A.O.U.W. of Ontario before many years come and go. A similar yearly loss happening on all the older members of the society ought very soon to open the eyes of the young men to what they are doing and to what they ought to do.

* * *

THE COAL OIL LAMP.

Considering the enormous number of kerosene lamps burning nightly on this continent, it is of importance that those who use them should have some knowledge that there is possible danger in their use, and should be instructed how to handle them with safety. To this subject the Ohio Fire Marshal, Mr. Davis, devotes one of his periodical papers to citizens of his state. Here is what he says upon the chemistry of fire and of explosion. He tells also how and why a lamp expiodes,—and we all know how often we hear of fire and loss of life from the explosion of kerosene lamps:

> All the facts of the chemistry of fire, and of explosion as well, can be told in a simple story of what occurs in the light of an oil lamp. While the lamp burns the oil slowly disappears, and there is an apparent but not a real loss of matter. Kerosene, being the thinnest of safe oils, is drawn rapidly by capillary attraction to the top of a wick. When a match flame is touched to the oil in the wick's top, its heat liberates the atoms of carbon and hydrogen, of which the oil is composed, and permits them to unite with the oxygen of the air for which they have a greater affection than they have for each other.
>
> In low test oils the heat transmitted by the metal warms the oil to a point at which it gives off an inflammable vapor which forms under pressure in the globe. A burner which is kept bright radiates heat, while a dirty one conducts the heat to the lamp. If the wick be too small, flame will travel down the tube; if there is a leak at the collar escaping gas ignites, and if the burner is removed for the purpose of filling it, after the lamp has been burning, the gas within the globe expands and may reach a near-by light. Air ⅛ oil vapor will explode if it touches a flame.

Ohio, it appears, has a law which compels the use of a lamp oil which has a higher flashing test than any other state. And it is to be observed that coal oil, which is above the Ohio requirement that it shall not give off a vapor which will ignite from a flame until it is heated to 120° Fahrenheit, burns with a light that is almost white. If the oil has dropped below that test, as it will if stored for a few months, it burns yellower. These facts apply in a general way to the combustion of all sorts of material. Explosions are to be dreaded from the use of inferior oil, and from the ignorance or neglect which allows kerosene lamps to become dirty and their burners choked up. The experience of the State of Ohio has been that most lamp accidents have occurred from the upsetting or the dropping of the lamp. And some suggestions are given as to the kind of lamp to use. Metal lamps, says Mr. Davis, are not liable to break, but they heat the oil more. A lamp should never be filled within fifteen feet of any blaze, and the oil should be kept in a cool place always. A good precaution to take is to remember that a lamp of glass should weigh one pound for each pint it will hold, and its foot should be broader than its bowl and heavier. Thin and easily shivered lamps are more dangerous.

* * *

SIBERIA AND CANADA.

A paragraph in our Manchester correspondent's letter dwells a little upon the probable competition of Siberia with Canada. Great Britain, he reminds us, is the principal buyer of Siberia's butter, and the seller of a little machinery to the latter, while Germany and the United States are both selling goods in that far country. "Canadian manufacturers may be interested to learn that at Irkutsk and elsewhere, there are customers for harvesters, axes, saws, files, small machinery generally, portable engines, river steamers, nickelled baths, mining implements, traps for animals, as well as cooking stoves, spades, forks, hinges, padlocks, and small-arms." Irkutsk is a place on the Siberian Railway, of 50,000 population and extensive trade, situated near the frontier of Mongolia, close to Lake Baikal and about midway between the Ural Mountains and the Pacific Ocean. It ought to be added that credits out there are everything but short, and we must remember besides that the whole of Russia is affected seriously by the financial strain of war. The method of sale recommended by a British Board of Trade commissioner is the combined store or agency, holding such stocks as are necessary to develop gradually a large and broad trade.

The possibilities of Siberian competition with Canada on a large and strenuous scale are not yet realized by Canadians generally in the way such an important subject demands. Nor is it sufficiently known that the Russian Government, which recent events have shown to be not particularly businesslike in many respects, has made an exception in the case of the fostering of the industries of its eastern provinces. Its wisdom has certainly been manifested in the systematic efforts it has made to develop the trade in eggs, butter, and other produce with Great Britain; and the success of these attempts is proved by the remarkable manner in which farm produce of this nature has invaded the market for which it was largely intended, and by the constant increase which is now taking place in the trade. Canadians ought to realize these facts before it is too late.

* * *

THE MAY FIRE LOSS.

The fire waste in the United States and Canada, during the month of May, shows, like the previous month, a satisfactory diminution. The following summary, tabulated by the New York Journal of Commerce and Commercial Bulletin, shows the figures in detail:

	1903.	1904.	1905.
January	$13,166,350	$21,790,200	$16,378,100
February	16,090,800	90,051,000	25,591,000
March	9,907,650	11,212,150	14,715,400
April	13,549,000	23,623,000	11,901,350
May	16,366,800	15,221,400	12,736,250
Total, 5 months.	$69,070,600	$161,887,750	$81,322,100

Underwriters may be said to be looking forward with a little more hopefulness of spirit, the losses during the summer months generally being much lighter than in the other seasons of the year.

A CHANGE OF PROPRIETARY.

An announcement made in the June issue of the Canadian Engineer may possess interest for some of our readers. It is to the effect that the Monetary Times Printing Company, Limited, has taken over the entire interests of Biggar-Samuel, Limited, publishers of the Canadian Engineer, the Canadian Machine Shop, the Pulp and Paper Magazine, and the Canadian Journal of Fabrics, and that henceforth the head office of those journals will be at 62 Church Street, Toronto.

The new editor of the Canadian Engineer, Mr. Samuel Groves, is a trained English engineer, with a ripe knowledge of the best modern engineering practice, gathered in some of the largest industrial establishments in England, the United States and Canada. He is an expert in Metallurgical Science, and was 1904 Lecturer on "Mines, Furnace, and Foundry" to the Carnegie Technical Schools, Pittsburgh. There is reason to expect, therefore, that the position which the Engineer has made for itself, a solid and permanent position in the industrial field of Canada, and the reputation which its columns possess, will be maintained, and, if possible, increased under the new regime.

THE QUEBEC BANK.

The report submitted by the directors to the shareholders of the Quebec Bank at their eighty-seventh annual meeting on Monday last, was a satisfactory one. The profits of the year were shown to be $261,475, which is equal to nearly ten and a half per cent. on the capital. These profits enabled, after paying the usual dividend, the putting aside of a sum for pension fund, some slight loss on real estate to be written off, an addition to be made of $50,000 to the reserve and a larger balance than in the preceding year to be carried forward at profit and loss. These results met with the approval of the shareholders. The report shows a considerable increase in the deposits with the bank, an increase which apparently has not all been put into current discounts. A branch of the bank, the report tells us, has been opened during the year at L'Epiphanie, which is not far from L'Assomption.

FINANCIAL ITEMS.

G. A. Case, Limited, Toronto, have received an Ontario charter authorizing them, with a capital of $40,000, to purchase and sell and lend upon debentures, bonds, or other securities, and to carry on a general brokerage business.

Announcement has been made that Mr. A. B. Patterson, formerly manager of the Merchants Bank at Hamilton, succeeds Mr. Daniel Miller in the management of the Toronto branch. Mr. J. E. Magee, of the Owen Sound branch, will succeed Mr. Patterson, while Mr. C. M. Wrenshall goes from St. Sauveur, Que., to take charge in Owen Sound. We are informed further that the Merchants Bank has opened an agency at Camrose, Alberta, which is under the supervision of the Westaskiwin branch.

The London and Western Trusts Company, we see in a despatch from London, Ont., has sent to depositors and others having claims against the defunct Elgin Loan Company cheques for the final dividend, making 100 cents on the dollar, and interest from the date of the liquidating order. It is stated that there are being held by the Trusts Company, at the request of the Elgin Loan shareholders, awaiting a more favorable market, sufficient assets to pay a substantial dividend on the stock. The liquidating order was issued June 15th, 1903, less than two years ago, and little hope was held out then of anything remaining for the stockholders.

The recently noted disgraceful fact that there are at the present time no fewer than ten bank presidents and cashiers in the penitentiary of one American State renders all the more striking the following protest from the New York Evening Post: "The futility of the State bank examiners as a safeguard against improper banking methods, has long been notorious; their vigilance has, if anything, grown more lax since the rise of a widespread movement of speculation rendered close supervision more necessary than ever before. Yet what one usually hears, when a rotten institution collapses, is explanation why it was flatly impossible for the Banking Department to discover the irregular practices." We may congratulate ourselves on the fact that there are some things we manage better in Canada. One of them is a rigid system of inspection for our banks.

INSURANCE MATTERS.

A society has been organized under the name of the Dominion Fire Protection Association, of which the manager is Mr. J. A. C. McCuaig, and the head office in the Royal Building, Toronto. Its objects will be to advance the science of diminishing fire hazards and to educate the public in regard to fire protection. It is open to insurance men, architects, builders, manufacturers and all those interested in protection against fire. The first publication of the society has to do with specifications for the installation of fire pails.

The absurd but disastrous strike of teamsters in Chicago has drawn attention of an acute kind to schemes for insuring manufacturers and traders against loss by such misuse of power by aggressive union leaders. A committee which recently investigated the subject found no fewer than 149 firms in Chicago ready to apply for over $12,000,000 of strike insurance. If the firm among whose employees the present strike, or rather boycott, originated had been insured against such contingencies it could simply have ceased doing business and been recouped for its loss by co-insurers, and not a single other firm need have been involved.

Probably in no branch of insurance have the concessions granted to policy-holders been more numerous and followed one another with such rapidity as they have in connection with the accident branch. Remarkable ingenuity has been shown in the selection of names to distinguish the new contracts one from another and from their predecessors. Some only of these selections have been happy. The changes introduced in the method of settlement of claims by life offices whereby the period (which many will remember as six months) which by the policy had to elapse between the death of the assured and the payment of the claim has been reduced to the short interval between death and the proof of it, and the title to the policy, has now been followed in the world of accident insurance. Insurance is an indemnity, and the accident insurance policies have provided for the payment of weekly compensation at the end of the week or other period. Claims have been promptly paid; but, as the surgeon expects his fee for an operation at the time he performs it, so now those assured under the new "inclusive excess" policy of the *Casualty* Insurance Company will find that a capital sum is payable immediately the policy-holder contracts any sickness or disease or is operated upon therefor. The expenses of the illness will be provided as they occur, not after they have been incurred. —Insurance Spectator, London.

Mr. J. G. Van Cise, actuary, has compiled a pamphlet on the effect of total abstinence on the death rate. It makes a very valuable temperance document. Unfortunately, however, the author had not at his command the facts which enable him to prove absolutely his contention that total abstainers make the best risks. Many years ago Dr. Carpenter, of England, in a $5,000 prize essay on the effects of moderate drinking proved this point theoretically, but as to proving it by facts, this has been and always will be a very difficult matter. The experience of a large life insurance company, like the Temperance and General of England, while strongly in favor of total abstinence, does not prove absolutely that total abstainers make the best risks. This would be true if all the applicants for life insurance would tell the exact truth when making application. If a man declares himself to be an abstainer, it may safely be assumed that he speaks the truth, but it is undoubtedly quite true that a man who calls himself a very moderate drinker may in the eyes of other people drink somewhat to excess. He may, in fact, while classed on the company's books as a moderate drinker, be stimulating his vital organs daily beyond the normal by the use of alcoholic beverages, which in time brings on a serious organic trouble. Hence we can readily understand the difficulty in the way of getting perfectly accurate statistics to prove the moderate use of alcohol. It would seem to be impossible, therefore, says the Indicator, under existing circumstances to compare the relative effects of "total abstinence" and "moderate drinking" so long as so wide a range is given the latter.

* * *

TRADE NOTES.

The Norris Manufacturing Co., Limited, Windsor, Ont., have received a charter, and they will manufacture and sell shirts, collars, cuffs, and similar articles, and for such purposes develop electric power, and dispose of the surplus thereof. Geo. Bartlet, of Windsor, and G. E. and F. H. Norris, of Detroit, are among the provisional directors.

There was another 10c. reduction per cental in all lines of sugar this week, and its position is still weak. One reason for this, no doubt, is the probable lateness of the fruit crops, owing to the backward season. Indeed, unless conditions improve, it looks as if the berry crop will not be large.

"Tailleur parisien" is also a pleasing between-seasons or fall fabric, though less soft to the touch than those already mentioned. The samples show chiefly neutral tints, produced in the form of a quite small and rather indistinct check, by a pretty equal mingling of two shades of one color and white; the latter appearing more or less to be the ground color.

The Canadian Grocer does good work in calling attention to the value of fish as a nutritious diet for summer. Codfish, for example, is now put up in non-porous wooden boxes, which render it absolutely odorless and it is so prepared that it will keep for almost any length of time, even in extremely warm weather. Nothing remains for the grocer to do but to tell his customers of the many excellent qualities of such fish products and of the innumerable appetizing summer dishes that may be prepared from shredded codfish.

Demand for raw silk, says the Economist, is of small proportions, and there does not seem much likelihood of any increase in the immediate future. The conditions surrounding the silk industry at the moment do not seem to admit of any speculation in raw material on the part of manufacturers, and as a consequence the latter are conducting their operations in a very hand-to-mouth manner. Reports from silk commission houses are to the effect that the demand which has been in evidence has shown a decided decline, and that the manufacturer realizes the possibilities of an over-production, brought about by the extension of his plant when demand was greater than supply. In certain directions silks are being thrown on the market by irresponsible parties at less than the cost of production, and there has been more or less stoppage of machinery. All these things produce an apathy on the part of the manufacturer, who is not likely to be a free operator until conditions in the piece goods market are more settled. It is realized that the outlook for fall is satisfactory, provided there is no continued evidence of over-production. It is generally admitted that a curtailment will be the wisest and most helpful course for all concerned.

The recent show of the Royal Agricultural Society at Adelaide, Australia, demonstrated the great progress made in evolving more profitable types of merino sheep in South Australia in the last 50 years. A Queensland property containing 80,000 small, fine-woolled sheep in a single decade, by the introduction of South Australian rams has had the average weight of each fleece increased from less than four pounds to over eight pounds, and the value of its total wool-clip from the same number of sheep raised by more than $50,000 per annum. Some interesting information contained in a recent issue of the Manchester Guardian is generally interesting. The high prices obtained at Bradford a few months ago for Australian and New Zealand Lincoln greasy had, it says, brought that class of sheep into favor once more, and flock rams had risen in value three and even four-fold as compared with prices a year ago. Flock rams of this breed were selling at seven guineas. Much of the energy of breeders in this colony is devoted to the production of the heaviest lambs for the freezing establishments.

A correspondent of the Dry Goods Economist in Paris describes three very attractive fabrics designed for the commencement of fall, and known as "satiné souple," "onduline" and "foulardine." The satiné is the most substantial and shows a pretty gloss, almost causing it to resemble a very light weave of cloth, though being of the tulle order. It is admirably suited for suits of the tailor type, and exists in a great variety of medium tints. Its most appropriate trimming would certainly be taffeta pipings or rouleaux in a somewhat darker shade, and taffeta is much spoken of as a garniture for all wool materials for fall, replacing those of satin, which were favored this spring. Onduline is also attractive and well deserves its name, as the wrong side of this fabric, or when it is held up to the light, shows a slight undulating movement in the threads composing it. It is a strong though comparatively thin material, and will prove serviceable either for tailor suits or children's wear. Foulardine, though presented as a fall fabric, strikes one as being more suitable for between seasons. It is more suited to the general run of toilettes than those of a strictly tailor order.

* * *

—An important matter for the West will be the convention of boards of trade, to be held at Regina early next month. Among the subjects to be discussed will be insolvency legislation, interest rates, administration of estates, exemption ordinances, and the establishment of a permanent association of western boards of trade. The present is a time of peculiar, even critical, interest to the West, and such a gathering will have much power for good.

* * *

—The Canadian Manufacturers' Association, or rather some three hundred members of that important body, are to-day leaving Montreal on the steamship "Victorian" on an extended trip to Great Britain. On arrival they will be taken in hand by the London Chamber of Commerce who intend, if report be true, to do the honors in royal style. The manufacturers should be able to do much in the way of enlightening the people of the Mother Country regarding Canadian facts and resources, and all good wishes go with them on their trip.

* * *

—The Canadian Street Railway Association held their annual convention in Toronto on Friday and Saturday last. One of the most important subjects discussed was the efficiency of various fenders, trolley and wheel guards and other contrivances to save life and reduce the number and severity of injuries. Occupying a conspicuous position on the floor was a ponderous model in wood of a fender resembling the cowcatcher of a locomotive. It is said to be the most practicable fender for radial lines, throwing whatever may be encountered to one side. The old board of officers for the ensuing year were elected as follows: W. G. Ross, Montreal, president; W. H. Moore, Toronto, vice-president; A. H. Royce, Toronto Junction, sec.-treas.

* * *

—Universally bright seem to be the prospects of the western wheat crops. From every point on the C.P.R. system, comes the word "satisfactory," or just as frequently "very satisfactory." The wheat is growing very rapidly now and varies from two to six inches in height, and forms a thick mat on all of the fields where seeding was well and carefully done. There have been several small showers in some localities, but they have been appreciated and by no means excessive. Even the districts in which the subsoil is gravel and sand, and which usually are the first to complain of dry weather, are extremely confident. Farmers and country merchants are enthusiastic, for the grain is now at a stage where it will take extremely bad weather to do serious damage. With a reasonable amount of rain-fall during June and July the amount of wheat grown will create a new record.

* * *

—The Ontario Bureau of Mines expresses its intention of carrying on this season a systematic exploration of certain portions of Northern Ontario, including both mineral-bearing regions and districts believed to be more agricultural in their character. One party, under Dr. A. P. Coleman, is to be sent to the Michipicoten mining division to complete the investigation of the iron ranges under H. L. Kerr. A second proposes to visit the region west and northwest of Lake Abitibi, where a considerable section of the Great Clay Belt will be subdivided this season into townships and farm lots. Mr. Benjamin Tett, Newboro', will head the third party, which will go into the district near Chapleau Station, on the Canadian Pacific Railway, where a somewhat extensive area of good land is to be surveyed into farm lots, and in the vicinity of which iron ores are known to exist. Prof. W. G. Miller, Provincial Geologist, will continue the examination of the rich silver-cobalt area on the Temiskaming and Northern Ontario Railway, which has attracted so much attention, and will also institute a thorough enquiry into the clay and shale resources of the Province.

* * *

—Dr. A. P. Coleman, of the Ontario Bureau of Mines, who is now in the Michipicoten region, reports that a Berlin, Ont., company is developing power at the High Falls on the Michipicoten river. This it supplies to the Helen and other mines. It is his opinion that if cheap power is obtainable some of the gold mines may be reopened. The falls are 128 feet high. He also reports that on Anjigomi Lake Mr. Edgar Brown, Sault Ste. Marie, is stripping some iron claims. The range is over a mile in length, and contains some good magnetic ore. At the Helen iron mine a large amount of ore is exposed in the workings. The ore body is 180 feet below the old level at Boyer Lake, and appears as large and good as ever. A shaft 120 feet lower will give access to ore nearly 400 feet below the original ore body. Some mine vessel loads amounting to 30,000 tons have been shipped this spring.

* * *

—There is likely to be this summer a remarkable amount of railroad building done in various sections of the country. In Ontario the C.P.R. is building 227 miles of road between Toronto and Sudbury, also eighty miles of road in Western Ontario, called the Guelph and Goderich Railway. Near London the G.T.R. is double-tracking thirty-five miles of main line to Sarnia. The Temiskaming road has 100 miles to complete. Rails are also being laid 116 miles along the Ottawa river valley. In Quebec the Quebec and Lake St. John Railway is building about seventy miles, and the Great Northern is building one or two spur lines. In British Columbia the C.P.R. is extensively laying new lines, and the Great Northern is running a line from Similkameen district to a point near the coast, while the Crow's Nest also will build to the international boundary. In Manitoba and the Territories the C.P.R. is building about 200 miles of branch lines, and the Great Northern expects to build about 400 miles from Battleford to Edmonton. In Nova Scotia the Nova Scotia Eastern is extending from Halifax 200 miles, and other lines are building about 200 miles of branches. In New Brunswick about 150 to 200 miles of new road will be laid.

Meetings.

QUEBEC BANK.

The proceedings of the eighty-seventh annual meeting of the shareholders of the Quebec Bank, held in the Banking House, Quebec, on Monday, the 5th of June, 1905, were as follows:

Present—Messrs. John Breakey, John T. Ross, Gaspard Lemoine, Vesey Boswell, Edson Fitch, Thomas McDougall, T. A. Piddington, H. B. Patton, Wm. Brodie, Heber Budden, Major Jas. Morgan, John Shaw, A. C. Joseph, A. Laurie, and others.

On motion of Mr. Andrew C. Joseph, seconded by Mr. John Shaw, the chair was taken by Mr. John Breakey, and Mr. R. C. Patton requested to act as secretary of the meeting.

The chairman read the report of the directors, and Mr. Thomas McDougall, the general manager, read the statement of the affairs of the bank as on the 15th of May, 1905.

Report.

The directors beg to submit to the shareholders at this, the eighty-seventh annual meeting of the bank, the general statement of its affairs, together with its profit and loss account, exhibiting the net result of the business for the year ended the 15th May, 1905.

This result shows a profit for the year of $261,474.91, deduction having already been made therefrom of the charges of management, including provision for bad and doubtful debts.

Out of these profits an annual dividend of seven per cent. per annum, or $175,000, is paid; the usual annual appropriation for pension fund, $5,000, has been taken; loss, amounting to $6,340.88, on real estate disposed of, has been written off; the rest has been increased by $50,000; the balance of the profit and loss account carried forward, namely, $63,295.74, exceeds that of last year.

A branch of the bank has just been opened at L'Epiphanie, in the Province of Quebec, the prospects of which seem promising.

The head office of the bank and all of its branches have been carefully inspected during the year.

JOHN BREAKEY,
President.

GENERAL STATEMENT, 15TH MAY, 1905.

Liabilities.

Capital stock		$ 2,500,000 00
Rest	$1,050,000 00	
Reserved for interest due to depositors, and for rebate on interest on current bills discounted	128,294 26	
Balance of profits carried forward	63,295 74	
	$1,241,590 00	
Unclaimed dividends	407 40	
Half-yearly dividend, No. 166, payable 2nd June, 1905	87,500 00	1,329,497 40
Notes in circulation	$1,360,288 00	
Deposits not bearing interest	1,045,282 01	
Deposits bearing interest	7,253,498 00	
Balances due to other banks in Canada	215,367 07	9,874,435 08
		$13,703,932 48

Assets.

Specie	$ 304,716 50	
Dominion notes	493,860 00	
Deposits with the Dominion Government for security of note circulation	90,045 00	
Notes of and cheques on other banks	593,072 45	
Bonds and securities	992,633 51	
Call loans on bonds and stock in Canada	2,375,886 81	
Loans to other banks in Canada, secured, including bills re-discounted	214,905 58	

Call and short loans elsewhere than in Canada	250,000 00	
Deposits made with, and balances due from other banks in Canada	9,027 37	
Balance due by agents in Great Britain	111,612 70	
Balance due by agents in foreign countries	158,451 21	$5,594,211 13
Time loans on bonds and stocks	$ 230,985 41	
Notes and bills discounted current	7,600,341 98	
Overdue debts	9,525 56	
Real estate other than bank premises	2,570 65	
Mortgages on real estate	36,668 73	7,880,092 33
Bank premises and furniture		229,629 02
		$13,703,932 48

Thomas McDougall,
General Manager.

The Quebec Bank,
Quebec, 15th May, 1905.

Profit and Loss Account.

Balance at credit of Profit and Loss Account, 14th May, 1904		$ 38,161 71
Profits for year ended 15th May, 1905, after deducting charges of management and making provision for bad and doubtful debts		261,474 91
		$ 299,636 62
Dividend 3½ per cent., paid 1st December, 1904	$ 87,500 00	
Dividend 3½ per cent., payable 2nd June, 1905	87,500 00	
Reserved for pension fund	5,000 00	
Appropriated for loss on real estate sold	6,340 88	
Added to rest	50,000 00	236,340 88
Balance at credit of Profit and Loss Account carried forward		$ 63,295 74

It was then moved by the president, seconded by Mr. John T. Ross, that the report and statements now read be adopted and published for the information of the shareholders.—Carried.

The usual resolutions conveying thanks to the directors and officers were passed, after which the following shareholders were elected directors for the ensuing year: John Breakey, John T. Ross, Gaspard LeMoine, W. A. Marsh, Vesey Boswell, Edson Fitch, and Thomas McDougall.

At a meeting of directors, held immediately after the annual meeting, John Breakey, Esq., was re-elected president, and John T. Ross, Esq., vice-president.

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, June 8th, 1905, as compared with those of the previous week:

	June 8.	June 2.
Montreal	$27,068,335	$22,633,097
Toronto	20,259,779	19,415,662
Winnipeg	6,494,879	5,770,440
Halifax	1,896,051	1,507,275
Hamilton	1,349,518	1,386,838
St. John	1,143,421	1,027,786
Vancouver	1,800,188	1,488,852
Victoria	739,016	621,144
Quebec	2,218,449	1,485,930
Ottawa	3,578,815	1,813,370
London	1,250,401	927,017
Total	$67,798,852	$58,077,411

Vault doors in Bank of Montreal and Royal Trust Company, Montreal. Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons.** Total weight of lining and doors **260 tons.** Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

—The expectation in Newfoundland is that the fishery outfitting for the current season will, if anything, be larger than last year. It seems that a number of men who a few years ago were flocking to Sydney have turned their eyes homewards and the recent high prices have induced many who have made a little money outside the fisheries to come back and invest in the fisheries this season.

—It is believed that the market for new season's codfish will open at $5 for prime merchantable. "This is a dollar lower than the quoted figure to-day; but, in view of slow consumption in foreign markets, owing to high prices, and also in view of the fact that two cargoes of ours recently sent to Mediterranean ports have come back unsold, it is said that the opening figure will not be above five dollars, unless our catch is an extremely short one."

—A minister's wife, a doctor's wife, and a travelling man's wife met one day recently and were talking of the forgetfulness of their husbands. The minister's wife thought that her husband was the most forgetful man living, because he would go to church and forget his notes and no one could make out what he was trying to preach about. The doctor's wife thought her husband was the more forgetful still, for he would often start out to see a patient and forget his medicine case and travel nine miles for nothing. "Well," said the travelling man's wife, "my husband beats that. He came home the other day and patted me on the cheek and said: 'I believe I have seen you before—what is your name?' "

TORONTO THE NEW.

Incorporated in the year 1834, Toronto had less than 4,000 population, who wandered about its streets on wood sidewalks, with tallow candles for lanterns. King Street boasted 287 buildings, while Yonge Street had only 104. A transformation has been effected in seventy years, for we find that the city has to-day a population of 250,000, if not more, that there are 47,523 buildings within her borders, distributed over 185 miles of paved streets, with ninety-two miles of electric tramway track upon them. The first assessment of property within the city limits was $934,410, seventy years ago; to-day the value of property in the city is $143,000,000.

These and many other suggestive facts are to be found in a handsome book issued last month by the Toronto Board of Trade, which any possessor of "Toronto of Old" ought to read. Beginning with a sketch of the foundation and progress of the city, it proceeds to give the origin and history of the Board of Trade, the rise and growth of the Toronto Industrial Exhibition. A feature of special interest is a brief but comprehensive sketch of the Canadian Banking System. There is, of course, the roster of officers, committees, and sections of the Board, while the president's address and the reports of dry goods, breadstuffs, booksellers' and tanners' sections occupy some half dozen pages. The secretary has a modest page, about the middle of the book, where he reminds the reader that 1845 was the date of the Board of Trade's founding, and that the present volume is intended to mark the sixtieth anniversary. Very appropriately does the president of 1904, Mr. John F. Ellis, pay tribute to the founders of the board, Messrs. George P. Ridout, Thomas Clarkson, Peter Paterson, John Mulholland, William L. Perrin, and others, as far-sighted and patriotic men, desiring the welfare of the city.

A word must be said of the make-up of the book. It is exceedingly good, both paper and presswork being first class, and the illustrations done with great skill and striking effect. We are glad to learn from Mr. Morley, the secretary, that the handsome volume, so worthily representative of Toronto, is likely to receive a wide circulation. Members of the body have filled the advertising columns in a most creditable way.

⁂

CANADIAN COTTON GOODS IN JAPAN.

Complaint is made by Canadian cotton manufacturers as to the disadvantages under which their goods labor in Japan. One agent states he finds it impossible to sell Canadian cotton goods in that country in competition with American goods, as the latter had a preferential tariff of 5 per cent. To meet this he had reduced the price 5 per cent., but even then could not sell, because there was a sentimental objection in Japanese official circles against Canadian goods, inasmuch as they felt Canada had discriminated against them. The matter was brought up the other day in Parliament, and Hon. Mr. Fielding stated that the difficulty arose out of a treaty made by the Imperial Government with Japan some years ago, under which certain privileges had been granted, and Canada had an opportunity of joining in. All things considered, however, it had been felt that if the Government acceded to it Canada's freedom of action in other matters would be embarrassed, and it was not thought wise to assent to it. The consequence was that Canadian products did not get the advantages which the British products would have under that treaty. The matter had occurred several years ago, and it was thought Canada's action in regard to the labor question in particular might be hampered. The "opening up" of Japan is likely to be an important matter for Canada. But if we act towards the Japs as British Columbia already has done, what are we to expect?

TOWN OF MEDICINE HAT

Tenders Wanted.

The Town of Medicine Hat has the following four lots of Municipal Debentures for sale, for which tenders will be received up to nine o'clock on the **19th day of June, 1905:**

$12,000.00—Natural Gas.
$10,000.00—Water-works.
$30,000.00—Municipal Building.
$2,600.00—For the purchase of the New Edinburgh Natural Gas Well, Gas and Water Plant.

These four lots of Debentures all date from the 1st of August, 1905, bear interest at 5 per cent., and are repayable in twenty equal annual instalments of principal and interest. For particulars address the undersigned. The highest or any tender not necessarily accepted.

W. N. ADSIT,
Sec.-Treas. Town of Medicine Hat.

Debentures for Sale.

Sealed Tenders addressed to "The Corporation of the City of Regina" will be received up to and inclusive of Monday, the 19th day of June, 1905, till 5 o'clock p.m., for the purchase of Debentures of the city of Regina, issued in pursuance of a By-Law in that behalf authorizing the raising of $160,000 to be expended in the completion of the system of Waterworks, Sewerage, and Electric Lighting for the Corporation of the City of Regina.

These Debentures will be re-payable in equal annual instalments, and will bear interest at 4½ per cent. per annum, and are made re-payable within 30 years.

The highest or any tender not necessarily accepted.

J. KELSO HUNTER,
Secretary-Treasurer.

LONDON & LANCASHIRE FIRE INSURANCE CO.

In its more than forty years of experience and progress the London & Lancashire Fire Insurance Company has built up a lage business and strong reserves. By its last annual report we discover that the company's paid capital is £227,500; its reserve fund, £1,000,000; its fire fund, £530,000, besides which it possesses an accident fund, as it does accident business in the Old Country, a staff pension fund, and a credit balance, which bring its total funds up to £2,074,613, to say nothing of a nearly equal amount in capital subscribed but uncalled. By the balance sheet we learn the character of its assets. There are mortgages, bonds, and debentures in England; British Government securities and British railway stocks; Colonial Government securities, of which £50,000 are Canadian; United States Government and railway bonds; foreign railway debentures; and the snug sum of £273,023 cash on deposit.

The business of the year last past makes a satisfactory showing notwithstanding the unusual loss of, say, £90,000 by the Baltimore conflagration. The net premiums in the fire branch were £1,319,868; the net losses £719,809, equal to 54.53 per cent.; the commissions and expenses, £524,451, equal to 39.73 per cent., so that there was a fair margin of profit. Dividend of fifteen shillings per share was declared, fifty shillings being the amount paid up per share. Such a result emphasizes the value of a widely-spread fire underwriting business. Had the company's profit depended upon the United States or Canada in 1904 there would not have been any, for we are told the Canadian business shows a heavy balance on the wrong side. Indeed, over a series of years the Canadian field has been an uninviting one. All the more reason for property owners patronizing reliable companies.

⁂

OUR AUSTRALIAN LETTER.

The dispute over the mail arrangement with the Orient Company had its effect on the renewals of the subsidy to the Canadian-Australian Line. That subsidy has hitherto been paid by two States, New South Wales and Queensland. The latter does not want the line to cease calling at Brisbane, but does want the Commonwealth as a whole to pay the subsidy. New Zealand will give more than Queensland if the line will make Auckland a port of call instead of Brisbane, but Australia does not want the Canadian steamers to go to New Zealand. Australia has hopes that the Canadian route will yet be made a fast mail route to England. It can be done, but it will require more money than anybody is willing to pay just now. The matter has been postponed by renewing the old subsidy for three months. Sir Joseph Ward, Postmaster-General of New Zealand, has recently been in this city, and expresses himself as determined as ever to get direct communication with Canada.

The Commonwealth immigration laws were discredited by the refusal to allow certain hatters and certain potters brought out from England for their special skill in these crafts to land. A more recent incident has just occurred in Hobart. A wealthy Glasgow manufacturer, who happens to be blind, was touring the world with his daughter. He landed at Hobart without the sharp eye of the Customs officer having detected his failing, and, indeed, had got out of the city before the fact came to his knowledge. His zeal was not to be baulked, and as he could not get at the blind man he compelled the steamship company to give bonds that the unlucky visitor should not permanently remain in Australia. Australia's proximity to the crowded East renders some restriction to be put on immigation, but so far its legislators have succeeded in making themselves ridiculous.

The prospects of a good season for both farmers and pastoralists continue throughout the larger portion of Australia. It does not manifest itself in actual business. In South Australia and Western Australia it is good, in Victoria fair, but at best it is dull in Queensland, and duller in New South Wales. The Customs revenue of these last two States shows a decline of 10 per cent. as compared with last year. The lower duties of the Commonwealth as compared with those levied by the State of Victoria is contributing to giving Melbourne the chief distributing centre of Australia at the expense of Sydney. It was supposed that the Commonwealth tariff would have led to a large development of manufacturing in Sydney, but the experience has been disappointing. There has been an increase in capital invested in plant and machinery of about two million pounds, but the number of males employed in 1904 was less than in 1901, and the wages, in spite of the Compulsory Arbitration Courts' work, less than paid in 1902. There has been an increase in the number of women employed, yet the total wages paid was less, showing that the work has been irregular. New South Wales has itself to blame if it is not getting out of the Federation what it should get. It is due to the enterprise of the people of Melbourne that it is beating Sydney in the race for supremacy.

Among the recent arrivals from Canada was Mr. H. Cockshutt, of Brantford. He is here in the interest of his company. He made a short visit to Brisbane, and left Sydney for Melbourne last night. On the ship were three other Canadians, but out here as representatives of United States concerns.

The Commonwealth Government is a combination of Free Traders and Protectionists, who agreed to suspend hostilities and fight the Labor party. A condition of armistice was the appointment of a committee to enquire into the tariff. It has just completed its Melbourne session, and the result has been rather a boomerang for the Proectionists who created it. It has always been urged that Australians should buy flannel at home, because it was made of pure wool, while the imported had a large share of cotton in its composition. Evidence before the committee showed the flannel of a manufacturer who wanted more protection to contain a higher percentage of cotton than the imported. A manufacturer of harvesters wanted a heavy protection because the machine was an Australian one, which had been copied by Canadian makers. The next witness wanted high protection because he was making a drill which he had cribbed from Canada. The proceedings are interesting as displays of human nature.

Mr. Larke, the Canadian Commissioner, leaves for Canada by the "Miowera" on June 12th. He is taking a number of pictures of Australian scenes for the Industrial Exhibition at Toronto, and a number of lantern slides of Australian beauty spots in case any institutions would wish for a talk on Australia.

F. W.

Sydney, New South Wales, 8th May.

⁂

NORTH OF ENGLAND LETTER.

Considerable curiosity prevails now as to the attitude the Canadian Government will adopt towards the Colonial Conference. It is realized pretty generally among sensible business men that the colonies should not be made counters in a political game, whether or not colonial statesmen are willing to assent to such use of themselves. One may sympathize to some purpose with the Preferential idea, and still acknowledge the unwisdom of any attempt to hustle John Bull into a bargain about which he has not fully made up his mind. Evidently any such precipitancy would be

likelier to cause rejection than acceptance of an offer made either by Governments abroad or by a Government at home. At the same time it is right to say that the Home public of all parties have a sincere respect for Sir Wilfrid Laurier and a high opinion of his tactfulness. The feeling that he will not be injudicious diminishes in no way the natural interest in the undetermined position prevailing. But people want anxiously to know what attitude he will take up, and his action will go further with us than that of, say, anybody in Australia.

Siberia, despite its loathsome name, seems to be one of the countries marked out by nature to compete with Canada. A commissioner of our (official) Board of Trade after a tour through Siberia dilates in a full report on the advantages the market offers to British buyers and sellers. Great Britain is the principal buyer of the country's butter and the seller of a little machinery. It seems, however, that the Briton is backward compared with the American and German. Perhaps Canadian manufacturers may be interested to know that at Irkutsk and elsewhere there are customers for harvesters, axes, saws, files, small machines generally, portable engines, river steamers, nickelled baths, mining implements, traps for animals, as well as cooking stoves, spades, forks, hinges, padlocks and small arms.

If Canadian "combines" have not invariably had a smooth career, neither have English. What we colloquially call "Slubbers," being the British Cotton and Wool Dyers' Association, is one of the lame birds of the combine flock. With "goodwill" figuring in its assets at $5,170,000, it has only been able to earn an aggregate of $415,000 in its five and a half years of life. Such a lamentable exhibition holds forth few points to emulate, but the management has been peculiarly successful in furnishing examples of what to avoid. Its career has made tolerably plain the useful knowl-

edge that to continue unprofitable branches is bad business, that to permit each branch works to wage war on all its sister branches is suicidal, and that to allow departmental managers to set the central authority at naught is the way to spoil success. From so compact and uniformly successful a combine as the Bradford Dyers' Association we learn that discipline must be upheld at all hazards, profitless enterprises at whatever sacrifice must be dropped, and that the better organization and specialization of plant and processes must be continual.

Shippers of bacon have the assurance of people in the provision trade in Manchester that prices for some time forward will be high. Retailers acting in unison have raised bacon one penny per pound. Although there are dealers who hold that the plentifulness of United States hog products will compensate for the shortage of Irish, Danish and Canadian, that opinion is not at all universal. The dominant belief is in higher values still until nearly the end of the year.

So far as the provincial arrangements for the visiting Canadian Manufacturers' Association delegates indicate anything, they seem to suggest that the tour through the shires will be more in the nature of a holiday jaunt than a scientific expedition. Trips to model villages, to parks, to public buildings and the like seem to constitute the balance of the programme after luncheons and other junketings have been accounted for. In this way the tourists ought to enjoy themselves, and to help cement the kindly feeling towards all Canadian people that is present here when even it is not conspicuously visible.

American insurance offices in Great Britain have gained nothing by the association of one of their number with the methods of "Frenzied Finance." Chicanery in the stock markets the Englishman regards as natural, if not proper, and he has, perhaps, an exaggerated horror of the monster Trusts. Them and their controllers he profoundly distrusts, and the mere notion that the colossal accretions of capital meant for orphans and widows might be used at the bidding of the financial buccaneer is alarming to him. He declines to believe a similar state of affairs possible with an English company. and, though he may admit that no harm seems to have been done, the Equitable episode has had the effect of a warning. Coupled with stories of endowment policies that turned out less handsomely than the too sanguine anticipation, the new scare will make business in American contracts distinctly harder to transact. Unquestionably good faith is both legally and practically at the roots of life insurance business.

The attitude of the old lady who lost money on every ounce, and only contrived to get a living by losing a lot, is suggested by the English motor car accident insurance business. Hitherto the department has been run at a loss, and has not been especially cultivated by some offices. Now that automobiles are to be five times as numerous as last year, managers are anxious to embrace the larger volume of business. A favorite policy is that costing £15 per annum, giving £1,000 at owner's death, or £6 a week for twenty-six weeks in case of disablement; £100 at death and £1 a week in case of accident to one's chauffeur, and covering the car up to £1,000 in certain eventualities. It is, perhaps, worth saying that the station masters on English railroads, and in particular those at wayside stations, do a considerable volume of accident insurance business per annum. They were led into this activity by the railway passengers' insurance companies, and a few of them add appreciably to their incomes by this means.

All whom it may concern are warned to avoid such slips in typewriting as made a German-Englishman write himself down, "Wholesale tobacconist and cigar imposter."

NORTH COUNTRY.

Manchester, May 26th.

* * *

The Keewatin Flour Mill Company have started work on the erection of their large new mill at Keewatin, which is to have a capacity at first of 3,000 barrels per day, to be increased to 5,000 later. The company, it is said will also build near by storage elevators with a capacity of half a million bushels, besides several small elevators throughout the West for the purpose of facilitating the buying of wheat.

MORE ABOUT EDMONTON.

A man who knows Edmonton tells us a few things more about the progress of that promising place. He declares that what was called the boom of last year and of 1903 has not subsided, but the place has gone on to grow, and its people to show their faith in it. Jasper Avenue, he says, will before next winter sets in be a handsome street. The Bank of Montreal building, on a corner lot, is already an ornament to the place, and the Bank of Commerce has an excellent site. Now, he tells us, the Merchants Bank is about to erect a very fine three-story building on the corner of Jasper and Howard, where the frame warehouse of the Massey-Harris company now stands. Further east, the firm of McDougall & Secord, who now have nearly finished the Empire Block, one of the handsomest store and office buildings in Canada, will commence the erection of a substantial three-story store and office block.

The well-known firm of Revillon Brothers, Limited, have let a contract for a brick warehouse, 100 x 150, next to their present four-story wholesale warehouse, thus making the firm's wholesale building 150 feet square. It is also understood that this firm intends in the near future to erect a track warehouse. Then four store blocks in "Block 2" are well advanced.

Besides these structures for commercial purposes there are others contemplated. For instance, the religious body known as the Reverend Sisters of Mercy are putting up a new building for their maternity hospital at a cost of $40,000. Extensive improvements are in view to All Saints' Church, costing about $9,000, to provide more seating capacity. "The new Baptist Church, which will be a handsome and comfortable structure, is well under way. Early commencement of the terminal buildings of the Canadian Northern Railway is expected. Many smaller buildings and numerous comfortable and substantial residences are being arranged for." A feature which strikes any observer is the substantial and handsome nature of most of the business buildings. It is also a matter of course that residences, both of the modest sort and not a few of a superior character, are going up. The people of the town believe in a great future for it.

* * *

LONDON AND LANCASHIRE LIFE.

A comparative statement of this company's business shows a steady increase for twenty years in new business, amount at risk, and invested funds. Its total funds now exceed two millions sterling, being practically doubled since 1884. Last year's underwriting showed a gain over the year before. In Canada, the amount of business written was $9,717,000, being the second in extent among the British companies operating here, and yielding premiums of $333,573. The London & Lancashire Life has between $1,400,000 and $1,500,000 invested in Canada in the shape of mortgages, real estate, loans on policies and deposits with the Government, so that its intention to lengthen its cords in this land is evident. The literature of the company lays stress upon the variety and attractiveness of its plans of assurance and the liberality of its policies. Its scheme of endowment assurance, it is claimed, is especially advantageous.

* * *

—The Montreal Cotton Company is still, it seems, in strong opposition to the idea of being "absorbed" by the Dominion Textile Company. A special meeting was held of the shareholders a day or two ago, and they listened to an address from Mr. S. H. Ewing strongly urging them to hold on to their stock. This, he said, was advisable on the ground of past, highly satisfactory experience, pecuniarily, and on the ground that for machinery and equipment and general standing their own mills could not be surpassed on the continent of America, and that, therefore, even should they want to sell out, they ought to be able to do so on much more advantageous terms than those now offered.

Debentures issued for 3 or 5 years. Debentures and interest can be collected at any agency of Molsons Bank without charge.
WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

Word came on Sunday last of the death of Captain Joseph Ritchie for many years commander of the Allan liner "Parisian," and commodore of the Allan line. He died in Rothesay, Isle of Bute. Captain Ritchie was 67 years of age. He had many friends all over Canada, and it is true that no more genial and kind-hearted captain ever commanded a steamship.

Mercantile Summary

The Hampden Court Apartment Company, Limited, will, it is announced, erect an apartment house in Montreal at a cost of $122,000.

The town of War Road, Minn., on the Canadian Northern, just across the border, was, on the 31st ult., almost wiped out by fire. The total loss is estimated at $200,000.

Negotiations are still being carried on between the Canadian Northern and Grand Trunk Pacific Railway Companies regarding the erection of a union depot in Winnipeg. The Northern Pacific is also said to be interested in the project.

Portage la Prairie, Man., will issue $10,000 worth of debentures to pay for the raising of the Crescent Lake bridge so as to allow of large launches passing under. The town will also spend $20,000 on improvements and additions to the local gaol.

"Standard Explosives, Limited," is the name of a recently incorporated company, with a capital of $300,000, which will manufacture chemicals and explosives, and develop electric power for such purpose. The chief place of business will be Montreal.

It is interesting to note that, in the view of a correspondent of the London (Eng.) Standard, residing in the Barbados, Canada is no mean competitor of the United States in everything that is being done to foster trade with the West Indies. Probably the main grievance at present is in his opinion that the line holding the subsidized contract between Canada and the West Indies is not using sufficiently large steamers to cope with the increasing freight requirements. No efforts have been made to place additional steamers on the route, and the result is that it is dangerous to accept from a firm offers for immediate delivery, as there is every possibility of the produce being shut out.

The Northern Aluminum Company, Shawinigan Falls, Que., is doubling the capacity of its works, in order to make provision for the manufacture of finished materials such as aluminum plates, rod and wire. The new buildings required, it is said, will cost between $200,000 and $300,000. These include an additional furnace room measuring 200 by 100 feet, a building to be used for wire mill, measuring 250 by 150, and an office building. In addition to these, the power house will be extended to a much larger capacity.——The Belgo-Pulp & Paper Company, at the same place, has recently increased its capital by $800,000. It purposes installing additional paper machines and a mill for the manufacture of sulphite pulp. At the Falls, several smaller industries are now springing up in addition. The St. Maurice Valley Railroad, which is to be built from Three Rivers to Shawinigan Falls, will, no doubt, give employment to a large number.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

An assignment has been made to J. S. Gould, of Smith's Falls, by H. G. Watkins, sawmill owner of Ardoch, Ont., who succeeded to the business of his father seven years ago.

The Carter White Lead Company, of Canada, Montreal; capital, $475,000, has been incorporated. It will build or purchase factories and warehouses for the manufacture and sale of lead products. P. M. Carter, of Montreal, is the leader in the enterprise.

The Canadian Shoe Machinery Co., Ltd., has received a Dominion charter. It will take over Ernest Carson's machine shop in Quebec City, including all patents for the manufacture of shoe machines controlled by him and to manufacture boots and shoes, and similar goods. The capital stock is placed at $500,000.

There has been this year a great increase in the building industry in Toronto. The amount spent in new buildings up to May 31st last is estimated at $3,191,118, compared with $1,525,063 in the same period of 1904. The number of permits issued up till May 31st this year was 914, against 706 last year. The number of new buildings erected was 1,078, compared with 526 last year.

The Canadian Pacific Railway has made several important changes in its time-table for the summer months. There will be two trains daily each way between Montreal and the Pacific Coast. Additional trains will be put on between Montreal and Quebec, Joliette and St. Gabriel. Between Montreal and Ottawa there will be seven trains each way every week-day. To Ste. Agathe and other Laurentian points there will be three trains each way.

Reports from Leamington, Ont., say the production of oil is steadily increasing. During May one hundred and eighteen tanks, averaging one hundred and fifty barrels each, were shipped from Leamington, a large increase over any preceding month. This does not include Blytheswood, Wheatley, or Comber shipments, which would increase the total very largely, an indication that the field is steadily improving. The big gushers are steadily flowing. The net proceeds from the sale of oil of one company alone during May are said to have amounted to $13,500.

The Public Works Department of the Dominion Government has made several important appointments lately. Mr. J. G. Sing, C.E., and engineer in charge of the public works of Canada in Western Ontario, comprising the harbors on Lakes Erie, Huron and St. Clair, also the Rivers Detroit, St. Clair, and Thames, has been appointed acting engineer in charge of the district of Eastern Ontario, which was up to the time of his death, in charge of the late Major Henry A. Gray, M. Inst. C.E. Mr. H. J. Lamb, C.E., has been appointed acting engineer in charge at London.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

The Western Fuel Company, of Victoria, B.C., have closed down No. 1 mine owing to unsettlement among the laborers.

C. D. Haines has at length succeeded in obtaining an independent entrance into Brantford for his proposed radial line from Hamilton, in spite of the opposition of the local street railway company.

In the matter of Gold Bros. & Cohen, clothing manufacturers, Montreal, whose embarrassment we recently noted, an offer has been made of 50 cents on the dollar, with secure payments in two and four months.

The assignment is reported of Hugh Morrison, general dealer at Fort Coulonge, Que. He has been unable to effect a settlement by way of compromise, and the estate is to be wound up by J. McD. Hains, accountant, Montreal.

J. B. Trahan, dry goods retailer in Montreal, has assigned as tutor to the estate of his late wife. He himself failed in 1903 with liabilities of $28,000, and being unable to effect a settlement he resumed business in the name of his wife, who has since died.

About a year ago J. S. Kennedy started in the drug business at Avonmore, Ont. He had previously been a clerk at Bobcaygeon, in the same province, and had also some experience as a clerk in Toronto. He has now assigned to O. Fulton.

Through their attorney, T. J. Gallagher & Co, dealing in hats, men's furnishings, etc., at Moncton, N.B., propose a compromise arrangement at the rate of 33 1-3 cents on the dollar, their liabilities being reported at about $8,000. Gallagher has only been a short time in business, and previously was a traveller in the oil trade.——At Petitcodiac, in the same province, an assignment has been made by D. L. Trites, victualler. He is an elderly man who has been long in business, but his habits are reported to have militated against his success.

A winding-up order has been issued in the matter of the Laurie Engine Co., Limited, Montreal, and a meeting of shareholders and creditors is called for the 14th inst., to appoint a liquidator. The company was incorporated in June, 1894, with an authorized capital of $250,000, to take over the business previously carried on by the firm of Laurie Bros. There was not any great amount of cash capital then contributed, and though the business has been an active one, the earnings have always gone into plant extension, and they have nearly always shown more or less strain in the conduct of their finances. Recently a syndicate of the principal shareholders endeavored to effect a re-organization, offering to buy out the general shareholders at a figure, and put in a certain amount of fresh capital, but this scheme has apparently fallen through, and liquidation will follow.

PORT ARTHUR & FORT WILLIAM.
Post Office ddress, — — Port Arthur, Ont.

Mercantile Summary.

W. C. Crawford's handle factory, the mainstay of Tilbury Village, Ont., was last week badly damaged by fire, which, however, is covered by insurance.

The Dominion Department of Public Works has awarded the contracts for the dredging of the harbors of Port Arthur and Fort William to A. F. Bowman, of Southampton, the price being 14c. per cubic yard at Port Arthur, and 12c. at Fort William.

Mr. A. P. Cockburn, secretary of the Muskoka Lakes Navigation and Hotel Company, Limited, died suddenly last week of heart failure. Mr. Cockburn had led a busy life. He did probably more for the development of the Muskoka region than any other man. He was 68 years of age.

The H. Corby Distillery Company, Limited, capital stock $1,500,000, has been granted a charter by the Dominion Government. It will purchase the property now carried on by Henry Corby at Corbyville, Ont., and will do a general business as distillers, brewers, maltsters, millers, farmers, dealers in wines and alcoholic liquors, also will build grain elevators, etc.

The Montreal Canning & Preserving Co., Limited, incorporated in 1900, under a Provincial charter, authorizing a capitalization of $10,000, is in trouble, and a meeting is called for the purpose of appointing a liquidator. The company has apparently suffered all along from an insufficiency of capital, and a few months ago they were before the courts on a charge of using material unfit for consumption in the preparation of their goods, which naturally affected their business very seriously.

In last issue we referred to the embarrassment of Carl Shiller, a Montreal jobber of dry goods, etc. Since then he has consented to assign, followed by a proposition to pay his creditors 40 cents in the dollar. A statement of his affairs now submitted to creditors shows liabilities of $45,000, as against assets of $39,700. Seeing that he claimed a surplus of $28,000 odd in February last, explanations as to the great discrepancy now shown would be interesting.

The Geo. B. Meadows, Wire, Iron & Brass Works Co., of Toronto, has purchased land on Wellington Place, corner of Draper St., on which they are erecting a new factory designed especially for their line of work. The plot of land is 90 by 140 feet, and the factory now being erected will be 120 by about 40 ft. There are to be four stories. This move has been made necessary by the expansion of the business. The new location is in the very heart of Toronto's new manufacturing district. Needless to say, the factory will represent the latest so far as construction and machinery are concerned, and we congratulate the company upon being in that happy condition which warrants this step being taken.

Mercantile Summary.

A company has been incorporated under the name of the Consolidated Crossin Piano Co., to take over the Crossin Piano Company, Toronto, of political fame. The new concern will have a capital of $100,000.

The directors of the Hampton and St. Martin's Railway Co., who have a line which does service for the valuable gypsum properties in its neighborhood, met last week and discussed a scheme for extending and improving it.

The Minister-Myles Shoe Co., Ltd., Toronto, has been incorporated, with a capital stock of $100,000. It will manufacture, buy and sell, boots, shoes, rubbers, moccasins, and leather goods. Alfred and R. E. Minister, and Robt. Myles, all of Toronto, are named as provisional directors.

We have received from Quebec a small pamphlet, entitled "Handy Information Book." It is published by Robt. Borland & Co., coal merchants of that city, and contains a fair amount of useful information, some of which should interest business men, and especially householders who use coal.

The city council of Ottawa finally passed a recommendation to ask the Legislature for power to grant exemption to an extent not exceeding two-thirds of the investment in the case of any new industry expending $100,000 or more upon land and buildings, and impose a fixed assessment for a term of years of one-third the total value of any company or individual undertaking the erection of an hotel to cost approximately $1,000,000.

It would appear from the following figures prepared by the Rev. Dr. Chas. A. Eaton, that Canada is really one of the most temperate countries in the world. The consumption of alcoholic spirits (in English gallons) per head for the year, for the following countries was: Belgium, 2.81; France, 2.72; Italy, 2.40; Western Australia, 2.27; Germany, 2.09; United Kingdom, 2.05; United States, 1.16; Victoria, 1.16; Queensland, 1.04; Cape Colony, .95; New South Wales, .90; New Zealand, .73; Russia, .60; Tasmania, .55; Canada, .54.

A prominent citizen and business man was lost to Montreal a few days ago, in the person of M. E. L. Morin, who died at the age of 75. M. Morin at an early age engaged in the butter and cheese commission business, in which he was successful. He also founded in 1871, "Le Journal Negociant Canadien." He was an active member of the Montreal Board of Trade, also of the Corn Exchange Association, and of the Chambre de Commerce, and represented the last-named at the Congress of Chambers of Commerce of the Empire. M. Morin was also the author of considerable literary work, writing more particularly on subjects belonging to political economy.

TENDERS FOR DEBENTURES.

Sealed tenders will be received by the undersigned up to June 20th, 1905, for the purchase of the following debentures:

$118,500 Debentures of the Town of Gananoque, payable 1st June, 1933, bearing interest at the rate of 4 per cent. per annum, payable half-yearly, on December 1st and June 1st, with coupons attached, at the office of the Town Treasurer, and principal also payable at same place at the end of 28 years.

Debentures delivered at Gananoque. For further information write to

FREEMAN BRITTON, or S. McCAMMON,
Treasurer. Clerk.

Dated at Gananoque, 18th day of May, 1905.
W. J. WILSON, Chairman Finance Committee.

TENDERS

$100,000—School District of Winnipeg—Debentures for Sale.

Sealed tenders addressed to the secretary-treasurer of the Winnipeg Public School Board and marked "Tender for School Debentures" will be received up to 12 o'clock noon, on Tuesday, 27th of June, 1905, for the purchase of $100,000 of debentures of the School District of Winnipeg No. 1, payable at the expiration of 30 years, with interest from the 1st of August, 1905, at the rate of four per centum per annum.

Principal and interest payable at the office of the Winnipeg Public School Board, or at any chartered bank in Winnipeg.

Delivery to be made and money to be made at Winnipeg. Payment to be made in gold or its equivalent.

The highest or any tender not necessarily accepted.

Any information desired may be obtained by addressing the Secretary-Treasurer.

STEWART MULVEY,
Secretary-Treasurer Winnipeg Public School Board.
F. C. HUBBARD,
Chairman Finance Committee.

The Imperial Cement Co., Limited, has received authorization from the Ontario Government to increase its capital stock to $300,000.

A despatch from New York, dated 25th May, said that the steel rail pool in which combination six of the largest rail mills of the country were to be found, and which made prices and allotted tonnage, had been officially dissolved. The dissolution is likely to have very little bearing upon prices of steel rails for several months at least, as the tonnage of the mills for the entire year has been allotted, and any reduction in price of new business would mean a corresponding reduction on the old contracts. It is not reasonable to believe, therefore, that reduction in prices for early delivery will follow the formal or nominal termination of the agreement.

Mercantile Summary.

Southampton, Ont., ratepayers have voted for a by-law to spend $4,000, chiefly for the extension of the waterworks system.

Permits have been issued in Montreal for the erection of the Montreal Steel Works building, and of one to contain an electrical transformer and distributor for the Montreal Light, Heat and Power Company.

Galt is considering the proposition of its local gas company to sell out its plant to the town. Heretofore the company has refused to entertain the idea, but a short while ago a Detroit syndicate appeared on the scene and, if report be true, the one in possession feared competition.

Repairs on the Dominion Iron and Steel Company's blooming mill, which caused it to be idle for two or three weeks, have been successfully completed. The whole manufacturing part of the plant is again in operation. The company propose to build fifty new coke ovens.

– The Mexican Light and Power Company, a company controlled by Canadian capitalists has, says a despatch from Mexico City, dated 6th inst., purchased all the light and power plants in the city. The amount paid to the Mexican Gas and Electric Company, one of the companies purchased, is said to have been $5,000,000.

A report by the Dominion Marine Department states that there are now on the Canadian register 5,152 vessels; with a total tonnage of 672,838, as compared with 7,020 vessels, measuring 683,147 tonnage last year. New vessels built in the several provinces during the year were:—Ontario, 105 vessels, 5,167 tons; New Brunswick, 25 vessels, 1,306 tons; Nova Scotia, 99 vessels, 15,993 tons; Quebec, 20 vessels, 3,203 tons; Prince Edward Island, 2 vessels, 185 tons; British Columbia, 48 vessels, 2,362 tons; Manitoba, 9 vessels, 328 tons. The total number of new vessels built and registered last year was 308, measuring 18,554 tons register tonnage.

The project of a ship canal from Georgian Bay to Toronto is again on the tapis. Mr. H. C. Spalding addressed York County council on the subject a few days ago. His proposition is to build a ship canal from a point on Georgian Bay near Victoria Harbor across to Lake Simcoe. The vessels could then use this lake to a second canal which would utilize the channel of the Humber River and terminate in Humber Bay. The rise of 131 feet from Georgian Bay and the drop of nearly 600 feet from the height of land to Lake Ontario he would overcome, not by a costly system of locks, but by a system of portages which would reduce the cost from $60,000,000 to about $35,000,000 and three-fifths of the time of locking would be economized.

– At the annual meeting of the Montreal Light, Heat, and Power Co., on Friday last, it was announced by the president, Mr. Holt, that it was the intention of the directors to reduce the price of these commodities as soon as possible. Referring to the reports frequently made, that the price of gas in Montreal should be as cheap as in other cities, he insisted that each city and each company had to be considered by itself. The only city on the continent that might be compared with Montreal, he said, was St. Paul, Minn. Most frequent mention was made of Toronto, and Mr. Holt stated the coal secured in Toronto was able to turn out close to 11,000 cubic feet of gas, and to secure this kind of coal in Montreal would cost $1.40 more a ton than it did laid down in Toronto. The company has a plan to convert all its coke, of which it makes some $200,000 each year into briquettes, and it will erect a plant for this purpose at a cost of $20,000. The old board of directors was re-elected. After the meeting of the shareholders the directors met and re-elected Mr. H. S. Holt president. Mr. W. McLea Walbank was re-elected first vice-president, and Mr. R. Forget, second vice-president. Mr. J. S. Norris was appointed secretary pro. tem., vice, Mr. H. H. Henshaw, resigned.

SWEET CAPORAL
CIGARETTES
STANDARD OF THE WORLD
SOLD BY ALL LEADING WHOLESALE HOUSES.

TORONTO MARKETS.

Toronto, June 8th, 1905.

Chemicals and Drugs.—For the most part trade in drugs is good, or at any rate up to the average, and prices retain their steady tone. Quinine is a little easier, and sellers are in some cases giving concessions. Opium on the other hand has strengthened its position somewhat. Camphor and blue vitrol are easier, while Jamaica ginger and carbolic acid are firmer. Ipecacuanha and menthol are still low. The agreement as to prices of alkali and chloride of lime, etc., expires at the end of the present year, and much interest is felt in the prices which will be made after that.

Dry Goods.—Stock-taking is on in some of the local dry goods houses, and trade is on the quiet side. This applies more particularly to the sorting trade in light summer goods, and may be remedied with warmer and more seasonable weather. Carpets, curtains, and other furnishings have been moving out even more quickly than usual. Wholesalers are paying attention now to fall goods, and the prospects seem to show forth a good season's trade. Prices for all staple lines continue quite firm. In some kinds of woolens, such as mohairs, alpacas and lustres, an advance of about 7½ per cent. was recently made. Several lines of hose and drawers have gone up.

Flour and Grain.—A distinctly better tone to the market, so far as flour is concerned, has been visible this week, Ninety per cent patents continue to sell at $4.40 or $4.45 in buyers' bags, but the tendency is towards a somewhat higher level. With the decreasing demand for millfeed weakening prices are to be noted. Trade in wheat is still of a somewhat restricted character, but it seems to be improving. Prices are unchanged from last week's. Barley has declined 1 to 2c., and oats have gone up 2c.

Groceries.—Sugars are experiencing a very weak market, the effect of over-speculation now being felt in full measure. All grades declined a few days ago, and still others are not entirely unexpected. In general grocery lines there is not any particular improvement in the demand, though the quietness is not causing anxiety. In canned goods the position is still strong, and particularly so in tomatoes, owing to the scarcity. In prunes and dried fruits there are no special features. Teas are in very moderate demand, coffees somewhat better. Payments are about in accordance with expectations.

Hides and Skins.—An advance has taken place in hides, and an altogether better tone prevails in the market. Leather men also speak of improved prospects, though prices for many reasons remain somewhat unsettled.

Fruits and Vegetables.—Strawberries are becoming more plentiful, also spinach, cabbage, and similar vegetables. Oranges are not very abundant, but sell fairly well.

Live Stock.—At the cattle market this week, values were easier, with somewhat large supplies of animals compared with the demand. Some extra choice exporters sold up to last week's quotations, but the general tendency was easier. Trade for butchers' was slow and, except for very good grades, prices were a little lower. The demand for stockers and feeders was not active, but every thing sold eventually. Quotations for milch cows are unchanged at $30 to $60. Prices for calves were a little easier at 3½ to 6c. per pound. Sheep and spring lambs were lower in price.

Provisions.—The prices for butter continue quite strong, especially for tubs. New cheese fetches 9¾ to 10¼c., while old is out of the market. The quality of the eggs coming in now is hardly so good as it was, but the demand is steady and the price is quite firm around 16c. Live hogs have advanced 15c. per cwt., and smoked meats keep quite firm in sympathy.

A. C. C. DINNICK, Managing Director.

Wool.—More new clip is now coming forward, but it does not look as if there will be any great increase in the crop. Prices are about as before.

* * *

MONTREAL MARKETS.

Montreal, June 7th, 1905.

Ashes.—The market is without change of any kind. The volume of passing business is very light, with values maintained at about $5.50 for pots of first quality; seconds, $4.95 to $5; pearls, $7 to $7.25.

Dairy Products.—Cheese shipments last week were nearly 10,000 boxes ahead of the same period of 1904, the figures being 58,583 boxes, and the total at date is 160,513 boxes, as against 151,498 boxes a year ago. Butter exports are also showing up well, 8,008 packages going to Britain last week as against 6,121 for the same week last year. Yesterday's Liverpool cable shows some decline in cheese quotations, but local values are fairly steady at 9⅜ to 9½c. for fine Ontario makes, and 9⅛ to 9¼c. for Quebecs. The receipts of new grass butter have been pretty liberal, and there has been some easing off from the high prices of a week ago; we quote about 19½c. for choicest creamery, and 19 to 19¾c. for good to fine.

Dry Goods.—Wholesale business is of a between-season character, and retail trade in the city is not what it should be at this season, but collections on the whole may be called fair. Cables to hand from Britain report an advance in Bradford dress goods, etc., of a full 5 per cent. In domestic cottons and woolens no changes are reported.

Tenders for Government of British Columbia 3½ per Cent. Debentures.

Tenders will be received up to the 15th of June, 1905, for the purchase of $365,000 Government of British Columbia Dyking Debentures, in denominations of $1,000, issued under the authority of the "Dyking Assessments Adjustment Act, 1905," bearing interest at the rate of 3½ per cent. per annum, payable half-yearly at the Government Treasury, Victoria, on the 1st of January and 1st of July in each year; the principal redeemable in thirty-two years from the 1st of July, 1905.

Tenders to state the price net, the amount to be deposited at the Canadian Bank of Commerce, Victoria, on the 30th of June, 1905.

Tenders to be addressed to the Honourable the Minister of Finance, Victoria. Right of acceptance of any tender reserved.

May 5, 1905.

AGENCIES THROUGHOUT CANADA.

Groceries.—About the only feature of interest in this line is the further decline of 10c. a cental in refined sugars, making the present factory figure for standard granulated, $5.15 in bbls., and in bags, $5.10; No. 1 yellow, $4.65, with a range up to $5 for bright coffee. The demand from jobbers is reported a good deal more active than it has been. A first cargo of new molasses is now in the harbor, but the movement in this line is slow, at 38c. in a jobbing way. Some lots of early picked Japan teas have been received, and sales of a few packages of fancy are reported at 36 and 29c. Some samples at about 22c. are now being shown. The quality of the first crop is reported excellent, but the yield is short.

Hides.—Owing to the light supplies now offering of beef hides the market shows a firmer tendency, and 10c. is the figure generally offered for No. 1 by dealers, tanners being quoted an advance of from half a cent to one cent. Calfskins are steady at 15c. for No. 1, and 13c. for No. 2; lambskins, 25c. each.

Metals and Hardware.—The general situation in these lines is just about as reported last week, there being really no noteworthy changes in quotations. It is expected that the existing fair demand for structural iron, builders' hardware, etc., will be pretty well sustained throughout the summer, owing to the activity in building operations.

Oils, Paints, and Glass.—The demand in these lines is still quite well maintained, but is expected to fall off as the month advances. The stiff advance in turpentine to $1.05 is fully maintained, and there has been some talk of $1.07, but no further definite advance has yet been announced, though some profess to expect it to reach $1.10 shortly. Linseed oil is steady at 53 and 56c. for raw and boiled respectively. Fish oils rule very dull, being largely displaced by mineral oil. There is practically no supply of new seal oil here; the catch has been small, and 55c. would be quoted for small lots of steam refined; cod oil, about 40c.; castor oil, 7½ to 8½c., as to quality and lot. Leads remain at former figures, and no immediate change is looked for unless the Government decides to protect the corroding works being established here. Glass stocks are low, but some fair supplies are now afloat for this market.

Wool.—British advices indicate a pretty strong market, but local dealers report millmen as placing very light orders. In Capes the lowest quotation is 18½c., with a range up to 23c.; Chilean merinos, which are largely displacing Capes, are quoted at 14¾ to 16½c.; fine washed B.A. is held at 44c.; Canadian pulled, 30c. For new clip of North-West operators in that district are quoting 16 to 16½c., as compared with 13 to 14c. last year.

⁂

RAILWAY FREIGHT RATES.

The enormous difficulty of framing freight rates on railways in a country as large and varied as the United States is the subject of a recent paper in the Springfield Republican. Take the statistics alone: The internal commerce of that country for the last year has been estimated at $22,000,000,000. According to the report of the inter-state commerce commission for 1904 the gross earnings of the railways for the year were $1,966,-

One Reason Why

In calculating the Death Losses in the Manufacturers Life during 1904, special allowance was made for the light mortality to be expected during the years immediately following the issue of policies.

Even on this basis the loss amounted to only 61.47 per cent. of what the select mortality tables provide for.

This is another example of the care exercised by this Company, and one reason why it gives such magnificent results to its Policy-holders.

Write for rates to any of the Company's Agents, or to

THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST.

DEBENTURES.

SEALED TENDERS, marked "Tenders for Debentures," addressed to John Smithers, Town Clerk, Moosomin, will be received up to and inclusive of June 10th, 1905, for the purchase of Debentures of the town of Moosomin, issued in pursuance of By-law in that behalf, authorizing the raising of $38,500, for the purpose of erecting a Town Hall and Fire Hall, combined, $23,000; drainage, $5,000; purchasing of fire apparatus, $7,000; paying up floating debt, $3,500.

Said Debentures bearing interest at the rate of 5 per cent. per annum, and repayable in 20 equal, consecutive annual instalments.

A GOOD POLICY

for policyholders is the 20 pay life guaranteed option policy issued by

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

In this style of policy the Benefits conferred and the Premium rates charged are more liberal than those in any similar policy issued by other companies.

Be sure to examine it before insuring elsewhere.

the far West; his table is made of lumber which may have been brought from Maine or California and manufactured in Connecticut; his sugar is drawn from Louisiana; his bread is made from flour ground in Minneapolis from wheat grown in the Dakotas; his beef is raised in Texas and slaughtered in Chicago; his bacon was cured in San Francisco or Omaha; the milk he drinks is brought possibly from 200 miles up the State; the eggs he eats may have been laid in Iowa, and his fruit dish may display at once the product of Jersey, Florida and California. What innumerable freight problems have gone toward producing for us even a simple repast! What a factor the rate is upon our very table. And it is woven in the very clothes we wear. The working man in New York is clothed in wool from Montana, or cotton from Texas, woven into fabrics in the factories of Connecticut.

A slight change in rates is productive of consequences which might be termed colossal. According to President Mellen of the New York, New Haven and Hartford Railway, any one of the big railways of the country spends more money each year in the adjustment of freight rates than the entire expense of the inter-state commerce commission. A change in its freight rates of only one per cent. per hundred pounds costs the New Haven Railway $11,000 to prepare new schedules. President Lucius Tuttle of the Boston and Maine recently showed, in a speech to the brotherhood of locomotive engineers, that the average freight rate received by all railways in 1893 was 8.93 mills per ton per mile, while in 1903 the rate was 7.81 mills. This reduction of 1.12 mills in the average freight rates amounts in a year to $191,000,000. President Tuttle gave a further illustration of the large consequences of a slight change in the rate. He recalled that in 1903 the employees demanded and received an increase in the wage schedule amounting in all to $800,000. He said: "For that same year the company fortunately received an increased average rate of .47 of one mill a ton a mile upon its total freight movement, a sum in itself wholly insignificant and inconsequential, but which, when averaged over the year's freight tonnage, became a balance of nearly $800,000, an amount almost sufficient to make good the year's wage increase."

* * *

Lewis and Clark were the first Americans who crossed the continent to the Oregon Country and the Pacific Ocean. To commemorate this event the Lewis & Clark centennial exposition will be opened from June to October. It is the first exhibition of any size that has been held so far west for many years, and many people are taking advantage of seeing the coast and exposition on the same trip. This is made possible through a tour which the Grand Trunk is running, which leaves Toronto July 6th. The route will be via Chicago, Denver, and Garden of the Gods. For $160.50 this trip can be taken, which price includes sleeping-cars, meals in dining-car, hotels and side trips.

TANNERY FOR SALE.

The Tannery, known as the Beaver Tannery, in the Town of Aurora, in good repair; capacity, 600 sides per week; equipped with latest machinery and in good order. For further particulars apply to the Daville Tannery, Aurora, or P.O. Box 128, Aurora, Ont.

* * *

The Windsor & Tecumseh Electric Railway is to be equipped with 300-K.W. 3,300 volt Westinghouse single phase engine type generators direct coupled to Robb-Armstrong engines, and its car equipments are to consist of 2 50-h.p. Westinghouse single phase motors each. This is said to be the first single phase road in Canada.

* * *

The Chatham, Wallaceburg and Lake Erie Railway Company is building a new electric line from Chatham to Wallaceburg, Ont., a distance of about 20 miles, through a rich farming and fruit-raising country. An order for four double equipments and one quadruple equipment of 101 railway motors has been placed with the Canadian Westinghouse Company, Limited.

"The Unexpected Always Happens."

Who is there but has had brought home to him the truth of the above statement? It is always the accident that was least looked for that actually does occur. Nobody is immune from accident. Your experience and observation confirm that fact.

WISE men prepare for such emergencies by carrying an accident policy. The WISEST men see to it that that policy is an Employers' Liability Combination Policy, issued by

BRANCH BANKS AND WESTERN DEVELOPMENT.

The wonderful development of the Canadian North-West during the past few years may be said to be the cynosure not only of this continent, but of nearly all Europe as well. One feature of this development which strikes the eye, and which differentiates it from that of the Western States has been its great steadiness. True, Winnipeg has had its set-back—a few years ago—but since this western growth really began in earnest, there has been no violent alternation of up and down, no wonderful increase of prosperity and business, followed by corresponding deeps of stagnation. The growth has been rapid, but sure, and the rate of progression seems to be increasing in momentum as each year goes by.

There can be little doubt that much of this highly satisfactory state of things, from which not only the West, but the East almost equally is bound to profit abundantly, is due to the admirable system which we possess in Canada of branch banks. To them probably more than to any other cause is due the combination of capital with opportunity whenever the latter calls for the former. In this way, the development of the country, of its farming resources, of trading facilities, and so forth, has not had to lag behind on account of lack of available funds.

Many conservative thinkers are apt at times to fear that the practice of establishing branch banks at every little town in the Dominion, is being overdone. Perhaps there are cases in which it has been, and perhaps branch offices have been placed in a field where nothing but over-competition could be expected for the small amount of business offering. But, while admitting this, never let it be forgotten that it is to these local banks—of which we may mention that at the present time, including the head-offices, there are no fewer than 1,206,—connected branches of the head institutions a thousand miles away—that Canada, and particularly Western Canada, owes much of the plain sailing she has enjoyed of recent years.

Political economists tell us that fluidity of capital is a great factor in prosperous conditions. In favor of the system of branch banking such as we have in Canada, and against the system that is in operation in the United States, is the fact that it provides for this fluidity, or easy flow of capital into the sections where it is most needed, and at the slightest cost of interference with a stable market. In the eastern provinces, that is to say, in many parts of them, industry and business are quiet, and capital, being superabundant, finds difficulty in finding profitable openings for employment. In the West, the reverse condition is the fact; lands are setting up rapidly, industries starting on every hand; the only thing needed is capital, and that is precisely what the East has to spare. Nothing is more easy, nor in its working more simple, than to transfer from the superabundance of the older provinces to the needs of the new ones. That is to say, nothing is simpler, providing the circulation of money is so elastic as it is in Canada, and providing that the banking system is so wisely framed as to admit of this being done without undue interference with the needs, even though they be admittedly lesser ones, of the districts from which comes the abundance. That this can be and has been done must be placed to the credit of our Canadian branch banking system, together with the fact that interest charges in the West and the East show no such wide discrepancies as might prevail under other conditions.

We have heard the objection raised against the Canadian system, or rather in favor of the American system, that the manager of an individual bank in the States is more likely to take a keen personal interest in the progress of his own town than is the case with a manager of a local Canadian branch bank, who may at any time be removed to some other sphere. There is a certain amount of truth in this contention, though there are dozens of noteworthy cases to prove the contrary. One great and lasting advantage, however, the Canadian town does have, compared with its compeer across the line, and that is that its local bank gives it practically equal banking facilities with those of the largest cities. In the United States, in a time of depression, a panic may seize a particular section and its bank is the first institution to feel the effect. In a Canadian town, on the other hand, the branch bank is but one of a dozen or a hundred ramifications from a central head, and each and every one supports the others, thus rendering them all practically invulnerable.

There can be little doubt that Western Canada owes a great deal to this system, which permits for the benefit of its small communities all the virtues of the individual bank with the added advantage of the support of a guaranteed national institution. Another thing which may be noted in favor of our Canadian branch system is the facilities it offers to immigrants, who in the case of a country enjoying the present circumstances of Western Canada, are a class of the community extremely well worthy of consideration. The newly arrived from Britain and elsewhere find all the facilities for doing their banking business already provided for, so that they do not have to suffer the inconvenience and delay in these matters generally incidental to the development of new countries.

* * *

SHOE AND LEATHER TRADE.

Since the opening of navigation, business has been distinctly brisker in the boot and shoe trade. At the same time there is a general feeling that the demand is scarcely as large as might have been expected under the conditions prevailing. Part of this may rightly be attributed, no doubt, to the backwardness of the season which has caused dealers to be slow about stocking up in any quantity.

As to prices, considerable uncertainty would appear still to exist. Many of the manufacturers raised their prices, as we have before announced, but in some cases, the jobbers have not followed suit. The manufacturers were, without a doubt, warranted in their course of action, being supported by the continued increase in the prices of raw material and of labor, and it is a little difficult to understand why jobbers have continued to sell at the old rates, which must be unprofitable.

Manufacturers report, generally speaking, satisfactory conditions for their business throughout the country, in spite of the poor start of the summer season. Many of them are now fully engaged on fall orders. An improved demand is reported from the West, though it will be unwise to face the danger there of over-stocking.

The state of the leather market is still unsettled. Tanners report the prospects good, and they have been making desultory endeavors to raise the range of prices, but they have taken no really concerted action. However, there is no probability of there being any decline in prices, and the indications point to a rise before very long. This would be warranted by the state of the hide market, prices in which have advanced recently owing to scarcity. The tanners have found difficulty in some cases in obtaining required supplies.

As to conditions abroad, the leather and hide trade in England is reported to be moving briskly. In Chicago a report comes that the western shoe factories are not cutting or purchasing large supplies of tanned stock at present, and a large proportion of such leather as is now going forward applies on old orders. In this connection some tanners of collar leather and calf shoe leathers report a difficulty making shipments as contracted for June 1st delivery. Heavy leathers of nearly all description rule firm at the advanced quotations established, and tanners in these lines are apparently experiencing less difficulty maintaining quotations than encountered by sellers of lighter stock.

* * *

INVESTMENTS OF CANADIAN LIFE INSURANCE COMPANIES.

What has happened and is happening in regard to the unfortunate Equitable Life has made some timid people apprehensive of what, *they* claim, may happen to any of our own companies. Life insurance funds, of course, must be looked on as among the most sacred of trusts, to be used, and used only, with the strictest regard for the welfare of people who are otherwise oftentimes practically helpless. That, therefore, the use of them should be absolutely above suspicion is a necessity both for the very existence of the companies and for the welfare of the community at large. In this we believe as fervently as any of the timid ones to whom we have referred, but at the same time we have to disagree *in toto* from the conclusions they seem to have arrived at. With one's premises at fault, as without a doubt those of these persons are, it is easy to arrive at wrong deductions.

One correspondent of a daily paper starts out with the contention that in many cases,—he does not specifically mention in this country, but that is the inference—life insurance funds are being manipulated in such a manner as can only be for the selfish interests of their so-called guardians. And he goes on in the endeavor to make out a case for the Government control and operation of life insurance.

Now, while no one will dissent from the view this correspondent takes as to the necessity for the life insurance business being conducted in such a way as will bring its protection and untold benefits to the largest number of people at the least possible cost, and will do this safely, we do not believe that Government ownership is the means through which it can be accomplished satisfactorily.

In the first place, there is politics to be considered. Think of the thousands of agents and of the doctors! In whatever way the question is looked at, no ray of light makes its appearance to dispel the doubts which assail one, with such a contingency in sight. However honest in intention may be the Government in power, can there be any tittle of doubt as to the results of such an addition to the great army of office seekers? Again, as to the question of expense, why should it be imagined that the Government would be able to secure the services of agents at a cheaper rate than the companies?

Coming down to actual accomplished facts, how do systems of Government insurance work in actual practice whenever they are tried. In New Zealand, it is said to work well, but New Zealand is the acknowledged Utopia of government control, and even there in that favored country to the story of most of the Government utilities, there is usually another and less favorable side. In the Dominion civil service, there is in operation a Government system for insurance. But we understand that only a small proportion of those for whom it was intended take advantage of it, though the rates are extremely low. The business of life insurance has to be pushed just as any other business has to be. In England, again, there is a Government system of life insurance. No agents are employed, and each person desiring to be insured has to apply voluntarily. The results, however, as might be expected, are very meagre.

Let us consider, however, at close quarters another of the points referred to by the above-named correspondent. He must be under a misapprehension as to the safeguarding of the funds of Canadian companies, or he would realize that their investments are regulated by the Dominion Insurance Act, which stipulates as to the class of securities which may be invested in, these securities being investigated every year by the Superintendent of Insurance. The charters of most of our Canadian companies provide that ninety per cent. of the net profits must be paid to policyholders, shareholders only getting 10 per cent.

We might easily go at great length into reasons why the correspondent's fears are at variance with the true facts of the case, but the above will suffice to show wherein they are needless.

* * *

MINERAL PRODUCTION OF BRITISH COLUMBIA.

The annual report of the Minister of Mines of British Columbia for the year 1904, which we have just received, shows on the whole satisfactory results for the year's operations. The gross value of the year's output was $18,977,359, compared with $14,811,405 in 1903, or an increase of about 8½ per cent. Analysis of the returns from all sections of the Province shows that the increase has been by no means general. The placer gold output shows an increase of $44,880, which is mainly attributable to one district, Atlin, the other districts only about holding their own; while in those districts where the placer gold is obtained from the river bars, exposed only at lowest water, there is this year a marked falling off in production, since the spring opened up early and the gradual melting of the snow in the mountains prevented any extremes of high or low water, so that the bars were not exposed and, therefore, could not be worked. The districts showing an increased output this year, named in order of precedence, were East Kootenay, the Boundary, the Coast, and the Slocan, while the greatest decrease was in the Rossland camp, this being accounted for by changes in the management of some of the producing companies, and by experiments as to the best methods of treatment of the low-grade ores of the camp being conducted; these temporarily retarded the output.

The tonnage of ore actually being mined in the province has perhaps, it is explained, a more direct bearing upon the general business prosperity of the local community than have the values produced, inasmuch as it represents the amount of work actually taking place, and in this respect the year 1904 shows a very greatly increased output of ore, amounting to 1,461,609 tons, an increase over the preceding year of 175,433 tons, or nearly 14 per cent. This increase was made chiefly by the Boundary, East Kootenay and Slocan districts, and not only have they made the increase shown, but they have also offset decreases in certain other districts.

It must be remembered that the tonnage of ore mined in 1903, than which that of 1904 is greater by 14 per cent., was itself greater than that of the preceding year (1902) by about 29 per cent., so that, looking back two years, we find the present tonnage output has increased in these two years about 46 per cent., a very satisfactory result.

Coal is taking a more and more prominent position in the list of British Columbia mineral industries. The chief producing collieries of the province are located on Vancouver Island and on the western slope of the Rockies, near Crow's Nest Pass, in the extreme south-eastern portion of the Province. The former are operated by two companies, the Western Fuel Co., at Nanaimo, and the Wellington Colliery Co., at Ladysmith and Union (Comox), while the eastern collieries are all operated by one company, the Crow's Nest Pass Coal Co. The gross output of coal from all mines was 1,685,698 tons, of which 1,071,337 tons were sold as coal, 159,651 tons were used under companies' boilers, etc., 432,070 tons were used in making coke, and 22,640 tons were added to stock piles. The amount of coke produced was 238,428 tons, of which 229,618 tons were sold, and 8,810 added to stock.

The production of placer gold in the province last year totalled a value of $1,115,300, an increase of 5 per cent. over the year previous, owing to good conditions in the Atlin. It is disappointing to learn that dredging operations were not so far a great success, on account of mechanical difficulties. The greater part of the gold obtained from lode mining in British Columbia is found in connection with other metals and only separated or collected by smelting, probably not 5 per cent. of the product being obtained from stamp mills. The lode gold product for 1904 was $4,589,608, and was $223,008 less than in 1903, due to the diminished output of the Rossland and Nelson districts. In the Nelson Mining Division there has been less ore mined and the values per ton were, on the average, lower. In the Boundary District the tonnage of ore mined has increased about 30 per cent., and the gross gold contents is this year about 10 per cent greater than it was the previous year. In the Coast District the tonnage of gold-bearing ore has been 20 per cent. less than the previous year, yet, for all that, the gold contents show an increase of about 8 per cent.

The total silver production for the past year was 3,222,481 ounces, valued at $1,719,516. About 50 per cent. of this production comes from the Slocan District. This output is 226,277 ounces greater than was made in 1903,—and is chiefly attributable to the re-opening of the St. Eugene mine, in East Kootenay, as a direct result of the bounty on lead mined, offered by the Dominion Government.

There was a further advance made in the production of copper, the output for the year being 35,710,128 lbs., valued at $4,578,037, an increase of about 4 per cent. over the preceding year, which makes this output of copper the greatest ever made by the province.

* * *

Stockholders of the Bank of New Brunswick have received word that the customary half-yearly dividend of 6 per cent. will be payable after July 10th next. The bank is preparing to open an agency in Trinidad at an early date.

FIRE IN WINNIPEG.

Fire underwriters are feeling a little "blue" owing to Tuesday's fire in Winnipeg, when the Scott Furniture Company's fine new seven-storeyed warehouse on Main Street was struck by lightning and destroyed in the ensuing fire, at a heavy loss, variously estimated at from $50,000 to $100,000 for the building, and $100,000 or more for the contents. It is not so much the mere loss that insurance men grumble at, as the alleged clear evidence presented by the fire of the total inadequacy of the fire-fighting equipment of the city to cope with any serious conflagration under the circumstances that prevailed. In the first place, the firemen could do no effectual work beyond the fourth story, which shows how strong is the need for a higher pressure of water. This need not receive, however, more than casual mention, as it is a lack which very fortunately is to be remedied shortly. Another cause for the headway which the fire gained was, we are told, that the attempt to erect the water-tower failed, owing to the network of wires overhead. On several accounts, it is said, the arrangements for checking the spread or the intensity of the fire, were ineffectual. No wonder then that fire insurance men, who have the future to provide for as well as the present, feel a little depressed at the prospects.

⁂

THE WEST INDIAN QUESTION.

We would be very glad to see some good come of the interest displayed in West Indian matters by the Dominion Parliament. A good deal depends upon how we make use of our present opportunities for working up a profitable trade with the Islands to whose proximity to the United States the latter country owes a good many commercial advantages. The time indeed may come when Canada will be asked to consider some form of union with these tropical British possessions—or will find to her chagrin that the time for such union has irrevocably passed away. The contingency referred to would be a vast pity, for apart from Imperial reasons, Canada and the British West Indies are so antithetical to one another in climate, in resources, and in needs, that,—if the "bull" may be forgiven—they have a great deal in common. That is to say, they are, or should be, complementary to one another. The vexed question of good transportation facilities is up again in the Dominion Parliament; the discussion arising from the item in the financial statement of $80,700 for the subsidy for a steamship service between Halifax, St. John, and West Indian and South American ports.

Mr. Fielding said the contractors had made a proposition for a change in terminal ports which would involve the abandonment of St. John as a port of call, goods from that port being sent to Halifax for shipment. The reason for the change was that it would permit of a more rapid service. Mr. Ames said that in the opinion of the trade of Montreal the present service was unsatisfactory, and expressed the idea that if in summer the vessels sailed from Montreal more business would be done. In support of this he read a resolution of the Montreal Corn Exchange. The time had come, he thought, for a change, and either the service should be made a mail one only or else that it should be developed into a proper service.

MONTREAL LETTER.

It was announced at the meeting of the Montreal City Council on Monday, the 12th inst., that a letter had been received from the Montreal Gas Company notifying the council that the directors of the company had decided to refuse the offer of the city to extend the gas contract. The letter, however, caused but little surprise, as, since the adoption of a resolution by the city council that the said offer did not include, in the event of expropriation, the purchase of the company's good-will and franchises, a negative answer had been expected. The facts leading up to the refusal of the company to accept the city's offer have been under discussion for nearly two months. In the first place a committee was named to wait on the company to get, if possible, a reduction in the price of gas in return for an extension of contract. The company offered gas at $1 for lighting and 90 cents for heating, for a contract extension of fifteen years, the present price being $1.20 for lighting gas, and $1 for heating gas. The present contract has five years to run, and the company asked to be relieved, paying a percentage on its earnings during that time. This was estimated at $125,000. When the offer came before the council an amendment was made, reinserting this percentage, and also a provision that the city would have the power to buy out the company at one year's notice. In this way the resolution was adopted. But Mayor Laporte vetoed the resolution. It was reaffirmed over his head by the council, but a new clause was inserted to meet some of the objections raised to the effect that the city did not offer to buy out the company as a going concern. These conditions are what has induced the company to reject the offer.

After the reading of the Gas Company's letter to the city council on Monday last, notices of motions were presented, one calling for tenders, and another for municipal ownership. Mayor Laporte has expressed himself as very pleased at the turn of affairs. His contention is that dollar gas is not cheap enough for the next twenty years, and he also objected to the expropriation clauses, which were later amended with the foregoing result.

The reports from leading wholesale houses generally are of an encouraging character, although in several lines business has been no better than that of last year. Quite a few small failures have been reported during the past week. Remittances are still on the slow side, but are expected to show an improvement next month. There is still a good call for money for mercantile purposes, and rates for time loans are steady at 5 per cent. A fair volume of mercantile paper is presented at the banks at 6 to 6½ per cent.

June 14th, 1905. "MOUNT ROYAL."

⁂

OUR SAINT JOHN LETTER.

Contracts have been awarded and work has commenced on extensions to the Pender Nail Works, that will be greater than the whole of the present structure. There will be a new machine room, new wire mill, new cleaning house, new rod warehouse, new engine room and boiler house, and a new storage warehouse and coal shed. The buildings throughout will be of brick laid in cement, and will be rushed to completion, and new machinery installed to enable the firm to keep up with the demands of business. The Pender Company is one of the most successful concerns in St. John, and has yielded handsome dividends to those who are interested.

W. R. Townsend, of New York, who some time ago obtained from the New Brunswick Oil Company the right to operate in an area adjacent to Moncton, has begun boring operations on a tract of land near the city. A strong syndicate of New York capitalists are said to be behind him, and if oil is secured, there is expectation that the work will be vigorously pushed.

James Kennedy, a St. John man who has been carrying on lumber operations at Grand Bay and Welsford, on the line of the C.P.R., a few miles from this city, is in financial difficulties. His creditors met a few days ago and appointed a committee to report on his affairs. He owes about $14,000, and has assets of about $27,000, chiefly lumber that has been hung up in the woods and so cannot be realized on.

Judge McLeod to-day gave a judgment on the request of George S. Cushing to have the Cushing Pulp Mill put in liquidation. The case is a mixed-up one. In 1901 the mill gave a mortgage for $200,000 to the Eastern Trust Company, and upwards of $100,000 is now due on interest. Of this, George S. Cushing, who was the first manager of the mill, and a heavy stockholder, is entitled to about $5,000 of this interest. Recently, on the part of the trust company and some of the bondholders, an order was secured for the sale of the property on July 15th. Mr. Cushing then began his proceedings, and the interests opposed to him opposed the proceedings on the ground that the mill is now working at a good profit, and has good prospects of paying off its liabilities. Judge McLeod says this would be good ground for refusing the request of Mr. Cushing were it not that the parties opposing Mr. Cushing had obtained the order for the sale of the mill and had advertised it only in a religious weekly paper, which would not be read by many probable purchasers. He decided that a winding-up order should be granted, but would delay issuing it pending an appeal to the full court.

The town of Dalhousie has decided to engage an engineer to look into the question of water, sewerage and electric light, and to furnish estimates on the cost of plants for these necessary works. The city council of Fredericton has definitely decided in favor of a sewerage system, and it is expected that tenders for the work will soon be called.

The St. John Street Railway is paying a dividend of 3 per cent. The company has just completed and opened for traffic a new loop that will enable them to better serve the eastern and southern sections of the city.

Moncton merchants have purchased in Halifax a steamer, the "Wilfrid C," which is to run between Moncton and points on the Petitcodiac river, going as far as Shulee and Apple river.

Dr. J. E. March, quarantine officer at St. John, has worked out plans for a new marine engine from which he expects great things. He has experimented with his device and a five horse-power gasoline motor, and has been able to run it with gas generated from coal burned in a small furnace. The gas gives much greater power than would steam generated by the same quantity of coal. The test is reported to have been most satisfactory, and a large engine will be built. If the plan works out successfully, a new motive power will be available. It is considered significant that Andrew Allen, at a dinner in St. John last winter, predicted that within ten years ships would be crossing the Atlantic driven by gas generated on board.

The Provincial Government has appointed Gilmor Brown, C.E., to go over the Central Railway running from Norton, on the I.C.R., to Chipman, and decide on the feasibility of a number of improvements suggested by Senator King and George McAvity, commissioners appointed by the Government to look into the needs of the road. This line may form part of the Grand Trunk Pacific connection from Chipman to St. John.

Great interest is now being aroused in New Brunswick over the probable route of the Grand Trunk Pacific, and a strong effort is being made to direct it down the St. John Valley. It is said a better grade has been secured through the centre of the Province, and that it will go that way. A prominent lumberman told your correspondent that if the line is built through the centre of New Brunswick, then much of the lumber business of the north shore will be diverted to St. John, the operators putting mills in the woods and sending their manufactured product to St. John, where there is an all-the-year-round open port, while the north shore ports are open in summer only. * * *

St. John, N.B., June 13th, 1905.

⁂

SOVEREIGN BANK OF CANADA.

The Sovereign is one of the younger banks, which is to be congratulated upon the highly satisfactory progress it has already made. In spite of the severity of last winter and the not particularly good crops in Ontario last season, its deposits show an increase since last year of $2,624,751, while its note circulation increased by $106,325. A feature which may well be deemed worthy of remark is the fact that out of the profits $50,000 has been added to reserve fund, though this is only the third year of the bank's existence. The general manager in his address called attention to the condition of its assets. These now amount to $11,670,000, and of this sum $4,750,000 is immediately available. The announcement is made of an increase in capital of $325,000, a step rendered necessary in order to keep pace with the bank's circulation. As evidence of the full confidence of the shareholders in the management, it may be mentioned that, in addition to their allotments, they applied for as much more of the new stock, and that, though applications were not due until June 15th, no less than $125,000 was actually received in cash at date of the annual meeting on the 13th inst., making the paid-up capital $1,400,000. The general manager stated in his address that the depositors in the bank numbered 26,725, and that its borrowing customers numbered 6,185, which means that the average amount loaned to each customer is only about $1,400. A distribution of this kind without a doubt serves to bring all possible losses to a minimum, and is an evidence of the prudence and conservatism which has distinguished the management. The prosperity and general conditions of the bank would certainly appear to warrant the announced increase of dividend. It may be mentioned that in the first year, no dividend at all was paid, the management having wisely considered it better to use profits in paying off the expense of organization and in strengthening the bank. This is a proceeding practically unique under the circumstances in banking in this country. Last year 5 per cent. was paid, and now the dividend stands at 6 per cent. The enterprising methods of the general manager certainly bring "results" in no mean measure.

⁂

GUARDIAN ASSURANCE COMPANY.

The figures presented at the annual meeting of this old-established London company, held on the 26th ult., amply show that its growth and prosperity continue as markedly as ever. Fire and burglary premiums, after reinsurances are deducted, increased from $2,376,645, in 1903, to $2,539,325 last year. The premium reserve fund, to cover unexpired policies, stands at $1,118,750, and the fire general reserve fund at $2,155,000, or an aggregate fund, with which to meet fire claims, of $3,273,750. The number of life policies held in the company on 31st December last was 12,073, assuring the sum of $41,072,800, including bonuses. The Guardian is noted for its conservative management, and has always followed the wise policy of building up ample reserve funds from which to meet any possible contingency. That this course has been successfully followed is evidenced by the present high position of the company, whose assets now stand at $26,149,320, while its annual income is over $4,700,000. It is with pleasure we note the manner in which the Canadian end of the business is being enlarged, under the able managership of Mr. H. M. Lambert.

⁂

INSURANCE MATTERS.

The New York Life announces that its paid-for business during the first five months of 1905 has been $148,244,000, a gain of $6,017,000 over the corresponding period last year.

The correspondent of the Monetary Times in Montreal calls attention to the condition of affairs of the Equitable Life Assurance Society, which, he says, continues to cause uneasiness among Canadian policy-holders. Would it not, he suggests, be advisable for the Insurance Department of the Federal Government to look into the matter on behalf of the 11,400 policy-holders in Canada, whose total insurance amounts to $23,000,000? The only protection Canadian policy-holders have at present is a deposit of $1,840,000. Any steps thus taken by the Federal authorities would at least assure the people that their interests are being considered.

A distinguishing feature of French economics, says the Review, is the steady withdrawal of money from the savings banks, showing a want of confidence in the State on the one hand, or, it may be on the other, an increase of belief in the relative advantages of life assurance. Let us hope it is the latter. Yet the purchase of annuities does not seem to commend itself more than usual to the French people, nor does the amount of new policies taken out in the ordinary way. Life assurance in France appears to be strangulated by too much formality, which the exclusion of foreign offices will not improve.

The fraternals are up against a very serious proposition in the recent decision of the Supreme Court of Missouri, holding that they are subject to the non-forfeiture law of that State. The fraternals have always contended that this non-forfeiture law, which prevented the lapsing of a policy after three premiums have been paid, so long as there was any reserve value which would pay for extended insurance, applied only to the legal reserve companies. The court holds that it applies to any insurance organization which charges more than the actual cost of carrying the insurance, and that the insured is entitled to the benefit of any surplus he may have paid, whether he is in an old-line company, an assessment organization, or a fraternal. —Investigator.

The town of Buctouche, Kent County, N.B., suffered considerably from fire last week. John Sayre, general trader; John L. Cormier, and M. L. D. Cormier, hotel proprietors; J. P. Goguen, confectioner, and G. S. Richards, general storekeeper, were burned out by a fire that started on the Sayre premises. The loss was upwards of $20,000, with very little insurance. Buctouche has suffered as much, perhaps more, than any section of the Province from fire, but the experiences of the past have not taught the people the wisdom of adequate fire protection, and without this insurance is almost impossible.

The annual meeting of the Canadian Fire Underwriters' Association will take place on the 26th and 27th inst., at the Royal Muskoka Hotel.

* * *

THE GROWING WEST.

I interviewed William Whyte, second vice-president of the Canadian Pacific Railway, and success-maker of the West, in the board room of the C.P.R., where he towered a figure of enthusiasm and eloquence not out of place among the big men who look down upon us from the pictures that perpetuate the builders of the system.

He was in the midst of estimate work.

The long table was piled with documents calling for the expenditure of millions.

His secretary was pounding the typewriter, and men were waiting to work with him in figuring out how best the C.P.R. can spend its money for new bridges, buildings, and branches in deciding which of which to build was the mission of Mr. Whyte's visit to Montreal.

In the Board Room of the C.P.R.

Sir Thomas Shaughnessy had intimated that I had better see Mr. Whyte at the Hotel Windsor in order to get the interview, but it was necessary that the picture of Mr. Whyte be taken in daylight, and in the board room of the C.P.R. in order to show him as a great workman at his work.

While he was stealing a few thousand dollars worth of the C.P.R. time, in order to let the photographer get the view of him that I was seeking, a view that will show the character, capacity, and characteristics of the man as they appear to those who study him when he is deep in thought or conversation.

When I say a few thousand dollars worth of time, I am referring to the fact that when a man is approving or deferring appropriations that aggregate an average of about a million dollars an hour, his time, has a value of thousands valued by the minute, but notwithstanding Mr. Whyte's enthusiasm for the West. he could not refrain from giving me part of his interview then and there.

That is where he shows one of the characteristics of the class of great men to which he belongs.

Of course they are all enthusiasts.

No man is great without great enthusiasm for some great cause.

It is only by being lifted up, thrilled, inspired, by the magnitude or the magnificence of an undertaking or an opportunity, that a man can be brought to that intensity of intellectual power inseparable from high achievements.

Mr. Hosmer in his interview has referred to the great sense of imagination with which Sir William Van Horne and his associates saw the splendid future of Western Canada and the Canadian Pacific, and did not see the gigantic obstacles in the pathway of its success.

Sir William Puts it Tersely.

Later, I was speaking to Sir William Van Horne of this ability of the inspired mentality to see the accomplished fact and thus be spurred to the doing of great deeds, and Sir William responded to my rhapsody by poking another hole in the snow with his cane, remaining for the space of an entire minute absolutely silent in that characteristic way of his, and then saying, anent the building of the C.P.R.: "We saw a hole. We believed we could go through. We did."

But when you ask Mr. Whyte about the great West it is like touching the button that set the motion of the World's Fair in St. Louis. Instantly, the mental machinery is set in motion that creates in the words uttered by Mr. Whyte a complete exposition of Canada's great West, an exposition fascinating, complete, analytical, interesting, practical, poetic, a wonderful creation, of fact and figures from the mind of the one man who deserves the title I have bestowed upon him—the success-maker of the West.

WILLIAM WHYTE, Second Vice-President of the C.P.R.

It Takes Hard Workers for this Work.

I have studied Mr. Whyte through the eyes of others. Those who know him had told me of his capacity for hard work. Of course he couldn't be associated with the hardworkers of the C.P.R. unless he were really one of them in his ability to do the great tasks that devolve upon him.

Let me tell you what those tasks are:

It is a big thing to run a railroad half across the continent, and that is the position Mr. Whyte occupies in the Operating Department of the C.P.R. His office at Winnipeg is the Executive Department of the Canadian Pacific system west of the Great Lakes, and to operate a railroad in a vast territory of plain and mountain with new conditions of population and traffic, constantly arising, is in itself an interesting and an immense undertaking.

But it is only a small part of what Mr. Whyte has to do.

His great work is to build an empire.

His it is to know what the resources and possibilities are in every section of that broad land where 50 millions of people are destined to dwell in prosperity.

It is for him to find out exactly what the land will do for those who will cultivate it—whether any given part of it will raise oats, wheat, barley, or fruit, or merely grass, or produce nothing at all except the minerals which lie hidden beneath the sterile and stony surface.

We must ascertain just what course must be pursued for his fruit plantation, his farm, or his mining, and then to tell that settler the truth about Western Canada, so that whether that settler comes from Europe, Asia or Africa, from New York, Missouri or California, comes with knowledge and training, or comes in ignorance and unskilled, comes with money or without it, he will be fitted to the land, and the land will be fitted to him.

He Knows Western Canada.

To know these things, means that Mr. Whyte must know Western Canada as a man knows his own house.

That is the way Mr. Whyte does know the western country, for in the nearly two decades that he has been working in this great western field, he has travelled and studied almost every square mile of a land that is as large as half the United States; and he has gone out into foreign countries and studied them, and thus developed a market for Canadian production.

This is not a vision of a railroad official in the palatial luxury of his private car. Rather let the picture be upon your mind of a man in a wagon toiling onward through the lonely trail where scarcely a wagon or a horse or a man has trod before.

Let the picture be a man with a pick, with the sun pouring down upon his head, digging a piece of coal out of a lignite deposit, and taking it to a solitary settler's hut to test it and see whether it would be good policy for his railroad to run a branch up to that region and carry this coal to the settlers throughout a wide section, not because the coal would pay the road a profit either as a commodity or freight, but because men must have cheap coal in order to live, and it is part of the duty of the Canadian Pacific to see that they get it.

Put another vision on your mind of a man calling together all the lumber dealers from Lake Superior to Puget Sound, and telling them that unless they sell lumber at a fair price to the settlers of the West, that the Canadian Pacific will go into the lumber business on a gigantic scale and bust the combine.

And another picture of a man buying the wheat raised by the farmer at a price higher than the market would pay, in order to give that settler the money with which to live and to develop his farm in an off year.

And a panorama of these views of a man always doing those things which must be done when millions of people are brought into a new land to develop millions of acres of wheat and fruit and mineral wealth into millions of dollars of money, and prosperity for the people of Canada both east and west.

The Magnetism of the Man.

And this man of action in the midst of the most irritating and exasperating labor of a railroad official, that of passing on the appropriations and estimates, devious and endless details, dry figures, and dry facts, was found genial, magnetic, full of courtesy in the few moments he had to give me in the Board-room of the C.P.R. And later when I found him in the corridor of the Windsor, surrounded by a group of men and newspaper representatives, he was the quiet delightful man of the west, with that hearty grasp of the hand, that twinkle of the eye, that glow of the cheek, that magnetism of the personality which you find in all these great pioneers who carry within themselves the force which radiates outwards into the men and the machinery with which they accomplish their great results.

Shaking hands with Mr. Whyte you feel you are greeting the great West.

We went upstairs to Room 320.

(To be continued.)

The Canadian Colored Cotton Company have made advances in several of the higher-grade lines of tickings. Sweaters, coats for children, etc., and similar lines of woolen goods, have also been raised in price this week.

The Ladies' Novelty Manufacturing Co., Ltd., is the name of a recently incorporated concern in Toronto, which will manufacture and deal in ladies' novelties, ladies' and children's wear, leather goods, etc. The share capital is placed at $40,000. Alfred J. Doherty and A. L. Spalding, of Toronto, are among those chiefly interested.

—Much complaint is heard among Vancouver mining men because of being obliged to transact their business in New Westminster. It is pointed out that much injustice is caused to Vancouver mining interests owing to there being no recorder's office in that city. This, notwithstanding the fact that some of the principal mining interests are situate near Vancouver.

—The Sovereign Bank of Canada did a graceful act in its presentation to the members of the Canadian Manufacturers' Association, on their departure for a tour of Great Britain, of a neat little morocco-covered case to hold their cards of credentials. On the outside was printed in gold letters the name of each recipient. The gift, we need hardly say, was thoroughly appreciated.

—As a result of a conference between Mr. Allan Hammond, president of the Vanburen Company, and Levi W. Pond, the log-driving contractor, of St. John, N.B., it has been announced that the log-driving difficulties on the St. John river have been adjusted, and that Mr. Pond's boats will be permitted to pass the Vanburen booms and ascend the river to Edmundston. A late despatch says the water in the river is falling, and that there are 12,000,000 feet of lumber hung up on the upper St. John river and 30,000,000 stranded in the Miramichi river.

—The authorities in charge of the coming Dominion Exhibition at New Westminster, B.C., are busily engaged making arrangements. The most substantial building on the grounds will be the Manufacturers', for which a contract has just been let. It will be situated next to the present main building, and to make room for it and the Industrial Building, work on which has already been commenced, the present Machinery Hall will be moved some distance to the rear of its present position. The lower floor of the Manufacturers' Building will be used for displays of machinery, while on the upper story will be situated the rest-rooms of the Council of Women, a large restaurant, and the rooms for the press, besides a long press gallery from which the representatives of the papers will be enabled to watch the sports on the athletic oval. The present Machinery Hall will, when in its new location, be used as a Dairy Exhibit Building, and work will be commenced shortly on the installation of a cold-storage plant. The old poultry-house has already been moved, and will in all probability be used for the Indian exhibit.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, June 15th, 1905, as compared with those of the previous week:

	June 15.	June 8.
Montreal	$26,173,962	$27,068,335
Toronto	19,509,764	20,259,779
Winnipeg	6,413,914	6,494,879
Halifax	1,657,903	1,896,051
Hamilton	1,216,882	1,349,518

BOOKS RECEIVED.

A remarkably useful book is that entitled the "Mercantile Year Book and Directory of Exporters for 1905." It is published by Walter Lindley Jones, F.R.G.S., London, Eng., editor of the Mercantile Guardian. This handy book of reference, which is in its nineteenth year, gives an itinerary, or walking guide, of the shippers of London in order of the streets on which they have their offices; lists of exporters in the chief British shipping centres; one of importers on the continent and in the colonies with the names of their representatives; and a great deal of miscellaneous information of value to all connected with the export trade. A very valuable feature of the book is Part III., which gives the principal classes of goods shipped from London, with the names of the shippers. The book is well bound, while in typography, arrangement, indexing, and other items, it leaves nothing to be desired. It is published at 21 St. Helen's Place, Bishopsgate Street W., London, E.C.

⁂

THE EQUITABLE LIFE TROUBLE.

The first and most important step in the reorganization of the Equitable Life Assurance Company has been taken already. On Friday last, Mr. Paul Morton, who has been acting for some time as Secretary of the United States Navy, was elected chairman of the board of directors of that harassed Society. The acceptance of this position was followed by the resignation of Mr. J. W. Alexander, the president; Mr. Hyde, the first vice-president; G. E. Tarbell, the second vice-president, and W. H. McIntyre, the third vice-president. It is understood that the new chairman bargained for a free hand as to the steps to be taken to put the Society on a reorganized basis. Mr. Hyde retains substantial interests, though a controlling part of the same has been taken over by a syndicate headed by Thos. F. Ryan, or rather by an association of policyholders represented by him. The reorganization promises to be based upon the plan of mutualization approved by the Superintendent of Insurance. That is to say, it will be done by conveying the stock to a board of trustees, composed of men of such character as to command universal confidence and having no connection with Wall Street, with the power to vote the stock for the election of directors, as to twenty-eight directors in accordance with the instructions of the policyholders of the society, and as to the remaining twenty-four directors, in accordance with the uncontrolled judgment of the trustees.

This, it is believed, will at once accomplish the object of putting the control of the company in the hands of the policyholders, and will eliminate entirely the one-man power to which so much objection has been made.

⁂

PUBLIC OWNERSHIP IN ENGLAND.

Those who find in the experience of London a good argument against municipal ownership of utilities must be very stubborn in the face of facts. We are told that it would not do for us to undertake such responsibilities, and that we are to look and see how they have failed in places where most was looked for from them. We look and find, among other things, the following facts concerning street railways, which (nobody will deny), are not by any means the easiest of utilities for public ownership to take hold of.

In the course of a few weeks, then London's street railways will have cost $60,000,000, raised upon the credit of the London rates; but, up to the present the tramways undertaking has not cost the ratepayers anything. On the contrary, the rates are better off by nearly a million dollars and a half, and the London ratepayer may well be content if, during the reconstruction of the northern system, "the profits of the southern do nothing more than maintain the equilibrium," as the chairman of the council recently said. The amount to be expended upon the northern reconstruction will amount to twenty-five million dollars, and there will be a partial cessation of revenue during four years. The southern tramways account for last year was excellent from the ratepayers' point of view. The gross receipts, instead of being $3,020,000, as estimated, were $3,410,000; and the balance of profit is bigger than was originally hoped for by $175,000. The Highways Committee would be quite justified in placing the bulk of this to the relief of the rates, but it has decided to take the most prudent course of devoting large sums to paying for the temporary generating station, and to increasing the renewals reserve fund. And this, be it remembered, is while the reconstruction of the southern system for election traction is still in progress. So that, instead of there being a deficiency, while all this work is going on, "the London tramway system," to repeat the words of the chairman, "has not, up to the present, cost the ratepayers a sixpence, in spite of disorganized traffic through reconstruction." The administration of London is, indeed, as a favorable critic puts it, "not only successful, but triumphant."

⁂

GAS STOVES AND THEIR DANGERS.

There are many things in ordinary household use, which, while in themselves perfectly safe, are, in the hands of careless people or when not sufficiently safeguarded, extremely hazardous to life and property. For example, take the common gas stove. We find that, from an insurance standpoint, the following items enter into a calculation of the relative danger of gas stoves:

Construction, method of connection with the gas supply pipes, pressure and nature of the gas used, surroundings of the stoves, protection of surrounding inflammable materials and method of carrying off waste or unburned gases.

It need hardly be said that a properly constructed stove should have all parts substantial, especially the burners and piping, should have couplings suitable for rigid attachment to gas pipes, burners should be so arranged that the flame would not inpinge on the stove casing or fittings, and it should be provided with legs of sufficient length to prevent serious heating of the surface on which it is set, or it should be fitted with a metal guard or heat deflector under the burners. They should also be constructed so as not to produce carbon monoxide, a deadly gas which yearly claims many lives. A common fault in the arrangement of gas stoves, and one of the most dangerous features in connection with them, is the use of a soft rubber tubing connection between the stove and the supply pipe. As rubber soon deteriorates, especially if stretched and subjected to heat, it would be but a short time before such a connection would become sufficiently weak to be forced loose by the pressure of the gas or by slight tension on the tubing. The soft rubber ends, although heavy, may melt if the fittings become too hot, and if the gas contains any sulphur compounds the rubber will harden and crack. The only way to eliminate the dangers is to provide rigid iron gas pipe connections. Loose valves are frequently opened, when the stoves are not in use, by accidental brushing against them, and if the stove is without a flue connection the gas would, of course, escape into the room. Enclosed heating stoves should all be provided with as good flues as are used for coal stoves, and open gas stoves, such as hot plates or gas crowns, should have a ventilated metal hood to carry off any escaping gas. Only a very small percentage of some illuminating and fuel gas is necessary to cause loss of life, two per cent. of water gas being sufficient. Air mixed with about five per cent. of gas will become inflammable, and about fifteen per cent. of gas produces an explosive mixture. Gas under too heavy pressure will be forced through the burner so rapidly that only part of it is consumed; the remainder, unless conveyed to a chimney, escaping into the air of a room, in time would impregnate the air to a dangerous degree.

Stoves should be set on metal with air space beneath, or on marble, tile, cement or the like, and inflammable surroundings should be properly protected by metal or asbestos. In sections of the country where natural gas has been used and where the supply is giving out, the fluctuation of the gas pressure, due to heavy demand upon the supply during part of the day and light demand at other hours, causes a

TENDERS

$100,000—School District of Winnipeg—Debentures for Sale.

Sealed tenders addressed to the secretary-treasurer of the Winnipeg Public School Board and marked "Tender for School Debentures" will be received up to 12 o'clock noon, on Tuesday, 27th of June. 1905, for the purchase of $100,000 of debentures of the School District of Winnipeg No. 1, payable at the expiration of 30 years, with interest from the 1st of August, 1905, at the rate of four per centum per annum

Principal and interest payable at the office of the Winnipeg Public School Board, or at any chartered bank in Winnipeg.

Delivery to be made and money to be made at Winnipeg. Payment to be made in gold or its equivalent.

The highest or any tender not necessarily accepted.

Any information desired may be obtained by addressing the Secretary-Treasurer

STEWART MULVEY,
Secretary-Treasurer Winnipeg Public School Board

F. C. HUBBARD,
Chairman Finance Committee.

Debentures for Sale.

Sealed Tenders addressed to "The Corporation of the City of Regina" will be received up to and inclusive of Monday, the 19th day of June, 1905, till 5 o'clock p.m., for the purchase of Debentures of the city of Regina, issued in pursuance of a By-Law in that behalf authorizing the raising of $160,000 to be expended in the completion of the system of Waterworks, Sewerage, and Electric Lighting for the Corporation of the City of Regina.

These Debentures will be re-payable in equal annual instalments, and will bear interest at 4½ per cent. per annum, and are made re-payable within 30 years.

The highest or any tender not necessarily accepted.

J. Kelso Hunter,
Secretary-Treasurer.

Regina, 16th May, 1905.

TENDERS FOR DEBENTURES.

Sealed tenders will be received by the undersigned up to June 20th, 1905, for the purchase of the following debentures:

$118,500 Debentures of the Town of Gananoque, payable 1st June, 1933, bearing interest at the rate of 4 per cent. per annum, payable half-yearly, on December 1st and June 1st, with coupons attached, at the office of the Town Treasurer, and principal also payable at same place at the end of 28 years.

Debentures delivered at Gananoque. For further information write to

Freeman Britton, or S. McCammon,
Treasurer. Clerk.

Dated at Gananoque, 18th day of May, 1905.

W. J. Wilson, Chairman Finance Committee.

The British Canadian Loan & Investment Company, (Limited.)

DIVIDEND No. 55

Notice is hereby given that a dividend at the rate of five per cent. per annum on the paid-up capital of the Company, for the half-year ending 30th June, 1905, has this day been declared, and that the same will be payable on the third day of July next.

The transfer books will be closed from the 20th to the 30th proximo, both days inclusive.

By order of the Directors.

ERNEST S. BALL, Manager.

Toronto, 25th May, 1905.

dangerous condition. The supply valve on a stove may be entirely opened when pressure is light and the increasing pressure might cause dangerous overheating. Fires in natural gas stoves sometimes go entirely out under low pressure, and, unless the stove valves are shut off, the increase in pressure would quickly fill a room with gas, possibly causing an explosion.

* * *

THE LUMBER TRADE.

Little change is to be noted in the value of various grades of lumber. Prices, however, continue very firm, and any change at all is likely to be towards an advance. Building operations throughout Ontario and many parts of Quebec are being actively carried on, with the result that the call for lumber and other materials is very marked.

There does not seem to be much improvement in the trade in Great Britain. We learn from a circular dated 1st June, and issued by Farnworth & Jardine, that the arrivals from British North America during the past month were 14,953 tons register, against 13,849 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1903, 1904, and 1905 has been 126,475, 131,783, and 150,663 tons respectively. The timber business of the past month has been quiet and rather disappointing. Imports have come forward freely, but the consumption, with the assistance of auction sales, has been fair; stocks, with few exceptions, are adequate, and values for some of the leading articles have shown weakness.

Regarding Canadian woods, speaking of waney, it states there has been a small import of about 1,000 cubic feet; the demand is quiet, the deliveries have been disappointing and stocks are large but values are steady. The deliveries of square pine show a little improvement, but the stock is ample; prices are firm. A parcel of about 3,000 feet red pine has been imported coastwise. There is no import of oak logs; there has been little enquiry, and the stock, though small, appears sufficient for present requirements. Elm.—There is a fair demand for first-class Rock Elm, and the stock is light; values rule high. New season pine deals are now coming forward, chiefly on merchants' account; deliveries have been fair, but the stock is too large; values are fairly well maintained. Red pine deals are dull of sale; stocks are ample.

New Brunswick and Nova Scotia Spruce and Pine Deals.—The import to the Mersey during the past month has been very similar in quantity to the corresponding month of last year, namely,;—4,840, against 4,310 in 1904. The deliveries have more than kept pace, stocks are moderate and values are fairly steady. There is a very limited enquiry for pine deals, and a parcel recently imported has been stored on shippers' account. Of birch logs there has been a moderate import, chiefly from Quebec; the deliveries have been fairly satisfactory, and stocks are not too heavy, values are steady. Planks have arrived much more freely, and although the deliveries have been large the stock is increasing, and values are a shade easier.

One cargo of British Columbian and Oregon Pine, consisting of about 146,000 cubic feet, chiefly logs, has recently arrived on merchants' account. The demand is limited, and the stock ample, but prices are fairly steady.

* * *

FINANCIAL ITEMS.

The Imperial Bank of Canada has opened a branch at New Liskeard, Ont.

Frank G. Bigelow, the defaulting manager of the First National Bank of Milwaukee, pleaded guilty on ten counts for violation of the banking laws, and for taking bank monies for his own use. He was sentenced to ten years at hard labor.

Mr. Thos. T. Langlois, president and manager of the British Columbia Permanent Loan & Savings Co., Vancouver, has been on a visit to the Maritime Provinces, opening a branch at St. John, in which some of the strongest men in the city are interested.

The Dominion Trust Company, established some two months ago, and in which Mr. Langlois, of Vancouver, is prominently interested, is, we understand, meeting with highly satisfactory success, and its prospects are very bright.

The shareholders of the Home Bank, Toronto, have held their first annual meeting and elected officers as follows:—President, Eugene O'Keefe; vice-president. Thomas Flynn; directors, Edward Stock, Thomas R. Wood, Edward G. Gooderham, Michael J. Haney and Lieut.-Col. James Mason. The last-named was appointed general manager.

A circular has been issued by the Twin City Rapid Transit Company, as to the privileges of subscriptions to the $1,000,000 of new common stock recently authorized to be issued. Both the preferred and common stockholders have the privilege to subscribe at par from June 20th to July 5th, both dates inclusive, for new common stock to amount of 5 per cent. of their respective holdings on June 7th.

The Atlantic & Lake Superior Railway Company is suing the Crown for $1,500,000. It claims that twelve years ago the Dominion Government guaranteed an issue of railway bonds, but that in 1895, when the bonds were offered in London, the guarantee was repudiated, though the company had carried out its part of the agreement. It is contended that the withdrawal of the guarantee destroyed its chances for the sale of its securities. The Crown, which was represented by the Deputy Minister of Justice, denies that any guarantee was ever given by the Government. Negotiations had been begun, he admits, but no final contract made.

* * *

FIRE AND ACCIDENT INSURANCE.

Mr. A. L. Eastmure, managing director of the Ontario Accident Insurance Company, Toronto, sailed last week on a two months' trip to England.

The Fidelity & Casualty Company, of New York, has been granted a charter by the Dominion Government for the transaction in Canada of the business of accident, sickness, and burglary insurance. Messrs. Lukis, Stewart & Co., are the chief agents of the company in Canada, with office in Montreal.

The Ontario Gazette gives notice of the incorporation of Eastmure & Lightbourn, Limited, to take over the business of Eastmure & Lightbourn in Toronto as agents and managers of insurance and manufacturing companies, and to carry on the business of financial and other agencies and managerships. The share capital is placed at $100,000.

The Supreme Court of Michigan has rendered a decision to the effect that the standard fire insurance policy in use in that state is unconstitutional. In the case of Wallace E. King against the Concordia Fire, the plaintiff claimed for loss by fire having been rejected because of his failure to keep an inventory of his stock in an iron safe, but inasmuch as the standard policy law was void, it followed that the company had a right to insert the "iron safe clause," or any

other reasonable clause in its policies if the insured agreed thereto. The court holds that the law is invalid because, while the legislature has the power to enact such a law, it has no power to delegate that authority to anyone. Practically the significance of the decision is that a legislative enactment will be necessary at this session or there will be no uniformity in fire insurance policies in the state for at least the next two years. In the meantime the validity of policies now in force is not disturbed in the least by the decision, as they are simply lawful agreements between the insurer and insured.

—The fifth annual report of the Ontario Labor Bureau, just published, shows that during 1904 there were fifty-four trade disputes resulting in strikes in Ontario, involving 171 establishments and 8,945 persons. An aggregate of 878 days was covered by the strikes, the average duration of each dispute being 14.41 days, or 10.18 days per person, compared with 82 disputes, involving 429 establishments, 10,564 persons, aggregating 994 days, an average of 12.12 days to each dispute, and 10.62 days per person in 1903. The establishments reporting to the bureau were 174, employing 11,503 persons. The gross value of their aggregate product was $25,714,296; the amount paid in wages $4,400,626, an annual average earning of $382.56 per person. The percentage of labor cost of production was 17.15, as against 21.69 in 1901, and 25 in 1903.

—The Geological Survey of the Dominion Government will this year have several parties in the field exploring various parts of the North-West. Especial attention is being paid to the investigation of the coal fields of British Columbia. Dr. Ellis has been working on the Nicola coal fields. Dr. Ellis having finished in the Nicola region, has now gone to Graham Island, in the Queen Charlotte group, where he will spend the remainder of the summer, while Dr. Poole will spend several weeks on Vancouver Island. Mr. D. W. Dowling, who did good work in the Rocky Mountain region last year and discovered several promising fields, will continue his explorations in the same region this summer. In the Rossland district an examination of all the mines will be made by Mr. R. W. Brock, after which he will go to the Lardeau district, and will thoroughly explore that district. Dr. Daly, Mr. J. M. MacCoun, and Mr. William Spreadborough will explore the country adjacent to the boundary line between British Columbia and the State of Washington. Mr. R. G. McConnell has left for the Yukon Territory. He will devote himself first to the Kluani district and the Alsek River. Later he will proceed to the Burwash diggings in the Mount St. Elias range, leaving Mr. McLaren, his assistant, in the region west of Whitehorse. Mr. Joseph Keel has instructions to cover the country adjacent to the north branch of the Stewart River, while Mr. Chas. Camsell will work from the sources of the Stewart River and down the Peel River to the delta of the Mackenzie.

Meetings.

THIRD ANNUAL REPORT SOVEREIGN BANK OF CANADA.

The third annual meeting of shareholders of the Sovereign Bank of Canada was held at the head office, Toronto, on the 13th inst, and was largely attended.

Amongst those present were:

Randolph Macdonald, A. A. Allan, D. M. Stewart, Hon. D. McMillan, Arch Campbell, M.P., John Pugsley, A. E. Dyment, M.P., S. F. McKinnon, H. H. Beck, James W. Pyke, Frank Turner, E. B. Strathy, John B. Kay, Andrew Smith, Hon. Jas. Young, J. F. Junkin, Alex. Graham, W. Graham Browne, L. P. Snyder, S. H. McDougall, and others.

DIRECTORS' REPORT.

The directors beg to present to the shareholders the third annual report, showing the result of the business of the bank for the year ended 29th April, 1905.

Balance at credit of profit and loss account on 30th April, 1904	$ 6,112 65
Net profits for the year ended 29th April, 1905, after deducting charges of management, Provincial Government and Municipal taxes, advertising expenses and accrued interest on deposits, and after making full provision for all bad and doubtful debts	133,975 67
	$140,088 32

This has been appropriated as follows:

Quarterly dividends at 5 per cent. per annum:			
No. 5, paid 15th August, 1904	$16,250 00		
No. 6, paid 15th Nov., 1904	16,250 00		
No. 7, paid 15th February, 1905	16,250 00		
No. 8, paid 15th May, 1905	16,250 00		
		$65,000 00	
Transferred to reserve fund		50,000 00	
Written off bank premises		10,000 00	
Reserved for rebate of discount on bills not yet due		5,000 00	
			$130,000 00
Balance carried forward			$ 10,088 32

RESERVE FUND.

Balance at credit of account, 30th April, 1904	$350,000 00
Transferred from profit and loss account	50,000 00
Total, 29th April, 1905	$400,000 00

Branches or sub-agencies have been opened at the following places during the past year:—Arkona, Dunham, Galt, Linwood, London, Monkton, Niagara, Rockland, St. Jacobs, Thedford, Thessalon, Toronto, Market, Tweed, Wyoming.

At four of these points the bank took over the business of private bankers, and at all of them the outlook is satisfactory.

The crops in Ontario were below the average last year, and the past winter was one of the hardest for many years, but in spite of these circumstances every department of the bank's business has made good progress, and the outlook at the present time is distinctly favorable. The increase of $2,624,751.50 in deposits and $106,325 in note circulation cannot fail to be gratifying to the shareholders, as it affords convincing evidence of a growth of public confidence in the bank, of which any Canadian institution might be proud.

The assets show an increase of $3,065,831.49 over last year, and amount to $11,669,905.58. Of this there is in actual cash or at credit with our bankers $1,569,682.57, or more than the entire capital of the bank.

The increase in the "bank premises" account is chiefly due to the purchase of a valuable site on the principal financial thoroughfare in Montreal, and the erection of a first-class ten-story building, the ground floor of which will be occupied by the Montreal branch, and the first floor by the General Manager and his staff.

Mr. H. S. Holt, president, and Mr. James Carruthers, director, retired from the board during the year, and the vacancies thereby created were filled by the election of Mr. W. K. McNaught, one of the original shareholders of the bank, and Mr. D. M. Stewart, the general manager. The presidency was filled by the vice-president, Mr. Randolph Macdonald, and Mr. Alexander A. Allan became vice-president, whilst Mr. Stewart, in recognition of his valuable services was made second vice-president as well as general manager.

The number of shareholders on 29th April, 1905, was 887, as compared with 841 in 1904, representing an average holding of 14.64 shares per stockholder. This is a very wide distribution and affords satisfactory security to the public.

The directors again wish to place on record their appreciation of the zeal and energy displayed by the staff of the bank from the junior clerks up to and including the general manager.

RANDOLPH MACDONALD, President.

D. M. Stewart,
Second Vice-President and Gen. Manager.
Montreal, 29th April, 1905.

President's Address.

In moving the adoption of the directors' report, the president spoke as follows:

I was one of the original applicants for the Charter of Incorporation of this institution, and it is with feelings of pride that I stand before you to-day as its president. The conservative principles which have always governed the bank will not be departed from while I hold office.

As you have been informed, it was found desirable to issue $325,000 additional stock, and the manner in which this has been taken up is most gratifying.

The directors and myself feel that the actual earnings and position of the bank are now sufficient to warrant an increase in the dividend. The rate for the present quarter will be 1½ per cent., or 6 per cent. per annum. We fully expect to be able to maintain this rate, and also make handsome additions to the reserve fund, and otherwise strengthen the bank.

The general manager spent three months in Great Britain and the Continent, and was very successful in furthering the interests of the bank in England, and in the financial centres of Europe.

The vice-president, Mr. A. A. Allan, in seconding the motion adopting the directors' report, referred in glowing terms to the energy and ability displayed by the staff, and stated that the board always had pleasure in making a grant of money for the annual conference of the executive and managerial staff, which did much to promote a good esprit de corps amongst the officers, and advance the interests of the bank.

General Manager's Address.

The general manager hoped that the statements submitted would be found satisfactory, and that the further information now given would enable the shareholders to form an accurate estimate of the actual position of the bank.

The surplus over all public liabilities was $1,700,000, and over 40 per cent of the assets immediately available; the proportion of the latter being 57 per cent. of the total deposits, which was a highly satisfactory showing.

The overdue debts were good, and only temporarily past due, the bank having written off or provided for all bad and doubtful debts out of the year's profits.

The bank had 26,725 depositors and 6,185 discount customers, making a total of 32,910, which he considered a splendid clientele to have acquired in three years. The deposits average but $311 per customer, and the loans show an average of $1,400 per borrower, which ought to satisfy the most exacting shareholder.

The general manager stated that he had intended from the bank's inception that it should not be purely local, but that, if possible, it should become an international institution, with business connections all over the world. This had been largely accomplished already, and the bank's American and foreign business had attained very important dimensions.

Within a week after the shareholders had been notified of the new allotment of stock, applications have been received for more than the total issue, and, although the first instalment is not due until the 15th June, $125,000 had been actually received to date, making the paid-up capital $1,400,000, and the reserve fund $425,000. Excluding directors' applications, the bank had received subscriptions for nearly 5,000 shares out of a total issue of 3,250. There were only 272 shares left after allotment, and these have been oversubscribed for nearly ten times. Referring to these facts, Mr. Stewart stated that this was the greatest compliment the management of the Sovereign Bank could have received, and it should be a powerful influence in further establishing the confidence of the public in the institution.

In conclusion, Mr. Stewart said that the results achieved by the Sovereign Bank were due to his own immediate assistants and the staff generally, and he considered the staff one of the best assets the shareholders possessed.

The usual votes of thanks to the directors and staff were made and referred to in eulogistic terms by the shareholders.

The following directors were elected:—
Randolph Macdonald, A. A. Allan, D. M. Stewart, Hon. D. McMillan, Hon. Peter McLaren, Arch. Campbell, M.P., John Pugsley, W. K. McNaught.

At a subsequent meeting of the board, Mr. Randolph Macdonald was elected president; Mr. A. A. Allan, first vice-president, and Mr. D. M. Stewart, second vice-president and general manager.

* * *

—The Nepigon Forest Reserve, which was created by a recent Order-in-Council of the Ontario Government, is the largest of its kind. Its land area is 5,000 square miles. Its soil is not generally suited for agriculture, but is heavily timbered, there being spruce, jack-pine, tamarac, cedar, balm of Gilead, poplar, white birch, and some scattered groves of white and red pine. The spruce are the largest in the Province, some of them said to be thirty inches in diameter.

The Britannic Paper Company, Limited, Toronto, capital, $200,000, will manufacture and deal in all kinds of paper, wood pulp, etc.

Doolittle & Wilcox, Limited, Hamilton, have been incorporated for the purpose of carrying on a quarrying and mining business in stone, slag, brick, etc.

Mercantile Summary

Mason's sash and door factory, in Ottawa, was struck by lightning on Monday night and destroyed by fire at a loss of $10,000.

The Mineral Springs, Limited, Toronto, capital, $100,000, have been granted an Ontario charter. They will make and deal in mineral and other waters and drinks. W. G. Gooderham and E. B. Shuttleworth are provisional directors.

The Dominion Government has awarded a contract to the Dominion Iron and Steel Company of Sydney, N.S., for 20,000 tons of steel rails for the Intercolonial Railway. The order must be filled before the close of the present year.

The Bryan Mfg. Co., Limited, Collingwood, Ont., has been organized to carry on a planing mill and box manufacturing business and manufacture sashes, doors, interior fittings, etc. F. W. and W. H. Bryan are directors.

The Crescent Oil and Gas Co., which holds an Arizona charter, has received a license to do business in the Province of Ontario on a capital not exceeding $1,000,000. Walter A. Brake, of Leamington, Ont., represents the company.

The Toronto Construction Co., capital $200,000, has an Ontario charter. It will carry on a general railroad, canal, bridge and other contracting business. G. S. Deeks and A. B. Cook, of Toronto, and W. Winters, of Spokane, Wash., are named as provisional directors.

Toronto Board of Control has given the contract for the water tunnel under the Bay to M. J. Haney, the price being $269,000. Mr. Haney is the contractor who is negotiating with the city for a large site on Ashbridge's Marsh, with a view to establishing his works here.

The Dominion Government's fisheries protection cruiser, "Vigilant," chased in Lake Erie a tug from Ohio, named "Grace M," for poaching in Dominion water, but she refused to stop when ordered to do so. In the dodging which ensued, the tug was sunk, two sailors being drowned. No blame attaches to Capt. Galbraith, of the "Vigilant."

The New York Oil Company, organized under Arizona laws, has been authorized by the Ontario Legislature to carry on business and to prospect for and operate mineral lands in Ontario, providing it does not use a larger amount of capital than $1,000,000. Walter A. Brake, attorney, of Leamington, Ont., is looking after the company's interests.

The Canadian Niagara Power Company held their annual meeting at Niagara Falls, Ont., on the 7th inst., and re-elected the old board of directors, as follows: W. H. Beatty, A. Monro Grier, K.C.; William B. Rankine, W. H. Brouse and W. Nesbitt. At the meeting of the board, the following officers were elected: President, W. H. Beatty; first vice-president and treasurer, W. B. Rankine; second vice-president and secretary, A. Monro Grier; assistant secretary and treasurer, W. Paxton Little.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The Otto Higel Co., Limited, manufacturers of piano fixtures, will build a high chimney 118 ft. in height at the corner of King and Bathurst streets, Toronto.

The failure is noted of the Armstrong & Dickson Mfg. Co., manufacturers of biscuits and confectionery, Montreal, of which concern Wm. A. Dickson has for the past year been the sole proprietor. The liabilities are reported at some $41,000, figures beyond what was generally calculated.

The Spitzee Mine Company, Rossland, B.C., is to be reorganized on an assessment basis, and development work is to be carried on more extensively. The plans include the extending of the main shaft from the 200-foot level down to the 1,000-foot level, the putting in of a larger compressor plant and hoisting machinery of larger capacity.

Shippers' Cartage Company, Limited, is the name of a new concern with headquarters at Montreal, which has been granted a Dominion charter. It will carry in a general cartage business, and operate storehouses, docks, farms, etc. Its capital stock is placed at $1,500,000. Alex. Chase Casgrain, of Montreal, is one of those interested.

A firm of coal dealers, at Levis, Que., Robitaille & Fils, is reported insolvent, with liabilities of $13,800, and assets of $3,780. Speculation is said to have largely contributed to their downfall. P. Robitaille, the head of the business, formerly operated in his own name, and failed in 1901, getting no settlement, and since that date his son, Arthur, has been the registered owner of the business.

It is announced that the contract of the St. Eugene Mining Company with, the smelter at Antwerp, Belgium, will expire on June 30th, and that after that date the ore concentrates of the St. Eugene will be shipped to the smelters at Trail and Nelson. The tonnage from the St. Eugene, together with that from the other mines of the district, is thought to be sufficient to keep the smelters busy.

According to a despatch from Windsor, Ont., early this week, the tunnel is to be constructed from the Windsor end right to the Detroit terminal before anything is disturbed on that side, and it is quite possible that the foundry for the Michigan Central may be located on this side of the river to avoid the heavy duties that would have to be paid on the material if imported from the United States. It is definitely announced that work will begin upon the tunnel by October 1st.

The ranks of the small clothing manufacturing concerns in Montreal are overfull, and the competition is getting to be such that the weak and incompetent have to go to the wall. The latest failure in that line is that of Solomon Fils, and Abraham Rubin, just announced, who began business in March, 1904, under the style of the Excelsior Clothing Mfg. Co. They both had formerly been factory hands, and while practical men were lacking in general business knowledge.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

The Temagami Navigation Company, Toronto, capital, $50,000, has been incorporated. J. Edwin Russell and J. M. Sinclair, of Toronto, are interested.

It is stated that terms have been practically agreed upon between New York and London, Ont., capitalists as to the building of the new $300,000 hotel in London, and it looks as if the work of erection will soon actually begin.

The Manning Wood Fibre Company, Limited, Toronto, capital stock, $100,000, has been granted an Ontario charter. It will make and sell excelsior packing and lumber. W. W. Thompson, of Gravenhurst, Ont., is a provisional director.

The Paul Automatic Gas Co., Limited, Montreal, has been incorporated, with a capital stock of $145,000, to acquire the patents of F. Paul, Jr., of Sorel, for improvements in gasoline-making machines, and to manufacture and deal in such patents.

Upon the demand of the T. H. Lee & Son, Co., Limited, of Toronto, an assignment has been made by A. Mathieu & Co., a small jewelry concern at Sorel, Que.——J. A. Fortin, a lately insolvent general merchant, of Sherrington, Que., is reported to have made an arrangement at 75 cents on the dollar.

The St. Maurice Light and Power Company, Shawinigan Falls, Que., will develop water-powers, electricity, and gas for light, heat and power purposes, for which purposes it has received a charter from the Quebec Legislature. Capital stock is placed at $75,000. Vivian Burrill and C. H. Mority, of Shawinigan Falls, are charter members.

This week several representatives of Canadian railways are attending the 25th annual convention of the American Association of General Baggage Agents, at Cleveland. Among the subjects being discussed are: Practical and theoretical design of baggage waybill; the best form of inter-line wagon contracts; limitation of size of any piece of baggage.

Several minor country failures in Quebec Province are noted as follows: Savard & Co., bakers, Ancienne Lorette, have assigned, as also has Maurille Tremblay, a altogether due in Quebec.——A small trader at Seven Islands, in the Saguenay district, E. Montigny, by name, has assigned, and the small liabilities are almost general dealer of Port au Persel, in the same district, who has put his affairs into the hands of Lefaivre & Taschereau, accountants, Quebec.

Colin Campbell, of Seattle, has secured a lease from the British Columbia Government to cut and carry away timber from eight square miles located near the Cheakmus or Squamish river. There is said to be about 250,000,000 feet on the land. It is understood that a contract has been let to log 25,000,000 feet during the next twelve months, a large portion of which has been purchased by the Pacific Coast Lumber Company of this city. The timber is principally fir of excellent quality.

GUARDIAN

ASSURANCE COMPANY, LTD.

HEAD OFFICE:

11 Lombard Street, London, E. C.

Established by Deed of Settlement in 1821, and Registered under the Joint Stock Companies' Acts in 1893.

The Annual Meeting of this Company was held on Friday, 26th May, 1905, when the Directors' Report for the year ending December 31st, 1904, was presented.

The following summaries are taken from it:—

FIRE DEPARTMENT.

The **Fire and Burglary Premiums,** after deducting reinsurances, amounted to **$2,539,325,** as against **$2,376,645** in 1903, showing an increase of **$162,680,** and the **Losses,** after making the same deduction, to **$1,422,955,** as against **$1,132,415** in 1903.

The **Premium Reserve Fund,** to cover unexpired policies, will stand at **$1,118,750,** and the **Fire General Reserve Fund** at **$2,155,000.** There will be, therefore, an aggregate fund (apart from the Proprietor's Capital) of **$3,273,750** to meet Fire Claims.

LIFE DEPARTMENT.

The total **number of Policies** in force on 31st December last was **12,073,** assuring, with Bonuses, **$41,072,800.** Of this sum $3,282,415 was re-assured with other Offices, thus reducing the ultimate liability of the Company to $37,790,380.

The amount of the **Life Funds** at the same date, including the Investment Reserve Fund of **$150,000,** amounted to **$16,277,510.**

The Present Position of the "GUARDIAN" is as Follows:

Capital Subscribed	$10,000,000
Capital Paid-up	5,000,000
Total Assets	26,149,320
Annual Income, over	4,700,000

NOTE.—In the above $5.00 is taken as the equivalent of £1 Stg.

Factory in BRANTFORD.

ENVELOPES made in great variety.

Mercantile Summary.

Davies' grocery store, in Rodney, Ont., was destroyed by fire at a loss of about $4.500, covered by insurance.

The International Acheson Graphite Co., of Niagara Falls, N.Y., will, we hear, shortly begin the construction of a factory in Niagara Falls, Ont., in order to take advantage of its Canadian patents and to get closer in touch with Canadian industries.

The shipments of ore from Rossland, B.C., for the week ending Saturday last were as follows: Le Roi, 575 tons; Centre Star, 1,800; War Eagle, 1,580; Le Roi, No. 2, 60; Le Roi, No. 2 (milled), 630; Jumbo, 300; Spitzee, 600; total, 5,545 tons; for the year, 146,509 tons.

The Russell Elevator Company, Limited, with headquarters in Toronto, and a capital of $20,000, has been granted an Ontario charter. It will make, deal in, and keep in repair all kinds of elevators and hoisting machinery. John Russell, of Toronto, is one of the provisional directors.

A miner carelessly carried a can of blasting powder uncorked in the Imperial mine, No. 1, at Inverness, Cape Breton, on the 8th inst. The result was an explosion which narrowly escaped being disastrous. As it was, several men were severely burned and suffered excruciating pain.

The movement in Sherbrooke towards doing its own lighting continues. The council has purchased from the Government a tract of 70 acres in the bed of the river Magog, near Rock Forest. This purchase includes the right to valuable water powers, now controlled by the British American Land Company, and the Sherbrooke Power, Light and Heat Company. It is proposed that the city take over this purchase for the purpose of utilizing water power in connection with an electric light plant.

The contract has been let and work is to be commenced at once on the construction of a new lighthouse, on Malcolm Island, B.C., similar to that on Discovery Island. The new lighthouse is one that mariners have long been anxious to secure. It will be of the No. 6 order, and will be a valuable aid to seamen coming into the waters between Vancouver Island and the mainland with the intervening archipelago from Queen Charlotte Sound, and to the northbound mariners, who will make out the light as they near Alert Bay.

A small general store business carried on by Smith & Wilson, at Port Hood, N.S., has assigned to G. O. Forsyth, of Port Hawkesbury. Their liabilities are stated at about $2,000, and they show nominal assets of $4,000, but the fact that $3,000 of this amount is in poor book accounts tells a tale of indiscriminate crediting.——Another insolvent firm reported is that of C. A. Dill, a small trader at Falmouth, N.S.——Freeman Ley, engaged in a limited store business at Louisburg, N.S., under the style of Ley Bros., has, through his lawyer, made his creditors an offer of 25 cents on the dollar. He owes in all $1,203.

Tenders For Debentures.

Sealed Tenders addressed to the undersigned, marked "Tenders for Debentures," will be received up to and including June 30th next for the following debentures:

$60,000.00 debentures of the City of Calgary, Alberta, of $1,000.00 each, bearing interest at 5%, with coupons attached, payable in thirty years from January 1st, 1905, interest payable half-yearly at Calgary, and principal at same place at the end of thirty years.

$8,000.00 debentures of the City of Calgary, Alberta, of $1,000.00 each, bearing interest at 5%, with coupons attached, payable in twenty years from May 1st, 1905, interest payable half-yearly at Calgary, and the principal at the same place at the end of said period.

Debentures delivered at Calgary.

Dated at Calgary, May 3rd, 1905.

H. E. GILLIS,
City Clerk.

Mercantile Summary.

Quebec Board of Trade is looking up the matter of a direct line of steamships between that port and London. There was a meeting held to look thoroughly into the question a few days ago, and it was finally decided to form a company to carry out the undertaking.

The results of the recent examinations held by the Institute of Chartered Accountants of Ontario have been announced, and for the finals are as follows: Passed—F. J. Clowes, G. M. Begg, W. C. Kettlewell, W. P. Godson, Toronto; C. D. Corbould, Rat Portage, Ont.; W. C. Benson, London, Ont.; G. W. Morrison, J. G. Grant, Toronto; Homer L. Lord, Montreal; H. C. Anderson, John I. Sutcliffe, Toronto; W. J. Ross, Barrie, Ont.; W. J. Mundell, Montreal.

The Quebec and Saguenay Railway held their annual meeting at Quebec on the 5th inst. and elected officers as follows: President, Mr. Rodolphe Forget; vice-president, Senator Choquette; secretary, Mr. J. A. Macdonald. The company proposes to continue the present line of the Q. H. L. & P. Co. from St. Joachim to Tadousac, a stretch of 110 miles. The region is capable of great development, and Government aid is being asked. The cost is estimated at $1,014,000, and the road would be one of the longest electric lines in the country.

We are now in possession of further information regarding the purchase of the Bertram Works by the Canadian Shipbuilding Co. The Canadian Shipbuilding Company already has yards at Bridgeburg, on the Niagara river, which will be utilized for the building of vessels larger than canal size for service on the upper lakes. The local yards will be used for building ships of canal size, and for excursion steamers for Lake Ontario. Several hundred men are employed at these two yards. Mr. Arendt Angstrom, who several years ago was with the Bertram Engine Works Company, and more recently has occupied the position of general manager of the Canadian Shipbuilding Company, will be general manager of the united companies.

Mr. Robert Munro, managing director of the Canada Paint Co., Limited, recently visited Winnipeg with a view to looking over the North-West field, and in the course of his trip made a statement to the effect that they had acquired the Winnipeg Linseed Oil Mills, and would enter into active possession as soon as possible. This move has two primary objects; first, it will enable them to secure for their general varnish and paint business a supply of the finest linseed oil that can be produced; while it will mean the extension of the company's constantly increasing trade with the North-West. These changes will involve the erection of buildings, and the placing of machinery and appliances, which will be taken up as soon as the mechanical department can tackle it. The mechanical superintendent has been in Winnipeg with Mr. Munro, and is already at work on plans and inventory of the work to be undertaken.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, June 14, 1905.

Ashes.—There have been some fair-sized receipts of late, as shipments now go, and values are easier, dealers apparently not being disposed to pay much over $5.35 for first pots; seconds are quoted at $4.80 to $4.85, and pearls nominally at $7 to $7.25.

Cements and Firebricks.—A good business is being done in cements; no very large contracts are being placed, but the aggregate of moderate orders is quite substantial and values are firm. The importations of British and Belgian cements show a material falling off, as Canadian and American makes are getting a stronger hold of the local market. We quote Belgian cement at $1.80 to $2; English, $1.90 to $2; American and Canadian, $2.30 to $2.40, less rebate for returned packages; firebricks, $17 to $22.

Dairy Products.—The make of cheese is evidently large. Receipts last week were 66,108 boxes, and eight steamships took out 70,347 boxes to British ports, over half the above quantity going to London. The exports for the corresponding week of 1904 were 22,000 boxes less. Notwithstanding the liberal offerings the market is a peg stronger than a week ago, finest Ontario makes being quoted at 9½ to 9⅝c., and finest Quebecs at 9¼c. Butter is also going out pretty freely, shipments last week aggregating 13,507 packages, as against 11,680 packages at date last year. The market is easier at 19 to 19¼c. for choicest grades of creamery.

Dry Goods.—Some shipping of fall goods is already being done, but the wholesale movement at the moment is not a very active one. Collections are reported fair in Eastern Canada, but a great deal of renewing is being done by merchants in Manitoba and the North-West, where everybody seems to be putting every dollar they can lay hands on into land. The Penman Manufacturing Co. announce an advance in sweaters, littlefolk coats, etc., and the Canadian Colored Cotton Co. advise an advance in several lines of higher grade tickings.

Groceries.—Since last writing there has been some little increase in the distribution of merchandise countrywards. We last week referred to the reported shortage of first crop Japan teas, and advices are now to hand of an advance of from 1½ to 2½c. in the higher grades of these goods. In Ceylons the market is rather in buyers' favor. In the sugar market there has been no recent variation, $5.15 being the factory price for standard granulated in barrels. Some large receipts of raw sugars are reported within the week for the local refineries, including a cargo from the Mauritius, one from the West Indies, and a mixed cargo of sugar and molasses from Barbados.

Hides.—Trade in this line now rules on the quiet side, receipts of both beef hides and calfskins being comparatively light. Quotations are unchanged at 10c. for No. 1 beef hides; calfskins, 15 and 13c. for Nos. 1 and 2, respectively, and 25c. for lambskins.

DELAYS ARE DANGEROUS.

The Accident and Sickness Policies

ISSUED BY THE

INSURANCE CO.

22-24 Adelaide St. East, TORONTO.

are by far the BEST, CHEAPEST and MOST COMPREHENSIVE in the market.

Full Information Freely Given.

A. C. C. DINNICK, Managing Director.

Leather.—There has not as yet been any advent of renewed activity in the local market, boot and shoe manufacturers being still light buyers. English demand for sole is reported as more active, but enquiry from that quarter for black leathers is slow. Values are all steady. No. 2 manufacturers' sole is quoted at 24c.; slaughter sole, 27 to 28c.; Western splits, 20 to 21c.; Quebec ditto, 15 to 17c.; glove grain, 11½c.; pebble, 11½ to 12c.; buff, 12½c.; harness leather, 30 to 31c.

Metals and Hardware.—The movement

ON THE MOVE!

OUR FACTORY HAS BECOME TOO SMALL.

We have purchased the large lot on Wellington Place, corner Draper Street, on which a building is now in course of erection, designed especially for our business.

JULY 1st, 1905

WILL FIND US IN OCCUPATION OF THE NEW FACTORY.

Accessible by street car from Front Street, King Street or Bathurst Street, and only a few steps from Belt Line. The new premises are situated a little West of Spadina Avenue, on South side of Wellington Place, in the very heart of Toronto's new manufacturing district, where we shall be happy to see our customers.

The British Mortgage Loan Co.
OF ONTARIO.

Dividend Number 54.

Notice is hereby given that a Dividend at the rate of Six per cent. per annum, on the Paid-up Capital Stock of this Company, for the half-year ending the 30th June, instant, has this day been declared, and that the same is payable at the office of the Company, in the City of Stratford, on and after

Monday, the 3rd Day of July next.

The Transfer Books will be closed from the 16th to the 30th instant, inclusive.

By order of the Board.

WM. BUCKINGHAM,
Stratford, June 5th, 1905. Manager.

DEBENTURES
OF CITY OF GUELPH FOR SALE.

Sealed tenders addressed to Richard Mitchell, City Clerk, Guelph, will be received up to and inclusive of Monday, the 19th day of June, 1905, until 1 o'clock p. m., for the purchase of $60,000 in all, of Debentures of the City of Guelph issued as follows:—

$7,000 under By-law for improvement of the Guelph Waterworks.

$23,000 under By-law to provide for an addition, etc., to the Guelph Collegiate Institute.

$30,000 under By-law respecting the Guelph Radial Railway Company, ratified by Act of Parliament.

These Debentures will be repayable at the end of 30 years and will bear interest as follows:—The $7,000, 4¼ per cent., and the others 4½ per cent., all payable half yearly. The highest or any tender not necessarily accepted.

Further information will be furnished on application to JOHN NEWSTEAD,
Chairman Finance Committee.
Guelph, 6th June, 1905.

in these lines is still quite fairly sustained, there being no evidence as yet of a tendency to mid-summer slackening, except in pig iron, in which there is comparatively little doing. No. 1 Summerlee is quoted at $19, and No. 2 selected at $18.25; of English iron there does not appear to be any here at present. The Londonderry furnace is reported to be turning out a good quality of iron, for which $19 to $19.25 is quoted; Midland is reported sold well ahead. Bars, nails, wire, etc., remain at old figures. Boiler plate is quoted at 2c., and iron pipe at $4.20 per 100 feet for inch in an ordinary way. Black sheets are steady at $2.15 for 28 gauge; Canada plates, $2.30; galvanized Canadas, $3.85 to $3.90 for fifty-twos, and $4.10 to $4.20 for sixties; galvanized sheets, $4.15; Ternes, $6.50; tinplates, $3.65 for cokes, and $3.90 for charcoals. In antimony there has been a tremendous jump of £10 a ton, and local figures are up to 11 to 11½c.; spelter, 6¼ to 6½c.; lead firmer at $3.40 to $3.50; tin shows some tendency to advance, and is firm at 32½ to 33c.; ingot copper, 16 to 16¼c., in a jobbing way; sheet ditto, 21 to 22c.

Oils, Paints and Glass.—The big advance in turpentine has not been wholly sustained, though some professed to look for even higher figures, and quotations are off 5c., the present figure for single barrel lots now being $1 per gallon. Linseed oil is unchanged at 50c. for raw, and 53c. for boiled. Ground white lead is quoted at $4.50 for chemically pure, and putty at $1.40 in bulk. Glass and other lines are without change.

⁂

TORONTO MARKETS.

Toronto, June 15th, 1905.

Chemicals, Drugs, etc.—Little appreciable change has taken place in the local drug situation since last report. Prices continue steady for the staple lines, and the same for most of the salts. Opium and quinine are both somewhat dull at present. A report from Great Britain says that there is no great amount of activity at present. Export business is fairly good, and some branches of the home trade are latterly looking rather better, but the total volume of business does not appear to be large, transactions continuing to be mainly for moderate quantities for near delivery. There is, however, no feeling of depression, although quiet times are now looked for with the approach of the holiday season and the end of the half-year. In the heavy alkali branch there is steadiness as to values, but demand is not active. Bleaching powder is not taken readily against contracts, and some quantities are offering for re-sale. Caustic soda is quiet. Ammonia alkali is fairly active.

Head Offices—Queen City Chambers, Toronto

SCOTT & WALMSLEY,

ESTABLISHED 1858.

Managers and Underwriters.

Chlorates of potash and soda are firm at old figures.

Dry Goods.—No special feature is noticeable in the trade this week. A fair amount of business is moving and this has improved especially in such summer lines as dress goods, with the warmer, more seasonable weather of the last two or three days. No variation has taken place in the stiff feeling with which cotton and woolen staple goods are held. Lustres, mohairs, and alpacas retain their strength at the recent advances. Payments are about average.

Union Assurance Society

You Need Go No Further

THE HUGH C. MACLEAN CO., Ltd,
Winnipeg Vancouver

Established 1882
THE COMMERCIAL
THE WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST.

Flour and Grain.—No great volume of trade in flour is passing, though the tone of the market is more encouraging. Ninety per cent. patents range around $4.45 in buyers' bags, east or west. As to millfeed shorts are somewhat scarce. Bran, however, is dull, and prices easy. There is a better demand for wheat. Oats are firm with a tendency to advance. Peas are on the scarce side, with a good active demand. Buckwheat is in the same condition.

Fruits and Vegetables.—Canadian strawberries made their appearance this week, selling at 13 to 15c. Imported are still fairly plentiful, however. Reports as to the prospects for the whole domestic crop differ very widely. Bananas have fallen off somewhat in demand owing to the higher prices. Other fruits are quoted as follows: Oranges, navels, $4 to $4.75 per case; Medd. sweets, $3.50 to $4; bloods, $4.50; lemons, Messinas, $2.50 to $2.75; pineapples, $3 per crate; cocoanuts, $3.75 per sack; tomatoes, Florida, $2.75 to $3 per crate; southern cabbages, $2 per crate; Mississippi tomatoes, $1.50 per 4-basket crate; cucumbers, $2 to $2.25 per hamper; cantaloupes, $3.50 to $4.50 per crate, according to quality.

Hides and Skins.—At the recent advance, hides retain their firmness. There is little appreciable change in the market since last report. Business in leather continues quiet. Prices have remained unchanged, in spite of the recent advances in hides.

Hardware and Metals.—Since last week when we gave a more or less extensive review of the conditions in the local hardware trade, few changes have occurred. The demand for seasonable lines continues unabated. Prices continue good with little tendency to vary more than fractionally. For metals, the prospects are said to be for a continued good movement. An English report of recent date said: "This has been an extraordinary month in the pig-iron markets. The month commenced with fairly firm prices, but a change soon set in, followed by a rapid collapse in values on the termination of the "corner" in Cleveland iron. Prices of Scotch iron are now about 4s. 6d., and of Cleveland iron about 5s. 6d., lower than they were a month ago; the markets have become steadier during the last few days, but the position is by no means clear, and little business is being done, buyers preferring to wait. Copper has declined steadily, and is about 25s. down. Tin has fluctuated, but closes at a reduction of some 45s. during the month. Spelter has eased about 7s. 6d., and is steady. Lead is 5s. dearer, and is now firm."

Provisions.—Receipts of butter have now fully caught up to the demand, and values are easing off a little. Some lots are being put into storage. Steadiness is the verdict of the cheese trade. Eggs of really choice quality are in somewhat scanty supply, and prices range between 16 and 17c. The provision trade is normally brisk. Dressed hogs advanced a few cents last week, while live hogs are steady. Products are firm.

Wool.—Receipts of new clip wool are on the light side, whether because of the cold, wet summer or through some other cause is not known. In the meantime prices remain nominally the same.

* * *

Reports of a various nature still continue to fly in respect to the designs of the United States Steel Corporation for the erection of a steel plant in Canada. One report now says the corporation will almost surely put it up on a tract of nearly 1,000 acres, in which it has an interest, near Sandwich, Ont.

Negotiations for the purchase of the E. and N. Railway by the Canadian Pacific have been practically concluded, says a news item from British Columbia, and the latter will take over the line and the adjacent land at a date shortly to be announced.

The Hudson's Bay Company has declared a dividend of 48s. per share. In January last, it declared one of 10s., which makes a total dividend of 58s. for the year, the largest in the company's history. Last year, the total dividend was 35s., while in 1900 it was only 15s.

Canadians may be interested to know that a club is being formed in London, Eng., for the accommodation of city and provincial business men, which heretofore has been somewhat of a lack in London life. The club starts under good auspices, and its prospects are said to be bright.

The customs returns for New Westminster for the month of May show that the total imports at that port were $114,083, on which the duty collected was $13,726, a substantial increase over the same month last year. The exports for May, 1905, amounted to $318,725.

G. A. Holland & Son Company, wall paper dealers, Montreal, have, we see in a city paper, purchased the premises adjoining them on the western side. The firm will either re-construct their present building or build a new additional structure, owing to the rapidly increasing business.

The Toronto, Hamilton, and Buffalo Railway Company held its annual meeting in Hamilton a few days ago, and elected directors, as follows: William K. Vanderbilt, William H. Newman, and Charles F. Cox, of New York; John N. Breckley, Rochester; Sir Thomas Shaughnessy, and David McNicoll, of the Canadian Pacific; Henry B. Ledyard, Detroit; D'Arcy Scott, Ottawa, and E. B. Osler, Nicoll Kingsmill, and W. P. Torrance.

The Canadian General Electric Company, Toronto, has closed a contract with the West Kootenay Power and Light Company, for two 4,500-K.W. vertical type alternators, and two 150-K.W. exciters. The latter concern has also 3,000-K.W. of Canadian General Electric Company's generators installed in its present plant, which will ultimately be closed down when the new plant is completed. It is understood that a portion of the C.P.R.'s boundary section may ultimately be operated by electricity from the same plant.

The very old and one time prominent Quebec leather firm of O. L. Richardson & Sons (in liquidation), has assigned on demand. Last January it was found necessary to ask a general extension of time, which arrangement it has apparently been found impossible to carry through, and affairs are now in the hands of Lefaivre & Taschereau, assignees. The business of late years has not been an active one, and the liabilities last January were shown at about $38,000.——Elzear Cote, a currier of the same city, for quite a number of years in business in a moderate way, is also reported in trouble, and has made a proposition to pay creditors 20 per cent. of their claims.

A GOOD POLICY

for policyholders is the 20 pay life guaranteed option policy issued by

Head Office—Waterloo, Ont.

The Mutual Life OF CANADA

In this style of policy the Benefits conferred and the Premium rates charged are more liberal than those in any similar policy issued by other companies.

Be sure to examine it before insuring elsewhere.

THE CANADA LIFE

holds Policy Reserves greater by $3,000,000 than the present Government requirement.

The business in force is three times as great as that of twenty years ago, while in the same period the Assets have increased four fold.

Each year with its increasing age, Canada's leading Life company

Shows Increased Strength.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

SOME LIFE INSURANCE CONSIDERATIONS.

There can be little doubt that the average man is sick of life insurance agents. Occasionally, perhaps often, he is badgered into signing his name on the dotted line simply because he is tired of saying "no," or of making excuses for delay any longer. But a more general result is that he is so annoyed by the very appearance on his threshold of the ordinary agent that he closes his heart and his ears from the start and refuses to think about the business at all.

Of course, it is not the poor agent's fault—not as a rule, that is, because no doubt there are a certain proportion who have no tact at all. The agent has to hustle to get the business, and, without the business, his company has no great regard for him. The fault lies, without a doubt, in over-competition, and in the false notion that new business has to be obtained, whatever may be the cost. The fact that this cost practically eats up the whole of the first premium, and sometimes something of the second, shows that something is radically wrong in the methods employed by some of the companies.

Absolutely new territory is so hard to obtain, that in most fields there are three agents where even one would find himself only barely occupied with profitable prospects. One consequence is that the agents are over-worked in going over the field again and again, and another is, that the clientèle, being persuaded, as it were, against their will, speedily drop their policies, after the payment of one or two premiums. And this, under the existing circumstances, is the reverse of profitable to the companies.

THE LIVE STOCK TRADE.

Almost demoralized conditions of trading prevailed at the Toronto Cattle Market this week, owing to the large number offering. At the Union Stock Yards there was not so much congestion, and prices continued about the same. In Montreal, prices seem to be about the same. For export animals at the Toronto market, the demand was only limited, and the supply considerably in excess. Prices declined perceptibly under the dull enquiry, and while one or two lots sold for $5.50, few fetched over $5 or $5.25. Best grades of butchers' were few and far between, and prices were distinctly easier. Butchers' animals at the Junction were not in very great supply, and all sold pretty well. The market for stockers and feeders has been dull in sympathy with the absence of interest in other lines. Good milch cows are warranted. Receipts of calves have been on the light side, and there is a pretty good demand for the better qualities. Sheep and lambs at both yards have been fairly firm, under an improving demand. In live hogs an increasingly dull trade is reported, perhaps owing to hot weather. The following summary will give readers a good idea of the prices for average lines of stock: Export cattle, choice, $5 to $5.50; do., good to medium, $4.75 to $5; bulls, $4 to $4.50; cows. $3 to $3.75; butchers' picked, $5 to $5.15; good to choice, $4.50 to $5; fair to good, $4 to $4.50; do., common, $3 to $3.50; do., cows, $2.50 to $3.50; bulls, $2.50 to $3.50; feeders, short-keep, $4.25 to $5; do., medium, $3.90 to $4.25; do., bulls, $3 to $3.50; stockers, good, $3.50 to $4; do., rough to com., $2.50 to $3; bulls, $1.75 to $2.50; milch cows, each, $30 to $50; export ewes, per cwt., $4 to $4.25 do., bucks, per cwt., $3 to $3.50; spring lambs, $4 to

$5; calves per lb., 3½ to 5½c.; do., each, $2 to $7; hogs, selects, per cwt., $6.65; do., lights, $6.40; do., fats, $6.40.

Advices from Liverpool say that the trade (up till 15th June), was slow for beef, the demand from London having dropped away to nothing, while local buyers only had an occasional deal. The much needed rain probably had a depressing effect on business also, anyway it improved a few days ago to such an extent that best bodies were occasionally making up to 11c., and country butchers have been more in evidence. The lighter run of cattle available also gave sellers the chance they were looking for, so that on the whole the clearance has been a much better one than many expected. For plainer carcases the improvement is not so pronounced, prices keeping to the level of last week, say 9½ to 10c. On cow and bull beef, there is a fractional advance noted, but on the week's business quotations practically remain at 7 to 9½c.

The feeling in Canada with regard to the continued refusal of the British Government to abolish the embargo on Canadian cattle seems to be becoming noticed and understood in the Mother Country, and some of the newspapers there have been taking up the cudgels on our behalf. In reply, the Right Hon. Minister of Agriculture made a brief statement to the effect that he felt it was impossible to depart from a policy deliberately arrived at and to incur the risk which undoubtedly attaches to the importation of living animals from a country which—though it might for the moment be free from cattle disease—had an open frontier of some 4,000 miles. He had no doubt the Canadian Government and people appreciated the risks involved, and the facilities given for the importation of fat stock—subject to slaughter on arrival, appeared to him to be calculated to reduce to the utmost any hardship which the necessary restrictions on importations impose on the industry. No doubt, as the Right Hon. gentleman so nicely puts it, Canadians *do* appreciate, etc.

* * *

BOND INVESTMENTS.

It is probably only those closely connected with financial affairs that have any adequate idea of the growth which the business of investing in bonds has made of recent years in Canada. The constant fluctuations taking place from time to time in connection with government, city and municipal debentures, would probably surprise most people. It is not many years ago that the market for such securities as these was limited to banks, corporations, fraternal societies and estates. Now, however, the private investor is a large factor in the market. Five or six years ago, before the South African War, the yield of interest on municipal bond securities was very low, township bonds selling to yield about 3 5-8 per cent., while a 4 per cent. rate for a good municipal security was eagerly snapped up. The tide suddenly turned, until an abnormally high rate of interest could be obtained for the same security. A little over a year ago the city of Guelph sold a large block on practically a 4½ per cent. yield. Since that time, however, the demand for bonds has been so great and money has become so much easier that the same city sold $60,000 worth on virtually a 4% basis. This was last Monday, and it looks very much as though the yield would have a tendency to become still less. The prosperity of the West has attracted the eyes, not only of investors in land, but of those who invest in bonds. This is shown by the city of Winnipeg having sold over a million dollars of debentures last week on practically a 4 per cent. basis, while towns such as Moosomin, Regina, Medicine Hat, and other places of a similar nature, have readily found purchasers for their debentures on about a 4¾ per cent. return. It looks as though history will repeat in the West what has been the case in Ontario, that is to say, the better places become known, and the more demand there is for their securities, the less the yield will be to the purchaser.

* * *

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian Banks for May, 1905. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, and average holdings of specie, Dominion notes, etc.:

Canadian Bank Statement.

Current Loans elsewhere	23,128,257	22,781,157
Loans to Dominion and Provincial Governments	2,486,270	2,711,486
Overdue debts	2,286,239	2,329,456
Real estate	668,225	657,274
Mortgages on real estate sold	611,348	626,495
Bank premises	10,482,732	10,609,869
Other assets	6,990,190	6,275,325
Total assets	$746,422,543	$738,654,287

Average amount of specie held during the month	17,020,615	16,995,368
Average Dominion notes held during the month	37,459,927	37,293,138
Greatest amount notes in circulation during month	61,339,132	62,226,126
Loans to directors or their firms	8,550,748	8,829,777

The figures do not appear to call for any lengthy comments. A number of banks end their financial year on 31st May, and several additions to the Rest have in consequence been made. The Merchants Bank of Canada has added $200,000, the Union Bank of Canada $100,000, the Bank of Hamilton $135,000, the Traders Bank of Canada $400,000 (of which $300,000 was derived from premiums on new stock), which, with one or two additions of lesser amounts, make a total increase of $954,000, thus bringing the combined reserve funds of all the banks to $55,862,330, or 68 per cent. of the total paid-up capital. In May, 1904, the total reserve fund was $52,309,458, or 66 per cent. of a paid-up capital of $78,801,319, while in May, 1903, it stood at $47,608,280, being 62 per cent. on a capital of $75,979,565.

Notes in circulation were reduced during the month by $1,805,000, rather an unusual feature. As a rule, circulation increases slightly at this time of the year, but the increase is never very large, while a small decrease is occasionally shown. The present decrease is, however, larger than in any recent year, and is pretty well divided amongst the banks generally.

Deposits this month make a better showing than they did in April. Deposits in Canada have increased by $5,583,000, and outside Canada by $3,720,000, a total of $9,303,000. Almost the whole of the increase outside Canada is in the deposits held by the Bank of Montreal, which have increased from $18,659,000 to $22,154,000. The total increase in April was some $2,500,000, or a total growth for the two months of $11,803,000. In 1904 the increase in May was $14,545,000, but there was a reduction in April of $5,084,000, leaving a net increase for the two months of $9,461,000.

Amounts due to banks outside Canada have increased by about $1,600,000, while sundry liabilities show a reduction of $1,428,000. Total liabilities have increased by $7,781,000, as against an increase in May, 1904, of $14,851,000.

On the assets side there are few changes to note. Assets in the shape of cash, bank balances, securities, call loans, etc., are, in the aggregate, practically unchanged, the total being $262,568,000, as against $261,157,000 a month ago. Call and short loans outside Canada, however, have been reduced by some $4,250,000, about $2,000,000 of this being in the loans of the Bank of British North America and $750,000 in those of the Merchants Bank of Canada.

Current loans in Canada have increased by $5,800,000, thus continuing the movement to which we drew attention last month. In May last year, current loans were stationary and the total increase for the two months of April and May was $5,644,000, as compared with $14,854,000 for the same two months in 1905. In May last year the banks were able to show readily convertible assets of the same amount as in March: this year there is a reduction of $4,400,000 from the March figures. There is apparently a tendency on the part of three or four of the smaller banks to yield to the temptation to increase their advances, and to allow their holdings of cash and other available resources to fall below the level which a conservative banker would consider it judicious to hold. The changes from the previous month are, in one or two cases, quite marked. It is to be hoped that by the end of June an improvement will be shown.

While it cannot as yet be said that there are any distinct indications of "tight money" in the near future, it is becoming more and more evident that money will be no drug, and that the borrower who is likely to need an increased credit during the next few months will do well to make his arrangements in good time.

May is the month in which a number of banks close their books for the year, and their annual reports are awaited with a good deal of interest. Speaking broadly, it may be said that the reports which have appeared indicate that, on the whole, the profit earning powers of the banks have been well maintained during the past twelve months. In some cases slightly reduced earnings are shown, but it may be said with confidence that, despite the slackening in business activity which was experienced in 1904, the prosperity of the country shows no signs of impairment. Crop prospects were never better, immigration both in quality and quantity is fully up to expectations, and the development of the West is proceeding with great rapidity. If all goes well, 1905 should be a record year for Canada.

* * *

OUR RELATIONS WITH JAPAN.

Until the year 1894, Canada was included in the old treaty, concluded between Japan and Great Britain some fifty years ago, but in the revision which was made in 1894 between the two nations a special clause, as follows, was inserted in its Article XIX. at the request of Great Britain:

"The stipulations of the present treaty shall be applicable so far as the laws permit, to all the colonies and foreign possessions of Her Britannic Majesty, excepting to those hereinafter named, that is to say, except to, India, the Dominion of Canada, Newfoundland, the Cape, Natal, etc., etc."

The article further says: "Provided always that the stipulations of the present treaty shall be made applicable to any of the above-named colonies or foreign possessions, on whose behalf notice to that effect shall have been given to the Japanese Government by Her Britannic Majesty's representative at Tokio within two years from the date of the exchange of ratifications of the present treaty."

The Canadian Government was notified in due time, as above stated, to signify her wish whether to become a party to the treaty or not, but the result was in the negative, on the ground that Canada had been making it her national policy not to join any treaty between Great Britain and foreign countries, so long as it had continued the Most Favored Nation clause in the customs tariffs. Japan is, however, bound by the treaty stipulations with Great Britain to observe this special clause, until the former gains her power and right to abrogate the existing treaty in 1910.

The so-called Most Favored Nation clause in the Anglo-Japanese treaty is in fact most disadvantageous to Japan, as she is placed under obligations neither to extend a certain preferential term to a nation nor to obtain a reciprocal term from another country, as in both cases she has to extend such special terms to all other nations with treaties with her. This clause being imposed upon Japan by Great Britain, at the time when our treaty was revised, Japan has no means to observe the stipulation, for the time being, until she becomes free of her obligation to Great Britain. The existence of this special clause in the Anglo-Japanese treaty, however, does not affect the Canadian policy of preferential tariff with Great Britain and her sister colonies, so long as this special tariff is not extended to any foreign nations. However, as the matter stands now, Canada is not a party to the Anglo-Japanese commercial treaty, and therefore her products are exempt from obtaining the lower or so-called conventional tariffs. Besides this, there are a great many disadvantages accruing to Canadian citizens on account of their not being the parties to the Anglo-Japanese treaty.

It is quite a mistake to suppose that Canadian goods are discriminated against in Japan or that there exists a sentimental objection among the Japanese official circles against Canadian goods. While it is true that there exists material discrimination in Germany against Canadian goods, there certainly exists no discrimination in Japan against them. Both the Japanese Government and people are very anxious to cultivate closer friendship and larger trade between the two nations. Instances can be given to prove how anxious they are to encourage Canadian trade. The Japanese Minister of State for Agriculture and Commerce has lately made a request to Hon. Sydney Fisher to supply the former with all the names and addresses of Canadian manufacturers and producers who sent their goods to the National Exposition held in the city of Osaka in 1903 for the purpose of preparing a hand book of information for Japanese buyers and consumers. He has also made a request that catalogues of the Canadian manufacturers should be sent to him, for the use of the Government Commercial Library, which has been lately established by the said department in connection with the Imperial Commercial Museum at Tokio. This and other instances will strongly prove how desirous the Japanese people are to promote Canadian trade in Japan, so long as they can find in Canada any marketable goods for the Japanese consumers.

Only the other day there came from Japan a couple of very wealthy gentlemen, who shipped from the Woodruffe farm and others a herd of Ayrshire cattle to Japan. They were more than satisfied with the result of their visit to Canada, having found better and much purer stock than those they had been for years getting from the States. These people, while they had been engaged in a daily business for the last twenty years, had previously no knowledge that Canada possessed such pure and beautiful stock. This reasonable blunder is due to the fact that Canadians have never advertised their goods in the Japanese market. This is only but one illustration of Canada's conservative system of conducting her foreign trade, and we are afraid there are plenty of similar cases. Among many drawbacks thus far, Canada's refusal to become a party to the Anglo-Japanese treaty stands first, but this question only rests with the Canadians to decide, they having the option of joining the treaty or refusing to do so and suffering from the consequence.

The articles which come under the conventional or lower tariffs are as follows: They are mostly manufactured goods: Lorgnettes or jumelles and similar articles. Philosophical, chemical, drawing, surveying, surgical and all other scientific instruments. Clocks, and parts thereof. Locomotive engines and parts thereof. Printing machines. Milk, condensed or desiccated, sterilized. Hats, all. Buttons of all kinds. Acids, all. Bismuth, subnitrate of. Hops. Phosphorus, amorphous. Potash, bromide. All other bromides. Potash, chlorate and iodide. Putchuk. Saffron. Insect powder. Dyes, alizarine and aniline. Indigo, dry. Logwood, extract. Paint in oil. Glass, window. Leather, sole and all other. Iron and mild steel, including pig, ingot, bar, hoop, sheet, and plate, pipes, nails, tinned plate, wires. Lead, pig, ingot, and some others. Some kinds of steel, other than mild steel. Tin, block, ingot, sheet plate. Zinc, several kinds. Oil, paraffin. Paper, printing. Cotton yarns. Cotton, several kinds of tissues. Woollen yarns. Alpacas. Bolzarine. Flannels. Woolen stuffs of several kinds. Some silks. Flax or linen yarns. Hemp, thread and canvas. Blanketing and whipped blankets, in plain weave. Handkerchief, cotton, in piece. Cotton yarns and threads of all kinds. Champagne and similar sparkling wines in cases. Still wines, of all kinds. Caoutchouc and gutta percha. Carriages, bicycles, tricycles, and parts thereof. Cement, Portland. Dynamite. Furniture. Jewelry. Label, for bottles, tins, etc. Lamps, all kinds of, and parts and accessories, metal or glass. Imitation of precious stones and pearls. Soaps. Perfumery; liquid, such as essences, oils, vinegar, alcohol, and similar aromatic liquids; several other kinds, not liquids, such as salts, powders, cosmetics, pomades, pastes, etc.

Of these there are many things which Canadians are able to produce and export to Japan, and if placed under this special tariff, they would derive great advantage in the market, as the conventional tariffs are generally 5 to 25 per cent. and in many cases 60 to 75 per cent. less than the general tariffs.

* * *

BUSINESS IN NOVA SCOTIA.

There appears to be a general impression in the air, in Nova Scotia, that times are rather bad in that Province at present. Our correspondent in that section has been enquiring into the facts of this state of things, and his conclusion is that it is extremely difficult to find any individual business man with much complaint to make. The basis of this idea of depression appears to be that the farmers in a large section of the Province had a hard winter. The almost complete failure of the hay crop in Nova Scotia and Prince Edward Island, and the partial failure of some of the other crops, left the farmers in a very poor condition to face the winter. Hay was brought in at great expense. A great many were unable to secure it at all, and were obliged to kill their cattle. This is now being reflected in the very small make of butter this year. The large amount of money sent out of the Province left the farmers with little or no ready cash; and perhaps a better description of the present conditions of affairs would be to say not that "times are poor," but that "cash payments are poor," for there does not appear to be any dropping off in consumptive demand, and in some lines, such as dry goods and millinery, which are apt to suffer most keenly in times of depression, trade has been particularly good. The worst that can be said is that there has been a set-back in one or two parts of the Province. However, with the continuance of the present favorable outlook, this will soon be overcome. At the same time, it must be borne in mind that collections will likely be poor for some time. One million dollars sent out of one part of a Province for hay leaves the farmers with very little ready money, and some have discounted their expectations.

* * *

BANK MEETINGS.

It needs but little "proving" to show that the Imperial Bank of Canada continues to make remarkable growth. Out of the net profits for the year closing on May 31st last, of $510,951, allowance was made not only for bad and doubtful debts, but for contributions to the Pension and Guarantee Funds. Dividends were also paid at the rate of 10 per cent. per annum, or a sum of $300,000, the bank premises account was credited with $25,041, the rest account added to by $150,000, and the profit and loss account increased by $35,909. Liabilities in the shape of deposits and circulation amount to nearly $24,000,000, while the total liabilities and the assets stand at $33,095,525. The development of the country and the growing business of the Imperial have rendered necessary a still further increase in its capital stock, but as authority for this increase was given three years ago, it was merely announced at the annual meeting that the remaining issue of $1,000,000 would shortly be allotted at a premium of 100 per cent. During the year, six new branches have been opened.

The profits of the Standard Bank for the year were so satisfactory that again a dividend of 10 per cent. was declared. The balance, after providing for this and reducing the bank premises and furniture accounts, stands at $39,600, which has been carried forward to Profit and Loss Account. This now stands at $62,114. The bank's total assets amount to $16,652,801. An agency was established a short while ago in Blenheim. The highly respected Standard Bank is evidently well to the fore in the development of business.

At the fortieth annual meeting of the shareholders of the Union Bank of Canada, it was pointed out that the net earnings of that institution for the year had been $382,173, or about 15 1-4 per cent. of the capital, which cannot be considered anything but satisfactory. From these earnings, two half-yearly dividends of 3½ per cent. each were paid, and the sum of $100,000 written off bank premises and real estate. The capital stock now stands at $2,500,000, and, with an addition of $110,000 to the Reserve Fund, the latter is now $1,100,000. There is nothing to cavil at in the rate of progression here.

The general business of the Ontario Bank continues to improve steadily. Since the last annual meeting, deposits have increased by $1,066,929 and the sum totals of these and notes in circulation now come to $13,348,589. The net profits, after deducting charges of management, interest accrued on deposits, making provision for bad and doubtful debts, amount to $152,583, which must be considered encouraging. An addition was made to Rest account of $50,000, and this now stands at $650,000. A branch bank has been established at Holstein, Ont.

Since its last annual meeting, the business of the Traders' Bank of Canada has shown good growth in every department. The deposits increased from $13,311,296 to $15,809,740, the note circulation from $1,868,900 to $2,111,350 the assets from $18,573,533 to $22,330,016. During the year, too, the substantial addition of $400,000 was made to Rest account, which now stands at $1,100,000. The president stated in his address that the addition of $1,000,000 to the bank's capital stock, authorized last year, had all been taken up with avidity, so that the paid-up capital now totals $3,000,000. Arrangements have lately been completed for the erection of suitable new fireproof premises, the old building having proved quite inadequate for the bank's growing business.

* * *

FIRE-FIGHTING APPARATUS IN TOWNS AND VILLAGES.

Repeatedly we have called attention to the need of constant care on the part of towns and villages which possess fire engines or other appliances for fighting fire. Every week, if possible every day, some one should see that the water tanks have water in them; that the hose are perfect, and have proper couplings; that the steam fire engine is in thorough order. And we have given instances of heart-breaking losses and disasters that took place because of neglect in these particulars. Now we get from Manitoba the description of a fire in the town of Morris, which presents a recent example. The incident of the lack of a tongue from the town bell illustrates what we have tried to warn municipal officers and residents against. The Morris Herald says:

> "The opportunity presented itself for a practical test of the new chemical fire apparatus a trifle sooner than was anticipated, when on Sunday morning, about three o'clock, a small shack in the north end of the town was destroyed by fire. An alarm was turned in before the flames had gained much headway, but the time required for a dozen men to haul the chemical engine to the seat of trouble was sufficient to allow the fire to grow to such proportions that the stream when turned on proved of no avail. As already stated by the Herald, the apparatus is altogether too heavy to be drawn by men more than a block, and even for that distance no time can be made. It is a foregone conclusion that unless there is a team on the ground ready to be hitched on, the chemical in its present condition is little or no better than a bucket brigade. As to its extinguishing powers but little can be said for or against it as the result of this experiment. It was, however, proven that the stream is inadequate in force and volume to be of any material benefit after a fire is well started.
>
> "In connection with this fire there are one or two things that we wish to call the attention of the head of the fire department to, viz.: On the arrival of the party who turned in the alarm at the fire hall, the bell was found to be minus a tongue. Nothing of a metallic nature could be found on the premises, and a piece of scantling had to be used as a tongue. This had the effect of awakening the nearer residents, one of whom was thoughtful enough to bring an axe. Until such time as the bell is raised a hammer should be left attached to it to be used in case of emergency. Then there was but one cylinder of the chemical charged, and no material at hand for recharging. The blame of these neglects does not rest on any one in particular, but it does no harm to call them to mind. The origin of the fire is unknown, but is supposed to be of an incendiary nature."

* * *

The Manitoba Fire Assurance Company, which is affiliated with the Liverpool and London and Globe, has appointed Messrs. Ridout, Szeliski & Strickland as special agents for Toronto.

BUSINESS EDUCATION IN SCHOOLS.

The lamentable results which attend the taking away of lads and girls from school at an early age and of their then going to business colleges and learning shorthand and typewriting without proper ground work, are too well known by the average firm to need much comment. The usual consequence is that while these young people have a fair knowledge of these particular subjects, so far as mere manipulation will carry them, they are yet very deficient in the rudiments of knowledge. In spelling, arithmetic, composition, and so forth, they know practically nothing, which naturally minimizes their value as clerks very materially. We are glad to see that an attempt is to be made by the British Columbia Department of Education to remedy this state of things. In order to furnish an incentive to a growing class of pupils, who desire to earn their own living at an early age, to remain at the Public Schools, the Department of Education has now decided to hold commercial courses in these institutions. Upon a pupil passing the entrance examination, he has the choice of taking up the regular work of the junior grade or embarking on the commercial course. A pupil taking the commercial course may not, however, after completing it, take up the McGill matriculation, McGill first year or McGill second year courses unless he or she reverts to the regular junior grade course. Any pupil taking the regular junior grade course on entering the High School may subsequently take the commercial course.

We will await a report upon the working of this plan, with interest.

⁂

THE ROYAL ARCANUM BREEZE.

The proposed changes in the rates of the Royal Arcanum, as adopted by the Supreme Council last month, have stirred up a veritable hornet's nest among the members. What is worse for the ultimate success of the Order, is the fact that there is a growing disposition on the part of a large section of the membership to make organized protest against the new schedule, in spite of their being told again and again that under no circumstances will there be any revocation, or even modification, of the decision of the Supreme Council. The truth is that, unless some such decided increase in the premium rate is made, it can be only a short time before the Order will have to go out of business. The revenue from the present scale of assessment during the last two years was not sufficient to pay the mortality claims; the surplus in the current cash account has been exhausted, and the Emergency Fund trenched upon. This made it evident that one of three things must be done—either readjust the rate, go back to the old policy of calling extra assessments or use up the Emergency Fund.

The society's official organ gives some details of the manner in which the new rates were fixed. It is claimed that an experience of twenty-seven years has been sufficiently long upon which to base permanent rates. This experience has been compiled, the mortality and lapse statistics carefully studied, and the actual cost of each member at each age for each certificate determined according to that experience. A mortality table was constructed from this experience, and rates deducted therefrom. Their accuracy is said to be vouched for by competent experts.

Before the present scale of assessment, which took effect August 1, 1898, had been two years in operation it was evident that it was operating with gross inequity towards members of different ages. Had the scale of assessment adopted in 1898 been applied to all members at their attained ages, there is no doubt that the inequities of the scale of assessment would have been reduced to a minimum, and the revenue sufficient to last for a long series of years. It is said that not one dollar of the Emergency Fund was contributed by any member more than 55 years of age on August 1, 1898, when the present rates took effect.

The mortality costs for the ages of 55 and over exceed the contributions of those members who were paying at the ages at which they had been assessed prior to the rates taking effect. These inequities would have been perpetuated and aggravated still further if any revision had been attempted on the basis of three or four or five assessments, and dividing the amounts by 12, so as to make a monthly payment; or if the new rates had been applied to the members at their assessed ages the result would have been much more inequitable, and it would not have been treating new members fairly. It is hoped that the new schedule will wipe out the inequalities and deficits, which even the officers now admit to have existed to an unbearable degree.

⁂

OUR HALIFAX LETTER.

There seems to be at least a possibility of the removal of the dogfish nuisance. The destruction this pest has wrought to the fishing interests in the past few years is incalculable. They abound in such numbers that very often the fisherman who starts to pull a fine cod into his boat will have nothing but the head left when it reaches the side of the boat, the voracious dogfish having torn away the remainder in the few minutes required to pull up the line. The fishing interests of this Province have suffered very severely from the nuisance, during the past few years particularly. The Government has now established reduction works at Canso, which well-qualified persons believe will result in the destruction of the dogfish. They will be completed before long, and then, with the co-operation of the fishermen, an attempt will be made to wipe out the dogfish on this coast.

The Scotch steam fishing trawler, "Thirty-three," is at work for the second season, and is having more success than last year. The Scotch nets were too small in the mesh for our fish, and the fishermen in their first season's work did not make enough of a showing to be convincing, although the fish they cured commanded a very high price. They have recently made catches of as high as one hundred barrels of herring a day. There is great interest being taken in the work of this trawler. If she demonstrates successfully, it will mean a very large increase in the revenues of our fishermen.

The mackerel fishing has just begun, and indications are favorable at present. American seiners have been making big hauls off the coast.

The People's Bank of Halifax, as such, has declared its last dividend: 2 per cent. for the two months ending May 31st.

The town of Inverness, Cape Breton, is asking for tenders for a loan of $5,000, repayable with 4½ per cent. interest in thirty years in half-yearly instalments, debentures to be for $100, or multiples thereof. Tenders received up to July 1st.

On Friday last, June 16th, the Dominion Iron and Steel Company put into effect a general increase in wages to laborers on the plant of from $1.30 and $1.35 to $1.40 per day.

There is, unfortunately, another strike on at Springhill, and 1,200 men are idle. There is no sympathy for the strikers, and, indeed, the miners of the Province are rapidly alienating from themselves the sympathy and patience of the public. The Provincial Workmen's Association started out well, but seems to have gone the way of nearly all unions, and has suffered from the want of cool, well-balanced heads. The most trivial circumstance is now sufficient to produce a strike. A month or two ago the men at the Westville colliery were ordered out because of the dismissal of an inefficient employee, who had been neglecting his duties as horse-cleaner. Now, at Springhill a careless lamp-cleaner has been dismissed, has appealed to his "lodge," and the men have all been ordered out on strike, much to the disapproval of the rank and file, it is said. The Provincial Workmen's Association is losing the confidence it once obtained from the people.

Experiments of interest have recently been made in shipping live shellfish from the Atlantic to the Pacific. A Halifax lobster packer, upon order from the Dominion Government, sent a carload of lobsters and oysters to Vancouver. A good proportion of the shipment has arrived alive, and the culture of the fish will be attempted. There are no lobsters found in British Columbia waters, and the oysters known as "Olympia," which came from the State of Washington, are small and inferior. The experiment has been watched with interest. The crustaceans were packed in damp seaweed and iced.

The Commercial Committee appointed to look into the needs of this port in the way of terminal facilities has made an interesting and valuable report, and proposed some radical changes. One was that the I.C.R. workshops at Richmond should be removed to some other site. They are now in the midst of the car tracks, and their removal would give much needed yard room. The buildings are almost ready to fall, so their removal will not be a difficult or an expensive matter. The roundhouse is equipped in a most inadequate manner, and has long been unequal to the demands upon it. The committee proposes that the land between Campbell Road and the railway track, from Roome Street north, should be expropriated, the houses razed, and the track straightened. A second track from Richmond to the deep water terminus is requested. Mr. Pottinger is asked to come to Halifax on monthly visits of inspection, as promised by the Railway Department some time ago. A copy of the report has been sent to the Minister of Railways.

Mackenzie & Mann have a pretty large foothold in this Province now. They have now 240 miles of railway in operation in the western part of the Province; sixty miles in Cape Breton, and on the completion of the Halifax and Southwestern and Middleton and Victoria Beach they will have over 400 miles.

Halifax, June 19, 1905.

* * *

LIFE AND ACCIDENT INSURANCE ITEMS.

Mr. A. R. Howell, superintendent of the Life Department of the Royal, has been on a visit to Montreal and Quebec.

Mr. L. Goldman, managing director of the North American Life, has just returned from a trip to British Columbia. We understand that he is much impressed with the progress being made in Western Canada.

It is announced that Mr. J. W. Alexander, who was president of the Equitable Life Assurance Company, is seriously ill in New York. He is said to have an organic trouble, which the strain of recent events has aggravated.

Mr. Wm. Fitzgerald and Mr. A. K. Blackadar, superintendent and actuary, respectively, of the Insurance Department, Ottawa, have just completed their annual examination of the companies in Ontario, and have returned to that city.

A large number of the life assurance companies in Great Britain are adopting the new "British Office Life Table, 1893." in their periodical valuations. This table represents the most recent mortality experience of assured lives, and will, no doubt, in time take precedence over all other tables of mortality for life assurance purposes. It has taken almost ten years to complete the work, and its construction is a monument to the skill and ability of British actuaries.

The man who says that he has no use for life insurance and can carry his own risk is, maybe, telling the truth. He may have to carry his own risk in that he may be carrying a load which no insurance company will carry for him. The post of duty is the post of honor, in war or peace. The truest honor runs parallel with the truest duty, and with the performance of it. Given the man with a home, it is his duty to provide for it, and the better provision he makes for it, the greater honor. It is a moral force that makes the man, and life insurance is the strongest moral force on earth. Hence, he who would conserve his will, his initiative, and his power to bring things to pass must fix his faith in life insurance.—The Aetna.

Senator McMullen, who, by the way, is a director of the Dominion Life Assurance Company, has just introduced a bill into the Senate, having for its object the elimination of the securities of trust companies from the list of securities which life assurance companies may invest in. The Senator intimated that his object in doing this was to prevent Canadian life assurance companies from attempting to do what has been done in the case of some of the large American life companies, notably the Equitable Life.

The business of accident insurance in France seems to be in a bad way. Only in three cases out of fifteen companies, says the London Review, is an increase of the premium income shown, while the percentage of loss for 1902 has only been partly compensated for by the ridiculously small profit of 3.12 per cent. for 1903. It is not worth while carrying on business under these circumstances, and even this has only been made by ordinary insurance business. The total expenses and claims put together amount to 96.88 per cent.

The representatives of the Standard Life Insurance Co. from Newfoundland, Nova Scotia, Prince Edward Island and New Brunswick met at Amherst, N.S., on June 9th last and presented Mr. G. H. Allen, the chief inspector of the company, with an address and a silver tea service, the occasion being Mr. Allen's retirement from the company to assume the position of manager for the Province of Quebec of the Mutual Life Insurance Company of Canada, and also to mark the twenty-first anniversary of Mr. Allen's connection with the Standard Life.

The New York Life Insurance Company has recently published a bulletin giving the salaries of the various officers: According to this bulletin President McCall's salary has been $100,000 per annum since 1901. George W. Perkins receives $25,000; Darwin P. Kingsley, $35,000, and Thomas A. Buckner, $40,000 per annum. The three second vice-presidents are Rufus W. Weeks, Wm. E. Ingersoll and Edward R. Perkins, whose salaries are $18,000, $21,000 and $30,000, respectively. Edmund D. Randolph, treasurer, receives $30,000; John C. McCall, secretary, $14,000; and Seymour M. Ballard, second secretary, $10,000.

The growing importance of the casualty and miscellaneous insurance business in the United States is manifested in the largely increasing number of corporations doing business of those kinds. At the close of 1904 there were forty-six stock organizations transacting one or more lines of miscellaneous insurance, about one-half of which operate more than one department. These companies as a general rule give signs of healthy growth and their aggregate transactions are increasing annually in larger proportion than any other branch of the insurance business. At the close of the year 1904 these companies possessed assets amounting to $74,211,203, with a capital of $18,500,000 and a net surplus of $21,743,110. During the year 1904 their premium receipts were $46,257,680; total income, $50,680,314; losses paid, $17,975,970; total disbursements, $44,065,735, and the sum added to the assets from the income account was $6,614,679.

A full report of the Superintendent of Insurance for the State of New York, Mr. Hendricks, on the Equitable Life's affairs has not yet been received, although telegraphic summaries are contained in the daily papers. They indicate that he has found reasons for serious criticism. It is stated that the superintendent will recommend that a bill be presented to the next session of the New York State Legislature limiting the powers of the investments of life assurance companies in that State. The investments of all Canadian companies are regulated by a Government standard, which, in many respects, is meritorious. In perusing the list of securities in the Dominion Act it would be in the interest of all concerned if certain securities were eliminated, while it may be desirable to include others. Investments change from time to time, and what might be regarded to-day as a desirable investment, five years hence would be considered as most undesirable. The law cannot prevent a company from making a bad investment. The matter is one which must be left ultimately to the best judgment of the directors.

* * *

FIRE INSURANCE ITEMS.

Much interest is being taken in the new fire marshal law of Minnesota, which goes into effect July 1st. One of its requirements is the keeping by the fire marshal of a public record of the rates charged in every municipality, together with the details as to its fire protection. The board companies protest against furnishing these rates for public inspection, holding that non-board companies, which fail to pay any share of their cost, will thereby be able to get possession of the rates.

At the meeting last week of the New York Fire Insurance Exchange the main questions discussed were the extension of the jurisdiction and the meeting of mutual competition on sprinkled business. There was a proposition to increase the territory of the Exchange so as to cover a greater field. It met, however, with considerable opposition. Those favoring it argue that it would put adequate rates and proper practices in effect in a territory which is now no man's land. The opponents said that there would be too much friction in the proposed new territory, that the rules of the Exchange were not adapted to country districts, and that the limitation of agencies would make serious trouble. Furthermore, they urged that expenses would be increased by their having to pay 25 per cent. commission on business which they now get at 15 per cent.

The insurance in the destroyed property of the Scott Furniture Company in Winnipeg is stated as follows: On the building, $40,000, comprising Norwich Union, $10,000; North British and Mercantile, $10,000; Caledonian, $10,000; Royal, $5,000; local companies, $5,000. On stock, total $40,000; Scottish Union, $2,000; Quebec, $3,000; Phœnix of London, $2,000; British America, $3,000; London and Lancashire Fire, $2,500; Canadian Fire, $4,000; Phœnix of Brooklyn, $2,000; Commercial Union, $3,000; Liverpool and London and Globe, $2,000; Manitoba, $1,000; Equity, $2,000; Anglo-American, $2,500; Western, $3,000; Hartford, $1,500; Northern, $1,000; New York Underwriters, $1,000; other companies, $4,000.

The thirty-third annual convention of the International Association of Fire Engineers will be held at Duluth, Minn., from August 16th to 19th, inclusive. Among the topics to be discussed by the delegates will be the following: The best fire protection for excursion and all passenger steamboats; advantages of fire-alarm equipment in fire departments; how to organize and maintain a volunteer fire department; value of searchlights for the fire department; are chiefs of foreign fire departments benefited by their attendance at the meetings of the association? suggestions regarding conflagrations, their cause and best plan for their prevention; the advantages of automobiles over horses for fire service; fire drill and school of instruction; standard threads.

The fire alarm boxes in Montreal are being re-numbered. In order to do the work, a new brake wheel will be placed in every box, and it will take two or three weeks to make the necessary changes. Under the new system the firemen will be able to respond more promptly to alarms, as on the first blow or two on the "ticker" they will know the district from which the alarm is being sent in, and the men in the stations responding to the box "pulled" will be ready to start by the time the first round has sounded on the ticker. The boxes are so numbered at present that the firemen must be very careful in counting the number before leaving their stations, for in some cases if they were to make a mistake of one blow, they might run to a box that would be three or four miles away from the one from which the alarm was being sent in.

On Wednesday there was a decline of ten cents per hundred in all grades of sugar. Molasses has also dropped.

INSTITUTE OF ACTUARIES EXAMINATIONS.

A cable received from London, England, announces the results of the examinations held here last April of the Institute of Actuaries of Great Britain. There are, in all, four examinations. Candidates in Toronto wrote on three of these. The names of those who were successful are:

First examination—John Allen, Imperial Life; E. G. Blackadar, Canada Life; Thomas A. Dark, Excelsior Life; J. M. Lang, Mutual Life of Canada; Milton P. Langstaff, Imperial Life; John H. McKechnie, Waterford, Ont.; Thomas A. Phillips, Toronto; C. J. S. Stuart, Canada Life; John S. Thompson, Toronto; Dwight A. Walker, Equitable Life, New York.

Second examination—William A. Bain, Manufacturers Life; Lorne K. File, Imperial Life; W. H. Gould, Toronto; M. S. Hallman, Mutual Life of Canada; W. R. Hitchins, Manufacturers Life; James Miles Langstaff, Imperial Life; James A. Macfarlane, North American Life; James B. McKechnie, Manufacturers Life; W. H. Somerville, Mutual Life of Canada.

Third examination—M. A. Mackenzie, Trinity University.

* * *

The New York Stock Exchange has begun proceedings to test the validity of the $2 tax on stock transfers. A broker was formally arrested and charged with a breach of the law. An application for a habeas corpus writ was dismissed, and the appeal will be made a test case. This Act, it is claimed, is unconstitutional, because the tax is unequal, and imposes a tax on the par value instead of the actual value of stocks, and on a further technical reason relating to the printing and passage of the Act.

* * *

—The Intercolonial Railway is suffering, we regret to say, from another deficit. The Hon. Mr. Emmerson is not in a position just yet to say exactly how much of a deficit, but it is estimated at between one and a half and two millions for the year. Apart from snow blockades last year, the shortage is attributed to high wages, a Government railroad finding it difficult to cut these down. The Intercolonial, says Mr. Emmerson, had not reached a stage when it could increase rates. Government operation prevented the rates being increased. In the maintenance-of-way department during nine months to March 31st last there was a net deficit of $182,625. In the shops an average increase in wages of two cents an hour had been made. The deficit in the mechanical department was $621,563, and in the traffic departments $145,447. These three departments made a total of $949,038. There were only two ways of improving conditions. One was by increasing the rates. The other was by decreasing the cost to the company for drawing freight.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, June 22nd, 1905, as compared with those of the previous week:

	June 22.	June 15.
Montreal	$23,644,502	$26,173,962
Toronto	$17,967,216	19,509,764
Winnipeg	6,046,552	6,413,914
Halifax	1,549,959	1,657,903
Hamilton	1,259,358	1,216,882
St. John	1,714,759	938,429
Vancouver	1,877,308	1,490,446
Victoria	594,148	1,616,064
Quebec	1,679,747	1,714,070
Ottawa	2,378,982	2,353,810
London	951,117	846,825
Total	$59,663,648	$63,932,069

THE GROWING WEST.

(Concluded.)

"It was here that I interviewed Mr. Cortelyou," I said. "Cortelyou is a man who studied Canada. He is a man of great intelligence, great ability," he said.

Then he sat down in a big easy chair, and I got out a note book at his desk, and when we got up it was five hours later—two o'clock in the morning, and every minute of that time devoted to a cross-examination of Mr. Whyte as to the essentials of success—the essentials in a railroad employee, who wishes to rise, a farmer who wishes to make the most of Western Canada's opportunities, the dairyman, the rancher, the miner, the salmon fisherman, the manufacturer, the merchant, the professional man, the educator, any one who may seek to find in Mr. Whyte's West a chance for the successful application of their abilities.

Mr. Whyte says when the interview is drawing to a close that he had never before given out these facts, nor had he ever seen them in print, for he had never submitted himself to a course of questions designed to bring out the facts of that vast land, where he was for many years the chief factor in its course and development, bearing as he does a broader and more intimate relation to that country than any man bears to an equal area of the world's service.

"Two things I wish to interview you about, Mr. Whyte."

"— how to suceed in the railroad business?

"— how to succeed in Western Canada."

"Success in railroading is hard work, but you have already covered that in your interviews with Sir William Van Horne and Sir Thomas Shaughnessy."

"Working to Win" is Mr. Whyte's Career.

"You can tell me how you worked your way. I suppose you started at the bottom?"

"I guess so."

"Rich?"

"No."

"Where?"

"My first railroad life was in Scotland. I started there at a small station, in charge of the station."

"What was its name?"

"Dunfermline, where Carnegie comes from. He made his first gift of money there. One of the kings was buried there. Lord Elgin, who descended from Robert Bruce, has a great estate south of there. I was working in the office of the Elgin Estate before I went to work for the railroad."

Education?"

"Just a common school education. My grandfather of the same name as myself, was Lord Elgin's factor."

"I suppose a factor is practically an estate manager?"

"Lord Elgin's interests are very large, embracing both agricultural and coal industries."

It is doubtless due to this early training and associations of Mr. Whyte's that he owes at least a foundation of that deep interest he takes in developing Canada's great Western estate in its coal, farming and industrial opportunities. Sir William Van Horne would say that this is the deciding thing that came into Mr. Whyte's life at the early age when impressions give the bent to after life.

He Fancied Railroading.

But, apparently the railroad is Mr. Whyte's first love and railroading is in his plan of life a foundation of all the rest, being the basis on which he has worked out the success of Western Canada.

This shows in the answer to my question: "What were your early ideas?"

"I fancied railroading, and when I came to this country, just having passed my 17th year, I entered the service of the Grand Trunk. The only work I could get to do was that of a brakeman."

"Passenger or freight?"

"Freight."

Then he went on to say that after a short time braking, he became freight clerk at Cobourg, then to Toronto after one year. Then foreman of shed. Then he was asked if he would take charge of outside work for loading and unloading cars, and delivering all freight from the sheds to the merchants. He was 21 then. Then he was made trainmaster. Then he went to Stratford, 88 miles west of Toronto. While agent there, the Grand Trunk changed from old gauge to the standard. It could not be done all at once, so trains coming from the west had to be changed over at Stratford, and that was a complicated operation of transferring the freight or shifting the wheels of the cars upon their axles. Busy in this direction, the early years of Mr. Whyte were passed. His subsequent career is a long story.

ALLAN WEST.

* * *

—According to the census returns for 1901, the number of persons employed on British railways is 320,512, but this total excludes platelayers, gaugers, packers and railway laborers. Taking 600,000 as the approximate great total of the railway employees of the United Kingdom at the present date, it is probable that rather more than one-half, i.e., about the number given in the census return, constitutes the managerial and operating staff of the lines. About 200,000, or one-third of the total, are engaged in connection with the maintenance and renewal of the permanent way and rolling-stock, and 80,000 are employed in looking after the various "side-shows" carried on by our railway companies. The one general characteristic of railway employment, which is also its chief attraction, is its permanency. There are, it is true, a good many "supernumeraries" and "probationers" in the service; but when once placed upon the regular staff, a man, if he keeps steady and works with moderate efficiency, is usually retained until incapacitated by age, and in many grades he can rely upon receiving a pension upon retirement. Even the men employed in the workshops are seldom discharged except for misconduct.

RE THE INDEPENDENT ORDER OF FORESTERS.

The Editor Monetary Times:

Dear Sir,—I again take the liberty of asking space in the columns of your valuable journal to give the readers, many of whom are no doubt members of the Independent Order, a few facts taken from the report for the year 1904, as furnished to several of the Insurance Departments in the United States, which may afford them some food for thoughtful consideration.

The total cash received for interest and rents amounted to $261,633 on mean ledger assets of $7,615,447, less than 3½ per cent., or to be exact the rate was equivalent to 3.44 per cent.

The net rental received from the Temple Building investment of $759,490 at book value (although the cost reaches nearly $900,000) was $7,323—less than 1 per cent.—a truly remarkable return, and a loss to the Order yearly in interest of over $15,000 on the book value; that is to say, if the sum which the building actually cost had been deposited in the bank at 3 per cent. instead of putting it into such a costly white elephant, the Order would be receiving nearly $27,000 a year instead of the paltry return mentioned.

The total stock of the Union Trust Co. is $2,000,000, paid up, of which amount the Order holds $1,995,000 at a cost of $2,194,500, and receives 4 per cent. on the par value, or 3.64 per cent. on the amount invested. In addition, the Trust Co. held $1,472,837 for investment on account of the Order, so that the concern had actually $3,667,337 of the Order's funds. It would be interesting to know what interest, if any, the Trust Co. pays for this money while seeking so called investments, and I wonder who holds the balance of the Trust Company's stock of $5,000.

The Order holds $163,600 Hamilton Cataract Power, Light and Traction Company's 5 per cent., costing $150,435. Is such a large investment of the funds in an industrial concern a proper one for the Order?

Here are three items of investment, aggregating at cost over $3,000,000, or 40 per cent. of the total ledger assets,

and which if the Order were forced to realize on would result in a heavy loss.

In 1904 the number of certificates issued was 28,730, and the number ceased to be in force 22,346, a net gain of only 6,384. In 1903 the figures were 36,316 issued, ceased 22,193, gain 14,123, and in 1902 there were issued 30,101, ceased 16,818, gain 13,283. Is this the beginning of the end?

Last year $71,880 was saved by "compromising and scaling down claims," while the expenses incurred investigating claims amounted to $19,150, apart from legal expenses. In 1903 the corresponding figures were $72,072 and $5,867.

Thanking you in advance,

Yours truly,

A MEMBER OF THE I.O.F.

⁂

OUR NORTH OF ENGLAND LETTER.

After all, there is to be no official visit to Manchester, it seems, by the C.M.A. delegation. There have been four separate decisions on the point, and, perhaps, there may be a fifth, and an affirmative one. But for obscure reasons negotiations between the London and Manchester Chambers of Commerce have broken down, and the city that has just sent delegates of all nations home rejoicing from the Cotton Congress is made to seem churlish to a body of Canadians. It is preposterous to suppose that our public men would not have delighted to make the visitors feel in every sense at home. And it is hard to believe that some sort of amends will not be offered. Of course, those with a serious interest in the exploration of this best of all business cities in England may not regret that their earnest endeavors are unhampered by any call to festivities. Such delegates as may come will find Mancunians anxious to remove any stigma upon their hospitality and upon the loyalty they bear to the Canadian segment of Greatest Britain.

Enquiries made among provision merchants here seem to show that Mr. W. A. McKinnon, Canadian Trade Agent at Bristol, is all wrong, and that Mr. William Davies' contentions are all right. Three experienced and wholly unbiased merchants agree that Danish bacon is the worst in keeping properties that is imported into Great Britain. It is explicitly denied that the knuckle bone is taken out by Canadian packers, and it is admitted that Canadian hogs are better fed, better cured, and give better meat than the United States variety. On one other point my authorities write. They wonder how in the world so palpable a negation of plain fact comes to be circulated by a professional reporter on trade subjects. Amazement is mitigated a little by the reflection that our own consuls are constantly furnishing details that display nothing but their own nescience. What we are clamoring for in this country are Government representatives abroad who understand industrial details at home with some particularity, and who are able to probe to the roots any information or misleading offered to them abroad.

A peculiarly delicate task, which has been acquitted with no little adroitness and fairness, awaited Mr. Chamberlain's Tariff Commission when it undertook to wrestle with the problems of the cotton industry. The bare idea of protecting an industry that produces ninety-eight millions worth a year and exports eighty-four millions worth, while but six millions worth is imported, may be dismissed with a smile. The Commission advocates no such superfluity. A tax of 10 per cent. or less upon a portion of our small import can obviously be of no direct or immediate use to the gigantic whole, and nothing more than that has been proposed. The contention is that cotton, in common with all other trades, would gain from a closer coalition of Imperial forces designed to improve inter-Imperial commerce. Also, that even so low and partial a tariff as the one named could be used effectively to obtain for England's claims special consideration when foreign powers were adjusting tariff bargains between themselves. Certainly foreign manufacturing markets have been closed against British cottons with serious effects, and only by preserving the mobility of trade so that it may turn to whatever productions are favorably regarded can Lancashire aspire to hold its own. With this must go attempts to secure business from the cotton-wearing peoples, and in particular those on British soil. From thence it seems but a step to Colonial Preference.

However, Lancashire at present is not in the mood to take that step. Cotton manufacturers fear that the effect of a tariff on materials quite other than cotton would be to send up the price of production. Putting the most unfavorable aspect on the case, Mr. Chamberlain's fiscal scheme as divulged thus far might make it necessary for a cotton mill to earn 10 to 12½ per cent. more upon its share capital. Of that consequence cotton manufacturers are afraid, and they ask for definite assurance that the excess of cost will be compensated by a gain of trade. The great majority of Lancashire men profess themselves unable to see that Chamberlainism can do their interests good.

No retail trade in England has brought forth so many bizarre notions for promoting sales as the trade in tea. The various widows' pension schemes have been noticed heretofore in the letters. It remains to tell of the latest freak advertising plan. This is to give 200 square yards of building land at the seaside to purchasers of 200 pounds weight of a certain sort of tea. A most remarkable incentive was given to female canvassers for tea by the amazing Mr. Rasmus Jensen, who promoted the Nelson Pension Tea fiasco. A sum of $50,000 to be earned in commissions was dangled before the eyes of fair canvassers, and the most successful lady was to have $2,500 in cash and the hand in marriage of any unmarried male employee of the firm. This was backed by a guarantee of breach of promises damages, with $500 added, in case of failure to marry on the part of the marked man. That unhappy creature was moreover to be dismissed from employment.

A severe scolding to extravagant Britain has been administered by a leading banker, Mr. Edgar Speyer. The part of his tirade that is most interesting fundamentally to Canadians is the accusation that our triple wastefulness—national, municipal and individual—is lessening our power to provide capital for colonial and foreign investment. While the rich are squandering sums unproductively, local debt is ever mounting, and in ten years the national expenses have advanced £49,000,000 per annum, which is calculated to be £25,000,000 more than might reasonably have been the case. Then our imports have exceeded exports by £180,000,000 per annum, and Treasury bills in the money market, reaching at times the mammoth sum of £35,000,000, have absorbed the bank balances that more properly might have been employed in financing trade. Not all of these trenchant allegations are unanswerable, but they will do good. Our bankers, at any rate, have always an ear for Cassandras, and in some of them I have traced a profound respect for the man who can convince them that matters are actually worse than they had thought.

A curious alarm has been raised by the directors of the Abstainers' Life office. Word has gone forth that a manœuvre to capture the company is in progress, and shareholders wishful to sell are advised to communicate their desire to headquarters. As the circular refers to the great importance of the temperance principles which the company represents, the inference is that the liquor interest is concerned more or less remotely with the enveloping attack.

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON ENGLAND—The National Bank of Scotland.

This is our nearest approach to an Equitable fuss in England.

Department stores are so great an institution in Canada that the movement in Germany to secure the heavier taxation of these businesses is sure to attract passing notice. Although a bill with this aim has passed its third reading in the Prussian House of Representatives, its ultimate passage into law is doubtful. The intention is to protect the small shopkeeper, and, nominally, the middle classes; though how the latter stand to gain is none too clear. Manufacturers in general oppose the measure, claiming that the increased productivity of industry makes the department store a necessity of all progress. Class legislation so extreme is not suggested here. Provincial shopkeepers confine their endeavors to the smothering of such facilities as the C.O.D. post, which might be helpful to the advertising retailer of varied wares.

North Country.

Manchester, June 9th.

* * *

BRITISH TEXTILE TRADE.

The British Board of Trade returns for May show fairly satisfactory increases in the country's exports. Again the chief advance has taken place in textiles, and not alone in cotton goods, for, although these show a handsome increase of £1,155,000, woolens are also £200,000 up, and "other materials" display a gain of £138,000. More than half the total advance in the exports is, therefore, in textiles. Glancing at the details of these exports, we find that the shipments of cotton yarn are £171,000 higher, while the gain in cotton piece goods amounts to £956,000. As regards piece goods, the trend of trade continues practically the same, the chief increases being shown by India and the Far East. A great increase in the Far Eastern demand has also been largely instrumental in bringing about the improvement in the woolen and worsted shipments, but the United States has helped as well. In linen piece goods there was a substantial advance of £75,000, for which larger purchases by the United States were mainly responsible. As regards imports, we have an advance for the month of £2,052,869, or 4.6 per cent., which is probably pretty well accounted for by the larger number of working days last month. In raw materials we have a total advance of £295,000, together with a decrease of £407,000 in raw wool and an increase of £570,000 in raw cotton. In respect to the last two items, there was an increase of 813,000 cwts. in the weight of cotton imported, chiefly American, while imports of wool show a decline in weight of nearly 13,000,000 pounds. In raw cotton we find for the five months a decline of nearly £2,500,000 sterling, notwithstanding an advance of 1,800,000 cwts. on the quantity imported, while wool shows a rise of £2,538,000, corresponding with an increased quantity of nearly 16,000,000 pounds, so that there is no indication that the leading British textile industries have not been well provided for.

* * *

VIRDEN BOARD OF TRADE.

The annual meeting of the Board of Trade for Virden, Man., took place on the 9th inst., when the following officers were elected: President, H. J. Pugh; vice-president, A. D. Jolliffe; secretary-treasurer, James F. C. Menlove.

* * *

Shipments to the United States are dropping off a little, as is usual at this season, but are, nevertheless, fully up to the average.

* * *

The volume of business in the Belfast linen market is of satisfactory proportions for the season of the year, and the tendency of values is upward. The summer months are usually quiet, and though there will be the customary falling off this year, it is not expected to be serious or prolonged.

Meetings.

ONTARIO BANK.

Report of Annual Meeting of Shareholders.

The annual meeting of the shareholders of the Ontario Bank was held at the banking house, Toronto, on Tuesday, June 20th, 1905.

Among those present were:—G. R. R. Cockburn, Donald Mackay, John Flett, F. M. Purdy, Henry Lowndes, Thomas Walmsley, R. Grass, Hon. R. Harcourt, R. D. Perry, C. S. Gzowski, David Smith, Barlow Cumberland, R. N. Gooch, J. G. Ramsey, Cephas Goode, J. K. Macdonald, R. Mulholland, Wm. Spry, and others.

On motion Mr. G. R. R. Cockburn was called to the chair, and Mr. McGill was requested to act as secretary.

Messrs. J. K. Macdonald, Henry Lowndes and F. M. Purdy were appointed scrutineers.

At the request of the chairman, the secretary read the following report:—

The directors beg to present to the shareholders the 48th annual report for the year ending 31st May, 1905, together with the usual statement of assets and liabilities.

Profit and loss (brought forward from 31st May. 1904)	$ 54,862 45
The net profits after deducting charges of management, interest accrued upon deposits, and making provision for bad and doubtful debts, were	152,583 34
	$207,445 79

Which has been appropriated as follows:—

Dividend 3 per cent. paid Dec. 1st, 1904	$45,000 00	
Dividend 3 per cent. payable 1st June, 1905.	45,000 00	
Added to rest	50,000 00	
Reserved for officers' pension fund	5,000 00	
		$145,000 00
Balance of profits carried forward		$62,445 79

The rest account has been increased by $50,000, which now stands at $650,000, and the amount carried forward to the credit of profit and loss account is $62,445.79.

The deposits have increased $1,066,929.99 since our last annual meeting, and the general business of the bank continues to steadily improve, which must be regarded as satisfactory.

A branch of the bank has been opened at Holstein, Ont.

All the offices of the bank have been inspected during the year.

G. R. R. Cockburn, President.

C. McGill, General Manager.

The Ontario Bank,
Toronto, 31st May, 1905.

After a few remarks by the chairman, the report was adopted.

By resolution the sum of $5,000 was granted to the officers' pension fund of the Ontario Bank.

A vote of thanks was tendered to the general manager and other officers of the bank for the satisfactory discharge of their respective duties during the past twelve months.

The scrutineers appointed at the meeting subsequently reported the following gentlemen duly elected directors for the ensuing year, viz.:—

George R. R. Cockburn, Donald Mackay, R. D. Perry, Hon. R. Harcourt, R. Grass, T. Walmsley, John Flett.

The new board met the same afternoon, when Mr. George R. R. Cockburn was elected president, and Mr. Donald Mackay vice-president.

C. McGill, General Manager.

The Ontario Bank,
Toronto, June 20th, 1905.

H. S. Strathy, General Manager.

Toronto, May 31st, 1905.

Your directors have much pleasure in submitting the accompanying statement showing the results of the business for the year ending May 31st, 1905, and feel assured it will prove satisfactory.

At the last annual meeting authority was given the directors to increase the capital stock of the bank to the extent of a million dollars. This was allotted to existing shareholders at a premium of 30 per cent., was promptly taken up and largely over-subscribed. The amount allotted is now practically paid in full, making the paid-up capital of the bank three million dollars.

A very considerable portion of the bank's funds has been invested in Government bonds and other high-class securities readily available. The cash reserves have been maintained at a proper strength, and placing the bank at all times in a position to take up such business of a high character as offered.

The premises lately occupied by the bank have proved quite inadequate for its growing needs, nor did they afford the necessary protection against fire. Satisfactory arrangements have about been completed for the erection of suitable premises, fire-proof as far as it is possible to make them, and with all the protection modern science suggests. The new edifice will give the bank most attractive premises, with every convenience and accommodation for its clients and staff, and it is anticipated will yield a reasonable return for the money invested.

During the year three new branches were opened, making fifty branches all in the Province of Ontario.

All the offices of the bank have received their usual careful inspections.

C. D. Warren, President.

The usual resolutions were moved and carried.

The scrutineers reported the following gentlemen duly elected to act as directors for the ensuing year, viz.:—C. D. Warren, Hon. J. R. Stratton, C. Kloepfer, (Guelph), W. J. Sheppard, (Waubaushene), C. S. Wilcox, (Hamilton), E. F. B. Johnston, K.C.

The meeting then adjourned.

At a subsequent meeting of the newly elected directors, Mr. C. D. Warren was re-elected president, and Hon. J. R. Stratton, vice-president, by a unanimous vote.

H. S. Strathy, General Manager.

The Traders' Bank of Canada,
Toronto, June 20th, 1905.

The following comparative statement will show the progress of the bank from May 31st, 1897:—

As on 31 May	Capital Paid-up	Rest	Deposits	Circulation	Assets	Dividend
1897 ..	700,000	40,000	4,235,331	676,195	5,886,855	6
1898 ..	700,000	50,000	4,930,817	697,680	6,824,850	6
1899 ..	700,000	70,000	5,661,112	680,920	7,638,303	6
1900 ..	1,000,000	150,000	6,528,074	987,440	9,177,061	6
1901 ..	1,344,420	250,000	7,672,591	1,192,470	10,846,149	6

TRADE WITH SCANDINAVIA.

At this present juncture in the history of those dual nations, Norway and Sweden, it is interesting to look up the commercial relations which obtain between them and ourselves. On doing so we find that in the fiscal year ending June 30, 1904, Canada imported from Norway and Sweden fish and fish products to the value of $2,062; glass manufactures, $4,066; metals and minerals and manufactured goods made therefrom, dutiable, $33,957; free, $142,182. The figures in 1900 were: Dutiable, $47,406; free, $329.

In fish and other oils the trade has fallen away from a volume of 23,143 gallons, valued at $11,677, in 1900, to 375 gallons, valued at $785, in 1904.

A recapitulation of the dutiable imports shows value of $59,327 in 1900, as compared with $48,971 in 1904. On the other hand, free imports have increased from $673 in 1900 to $144,798 in 1904. The total imports of merchandise were valued at $60,000 in 1900, and $193,767 in 1904.

Among exports from Canada to Norway and Sweden in 1904 were breadstuffs to the value of $96,625; coal to the value of $143,593; lobsters to the value of $63,000; metals and minerals and manufactures thereof to the value of $20,543. The total exports have risen from a value of $81,044 in 1900 to $426,645 in 1904. In conclusion we may say that the total trade between Norway and Sweden and Canada was $141,044 in 1900 and $620,414 in 1904.

⁂

IMPERIAL BANK OF CANADA.

The thirtieth annual general meeting of the Imperial Bank of Canada was held in pursuance of the terms of the charter of the banking-house of the institution, 21st June, 1905.

Present:—Messrs. T. R. Merritt, (St. Catharines), William Ramsay, of Bowland, Stow; Robert Jaffray, Wm. Hendrie, (Hamilton), Charles Cockshutt, D. R. Wilkie, J. W. Langmuir, Rev. T. W. Paterson, W. Bridgeman Simpson, Edward Hay, Prof. Andrew Smith, F.R.C.V.S., R. N. Gooch, J. W. Barry, A. H. Martens, Neil Robertson, R. W. Thompson, Frank A. Rolph, Peleg Howland, W. T. Jennings, C. H. Wethey, C. H. Stanley Clarke, Clarkson Jones, John Neilson, Alex. Neilson, John Stark, Charles O'Reilly, M.D., O. F. Rice, W. H. Cawthra, David Kidd, (Hamilton), James Bicknell, K.C., J. M. Kains, William Spry, A. E. Webb, G. B. Smith, William Glenney, (Oshawa), David Smith, Harry Vigeon, Harry Wyatt, W. T. Boyd, H. C. Hammond, R. H. Temple, W. B. Hamilton, A. A. McFall, (Bolton), L. Ogden, H. P. Eckardt, A. Foulds, T. Gibson, John Graham, A. D. Cadenhead, (Ocho, Rios, Jamaica), J. L. Blaikie, J. G. Ramsey, J. W. Beaty, A. P. Burritt, James Todhunter, W. G. Jaffray, V. H. E. Hutcheson, Frank E. MacDonald, Charles McGill, Thomas Walmsley, J. W. B. Walsh, I. J. Gould, (Uxbridge), W. C. Crowther, R. Inglis, W. W. Vickers, W. Gibson Cassels, W. Gordon Jones, J. H. Eddis, R. G. O. Thomson, and others.

The chair was taken by the President, Mr. T. R. Merritt, and the assistant general manager, Mr. E. Hay, was requested to act as secretary.

Moved by Mr. John Stark, seconded by Mr. A. A. McFall,

That Mr. Lyndhurst Ogden, Mr. R. H. Temple, and Mr. W. Gibson Cassels be and are hereby appointed scrutineers. Carried.

The general manager, at the request of the chairman, read the report of the directors, and the statement of affairs.

THE REPORT.

The directors beg to submit to the shareholders their thirtieth annual report and balance sheet of the affairs of the bank as on 31st May, 1905, giving the result of the business of the bank for the year which ended that day.

Out of the net profits of the year, after making full provision for all bad and doubtful debts and for the usual contributions to the pension and guarantee funds:—

(a) Dividends have been paid at the rate of 10 per cent. per annum, amounting to $300,000.

(b) Bank premises account has been credited with $25,011.73.

(c) Rest account has been increased by $150,000.

(d) Profit and loss account has been increased by $35,909.49.

Branches of the bank have been opened during the year at Arrowhead, B.C.; Balgonie, N.W.T.; Broadview, N.W.T., and in Toronto at St. Lawrence Market. Branches are being opened at New Liskeard, Ont., and at the Upper Bridge, Niagara Falls, Ont.

The authority given at the annual meeting in 1902 to increase the capital stock by $1,500,000, of which $500,000 was issued that year, has been further availed of by the issue of the remaining $1,000,000, which will be allotted to shareholders at a premium of 100 per cent. in the proportion of one new share for each three shares held on 30th June of this year. The additional capital will enable the bank to keep pace with the development of the country and to accept a share of the new business which will be the result thereof, besides adding to the total amount of the notes of the bank authorized to be placed in circulation.

Mr. J. A. M. Aikins, K.C., and Mr. Wm. Whyte, a vice-president of the Canadian Pacific Railway, have been appointed to and have accepted the position of local directors at Winnipeg.

A by-law will be submitted for your approval changing the date of the annual meeting from the third Wednesday in June to the fourth Wednesday in May, which your directors think will be a more convenient date.

The head office and branches of the bank have all been carefully inspected during the year, and your directors desire to express their satisfaction with the faithful and efficient manner in which the staff performed their duties.

THOS. R. MERRITT, President.

The usual motions were submitted and carried unanimously.

The scrutineers appointed at the meeting reported the following gentlemen duly elected directors for the ensuing year, viz.:—Messrs. T. R. Merritt, D. R. Wilkie, Wm. Ramsay, Robt. Jaffray, Elias Rogers, Wm. Hendrie, James Kerr Osborne, Charles Cockshutt.

At a subsequent meeting of the directors, Mr. T. R. Merritt was elected president, and Mr. D. R. Wilkie, vice-president for the ensuing year.

By order of the board.

D. R. Wilkie, General Manager.

Toronto, 21st June, 1905.

* * *

THE STANDARD BANK OF CANADA.

The thirtieth annual meeting of the Standard Bank was held at the head office of the bank in Toronto, on Wednesday, 21st June, 1905.

The chair was taken by the president, Mr. W. F. Cowan, and Mr. George P. Schofield, general manager, acted as secretary to the meeting.

On motion of Frederick Wyld, Esq., seconded by T. R. Wood, Esq., the minutes of the previous meeting were taken as read.

The president then read the following report and statement:—

The directors have pleasure in presenting the statement of the affairs of the bank for the year ending 31st May, 1905.

The profits for the year have been satisfactory, and after providing for the usual dividend of 10 per cent. ($100,000), reducing bank premises, and office safes, and furniture accounts, $17,394.72, the balance, $39,600.87, has been carried forward to profit and loss account which account now amounts to $62,114.83.

An agency of the bank has been opened at Blenheim, Ont.

The head office and agencies have been carefully inspected, and the officers of the bank have discharged their duties with zeal and efficiency.

All of which is respectfully submitted.

W. F. Cowan, President.

Toronto, 31st May, 1905.

Geo. P. Reid, General Manager.

The president, after making a few remarks thereon, moved, seconded, by the vice-president, "That the report and statements now read be adopted and printed for circulation among the shareholders." Carried.

Moved by G. B. Smith, Esq., and seconded by Wm. Spry, Esq., "That the thanks of the shareholders be given to the president, vice-president, and the other directors for their attention to the affairs of the bank during the year." Carried.

Moved by H. Langlois, Esq., and seconded by Wm. Glenney, Esq., "That the thanks of the meeting be given to the general manager, assistant general manager, and inspector, and the other officers of the bank for their services during the year." Carried.

Moved by R. C. Bickerstaff, Esq., seconded by David Smith, Esq., "That the ballot now open for the election of directors, and be kept open until two o'clock, unless five minutes elapse without a vote being cast, when it shall be closed; and that Messrs. J. K. Niven and H. Langlois act as scrutineers." Carried.

The scrutineers declared the following gentlemen unanimously elected directors for the ensuing year, viz.:—W. F. Cowan, Frederick Wyld, W. F. Allen, A. J. Somerville, T. R. Wood, W. R. Johnston, and Wellington Francis.

At a subsequent meeting of the directors, W. F. Cowan, Esq., was re-elected president, and Frederick Wyld, Esq., vice-president.

George P. Schofield, General Manager.

Toronto, 21st June, 1905.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st May, 1905.

J. M. COURTNEY,
Deputy Minister of Finance

UNION BANK OF CANADA.

STATEMENT OF THE YEAR'S BUSINESS.

The fortieth annual general meeting of the shareholders of the Union Bank of Canada was held at its banking-house in Quebec on Monday, June 19th, 1905.

There were present: Messrs. A. Thomson, Hon. John Sharples, D. C. Thomson, Wm. Price, E. Giroux, E. J. Hale, Wm. Shaw, T. C. Aylwin, Geo. H. Thomson, H. Budden, John Shaw, Wm. Brodie, T. A. Piddington, Lazare Noel, C. P. Champion, J. H. Simmons, Lieut.-Col. Turnbull, Lieut.-Col. Farley, Capt. Carter, and E. Dupre.

The president, Mr. A. Thomson, took the chair and requested Mr. J. G. Billett to act as secretary, and Messrs. John Shaw and C. P. Champion scrutineers, which was agreed to.

The chairman then read the report of the directors which was as follows:—

The directors beg to submit a statement of the assets and liabilities of the bank at the close of the financial year ending 31st May last; also the following statement of the result of the business for the past year:

Profit and Loss Account, May 31st, 1905.

Balance at credit of profit and loss account on May 31st, 1904.	$ 67,339 86
The net profits for the year, after deducting expenses of management, reserving for interest and exchange, and making provision for bad and doubtful debts, have amounted to	382,173 80
	$449,513 66
Which has been applied as follows:—	
Dividend No. 76, three and one-half per cent.	$ 87,500 00
Dividend No. 77, three and one-half per cent.	87,500 00
Transferred to rest account	100,000 00
Written off bank premises and real estate	100,000 00
Balance carried forward	74,513 66
	$449,513 66

The result of the year's business is satisfactory, showing net earnings of $382,173.80, or about 15¼ per cent. on the capital. From the earnings the usual dividends have been provided, $100,000 has been added to rest account, and $100,000 has been written off bank premises and real estate, leaving $74,513.66 at credit of profit and loss account.

The reduction of bank premises account has been made in accordance with the policy outlined in the report of the directors submitted to the shareholders at their last annual meeting. During the year three branches and two sub-agencies have been opened in Ontario, one branch in the North-West Territories, and one sub-agency in Manitoba, all showing fair prospects of success.

The customary inspection of the branches has been made during the year.

A. THOMSON, President.

GENERAL STATEMENT.

Liabilities.

Capital stock	$	$ 2,500,000 00
Reserve fund	1,100,000 00

G. H. BALFOUR, General Manager.

Quebec, May 31st, 1905.

On the motion of Mr. A. Thomson, seconded by Hon. J. Sharples, the foregoing report was unanimously adopted, and ordered to be printed for distribution among the shareholders.

The balloting for directors for the ensuing year, which was next proceeded with, resulted in the election of Messrs. A. Thomson, Hon. John Sharples, D. C. Thomson, E. Giroux, E. J. Hale, Wm. Price, Wm. Shaw, E. L. Drewry, John Galt and F. E. Kenaston.

At a subsequent meeting of the newly elected board of directors, Messrs. A. Thomson and Hon. John Sharples were elected president and vice-president respectively.

⁂

BANKING AND FINANCIAL.

The Union Bank of Canada has opened a branch at Smithville, Ont., with Mr. Joseph Anderson as acting manager.

Mr. Wm. Whyte, vice-president of the Canadian Pacific Railway, and Mr. J. A. M. Aikins, K.C., have been appointed local directors of the Imperial Bank at Winnipeg.

The Halifax Electric Tramway Company, Limited, has declared a quarterly dividend at the rate of 5 per cent. per annum, warrants for which will be issued on July 1st next.

It is now announced that Mr. Thomas Fyshe has severed his connection with the Merchants Bank of Canada, his term of service having expired. He will be succeeded by Mr. E. F. Hebden, who has been connected with the bank as chief inspector or in other important positions for many years.

Æmilius Jarvis & Co., Toronto, were the successful tenderers for the $1,209,875.42 4 per cent. debentures of the city of Winnipeg, Man., tenders for which were opened on the 16th inst.; also for the $54,600 5 per cent. debentures of the town of Medicine Hat, N.W.T., tenders for which were opened on the 19th inst.

Montreal stock brokers are still agitated over the tax question, and many continue in favor of paying the tax themselves until such time as the present quarter of 1 per cent. commission is reduced. It is believed that the law on the subject is unconstitutional, and there is likelihood that this will shortly be put to the test.

A month or two ago we noted the fact that the Bank of Montreal were promoting a private bill which would allow them to increase the number of their directors. The matter has now been taken up by the Government, and the Minister of Finance has brought in a bill under which any bank may appoint as many directors as it desires, the only restriction being that the number shall not be less than five.

The London Financial News refers in somewhat sceptical language to the various Canadian companies operating in South American cities. London investors, it says, did not take kindly to the shares, partly because they could not understand why, if they were any good, Canadian holders should be so anxious to get rid of them. We might reply that the reason Canadians are undertaking these tropical investments is simply "Many minds, many preferences," though the very men, it may be remarked, who have launched these Southern enterprises are also the men most largely interested in Canadian investments as well. Perhaps the real reason, however, is found in the fact that Canadians are growing in their ideas, are becoming more cosmopolitan in this, as in other matters. Britishers can scarcely be in a position to blame them for this.

The existence of the many bucket shops now established in Canadian as well as United States cities is imperilled by the efforts now being made by the leading stock exchanges of the continent. The legitimate brokers have long been desirous of putting the bucket shops out of business, their principal motive being to do away with the competition of these places. The New York Stock Exchange is taking the lead in the movement to prevent the bucket shops securing their daily service of quotations. The Western Union, which has an exclusive contract for furnishing this service, supplies all applicants with a ticker and the stock reports at a charge of $45 a month. The New York and other exchanges will endeavor to have the line drawn so that only legitimate traders will receive this service, thus placing the bucket shops on the same footing as that occupied a year ago by the pool-rooms, which were refused the racing reports by the Western Union. For over two years the Chicago Board of Trade has been trying to shut off the furnishing of market quotations to the bucket shops, and at the present time this service has to be obtained in a roundabout way.

* * *

DRY GOODS ITEMS.

A Bradford correspondent says, in reference to all classes of coarse crossbred colonial or English wools, the position is now an exceedingly difficult one, since the continuous drain on them which has been going on for exportation to the United States for many months, added to a large consumption in the worsted and woolen trades, has already reduced stocks to an unusually low point, although a much larger proportion than usual of the Australian clip is already on this side. Although we are on the eve of the sales of home-grown wools, the prices asked in the country are quite beyond the reach of buyers, and, if given, would mean a still further advance in coarse-fibred prices. But, in spite of the great strength of the wool market here, spinners of all kinds of worsted yarns are finding it quite impossible to sell, either to the Continent or in the home trade, at prices within 5 to 10 per cent. of cost, and, consequently, quite a considerable part of the spinning machinery of Bradford is gradually being allowed to stand idle rather than that spinners should continue to run on at an absolute loss. At present there are no signs of the general tension of the situation being reduced, and, although in the most fashionable circles there are indications that fine coating serges and mohairs may to some extent supplant tweeds in the near future, there is, on the other hand, every probability of tweeds being largly worn as long as the price of worsteds continues so high.

* * *

FOR GROCERS AND PROVISION DEALERS.

We hear that the Thomson Line of steamships, trading between Canada and London, is putting in improved facilities for the unloading and distribution of Canadian produce, by which a fruitful source of trouble and complaint will be removed. Hitherto the vessels have docked at Tilbury, and the cargo having been unloaded there has been brought, after more or less unavoidable delay, by train to the warehouses on the Middlesex side of the river. Now, however, the vessels will come some twenty miles further up the river to the Surrey Commercial Docks, where facilities have been provided for the rapid and economical handling and storage of produce. From the vessel butter, cheese and bacon will be taken direct to the warehouses, where storage will be provided at the same temperatures as those in which the produce has been stored on the vessel, viz., from 15 deg. to 55 deg. Fahr., according to the requirements of the trade.

According to the report of the Canadian Commercial Agent in Leeds, Australian and Tasmanian apples are arriving in large quantities. These apples are shipped in nice-sized boxes, holding about 40 lbs. of fruit, and are bringing wholesale to-day from $3 to $4.15 per box. The packing and grading is excellent, each apple is rolled in tissue paper, and all interstices in the box filled therewith. He says he has seen no apples imported into England that can in any way approach these apples, either as to packing or appearance; they come out of the box without the least sign of bruise or discoloration, and in as perfect condition as when picked from the tree. The best varieties sent are very fine in flavor, but do not excel the best Canadians as we find them in the orchards in Canada. The boxes are well stencilled "Australian" or "Tasmanian," together with the initials of the grower, and the place where grown. Within the box quite a neat, showy card, the full size of the box, is found, printed in colors, stating where grown, the variety and a guarantee that they have been packed and graded according to Government regulations, together with the address of the grower and shipper. In every respect well packed, neat and attractive packages. These apples sell readily retail from 8 to 12 cents per pound. For the finest 'Canadian dessert apples" packed in boxes in this attractive form there should be a ready sale at prices almost double what the same apples would bring in barrels.

* * *

CANADIAN MANUFACTURERS' ASSOCIATION.

The touring manufacturers arrived in London after a somewhat tedious voyage on the 18th inst., the only untoward incident, so far as has come to our ears, having been the slipping on the deck of Mr. Hendry, of Vancouver, who will have to keep to his room for some days. On Monday the visitors had the honor of an invitation to Windsor by His Majesty the King. Altogether they appear to be having "no end of a good time."

On Wednesday they were entertained at the annual banquet of the London Chamber of Commerce, the speech of the evening being made by Mr. W. K. George. He said while the visit of the manufacturers had no political significance whatever, everyone wished to get into closer touch with the Motherland. He endeavored to impress upon the audience that Canada must provide employment at a remunerative wage, otherwise, as before, the sons of the Old Land would go to the United States. The large immigration to the United States had been chiefly on account of the States' industrial development. Canada was now achieving the same remarkable development. In a country such as Canada a protective tariff was necessary, he thought. One result of it had been that hundreds of millions of capital of the United States had been invested in industrial establishments in Canada. Compared with this, he regretted to say that British capital thus invested amounted to only about a million.

* * *

—A correspondent of ours residing in Regina takes an exceedingly hopeful view respecting prospects for the crops in the Great North-West. He says: "We are having phenomenally fine weather for the farmers. We had a beautiful spring from the middle of February, and the seed was gotten in much earlier than usual, and within the past four weeks or so we have had copious rains, which have brought on the crop by leaps and bounds. Old farmers say that the wheat crop is to-day ten days in advance of what it ever was before in the history of the Territories. If the favorable weather continues we will have the banner crop of the country, and the talk of a 90,000,000 bushel wheat crop will be a low estimate. Time and the weather will show.

In the House of Commons the other day a discussion arose on the cement industry, and it was announced by the Hon. Mr. Borden that the Government intended in future to require that all cement used on Government works should be made in Canada.

Mercantile Summary

The Nasmith Company have secured a large site for their new bakery, at the north-west part of Toronto. Work will start shortly.

On the 7th inst., the Esquimalt and Nanaimo Railway and a land grant of a million and a half acres on Vancouver Island were finally transferred to the C.P.R. Mr. Dunsmuir retains the coal rights. The consideration is not stated. The old board of directors resigned, and a new board of C.P.R. officials was elected, with Wm. Whyte, president, and J. S. Dennis, vice-president. It is understood the new directors contemplate an active policy in the development of the land grant, and will place men in the field to explore and prospect the land, timber and minerals.

A special despatch from Rossland states that the connection of the 600-foot level of the Centre Star has been made between the Centre Star and War Eagle,, thus giving better means of ventilation, and it will otherwise be advantageous in the operations of the mine. The cross-cut connecting the two mines runs for a distance of 1,000 feet between the two main shafts. Six hundred feet of it was recently finished. It was while making this connection that a nine-foot shoot of high-grade ore was encountered in the Centre Star. This shoot, now that the connection has been made, will be developed.

A Great North-Western press despatch from Sault Ste. Marie, Ont., dated June 12th, said that more than 1,000 tons of ore per day are now being taken out from the Helen mine, and already this season over 30,000 tons have been shipped. It has been found that 180 feet below the old Boyer Lake level the ore is as good and abundant as ever, and a new shaft has been sunk which gives access to splendid ore 400 feet below the original bed. The entire output for this year has been disposed of. A syndicate of New York capitalists is at present said to be considering the erection of a large smelter at the Soo.

The Canadian Northern Railway, it is said, proposes to link up its southwestern Manitoba system with Lake Superior ports direct by building a connecting link some 65 miles long between Emerson, on the international boundary, and Vassar, a point on the company's main line between Winnipeg and Fort William. The new line would practically parallel the boundary, and will effect considerable saving as compared with the old routes. which all pass through Winnipeg. This line has been surveyed some time, and twenty-four miles have actually been laid. Now, however, tenders for construction are being considered with a view to completing the section in time to carry the present crop from the district interested. The company asserts that this strategic move is necessitated by the pressure on the Winnipeg terminals, which promises to be intensified in a short time when the new main line to Edmonton comes into full operation.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The Keewatin Flour Mills Co., will, it is stated, very shortly begin work on their new 3,000-bbl. flour mill at Keewatin.

A company has been organized by J. M. Crowley, of Sault Ste. Marie, Mich., to develop the iron deposits at Pipestone Lake, north of Fort Frances, Ont.

Ada C. McBeath, doing business at Renfrew, Ont., under the style of the Renfrew Furniture Co., for the benefit of her husband, has assigned to Wm. Hay. The business had been previously carried on, not very successfully, by McBeath and Allan.

The Royal Shoe Company's factory, and that of Smith, Carter & Smith, window shade manufacturers at Maisonneuve, Montreal, were a few days ago destroyed by fire. Loss, $10,000, to the former, and $25,000 to the latter, both covered by insurance.

Chapell Bros. & Co.'s wood-working factory at Sydney, Cape Breton, has been destroyed by fire at a loss of $30,000, the insurance being $7,000. Several other buildings, including Christ Church, were threatened, but the strenuous efforts of the firemen succeeded in averting the danger.

The failure is noted of L. P. Ferland, furniture dealer, Quebec, who is said to owe some $25,000. The business was established many years ago, in its location at the Champlain Market by his father, who retired in his favor in 1902. The young man, however, did not improve his excellent chances, his habits giving rise to more or less comment, and he has now assigned at the request of his father.

Attention is being attracted to the "Ottawa" mine in Slocan district. The vein being worked averages about a foot in width, varying from three inches to a couple of feet. The narrow lode carries 200 ounces of silver to the ton, and is a dry ore, there not being any lead. It carries also a small percentage of silica and iron, both useful in fluxing, and, therefore, a help to the marketing of the ore. Last year about 1,200 tons of ore were shipped, and, it is believed, that the operations this year will be at least equally successful.

Miller and Schwartz, jobbers in dry goods and clothing, principally to peddlers, and also doing some manufacturing in a small way as the Globe Manufacturing and Importing Co., have assigned on demand, and are reported to owe $15,700. The partnership dates from May, 1901, the firm previously having been Rubinovitch and Miller. Last October a surplus was claimed of $9,000, over liabilities of $9,000.——Another Montreal clothing concern, Adler Bros. by name, has been put into insolvency. They are said to owe $12,000, while showing about $1,200 of assets, a state of affairs which should suggest investigation.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

The Toronto General Trusts Corporation

Lefaivre and Taschereau, accountants, Quebec, are in possession of the estate of Mrs. J. A. Blondin, general dealer, St. Maurice, Que. Her husband established the business about 8 years ago, but failed in 1898. Resuming in his wife's name he again failed in about 18 months, and in the summer of 1902 was reported as compromising at 50 cents. It is evident that Mr. Blondin's forte is not storekeeping.

Mercantile Summary.

The Northern Navigation Company's steamer "City of Collingwood," together with the Grand Trunk freight sheds at Collingwood, Ont., were destroyed by fire on Monday last. Four lives were lost on the burning vessel. The ship was valued at $125,000, covered by insurance. The loss on the G.T.R. property was about $10,000.

A fire started in the rear of Nelson's clothing store at Fort Frances, Ont., on Friday last, and spread to Wells' hardware store, and several adjoining buildings. H. Williams & Co.'s general store, the Cooching and Alberton hotels, Bank of Commerce, Scott's jewelry store, Mackenzie's drug store, Fraleigh's drug store, and several other places were destroyed. Total loss is figured at nearly $200,000, partially insured. The fire is attributed to incendiarism.

During a thick fog which has prevailed on the upper lakes for several days, the steel freight steamers Etruria and Amasa Stone collided ten miles off Presque Isle Light in Lake Huron. The Etruria was damaged so that she sank within a few minutes, the crew narrowly escaping with their lives. The Etruria was struck on the starboard side, abreast of No. 9 hatch. The Etruria was valued at $240,000. The Amasa Stone, which escaped any serious damage in the collision, is a steel steamer of 6,282 tons, and went into commission this spring. She is valued at $350,000.

The following patents have recently been issued to Canadians by the Washington office:—788,883, William V. Brown, Berwick, N.S., portable fruit gathering platform; 789,187, Theophile Taillefer, Montreal, butter cutting and measuring device; 789,759, Messrs. Reynolds & Bedard, Montreal, briquette press; 791,803, Douglas J. MacLean, Montreal, drying apparatus; 791,821, Hugues Sauve, St. Timothee, potato digger; 791,884, Simeon Cyr, Little Falls, N.Y., land grubber; 792,069, Wallace G. Parker, Kentville, N.S., harness yokes; 792,264, Paul Ed. Heina, Paris, France, telegraph apparatus; 792,450, Joseph Potvin, St. David d'Yamaska, ditching machine.

There seems to be considerable misunderstanding regarding the route of the proposed canal from Georgian Bay to Lake Ontario. In reality, the proposition made by Mr. H. C. Spalding, C.E., is for it to begin at its northern end at Matchedash Bay and to reach Lake Simcoe at its arm, Lake Couchiching. Commencing again at the southern end of Lake Simcoe it would take advantage of the Holland River and cross York County on the high ground to the neighborhood of the Scarboro Heights. The traffic, after this canal has been built, may, he thinks, warrant a second canal direct from the Georgian Bay to Lake Ontario by a route west of Lake Simcoe, via Nottawasaga River valley.

Mercantile Summary.

The Andrew H. McDowell Company, are starting in business at Montreal as dry goods manufacturers, and general wholesale and retail merchants.

The Model Building Stone Company is building a factory in Montreal for the manufacture of cement blocks. The president of the concern is A. Valin, and the secretary J. Boddy.

James Kennedy, a sawmill proprietor and lumber dealer, of St. John, N.B., has suspended payment. He shows liabilities of $14,000, with nominal assets of $27,000, but in much locked up shape.

An assignment has been made to Kent & Turcotte, Montreal, by J. W. Gagnon, dealing in carriages, implements, fur coats, etc., at Louiseville, Que. His liabilities are estimated at about $3,000.

The United Shoe Machinery Company of Canada has been authorized by the Quebec Legislature to do business in the Province of Quebec. F. W. Knowlton, of Montreal, will look after its interests.

J. G. and J. F. Savage, and others, of Montreal, have formed a company for the manufacture and sale of soap, and will carry on business under the name of "Albert Soaps, (Limited), with a capital stock of $200,000.

The annual report of the St. John Railway Company shows a net profit after providing for the salaries on the bonds and all other charges, of $52,034.44, out of which the directors have declared two half yearly dividends of three per cent., amounting to $44,626.80, leaving a balance of $7,407.64, which has been transferred to profit and loss account.

The Kakabeka Power Company, Ltd., capital stock $2,000,000, head office at Fort William, Ont., has been granted a Dominion charter. It will carry on the business of a power and electric heating and lighting company, and acquire water-power franchises, etc. Interested in the scheme are Herbert S. Holt, Chas. R. Hosmer, F. W. Thompson, and other Montreal capitalists.

C. A. Forbes, in a general store way at Barrington, N.S., who was reported last month as asking an extension on liabilities of $3,300, has assigned to G. A. Black.——McIntosh Bros., at Green Harbor, in the same vicinity, have also put their affairs into Mr. Black's hands. Their business has been of a limited character in general merchandise and fish, and they have been apparently hard pressed of late.

A failure which, it is said, is likely to be felt by a good many people in the district of Iberville, is that of Francois Lafond, of Henryville, Que. Mr. Lafond has operated somewhat largely in hay, but has also done a private banking business, offering considerably more than ordinary bank rates to trusting depositors, and his general management is not favorably commented on. Full details are yet wanting as to liabilities, etc.

Laird, Paton & Son, Ltd., Montreal, have been incorporated to carry on the business heretofore conducted in Montreal under that firm name, as carpenters, contractors, builders, etc.

The Standard Manufacturing Company, Sackville, N.B., are enlarging their plant, and have ordered a 125-horse-power Robb-Mumford boiler from the Robb Engineering Company.

J. A. Bourget, general merchant, Lac aux Sables, Que., recently reported insolvent, has been making an amended offer of 60 cents on the dollar, on liabilities of $5,237, but it is reported the estate will be closed out.——I. Segler, a small general trader at St. Raymond, Que., has compromised at 25 cents on the dollar.

Factory at BRANTFORD.

Mercantile Summary.

The Robb Engineering Company has received an order from the Dominion Coal Company for two 100-horse-power Robb-Mumford boilers.

C. Furneau, of Newcastle-on-Tyne, is the representative of a company of Belgian and British capitalists, who are building a smelter at Frank, Alta., to handle zinc and silver lead ore from the Slocan and Kootenay mines.

We regret to learn of the death of Thomas Caswell, solicitor for the city of Toronto, which took place in Ireland on the 9th inst. He had been ill for weeks, but a fatal termination was not expected. This is supposed to have been due to cerebral hemorrhage. In the various city departments Mr. Caswell was highly esteemed, and was recognized as a high authority on municipal law, outside municipalities frequently appealing to him for decisions on important points.

The incorporation of a new land company is announced under the name of the Canadian Northern Prairie Lands Company, with a capital of $5,000,000, and head offices in Toronto. The company is authorized "to carry on the business of a land company, with the usual limitations, and with incidental and subsidiary powers," and to use any of its funds in the purchase of stock in any other corporation. It is supposed to be backed by Mackenzie and Mann, and to have reference to lands in connection with the Canadian Northern.

We understand that the new Canadian-Mexican Steamship Line will begin operations July 20th, when the first steamer subsidized by the Canadian and Mexican Governments will sail from Montreal to Mexican ports, touching at Havana. By the terms of the contract with the Mexican Government, the boats may carry cargoes and passengers from Canada to Cuba, cargoes and passengers both ways between Mexico and Canada, but on northbound trips no freight may be taken from Cuba to Canada. The Mexican Government objected to subsidizing a line that would be used to build up trade between Cuba and Canada.

The Ontario Wind Engine & Pump Co.'s goods are still finding favor abroad, they having received, by recent mail, an order from the British Government for one of the crown colonies for fifteen complete Canadian airmotor outfits. This patronage by the Imperial Government is sufficient warranty of the class of goods turned out by this firm, and it certainly reflects credit to the country. This firm have just issued an up-to-date illustrated catalogue which is very complete, setting forth the various lines manufactured by them, nicely illustrated, which will be sent to anyone writing to the above firm for a copy. Kindly mention this paper.

Arrangements have been made by the railway for special rates for a Home Comers' week at Charlottetown, Prince Edward Island, which is to take place on July 24th to 31st. Those interested should write the Intercolonial agent, Mr. Weatherston, or call at his office, 51 King Street East, where full information can be obtained.

⁂

SHIPBUILDING ON THE LAKES.

Never before in the history of the lakes, we learn from the Marine Review, have the ship yards been blessed with such a prodigality of orders; never before have all available berths been practically taken a year ahead. There are 16 ships under order for 1906 delivery. This is in striking contrast with the condition of a year ago when the ship-building berths were practically vacant and no orders in sight. Indeed the summer of 1904 was well advanced before the ship yards received a single order; but after that they came fast. But such a condition as now confronts the great lakes ship-builders is a new experience altogether. What with the orders for new ships, the lengthening of old ones, and the inevitable repairs to the existing fleet, the ship-builders of the Great Lakes can look forward to eighteen months of exceedingly active work. Since the beginning of the present year the great lakes ship-builders are working upon or have under order no less than forty ships for the ore trade.

⁂

—We take considerable pleasure, at this time of holiday outings, in calling attention to the excellent opportunities afforded by the Kawartha Lakes, the name Kawartha being the Indian name for "Bright Waters and Happy Lands." From Lindsay to Coboconk and Lakefield, it is 80 miles of as picturesque scenery and popular summer resorts as exist in this province of lakes. Excellent steamboat service throughout in daily connection with G.T.R. and C.P.R. trains during the season. From June 1st to October 1st, the steamer leaves Lindsay for Sturgeon Point and Bobcaygeon daily at 11 a.m. and 5.45 p.m., except on Saturdays, when the evening boat awaits the arrival of the G.T.R. and C.P.R. evening trains from Toronto and Port Hope. June 19th to September 30th, steamer leaves Lindsay tri-weekly (Mondays, Wednesdays, and Saturdays) for Fenelon Falls, Rosedale, and Coboconk; returning same day. June 19th to September 16th, steamer leaves Lakefield for Stony Lake points daily on arrival of all G.T.R. trains, connecting at Burleigh Falls with steamer for Buckhorn, Chemong, and Bobcaygeon; and during same period bus connection is given between Peterborough and Chemong, to and from Burleigh Falls, Bobcaygeon and intermediate points daily. For rates for excursion parties, time-cards, folders, etc., apply to The Trent Valley Navigation Company, Limited, Bobcaygeon, Ont.

⁂

—The merchant or manufacturer, the industrial or professional, the manager or operator, who assumes to "get on" without the trade journals directly or collaterally bearing on his particular specialty, is seriously handicapped in the stress of competitive strife. Wilfully, though perhaps not wittingly, he deprives himself of sources of information and material for progress and profit, lack of which must inevitably leave him in the lurch. The managing head of every "house," no matter how large the concern should above all things see to it that each department head, and so many of the working force as by their intelligent interest show that they would profit by technical and professional information—that all these men are provided with the trade journals best fitted to promote the advancement of each in efficiency. This at the expense of the firm, of course, since the firm, in turn, cannot fail largely to profit by such policy. And don't commit the folly of balking at the preponderance of ad pages. The information these contain is never less and often far more valuable than that found in the "reading matter."—Boston Herald.

STANDARD
OF THE
WORLD

SOLD BY ALL LEADING
WHOLESALE HOUSES.

TORONTO MARKETS.

Toronto, June 22nd, 1905.

Chemicals, Drugs, etc.—There has been an advance in opium products, particularly in morphine. Carbolic acid is easier, in sympathy, we suppose, with peace rumors. Quinine is a little on the firmer side, cod liver oil also is a little improved. Tartaric acid is firmer. Rhubarb is high. Camphor maintains its position. New York markets are reported about as before. Advices from England speak of the chemical market retaining its position in most of the branches.

Dry Goods.—With stocktaking, last week the wholesalers report a slight quietness in some branches of the trade. Staples remain practically unchanged since our last advices on the subject. Cottons are firmer, and the advance in raw cotton makes their position all the stronger. Payments are about average for this time of the year.

Flour and Grain.—The quoted price for ninety per cent. patents is $4.40 to $4.45 in buyers' sacks, eastern and western freights. Manitoba flax is steady, and sellers are making no concessions. In millfeed the situation is not materially changed since last week. A firmer tone prevails in the wheat market, and some believe there will be advances before long. In Manitoba business is rather quiet on the present level of high prices. The local milling demand is fair, while that for export is very quiet.

Fruits and Vegetables.—The fruit market was opened this week, and a fairly good trade was carried on. Canadian fruits were in request, though they were not generally in evidence. Strawberries sell for 10 to 14c., but the quality of this berry at present indications does not promise to be very high. A few domestic cherries were offered selling at $1.25, or a little more per basket. Pineapples are firm. Spinach, lettuce, radish, etc., are selling fairly well.

Groceries.—Trade is not over-brisk. Sugars remain unchanged. In other lines there are few features. Teas are a little on the dull side, and, coffee, which was moving with exceptional freedom for a while, is now dull. Canned goods are not selling so readily the last week or two, owing, no doubt, to the advent of fresh vegetables. But the scarcity continues, and prices are very firm. From present prospects it looks as if they will continue so, as the season is so late for other lines.

Hides and Skins.—The recent advances in prices are well maintained, but there is no special feature calling for attention. Tallow is easy.

Leather.—In spite of the advance in hides, leather remains much as it was before, though firmly held by dealers. Stocks, however, are not particularly light.

Provisions.—Butter is coming in in abundance, and values are a shade easier. For cheese the price is 10 to 10½c., and there is an even firmer tone to the market. Eggs hold very steady. As is usual at this season the demand for cured meats has become intensified, and prices are firmer.

Wool.—Receipts have been small, and prices are higher. It looks as if there were over-competition among country dealers for the wool offered, and whether, under the circumstances of the market, they are warranted, is somewhat doubtful.

⁂

MONTREAL MARKETS.

Montreal, June 21st, 1905.

DELAYS ARE DANGEROUS.

The Accident and Sickness Policies
ISSUED BY THE
CANADIAN CASUALTY
and Boiler
INSURANCE CO.
22-24 Adelaide St. East, TORONTO.
are by far the BEST, CHEAPEST and MOST COMPREHENSIVE in the market.
Full Information Freely Given.
A. C. C. DINNICK, Managing Director.

Ashes.—A drooping tone is discernible in the market, owing to slow demand, and quotations for No. 1 pots have further declined to $5.25, with second quality pots ranging about $4.75. Pearls are wanted, and the few barrels recently coming in have realized in the neighborhood of $7.50.

Dairy Products.—That the make of cheese this season is a large one is very evident from figures of receipts and shipments at this port as authentically compiled. Last week there were received 90,852 boxes, as against 66,108 boxes for the preceding week, while ten steamships took out 74,149 boxes to Liverpool, London, Glasgow, and Bristol, being about 9,000 boxes more than the figures for the corresponding week last year. The receipts of butter last week were also fairly liberal, aggregating 31,172 packages, while the shipments abroad amounted to 17,665 boxes. Since last report there has been a further stiffening in cheese quotations, under good demand, and the market is firm at 9¾ to 9⅞c., for finest Ontarios, with fine Quebecs quoted at 9½ to 9⅝c. Butter values are also rather stronger than a week ago, about 19¾c. being quoted for choicest creamery.

Dry Goods.—Owing to the recent hot days retailers have found more active demand for warm weather goods, and wholesalers report a very fair number of better sorting orders within the last few days, but wholesale trade cannot be called very active. Remittances are fair with the exception of North-West collections, which are decidedly poor. Advices from Britain indicate the probability of a strong advance in mohair goods. Following the example of the Canadian Colored Cotton Co., as noted last week, the Cornwall and York mill at St. John, N.B., has also advanced the prices of better class tickings made by them.

Groceries.—The sugar market has developed further weakness, and this

The British Mortgage Loan Co.,
OF ONTARIO.
Dividend Number 54.

Notice is hereby given that a Dividend at the rate of Six per cent. per annum, on the Paid-up Capital Stock of this Company, for the halt-year ending the 30th June, instant, has this day been declared, and that the same is payable at the office of the Company, in the City of Stratford, on and after

Monday, the 3rd Day of July next.

The Transfer Books will be closed from the 16th to the 30th instant, inclusive.

By order of the Board.

WM. BUCKINGHAM,
Stratford, June 5th, 1905. Manager.

$500,000
GOVERNMENT DEBENTURES

Offers will be received up to 1st September, 1905, for Debentures to be issued by the Government of Prince Edward Island under authority of an Act passed in 1905. These Debentures will be in denomination of $1,000, redeemable in 30 years and bearing interest at the rate of 3½ per cent. per annum, payable half-yearly. Offers will be received for the whole amount or any part thereof.

Address "The Provincial Treasurer," Charlottetown, Prince Edward Island, Canada.

S. E. REID,
Provincial Treasurer.

AGENCIES THROUGHOUT CANADA.

afternoon the local refiners announced a decline of 10c. a cental, making the present factory price for standard granulated $5.05; with yellows ranging down to $4.55. Molasses is also easier by a cent, the jobbing quotations for single puncheons now being 37c. Quotations for River Inlets sockeye salmon are announced at $4.75 f.o.b., coast, but figures for Fraser River fish are not yet to hand. Evaporated apricots are very scarce, and are held at 13c., and of evaporated peaches there are none. The stock of Valencia raisins is now quite light, but fine off-stalk are quoted at 4¾c. Evaporated apples are quoted at about 7c. in a jobbing way.

Hides.—Business in this line is now of a rather dull order, but quotations are quite steady at 10½ to 11c. to tanners for No. 1, dealers paying 10c. Calfskins are quoted at 15c. for No. 1, and 13c. for No. 2; lambskins, 25c. each.

Metals and Hardware.—In general hardware trade is now getting to be of a summery character, but heavy metal men still report good business. There has been some further advance in antimony, which is now quoted at 11½c., figures nearly 100 per cent. ahead of what they were six months ago. Ingot tin keeps on firming up, and L. and F. could hardly be sold below 33c. in an ordinary way. Copper is barely as strong as it was, being quoted at 15¾ to 16c. The general range of quotations remains as fully reported last week.

Oils, Paints, and Glass.—With the approach of mid-summer trade is becoming less active, but there is still a very fair distribution in progress for the season. The week has developed no changes in quotations. Glass remains very firm at $3.75 per 100 feet for first break, with stocks on spot quite light, but fresh supplies are near at hand. Turpentine is fairly steady at $1 per gallon for single barrels. For raw and boiled linseed oils the quotation is 53 and 56c. respectively in an ordinary way.

* * *

A SCHOOL EXAMINATION.

Some of the illustrated booklets which the Canada Paint Company issue occasionally must have found their way to the neighboring republic as the following incident, which is said to have occurred at a recent school examination in Rochester, N.Y., will show.

Teacher:—"What is there to the north of the Great Lakes?"

Answer:—"The Dominion of Canada."

Teacher:—"Right,—What else?"

Answer:—(Ubiquitous small boy), "The *Canada Paint Company*!"

Teacher:—"Right—Ahem—then you may go up one!"

FAILURES, HONEST AND OTHERWISE.

We are inclined to gloss over unwise business methods, and to permit or encourage excessive purchases and credit for temporary advantage to ourselves; we are prone to sacrifice principle to expediency, and are too often intolerant of conditions and circumstances that are entitled to charitable construction and should warrant the exercise of patience and liberality. But we are becoming wiser in our day and generation, and are beginning to realize that the solution of many a credit problem lies in the education of credit seekers.

Many a failure, honest in law, is sullied by artifices that would be condemned by the verdict of strict integrity, says an exchange. "Most men are honest," and "All men have their price," though of opposing sentiment, are favorite aphorisms, and, paradoxical as it may seem, both are susceptible of demonstration. Ten per cent. of the reported failures appear to be fradulent. In addition to the known frauds there is a large number strongly tainted with

dishonesty, but so carefully disguised as to be beyond legal proof. Neglect, speculation, unwise credits, undue competition, and the like, are causes of failure which need no comment. But it is not easy to approach the subject of fraudulent failure without bias.

Nefarious schemes demand emphatic condemnation from those who have suffered by them. When one plots to defraud, his snares are carefully laid—the trap is temptingly baited—and it will pay manufacturers and jobbers to keep their eyes open. Accidents cannot be

THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST.

escaped, nor unfavorable conditions controlled, and fraud will continue to masquerade in the guise of virtue; but disreputable practices can be minimized, business methods improved, and menacing evils averted whenever debtor and creditor are willing to co-operate for their mutual advantage. Under unequal or unfavorable conditions the weak go down, while the strong keep on; warranting the conclusion that the cause of failure is with the man oftener than with circumstances.

Test of Popularity:

(1) Low ratio of business lapsed, and
(2) High ratio of business gained.

Head Office—Waterloo, Ont.

in the net amount of business **in force** in Canada, **gained** during the **last five years**, as shown by the Dominion Government Blue Books.

THE HABIT OF SAVING.

"It is believed by many that the recent rise of great fortunes in this country and the combination of capital into corporations that have largely replaced the individual employer have lessened and limited those opportunities for success in life which formerly were open to young men. Nothing, however, could be more erroneous. The opportunities to-day are greater than ever. It all depends on the young man himself.

"Generally speaking, the whole question depends upon self-denial. This is as important to financial success as it is to health. The man who has a sound body and a sound fortune at fifty can quickly trace both back to self-denial.

"Specifically speaking, later success comes from early saving. It is the habit of saving that is important. The man who is going to win a large fortune—and what is equally important, be able to keep it—must learn early what it is to have a bank account, and what careful investment means. The clerk who can save one hundred dollars and invest it in the safest and most remunerative way has already mastered the essential character of the problem and is much farther along the road to wealth and success than perhaps he may imagine. There are only two secrets of success and they are: 'Work Hard' and 'Save Your Money.'"

—H. Clews.

BRITISH EMIGRATION.

The statistics of emigration from the United Kingdom for 1904 have just been published by the British Board of Trade. During the year 271,435 British and Irish persons left Great Britain for non-European countries, as compared with 259,950 in 1903, and 205,662 in 1902. Of the total number of native emigrants, English passengers formed 65 per cent., Scotch 14 per cent., and Irish 21 per cent., as against 68, 14, and 18 per cent. respectively in the preceding year. Of the British and Irish emigrants, 119,504, or 44 per cent. went to places within the British Empire, 26 per cent. coming to British North America, while 10 per cent. went to British South Africa, and the remainder to other British colonies and possessions. Of those going to foreign countries, nearly the whole number went to the United States. The number of British and Irish emigrants to South Africa was only 26,818, as compared with 50,206 in 1903; and 43,206 in 1902. The number who came to British North America, on the other hand, reached 69,681, as compared with 59,652 in 1903, a number itself in excess of any previous figures.

The Barnett-McQueen Company, Ltd., will establish a mechanical engineering and contracting business in Winnipeg.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

EMPLOYERS' LIABILITY
ASSURANCE CORPORATION
MONTREAL —— TORONTO
GRIFFIN & WOODLAND,
MANAGERS.

—A Nova Scotia exchange says that the Government will erect a fish-reduction factory on Round Island, one of the group lying just south of Clark's Harbor and about a mile from that place. The site is certainly well chosen, it says, both with respect to its easy and safe approach from all sides by boats of considerable draft. and to its central location as regards extensive shore fishery. There will be only three of these works, to start with, in the Maritime Provinces—one at Canso, now in course of construction;—one at Caraquet, N.B., and the other at Cape Sable.

* * *

—The car crawled slowly on, with an occasional long pause at a threatened breakdown. At last an old man with a long white beard rose feebly from a corner seat and tottered toward the door. He was, however, stopped by the conductor, who said: "Your fare, please." "I paid my fare." "When? I don't remember it." "Why, I paid you when I got on the car." "Where did you get on?" "At —— Street." "That won't do! When we left —— Street there was only a little boy on the car." "Yes," answered the old man, "I know it. I was that little boy."

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

THE POWERS OF LIFE INSURANCE AGENTS.

Agents for life insurance companies can exercise their influence in several ways both beneficially and detrimentally, considered from the points of view of themselves, of the companies they represent, and of the policy-holding public. Some agents have in the past used their main efforts in endeavoring to obtain from the companies new concessions in the way of high commissions, heavy travelling expenses, and so forth, until the time came when the policyholder suffered. The companies objected—and objected—but there was so much competition that in the end they yielded. Naturally, the final result has been good neither for agents nor companies, but this consideration, while possibly it might have been foreseen was, under the circumstances, not sufficiently strong to make itself felt till too late.

This refers to the influence of agents, however, from the adverse point of view. There is another side of at least equal importance. If policyholders have in some cases suffered owing to the exorbitant demands of agents, they also owe to them the possession of numerous advantages. Many of the more modern concomitants of life insurance, such as non-forfeiture, options, incontestability, surrender values, etc., are the direct result of the persistent demands of agents on behalf of their patrons. And these concessions, while they were suggested for a long time to unwilling companies have, without a doubt, redounded to their own benefit as well as to that of the policyholders and the companies themselves.

A feature which agents have clamored for largely in recent years has been estimates on deferred dividends—and the larger the estimate the more would the agent be satisfied. It is becoming realized, however, that a still more important thing than an imposing estimate is the reliability of it, so that it may be fully realized, it being better for a company's reputation for the estimate made by it to "come out true," even though it be a comparatively small one, than for a large one to be falsified. This also, agents and companies are finding out to their cost.

Possibly the final outcome of the thinking that is now going on in insurance circles will be the growth in favor of what may be called "straight protection," as opposed to the profit-bearing clauses which have become so much in evidence. With these eliminated, or practically so, rates for protection pure and simple could be reduced to a minimum.

⁂

THE DRY GOODS TRADE.

The backward weather in the early part of this season led, as was anticipated, to a poor showing of sorting orders for spring and early summer goods. That this was due to the weather solely, and to no untoward financial stringency, is shown by the fact that ordinary placing orders were fully equal to, and in many cases ahead, of the same period of last year. Since the change to more seasonable conditions, however, a great improvement has set in, sorting orders have been frequent and of at least average value, and the total turnover for the summer trade is likely to prove of large dimensions. At the same time it must be admitted that stocks of spring goods are in many cases quite heavy.

Apart from climate conditions, the considerations which have tended towards a betterment in conditions with dry goods trade, are the highly favorable advices coming to hand respecting prospects for the crops, both in the North-West and in Ontario, and the high state of prosperity in which the people of the Dominion generally find themselves.

Millinery has been a particularly heavy seller this season so far, which more especially as it has been quite high-priced, is another good indication of the country's prosperity. Hats, laces, and embroidery have been in heavy demand ever since April.

Dress goods form a strong feature of the season's business, and all types have sold well. Among the favorite varieties for ladies' wear are muslins and Japanese silks for waists. The latter have been particularly reasonable in price considering their intrinsic value. Cotton blouses, of course, retain their popularity.

All staple goods are firm in price. In fact, some cottons have actually advanced, such as prints and heavy greys. The home factories, according to all reports, are extremely busy, finding difficulty, indeed, in keeping up to their agreements as to delivery. In woolens, there has been no recent active advance in domestic lines, but they are all held very firmly. Imported goods are quite high, too, and Bradford advices speak of continued advances in some lines of manufactures. The price of raw wools in Toronto went up a cent or more per pound recently.

* * *

MODERN TRADE UNIONISM.

To one interested in commerce who carefully scans the social fabric, not only of any individual country, but of the world to-day, the most conspicuous phenomenon, and one that is of the most vital importance in the future development of the world, is the relative position of labor and capital.

In early days of English history there were conflicts between the King and people for political power—the people finally relegated the doctrine of the "Divine Right of Kings" to the historic past, and to-day we have a system of democratic government in British countries which yet retains the executive officer of the nation in a dignified position. In the Feudal Ages the great contests were caused by greed for territorial possessions, and much blood has been shed in this cause. And so we could continue throughout English History until the nineteenth century when an entirely new phase of development was ushered in—the adaptation of steam power to the needs of man inaugurated our present industrial age.

The past century has been one of commercial and industrial activity pre-eminently and standing on the threshold of the twentieth century we may say that the question of dollar-making is the pivot around which the world moves. In early days a man could live comfortably in a simple way, with the result that his energies and thoughts were directed along channels entirely different from those of the present day. To-day the people—as such—or those who are in the middle and lower grades of society, and who constitute the masses of any country, must work and work hard to sustain life, and capital controls their efforts and is the great overlord.

If one but looks at our social fabric to-day in this light, the importance of the relative positions of labor and capital will at once be apparent—and as population increases and the struggle for existence becomes more keen, this problem will be foremost before the great industrial nations, and we can well imagine, in the light of the great Pennsylvania coal strike of several years ago, that our great civil wars of the future will not be for political or territorial aggrandisement, but will be between the masses—the brawn of the nation—and the hierarchy of capital accumulated in a comparatively few hands.

For this reason it will be interesting to understand more thoroughly just what our modern trade-unions are, how they are organized, their development during the past century, their methods of fighting, the results they have accomplished up to the present day, and the way they have sheltered themselves behind the arm of the law in different ways, and we will endeavor in the next few numbers to place these facts clearly before the reader in order that we may try to forecast the future development of the social fabric. No effect is produced without a cause, and no matter how isolated a particular phenomenon may appear to be, yet if we probe deeply enough we shall always discover its cause, and find that it grew naturally out of a pre-existing set of fixed conditions. Consequently if we understand our important Trade Unions of to-day in their proper light, and grasp their co-relation to the remainder of the social organism, we ought to be able to fairly accurately foresee certain interesting conditions that will evolve therefrom in the future.

(To be Continued.)

* * *

FIRE INSURANCE EXPENSE RATIO.

A question that is always to the front in the fire insurance business is that of expense. In this particular, fire insurance is not materially different from other lines of business. There is always in all lines of business a struggle to keep expenses down. The more widely extended the business and the more what may be called retail it is, as regards extent of territory, naturally the greater tendency to large expense. The managers of fire insurance companies strive to keep the expense element at the lowest possible figure, but in spite of their efforts the expense is very considerable. There are a good many items in the expense account of a fire insurance company. The heaviest item is that of commissions. The agent is compensated by a commission upon the premium collected. This has gradually increased. But it is to be remembered that it is the price which the buyer of fire insurance pays for the privilege of doing business with his neighbor. It may not be amiss to take note of the fact that the money paid for commissions remains in the community where the business originates.

A well-known Philadelphia insurance man, Mr. F. C. Aviatt, goes so far as to say, in a recent paper, that a company, using the word company in the sense of the stockholders, does not profit by the commission paid for the business. The company simply enters into an arrangement with a man in a given community to sell its fire insurance policies to those who desire to buy them. When he has collected the money the company authorizes him to retain a certain proportion for his services. This money is kept in circulation and is a benefit to the community, in that it furnishes employment and support to one or more of the members of the community and thus takes them out of the competition in other lines of activity. This is a commonplace, but it seems to be lost sight of many times by those who assert that all money collected on behalf of this insurance company is withdrawn from the community and sent to the headquarters of the company. Another item of expense is the charge which the nation imposes upon the business in the shape of taxes. This amounts to nearly 3 per cent.

What the public desire in the matter of fire insurance indemnity is unquestionable value. Were it otherwise, business could not be conducted, because the fire insurance policy enters into almost every transaction of any importance in this country. As between lower rates and value there is scarcely any business man in the country who would hesitate about choosing value. He may think from a cursory examination ‘that he is paying too much for his indemnity,’ but he would rather pay more than less if the less lessened the value. Of course, this does not mean that the companies should not bring down their expenses to the lowest ratio possible.

* * *

MUNICIPAL INDEBTEDNESS.

However good in theory, and perhaps in practice, may be the principle of municipal ownership, there can be no doubt that its application is often attended with a startling increase in municipal indebtedness which, unless watched, is apt to land ratepayers in an unenviable position. We in Canada have often noticed this tendency in our cities to increase their liabilities more and more rapidly, but in other countries, some of which are held up to us as models, the same tendency is visible in even a more marked degree. Great Britain, for instance, is the ideal home of municipal honesty and municipal enterprise, but that all that glitters is not gold even there is manifested by some remarks made by Lord Avebury. Or, rather, he has made an interesting study of the increase in recent years in local and national expenditure. About forty years ago, says that authority, the local expenditure of the United Kingdom amounted to only some thirty-six millions sterling; in 1901-02 that total had swelled to 144 millions sterling. No doubt population had increased, but in the last twenty-two years the average rate per head of population has risen sixty-two per cent., while the average debt per head was now ninety-five per cent. greater, and the average rate per pound of valuation sixty-one per cent. In London the increase had been from £1 4s. 11d. per head of the population in 1874-75 to £2 12s. in 1900-01. In the rest of England and Wales the increase had been from 14s. 8d. per head of population in 1874-75 to £1 2s. 6d. in 1900-01. These figures are serious, but when we come to local borrowings, the results of a little enquiry are absolutely startling. The outstanding loans of local authorities in England and Wales had risen in ten years by no less than £142,000,000, and now amounted to over £343,000,000, while those of the United Kingdom were £412,000,000!

Not only this, but we note that in his Budget speech last year the Chancellor of the Exchequer pointed out that in England and Wales the total outstanding loans in 1880 were £137,000,000. In the ten years from 1880 to 1890 that amount was increased by £62,000,000. In the ten years from 1890 to 1900, the amount further increased by £95,000,000; while in the two years of 1900-02 the figures were increased by no less a sum than £49,000,000. That was to say, the present rate of increase was two and a half times as great as it was in the period between 1890 and 1900; more than four times as great as between 1880 and 1890. In the twenty years between 1880 and 1900, while in England and Wales the local indebtedness increased by £157,000,000, the gross capital liabilities of the State were reduced by £132,000,000. But when the State was forced again to become a borrower, owing to the exigencies of a prolonged war, there was no compensatory restriction in the demands of the local authorities. In the three years ended March 31st, 1902, the local authorities of the United Kingdom borrowed over £103,000,000, and the total local indebtedness at the end of 1902 was, as stated, no less than £412,000,000.

We note, also, that some sort of a reply to these figures has been attempted by Sir Albert Rollit, but, as it is remarked by the Spectator, this writer did not take into account, so far as we are aware, the fact that many municipal bodies undertaking various matters—not all profitable—that used to be left to general private enterprise, have to provide expensive plants which will require replacement, and sometimes this will involve a total change in detail—we doubt whether due provision is always made for this certain contingency, beyond the usual reliance on further loans, higher assessments and the like. These means, however, unfortunately tend to intensify and to exaggerate the evil. Municipal bodies cannot continue to borrow *ad libitum* with permanent impunity any more than any other bodies engaged in large operations. At present there is a universal outcry as to the increase in rates, and it is quite likely that ere long municipal bodies may find themselves in serious difficulties.

For ourselves, we wonder ratepayers have not long since been roused out of their general apathy in reference to municipal matters, and efforts made by householders to curtail decisively the excessive increase in expenditure indulged in by the men who represent them in the councils. But then we know, of our own experience in Canada, how insidious and how usually unchecked is this slow but sure or rather rapid increase in municipal borrowing. It is certainly true that a wholesome check to it would do much towards strengthening the security of municipal loans.

* * *

CANADA AND THE JAPANESE TREATY.

In view of our article last week setting forth the facts regarding the British commercial treaty with Japan, and the exclusion of Canada from the benefits arising therefrom, the discussion which took place three or four days ago in the Dominion Parliament will prove of particular interest. As was stated, the Canadian Government did not become a party to the treaty in December, 1896, nor January, 1897, but when Mr. Fisher was in Japan two years ago he was informed by the Japanese Government that if at any time Canada desired to come within the terms of the treaty, the Japanese Government would raise no objection.

Mr. Fisher, in making a statement on the subject, said that when he went to Japan two years ago, he had made a special study of the subject, and found that Japan had commercial treaties containing most-favored-nation clauses with Great Britain, Germany, Austria-Hungary, and France. The treaties each included a specified list of articles with lower rates of duty. Japan had also general commercial treaties with seventeen other countries. And in each of these, while there was no specified reduction on any specified article, there was a most-favored-nation clause, with the result that Japan has given to nearly every commercial nation of the world the lowest duty which she gives to any other country on certain specified articles. As Canada had not adhered to the British-Japanese Treaty, it was not entitled to any of the reductions set forth in this list, and therefore upon these articles had to pay on an average about 15 per cent. ad valorem, while the United States and all other countries having any commercial treaty with Japan had only to pay on an average about 10 per cent. ad valorem. A summary of these articles appeared in our last week's article.

Now, it is highly satisfactory to learn, with a view to securing the advantages of the treaty the Dominion Government has sent a despatch to the Colonial Office requesting the Foreign Office to ascertain if the Japanese Government would, notwithstanding the delay, permit Canada to adhere to the treaty. This, so far as we understand, will meet with a ready response from Japan. Should this request be guaranteed, Canada will obtain the advantage in Japanese markets of the minimum tariff, and to that extent will be on the same footing as Great Britain and the United States, while Japanese goods will enter Canada at no reduction in the Canadian tariff. The great advantage to Japan, however, will be that the subjects of the Mikado will have full right to enter the Dominion, the same privilege being accorded to Canadians in Japan. With the exception of in British Columbia, such a step will be fully welcomed by Canadians.

* * *

THE C.O.D. POSTAL SYSTEM.

The announcement that Lord Stanley, the British Postmaster-General, proposes to instal the C.O.D. parcel post system in Canada will be received with various feelings in this country. It will be remembered that the same proposal, applied on an extensive scale to Great Britain, met with such a fierce wave of opposition from the ordinary retail dealers of that country that it was withdrawn, although, it is believed, only temporarily. No doubt, as Lord Stanley says, the Canadian scheme would be followed by a gain to British trade, but we may ask at what cost to local Canadian trade?

And, we may ask, is it wise to starve colonial trade, even for the purpose of helping that of the Mother Country? Is it not possible to do more for the Empire by the development, in every way, of the colonies than would be done fractionally to the merchants of the Old Country by the proposed innovation? We would imagine that a better and less costly improvement in the postal relations of Great Britain and the continent would come about by the Government of the former doing away with the present absurd handicaps on the circulation in this country of British periodicals, filled with Imperial sentiment and with advertisements of British-made goods. Under present mediæval regulations every advantage is with the Americans, for no better reason, according to the words of the British Postmaster-General than that sentiment should not be allowed to stand in the way of business, and that the interests of the latter would not be served by a reduction in newspaper rates. Yet, so far as apparently authentic information has reached us, the forerunners of the C.O.D. postal system have met with a by no means unqualified success, pecuniarily speaking. Why should it be thought that the system applied to Canada would meet with any better?

And so far as Canada itself is concerned, we would suggest that there will be plenty of time in which to test the newest theories about the Government undertaking a collecting business and competing with the local merchants, to whom should go the trade, when the ordinary and absolutely necessary postal arrangements of this country shall have become perfected and profitable in every branch. Until this has become a recognized fact, it would probably be better to leave all such new undertakings severely alone.

* * *

MEXICAN TRADE.

It is to be hoped that Britain's example in Mexico will not be followed by Canada in the matter of trade, nor that Britain will come to the same decision in other places. The report that comes to hand from Mexico City, namely, that owing to the constant and growing competition of German, French, and more particularly American firms with the old-established British concerns there, they are giving up, and that Great Britain will therefore abandon the country in a consular and commercial sense would appear incredible, were it not backed up by the following statement from Mr. Lucien Jerome, the British Consul in Mexico City:

> The investment of additional British capital in Mexico will not be encouraged. England feels that the United States has a preferred claim to Mexico's trade and to the opportunities for industrial development in this Republic. No campaign will be made by British interests to wrest Mexican trade from the United States, and no efforts will be put forth by the British consular service to encourage the investment of English capital in Mexico. The United States is right at Mexico's door, and it is reasonable that it should obtain the bulk of Mexico's trade. England is interested in Argentina and Chili, but outside of those countries there is no Latin-American country that we care much about.

It is true that Mexico is next-door to the United States, but then there is scarcely any country in the world that is not nearer to some commercial nation or another than Great Britain. Will the proud commercial kings of the Mother Country, therefore, give up one after another? Canada is also next-door to the United States. Will Britain abandon us from a trading standpoint? One would think that such a contingency as meeting with keen competition would only arouse her to fresh and more determined efforts. It does not sound right, as coming from the bull-dog Englishman.

* * *

OUR ST. JOHN LETTER.

On the 7th of July next, before the Equity Court in this city, the Attorney-General will make an application for an injunction against the St. John Lumber Company, an American syndicate who have placed piers and other obstructions in the river that are said to interfere with the operations of New Brunswick lumbermen desirous of bringing their logs down the river. Some prominent American lumbermen who have their mills at St. John are as deeply interested in the action being taken by the Attorney-General as are the New Brunswick lumbermen. If Hon. Mr. Pugsley is successful in our courts he will probably have similar suits instituted in the courts of Maine, as the present action can only refer to that half of the river which is on the Canadian side, where it forms the international boundary.

The Railway Department has issued a call for tenders for very extensive alterations and improvements to be made in the Intercolonial railway station at St. John. The train shed is to be widened to give an additional track, and lengthened one hundred feet. It is now too short for the long passenger trains that are used on both the I.C.R. and C.P.R. The baggage room facilities at present are inadequate, and will be improved by a two-story addition, the upper rooms giving quarters for the baggage masters, revenue officers and conductors and brakesmen. The work will be rushed along to completion before the cold weather sets in.

The Judges of the Supreme Court of New Brunswick are making a strong effort to get the different interests in the Cushing pulp mill dispute to settle their differences. Your readers know that one set of owners are moving through the trust company to foreclose the mortgage, while the others want the property put in liquidation. Meanwhile the mill is being operated, and is showing a profit of about $5,000 per month. When the case comes before the full court on appeal the Judges declared that every effort should be made to bring about a settlement. To permit of this they postponed a decision on the appeal until September 15th, and Judge Barker, of the Equity Court, who had ordered a sale under the foreclosure, postponed the sale until after that date. The lawyers all agreed, but told the court they feared it was no use. Meanwhile, A. H. Hanington, solicitor for Capt. Partington, the chief owner, has gone to England to interview him.

F. E. Sayre, a St. John millman and lumber operator, has just purchased the lumber mill of A. H. Sawyer at Hartland, Carleton county. With the mill he secured 16,000 acres of timber lands, owned by G. M. Sawyer, and 100 miles leased from the Provincial Government.

James L. McAvity, an energetic young business man of this city, who purchased the foundry business of Messrs. McLean & Holt a year or two ago, has now secured a large tract of land at the back of the city, and will build a modern factory. He is going extensively into the manufacture of stoves, and has opened a retail store in the centre of the town to handle the product of his factory.

Announcement has been made within the past few days of a disagreement between the partners in the wholesale commission house of A. C. Smith & Co., of West St. John, who do the largest business of the kind in the city, handling for the C.P.R. the cattle and other live stock sent here in winter for shipment to the Old Country. The business was established by G. A. C. Smith, now deceased, and C. B. Lockhart, M.P.P. Mr. Smith's son is now head of the business, and he and Mr. Lockhart, having failed to agree on the terms of dissolution, will appeal to the courts for a settlement. The firm has made considerable money in the last few years. * * *

St. John, N.B., June 26, 1905.

* * *

ST. JOHN DOCK FACILITIES.

There is a hitch in negotiations between the city and the Canadian Government for the construction of additional deep water wharves. Some time ago the city proposed to Hon. Mr. Hyman, Minister of Public Works, that it would spend some $300,000 on wharves and warehouses if the Government would do the dredging, which, it was thought, would cost between $150,000 and $200,000. The Minister considered this a fair and reasonable proposition, and readily promised his assent. He set his engineers to work preparing a report, and then it was discovered that the dredging meant an outlay of about $450,000, and naturally the Minister is considering the new aspect of the case. The city is urging him to go ahead and spend the sum agreed anyway, believing it will make possible the completion of one additional berth. The matter of further deep-water wharves at St. John for the accommodation of the winter export trade of Canada is becoming too big a project for the city, and it will not be surprising if at an early date steps are taken to give control of the harbor to the Dominion Government.

The local syndicate who have organized to build a dry dock are making a strong effort to get the Dominion Government to assist them in financing the scheme. The dock will receive a Dominion subsidy of 3 per cent. on an expenditure up to a million for twenty years, a provincial subsidy of $5,000 for forty years, and a city subsidy of $2,500 for forty years; also a free site. This would be sufficient to justify capitalists in advancing the money but for the uncertainty of getting back their principal. The latest proposal of the company is that the Dominion Government take over the subsidies and in return guarantee the bonds, when it will be easy for the dock company to float them. The proposition is now being considered by the Government.

* * *

INTERNATIONAL ACTUARIAL CONGRESS.

The fifth International Congress of Actuaries will be held in Berlin in September, 1906. Among the subjects to be taken up, we note in an advance programme the following: 1. The scope of insurance. 2. Insurance of women. 3. People's (i.e., industrial, etc.), insurance, especially the insurance of children. 4. The insurance of abstainers. 5. Insurance of persons engaged in the preparation and sale of alcoholic liquors. 6. Graduation of Mortality Tables. (It seems a pity not to include the graduation of sickness, secession, marriage and other functions.) 7. The treatment of loadings for extra risks. 8. Insurance taxation. 9. Aids to actuarial calculation in different countries (i.e., Arithmometers, etc. There is to be an exhibition of such machines at the same time.) 10. The progress of teaching in insurance science. 11. Progress in insurance legislation. 12. Progress in Mortality research. 13. Proposals for the unification of legal directions regarding insurance, especially in the matter of information to authorities.

It has been resolved that, according to the reception given to the several themes, so they should be made the subjects of discussion, or the papers submitted merely printed as notes without discussion—which items come under each category remains yet to be determined.

The honorary president of the Congress, Dr. Count von Pasadowsky, German Home Secretary, is particularly concerned in the treatment of people's insurance at the Congress, and in an audience granted to representatives of the Comité permanent, expressed his interest in the measures that might be suggested for placing this branch of insurance on a firm footing.

* * *

THE EQUITABLE REPORT.

Mr. F. Hendricks, Superintendent of Insurance for the State of New York, has presented what he terms a preliminary report on his investigation into the management of the Equitable Life Assurance Company, and if there has been lingering doubt in the minds of any as to whether the misdeeds of its officers had not been exaggerated, that doubt would speedily be dispelled. References, brief or otherwise, are made to the salaries, expense accounts, etc., of Mr. Hyde and the other officers, and then the superintendent makes some comments on the broad aspects of the case which show—what, indeed, people knew he would find—a remarkable condition of affairs. Not only did Hyde and his favored associates use Equitable funds for the purposes of subsidiary companies of sometimes a risky character, but they received salaries, and large ones, from numberless other corporations as well. For example, we are told that Mr. Hyde, in addition to his salary of $100,000 per year from the Equitable Life, drew $12,000 annually from the Equitable Trust, $12,500 from the Mercantile Trust, and several other more or less large increments from various sources, though it is acknowledged he spent several months in each year in Europe. It appears also that he is a member of the boards of several great railroad corporations, though in most cases he is not a stockholder. Mr. Hendricks, dwelling on this point, remarks: "Mr. Hyde is not an expert in railroad matters, having had no training in that direction, has had no wide experience, and has never demonstrated his ability as a business man, and consequently I conclude that the great railroad managers did not put him on the directorate of their companies for either of these reasons, and the inference is that he has been put on these boards for the reason that he was the financial head of a great insurance corporation, whose assets were so large and whose ready money was always available for the purchase of securities which these great corporations are largely in the market to sell."

A pointed indictment truly!

"Why," is asked, "why were these officers during a long series of years permitted again and again to violate their obligations, and perpetrate so many wrongs against the interests of the society for their own profit?"

In conclusion, the superintendent expresses in this report his opinion that the only thing to restore confidence in the society will be the elimination of stock control, and of the Wall Street influence. No superficial measures will correct the existing evils. A cancer cannot be cured by treating the symptoms. Complete mutualization with the elimination of the stock, to be paid for at a price only commensurate with its dividends, is the only sure measure of relief.

Latest reports from New York are to the effect that Mr. J. W. Alexander, through his son, has forwarded to Mr. Paul Morton, the new chairman of the society, $60,000, the balance of his syndicate profits, with interest.

* * *

ACTION AGAINST THE MUTUAL RESERVE.

An attempt was made recently in the United States Circuit Court to compel the Mutual Reserve Life Association to produce its books and records covering substantially the entire quarter of a century of its existence. Under the advice of counsel the Mutual Reserve refused to comply with this omnibus subpœna, and thereupon a motion was made to punish the officer upon whom it had been served for such failure. The motion was denied in an emphatic opinion by Judge Lacombe as follows: "This court did, as counsel for complainant suggests, heretofore lay down the rule that a subpœna duces tecum should be first obeyed by bringing the documents into court, and that thereupon the court would inspect them to see if they were relevant or material, and such as might be offered in evidence. (Edison Electric Light Co. v. U.S. Electric Lighting Co., 44 F. R. 294, 45 F. F. 55.) That decision had reference, of course, to the concrete case then before the court; it was not expected that any such grotesque subpœna duces tecum as we have here would ever be taken out, calling for apparently a cart load of books and papers, nearly all of which, so far as their description indicates, have nothing whatever to do with the issues raised by the pleadings. The motion to punish for failure to obey this omnibus subpœna is denied. If in this long enumeration there are a few items, which possibly might have some bearing on the controversy, complainant may take out new and separate subpœnas for them; the court will then look into the merits of each separate application to produce. To undertake a recitation of this mass of irrelevant material would be a useless waste of time. This decision on the subpœna as a whole will not be taken as an adjudication against any individual item; each will be considered when presented in some convenient shape, but from a cursory examination of the list called for it would seem that as to most of them complainant would be wasting his time in making further effort to bring them into a controversy with which they have nothing to do."

* * *

Mr. Chas. B. Smithett, who for many years past has been the popular and aggressive general agent of the Confederation Life Assurance Co., Toronto, has had his title changed, and henceforth will be known as the special representative of that company. Mr. Smithett's friends are many, and they will, we are sure, be glad to hear of this important step forward.

BANKING AND FINANCIAL.

On July 1st there will be payable in Wall Street, disbursements for dividend and interest payments of public railroads and industrial corporations, the approximate sum of $140,300,000. On January 1st last the sum payable was $136,583,450.

The Canadian Bank of Commerce has opened up two new branches, one at Louise Bridge, Winnipeg, and the other at Saskatoon, Saskatchewan. This makes the total number of branches of this institution 119, of which 113 are in Canada.

The Railway Committee has reported the bill confirming the financial arrangements made by the Grand Trunk Pacific Railway Company for the construction of the western division and the Lake Superior branch of the National Transcontinental Railway. The aggregate of two 4 per cent. mortgages, guaranteed by the Grand Trunk Railway, is $28,500,000. The Government guarantee three-fourths of the cost of the western section, and are secured by first mortgage, comprising schedule A of the bill. The G.T.R. guarantee the other fourth of the cost and are secured by second mortgage. The first mortgage is at 3 per cent., and the Royal Trust Company are named as trustees. For the purposes of convenience, and to meet the desires of capitalists furnishing the funds for the western division of the line, that portion between Winnipeg and the coast, is divided into the "mountain" and "prairie" sections, respectively, and the bond issue for these sections is for £2,050,000 and £2,100,000, respectively. The rate of interest is 4 per cent., and the National Trust Company are trustees.

The bill to incorporate the proposed Monarch Bank of Canada came up for discussion by the Banking and Commerce Committee of the Dominion Parliament on the 23rd June, but it met with considerable opposition. The incorporators named are: Late Hon. James Cochrane, Thomas H. Graham, D. W. Livingstone, Edward J. Lennox, Thomas M. Ostrom, A. H. Perfect and Forbes F. Godfrey. Hon. Mr. Fielding said that if the promoters would say they had the resources to start that bank, and would not ask for an extension, he would support the bill. "I do not think," he added, "that people should start banks now unless they have made their arrangements accordingly." Another speaker said there had been eight or nine new banks incorporated in the last two years, and only one had been organized. The capital stock had not been available. If it was impossible for other banks to raise a capital of one or two millions, how could this one raise ten millions? It was a charter to hang up before the people, and there was not the slightest probability of the bank being organized with a charter of that kind. It should, he thought, be reduced to $2,000,000 at any rate.

* * *

LIFE AND ACCIDENT INSURANCE.

The International Association of Accident Insurance Underwriters will hold their convention at Muskoka Lake on July 18th to 21st. It will be both a pleasure and a business trip, as not only has an interesting programme of papers for discussion been prepared, but several trips in the beautiful lake region have been arranged.

The inspectors, general agents and agents of the Standard Life Assurance Company in the Province of Ontario, through the chief agent of the company, Mr. Hunter, of Toronto, presented a beautiful cut-glass loving cup to Mr. G. H. Allen, chief inspector of the company, the occasion being Mr. Allen's retirement from the company's service, after a term of many years, in order to assume the position of manager for the Province of Quebec of the Mutual Life Assurance Company of Canada.

One policyholder intimates that instead of bothering their heads over total abstainers, the insurance companies would do a great thing for themselves and their insured by having the latter examined every year, free, by the company's physicians. An ounce of prevention. The ordinary man won't call a doctor till he has something serious the matter with him, or thinks he has.

Still another of the fraternal societies is seeing which way sanity lies. The Grand Lodge of the Canadian Odd Fellows, by an almost unanimous vote, decided, the other day, to adopt the

Hunter rate for insurance, which has been recommended by the Ontario Government for adoption by fraternal societies. This implies an increase in the premiums to be paid by the members to the extent of 25 cents a month per $1,000 of insurance for a member under the age of 44, and an increase of 10 cents per member per $1,000 of insurance for members over that age. The new rate will come into force on September 1st, 1905.

If this should meet the eye of some faint-hearted person who seriously considers lapsing his insurance, let him pause and before he fully decides, think over seriously the situation such a step will leave him in. Not him individually, perhaps, but those for whose benefit the insurance was taken, those whose interests are at stake. Is there any less need for the policy now than when it was first taken? Really, isn't there more need of it now than then? It may be a little harder to keep it up, but remember that the risk is also greater. Better think of it from the standpoint of the family without the bread-winner or the proceeds of the policy.—Bulletin.

* * *

FIRE INSURANCE ITEMS.

The city of Detroit is contemplating establishing an insurance fund, from which any building belonging to the municipality, which is destroyed by fire, may be repaired. It seems strange, in view of the experience of other places along this line, that such a community as that of Detroit should be willing to face the consequences of such a system.

In regard to the explosion recently which wrecked the Government steamer "Scout" at Kingston, the subject of acetylene was brought up a few days ago in Parliament. It was stated that parties interested in the manufacture of carbide for acetylene gas wanted an investigation, as the industry was threatened with injury. The contention of manufacturers was that if acetylene gas were submitted to pressure of over forty pounds it became dangerous, and that it is not always handled carefully. The matter is to be brought to the attention of the Minister of Marine and Fisheries.

Mr. Edward Cairns, a little time ago, read a very suggestive paper on "Sprinkler Inefficiency," in which he traced the causes of several failures to act properly. Such failures were only 6 per cent. of the whole number of cases in which fires occurred, but the losses involved amounted to a large figure. Summarized, the result of these enquiries is as follows: Defective or partial equipment, 29 per cent.; hazard too severe for control, 14; faulty building construction and obstruction, 12½; exposure or conflagration, 10; inadequate water supply, 5; water supplies crippled by explosion, 3; water supplies crippled by freezing, 2; no watchman, 1; town water out of service, ½; unaccounted for, 2 per cent.

* * *

TRADE NOTES.

The Penman Mfg. Company announce an advance of about 10 per cent. in ladies' and golfers' sweaters, and such lines.

Alberta creameries in May turned out no less than 50,000 pounds of butter, as compared with 23,000 pounds for that month last year. A considerable quantity is now being shipped to Japan.

The Georgian Bay Fruit Growers, Limited, is the name of a new company organized at Thornbury, Ont., which will build and own fruit houses and cold storage plants, evaporators, cider and pulp mills, box factories, etc., and deal, wholesale and retail, in fruits of all kinds. J. G. Mitchell, of Collingwood, and J. Veitch, of Clarksburg, Ont., are among those interested.

A consular report just to hand states that the prospects for this year's currant crop are very poor, so far as prices are concerned, as it promises to be extremely large. That is, unless the peronosporos should make its appearance, which, in view of the severity of the past winter, is hardly probable. The Greek Government will no longer agree to encash the duty in kind, as last year's experiment, owing to the difficulty of disposing of the retention currants, is likely to cause considerable loss to the national exchequer. Therefore, the amount available for export will be increased by 15 per cent., and as consumption seems to be on the decline in most markets, the future for the currant-growers is very black indeed. Some of the latest schemes for remedying the evil are in favor of legislation compelling each grower to root up a certain portion of his currant vineyard, for which he would be gradually indemnified out of an increased export tax on currants; but this seems scarcely practicable.

* * *

PRICES OF COMMODITIES.

Bradstreets publish a table of comparative prices of commodities which furnishes an especially interesting comparison between prices in 1896 and the present year. The comparison, even with the high point of 1900 and the low point of 1901, shows that since 1896 the prices of breadstuffs and live stock have been steadily advancing. This advance in foods may be the moving cause in advances in other departments. Food supply seems the basic material, the prices of which must necessarily affect other departments. The subject furnishes plenty of room for speculation. Some people attribute higher prices to the increasing output of gold. But there are, no doubt, many other influences at work. The following table shows the index numbers (prices per pound) of the various classes of products at the low point in 1896, the high point in 1900 and the succeeding low point in 1901, compared with the level on May 1, 1905:

	July 1, 1896.	Feb. 1, 1900.	June 1, 1901.	May 1, 1905.
Breadstuffs	$0.0524	$0.0658	$0.0721	$0.0825
Live stock	.1855	.2500	.2555	.2980
Provisions	1.3619	1.8033	1.7006	1.7923
Fruits	.1210	.1472	.1923	.1276
Hides and leather	.8250	1.1725	1.0450	1.1100
Textiles	1.5799	2.5065	2.0046	2.3632
Metals	.3757	.6148	.5990	.5916
Coal and coke....	.0048	.0067	.0054	.0063
Oils	.2082	.3284	.3392	.2833
Naval stores	.0402	.0807	.0523	.0927
Building materials	.0716	.0973	.1155	.0770
Chem. and drugs.	.6607	.9260	.7689	.6790
Miscellaneous	1.0250	1.3115	1.1577	1.7665
Total	6.5119	$9.3107	$8.3081	$9.2700

The London Economist Index Number at the end of May, 1905, stood at 2144, compared with 2134 at the end of April, and with 2130 at the end of June, 1904. The chief feature of the summary which accompanies the Index tables is the upward movement in cotton. This, however, would appear to be a natural recovery after the recent sharp fall. The fall in sugar and in pig iron seems to be due to a close in speculative operations. Coffee and tea have declined slightly, while meat is a little dearer.

* * *

ANSWERS TO ENQUIRERS.

Editor Monetary Times:

Sir,—I notice that the different trust companies in this Province are borrowing money by taking deposits and issuing deposit receipts bearing a fixed rate of interest in competition with executorship funds. The money thus borrowed is shown in the Government returns as trust funds, guaranteed. It would be of interest to the many readers of your valuable paper if you would insert this letter, together with your reply, stating what is the limit (if any) of the borrowing powers of these trust companies.

SUBSCRIBER.

[Trust companies cannot issue debentures, and it is held that they have not the right to make deposits as banks. They have the right, however, to receive monies for the purpose of investing the same, and in this they have the choice of two methods: First, what is known as the guaranteed investment principle, under which the trust company guarantees to pay a given rate of interest, and to return the principal at a certain date; or, secondly, they can invest monies, acting simply as an agent, and charging commission as compensation for the services rendered.—Ed. M. T.]

* * *

—The fifteenth annual meeting of the Canadian Electrical Association was held last week in Montreal, there being an attendance of almost 200. Many papers of value to the profession were read and discussed. Mr. A. A. Wright, of Renfrew, Ont., has been elected president; R. G. Black, Toronto, first vice-president; John Murphy, of Ottawa, second vice-president; C. H. Mortimer, secretary.

* * *

—Mr. W. C. Hall, of the Quebec Land Department, and an expert in forestry matters, has a proposition for the establishment of a forest reserve in the heart of Gaspe Peninsula. He considers that the highlands in the interior of the peninsula cannot be turned to better economic account than by dedicating them to the service of forestry. He points to the case of the Eastern Townships as a warning against the squandering of the public timber resources. Not only would a perennial supply of timber be ensured, but the sources of the Gaspe rivers would be preserved from the possibilities of exhaustion. In that part of the province the white spruce abounds. Mr. Hall is convinced that given time to mature, crop after crop of this timber can be cut in the reserve. The area comprehended by his recommendation is upwards of 1,500,000 acres, or 2,509 square miles. This is equivalent to a tract about 50 miles square. The proposed location of the reserve is in Bonaventure county, near the townships of Romieu and Cherbourg.

—The total freight carried by the two Soo canals during May last was 5,775,787 tons, of which 4,686,827 tons were carried through the United States canal, and 1,088,960 tons through the Canadian. This is an increase of 587,770 tons, or 11.33 per cent., compared with May of 1903. In May, 1904, the total freight carried amounted to 449,888 tons, so that comparison with that period is of no benefit. The total freight carried in the Canadian canal during May, 1905, was divided into: East bound, 910,048 tons, and westbound, 178,912 tons. The total is 452,213 tons more than in May, 1903, and 887,749 tons more than in May, 1904.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, June 29th, 1905, as compared with those of the previous week:

	June 29.	June 22.
Montreal	$24,159,838	$23,644,502
Toronto	17,806,751	17,967,216
Winnipeg	5,488,411	6,046,552
Halifax	1,825,186	1,549,959
Hamilton	1,287,729	1,259,358
St. John	942,675	1,714,759
Vancouver	1,471,118	1,877,308
Victoria	863,662	594,148
Quebec	1,874,397	1,679,747
Ottawa	1,981,483	2,378,982
London	834,789	951,117
Total	$58,536,039	$59,663,648

Vault doors in Bank of Montreal and Royal Trust Company, Montreal. Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

REPORT ON FISHERIES.

The report of the Deputy Commissioner of Fisheries, Mr. S. T. Bastedo, for 1904, shows that in spite of the lateness of the commencement of the season, it is a very prosperous one for the fishermen. Prices were high, and 24,009,970 pounds of fish were taken during the year, or 2,815,765 pounds more than the previous season. This was valued at $1,793,229. This amount is distributed as follows: Lake trout, 6,275,430; whitefish, 3,474,300; herring, 4,252,580; pickerel, 2,632,540; pike, (including blue pickerel), 1,775,700; coarse fish, 2,087,900 pounds; perch, 922,600; eels, 45,500; tulibee, 5,800; cat-fish, 520,150; sturgeon, 485,200; and of caviare 29,170.

During the year licenses were issued for 3,490,036 yards of gill nets, 514 pound nets, 473 hoop nets, 120 seines, 75 dip nets, three machines and several thousand nets.

The occupation gave employment to 3,125 men, 128 tugs, and 1,477 other boats. An estimated capital of $931,097 is invested in the industry.

Regarding the depletion of international waters Mr. Bastedo lays the blame for excessive fishing on the American fishermen and authorities, as the failure to provide protective measures to regulate the fishing was indefensible and unjustified. From the increasing number of fishermen and the improved means of handling the nets, he says, it is evident that if something is not done the lakes will be exhausted.

CHARACTER AND CREDIT.

Conventions of credit men are interesting, inasmuch as nearly always some good things are said along the lines of their chief subjects. And what can be of more importance to the business world than the best way and proper extent to which their customers should be accorded credit. The convention at Memphis, Tenn., on the 16th June was no exception to the rule.

The president, Mr. F. W. Standart, made in the first place some comments on the insurance laws as they stand in the United States. He thought the insurance companies, both fire and life, should be under the supervision of the National Government, rather than under the control of the various State officials. Such a change would operate not only to the material benefit of policyholders in general, but would also be conceded to distinctly safeguard the interests of the insurance companies themselves, for the reason that on the one hand the policyholders would be afforded greater protection in the way of supervision and examination, and discouraging and eliminating unsubstantial and unreliable institutions, while the companies, on the other hand, would benefit by uniformity of legislation and taxation. The importance of the question of insurance to credit interests is becoming daily more unquestioned.

Mr. W. A. Given, president of the Pittsburg Association of Credit Men, gave a fine address upon the part which is played by credit, and as to the basis on which it stands.

An analysis of credit for any man shows that it depends largely on what he tells you concerning himself, and also on his reputation, that is, what others say of him. So capital in business is that which stands at the head, or is the beginning, that with which investments are begun.

We often say of that which pleases us "capital," meaning it is good. So we might say of capital in business, it is that which "is to the good." In fact, capital is the accumulated products of industry or labor. It is the crown or surplus of a man's income, his accrued energy, that which he has by him, or, as we so often put it, that which he has "to the good."

Capital is essential in the basis for credit, first, because it is a guarantee of security to the creditor and of good faith on the part of the debtor. If the debtor is risking his own capital he will naturally guard his investments more carefully, and the creditor's risk is thus proportionately lessened. Second, because most kinds of merchandise, and especially general stocks, cannot be turned rapidly enough to pay for themselves within the usual or discount period.

Of course, as Mr. Given clearly shows, credit should be in proportion to the capital employed. If capital be wisely used, credit based upon the same in such relative proportion will generally be safe. But if carelessly managed, or if credit limits be too greatly strained, that is, by increasing credit to an amount out of proportion to the basic capital, the success of the enterprise is rendered doubtful, for its affairs are thus placed in a condition in which they are no longer in the control of the debtor. Will an honest merchant strain his credit to this point, it may be asked? Certainly an honest, thoughtful and wise man will not, and so in addition to capital a second factor is necessary in the basis for credit, namely, character. Character is made up of those heaven-born qualities, truth, justice, and faithfulness. The man whose thoughts and actions are dominated by these qualities has the character that will ensure honest, wise and thoughtful management of his business. Such a man will recognize that justice to his creditors (as well as to himself) forbids straining his credit to the outside limit, or beyond it, as is so frequently done. Justice in his character will cause him to protect his creditors as well as himself by adequate insurance. His characteristic truth will not color too highly his assets nor put his liabilities at too low an estimate, neither will he conceal nor neglect to make known his true condition to those who have a right to know. Tht man with such a character will have so high a regard for his word that he will be careful not to contract beyond his ability to perform. What a man says for himself and of himself may be useful, especially if he submits a detailed statement of resources and liabilities.

⁂

LITERARY NOTES.

A New Commercial Gazetteer.—In the Commercial Gazetteer of the World, by William Melven, M.A., and published in this country by Morang & Co., Limited, Toronto, we have one of the most useful works of reference that have come to our table for some time past. It is not merely, as its name might lead one to suspect, a simple geographical summary of places, with a few lines giving the main facts respecting their situation and population, etc., but its purpose is to present these facts from the point of view of their commercial bearing. In these days of discussion concerning a British Zollverein, tariff wars, differential and preferential duties, and so forth, a reliable source of information as to the potentialities and actualities of various countries is, indeed, a desideratum. This the present Gazetteer certainly affords. The size, climate, physical characteristics and various other features of the countries of the world, and the population and transportation facilities of the towns are dealt with in view of their bearing on commercial advantages or disadvantages. It is shown also what are the wealth and natural resources of the countries, especially such as are valuable from an economic point of view. In the case of ports, special attention is given to their peculiarities, and to the principal articles of export and import, bearing in mind their relation to commercial requirements. A study of these will often show what is required in certain markets, and what can be obtained there in return. This in many cases will be found to raise questions whether many articles could not be supplied as well and as cheaply by this country as by the countries by which they are now sent. The book is well bound in cloth, is nicely and clearly printed, and is well supplied with admirable maps. Its price is $2.

Moody's Manual of Railroads and Corporation Securities.—The new edition of Moody's Manual of Railroads and Corporations Securities just to hand is very comprehensive and complete. The edition for 1905 comprises 2,600 pages, size 7 x 9 inches. The book is four inches thick, and weighs over twelve pounds. It contains over 3,000,000 words, and covers the entire field of corporation investments. There are ten sections to the volume, each section being prepared by its own special experts, who have made it their entire work to make the book complete and up-to-date. The increases in information over the 1904 edition are about as follows: In steam railroads, 80 per cent. increase; in electric traction companies, 56 per cent.; in gas and electric light company statements, 49 per cent.; in water supply companies, 80 per cent.; in telephone, telegraph and cable companies, 32 per cent.; in industrials, 21 per cent.; in mines, 48 per cent.; in banks and financial institutions, 90 per cent. This summary will serve to show the nature of the book's contents, though a large proportion of our readers, it is quite safe to say, are already well acquainted therewith. It is only necessary to say that it keeps up its well-earned reputation as a concise and reliable guide to all the subjects of which it treats. The price is $10 in red cloth, or $12 in full Russia leather, express charges prepaid.

Investment Directory.—Just come to hand is the 1905 issue of the "Investment Directory of Insurance Companies," compiled by S. H. Wolfe, the New York actuary, and published by the Insurance Press, of New York. Without doubt, the insurance business of this country and the United States constitute the largest single market for high-grade securities in existence. It is sometimes charged by bequeathers of large fortunes that their executors are to invest the proceeds of their estates only in such securities as are selected by the large life insurance companies for the investment of their own funds. The author of the book before us feels, for this reason, that there is a wide field for a handbook which will set forth exactly what these investments are; and it may be mentioned that they now

amount to well over a billion and a quarter dollars in value. To say that such a guide must possess value is needless, especially when the task of compiling it is done so manifestly well as it is in this instance. To executors it is a great boon, while to bankers and brokers it is practically indispensable. The work is divided into two sections: first, securities, classified by forms, year of maturity and rate of interest; and secondly, schedules of securities owned by the various insurance companies. We may mention that the aim has been to include all insurance companies whose investments in bonds and stocks amounted to $100,000 or over. The work, we may add, is well indexed, and carries out the purpose for which it is intended.

* * *

ASSOCIATED BOARDS OF TRADE OF THE N.W.T.

Of more than ordinary interest to the Dominion in general at this time of autonomy talk will be the second annual convention of the Associated Boards of Trade being held this week (the 29th and 30th inst.) at Regina. We are informed that the railway has been induced to give greatly reduced rates to delegates, and a large representation is expected. We notice on the official programme that there are no less than thirty topics named for discussion, and can only say that Westerners must be much more speedy in their methods of discussion than is usual at most conventions, if they hope to cover such a wide and various list. One subject that will come up will be the organizing of the associated boards on a permanent basis. And another, which is likely to create plenty of discussion, is "Interest on Mortgages," the belief existing in the West that farmers and ranchers are paying a higher rate of interest on real estate mortgages than the nature of the security warrants and the profits of the business would justify.

One resolution reads as follows:

"Whereas the fire insurance rates in towns and cities throughout the North-West Territories are being increased from time to time to an alarming extent, principally in order to cover losses sustained in populous cities in the East; and whereas systems of fire insurance under Government auspices have been successfully carried out elsewhere, notably in New Zealand; and whereas the principle of Government insurance has been adopted in the North-West Territories in connection with losses in grain crops due to hail storms; therefore be it resolved that this convention most respectfully begs to submit for the consideration of the Governments of Saskatchewan and Alberta the desirability of causing enquiries to be made into the subject with a view to providing a system of Government Fire insurance.

Still other opportunities for wide and varied discussion are presented by the resolutions on "Insolvency," on the "Collection of Small Debts," on "Mercantile Reports," and on "Small Debts and Civil Procedure." All these branches of store-keeping practice are of vital importance in the West at its present stage of development.

There can be no doubt as to the value of these joint meetings—of these discussions by dozens of well-qualified men representing all parts and conditions of the West. Business life is sure to profit by it; indeed, the whole people will doubtless do so; and what is good for the West is good for the whole of Canada. We wish success to the present convention.

* * *

OUR AUSTRALIAN LETTER.

I can write more cheerfully of Australian prospects than I have been able to do for some time. The advances in wool and many other pastoral products, the firmness of wheat and other produce of the land, the good rains and warm weather, giving assurance of at least a good winter, and almost of a good year, are having their effect upon commerce and industry. There is increased activity in most branches of trade, and the unemployed are said to be fewer in numbers than for many winters. The improvement is echoed in the greater demand and better price for debentures, bank stock and other investments.

There is, however, a dark spot here and there in the scene, none the better that they ought not to be. The Australian bank returns show this statement:

Date.	Deposits.	Advances.
June, 1895	$ 99,466,741	$117,014,198
June, 1897	99,411,207	113,598,551
June, 1890	97,643,088	104,277,248
June, 1901	105,793,779	108,564,374
June, 1903	109,156,497	104,438,842
March, 1904	109,457,150	105,224,892
June, 1904	109,078,290	104,054,102
March, 1905	115,660,704	102,511,608

In spite of drought and other misfortunes the deposits are sixteen millions more than ten years ago, but the advances are fifteen millions less. From a banker's point these figures may indicate a wise caution, but from a national point of view it indicates a lack of confidence in the industries of the country that is discouraging. This is a young country, with vast areas half tilled or in a state of nature, factories closed or half occupied, and still thousands of idle men in the cities and country, and the annual meetings show that the banks are actually sending money to London to be invested there, and, what is not much more encouraging, an undue portion of what is invested here is put in bricks and mortar in houses and offices in the great cities. This lack of confidence is not due to any uncertainties of nature, but to the political, social and industrial conditions of the country. The Government of the Commonwealth is composed of able and well-meaning men, but it is so weak as to be helpless. It hangs on with but one of a majority, and with several of its supporters dissatisfied and restless. Then there is Socialism, varied in hue from the mild form that looks only to the public ownership of monopolies to rank Communism, but all combined and aggressive, its chief force being supplied by the more radical of its elements. The Government has achieved success through the division of its opponents. It knows this, and in the past it has obtained concessions through giving its support to one or the other of the powerful factions in return. This knowledge, too, has made its opponents moderate where they have assumed control of public affairs, as in the Commonwealth for a time and in Western Australia and largely in Queensland to-day.

What the business of Australia needs is the settlement of the policy that is to govern the Commonwealth and the States.

It has been stated over and over again that capitalists have come here, looked at proposed investments, and then abandoned them. The bank returns support these statements, for where a people are sending their money abroad it is not probable that strangers will bring money in.

There are attempts to bring about a union of the opponents of Socialism, but with no great signs of success just yet. The best thing that could happen to Australia would be to allow the Socialists to get into power. It would force the formation of two distinct parties. Some fear that a terrible calamity would befall the country in the meantime. No doubt stocks would fall, but while this might ruin some men it would not be a permanent injury to the country—it would, no doubt, affect trade injuriously

for a time, but these losses could be recovered. What would be likely to happen would be that there would be very little radical legislation. The men likely to be in power would be men of ability, who know the impracticability of the schemes of the wild-eyed. Their caution would disappoint the ardent Socialist, and lead to a rift in the ranks of the workers. The best of them would soon see the limitations of the powers of Government to reform society, and the falling off in business and industry would throw so many out of employment that others would be brought to reason. This may yet come to pass, and the state of things get better in Australia.

It may be useful to Canadians to know two other results that have followed the present condition of affairs in New South Wales. First is that actually fewer men are employed in the industries of the State than two years ago, and that the average rate of wages is lower now than then. The second is the decline in the credit of the State. A political manifesto stated that the credit of New South Wales was ten per cent. below that of Canada. The Premier, in true provincial spirit, asserted in part that this was not so, and tried to explain away the rest. The morning papers have called him sharply to account. They take the three per cent. stock, and show that the Canadian is quoted at 97½ and that of New South Wales 88½, and while New South Wales stock pays the investor £3 13s. 6d. per cent. the Canadian pays only £3 2s. What is more, the New South Wales stock, which used to rank the highest in the money market of any of the Australasian States, to-day stands the lowest but one.

Australia has joined Canada in celebrating Empire Day on the 24th, and she has done it well. It was wisely not declared a public holiday. A special feature was the gathering of the schools, at which flags were raised and patriotic speeches made. Canada had a fair share in these festivities, as the Canadian Commissioner was selected as the only speaker at the gathering of the merchants in the Exchange and two other meetings during the day. In New Zealand, Premier Seddon emphasized the value of giving trade to our relatives in the Empire. Sentiment does count, even in trade, and these assemblies will help Imperial business.

There are evidences that Canadian manufacturers are taking more interest in Australian business, but so far it has not got much beyond the stage of making enquiries.

Mr. Patterson, of the Massey-Harris Company, is expected to be a passenger on the "Miowera" for Canada, which ship will probably have her space, like her sister ships for some time past, fully taken up. The line is gaining with the public. It is a pity that the question of subsidy has not been settled. The company will put on better ships if the Australian Government will support Canada in its treatment of the company.

Judge Bell, Mrs. Bell and their daughter, of Chatham, Ont., have just left for home via England. They have been visiting Dr. Cameron, a brother of Mrs. Bell, and the Judge's son, who are living on the Clarence River, N.S.W. The Judge is reported to be wonderfully struck with the fertility of the northern coastal district of this State. It is one of the very finest portions of Australia. The Dr. and young Mr. Bell are prospering there.

A State election was held in South Australia on Saturday last. The result is not fully known, but it is clear that the Socialists have made considerable gains, if not secured a majority in both Houses. There were three other parties in the field, and as usual Socialism gained in this strife of factions.

F. W.

Sydney, N.S.W., May 29, 1905.

* * *

IMPORTANT MINING SALE.

Mr. T. G. Blackstock and the Gooderham estate have sold their controlling interest in the War Eagle, St. Eugene and Centre Star mines to a syndicate of Toronto, Montreal and New York capitalists, largely representing the Canadian Pacific Railway. The deal is without doubt the largest which has ever been put through in the history of mining in Canada, and is the more important because it means for the future a practically complete unity of the railway, mining and smelting interests of the Kootenay. It is understood the price paid was $825,000, which, considering the undoubted value of the properties, is considered by many people to be quite low. It has been long recognized that the freight and smelting charges were an insurmountable barrier to the profitable working of the low-grade ores. With the three great interests pooled it is almost certain that satisfactory progress can be made, and that the new owners, who will face an industrial rather than a mining proposition, have every guarantee of success. The development of the silver and lead industries is also believed to be assured to be an outcome of the transaction.

A provisional directorate is to be formed immediately, we understand, and it is believed that some Boston capital may come in before the final announcement as to the identity of the other financial backers is made. The causes which led up to the purchase of the properties by the Aldridge group are known to have been the death of Mr. George Gooderham and the enforced temporary retirement from business of Mr. Blackstock.

Mining operations in the Kootenay district have for some time past been carried on under great drawbacks. Notwithstanding the fact that capital has been poured without stint into the mines, it has been found impossible to make the different companies, under existing conditions, pay the dividends expected of them. For the past year or two efforts have been made to promote an amalgamation of the large mining interests, with a view of reducing expenses, and securing, by reason of the large tonnage, thereby insured, lower rates for freight and treatment of ore. The result of the negotiations now announced will bring about practically the same consummation. The smaller shareholders of the three companies involved will be protected by their shares being put on a parity with the stock held by the syndicate. Some inkling of the coming changes must have been possessed by the market, for we find on reference to Stock Exchange transactions that shares, which until recently were slowly changing hands around 10, have lately been bought for 16, and in some cases as high as 20.

MONTREAL LETTER.

At a meeting of the Montreal city council on Monday, the 26th inst., a vote was registered favorable to the annexation of St. Henri to Montreal. The consideration of the by-law was left over till July 10th, in order that the council might obtain fuller information about St. Henri's finances and obligations. The mayor was of opinion that the delay would be in the interests of the city and the suburbs, and he expected that in the meantime a letter would be received from St. Cunegonde on the same subject of annexation. This vote would appear to make annexation practically certain, although a mass of detail will have to be considered when the by-law comes up.

A meeting of manufacturers from the east end of the city was held on Tuesday evening, the 27th inst., at the Windsor Hotel for the purpose of forming a club, which will probably be called the Manufacturers' Club. Mr. Branchaud, manager of the East End branch of the Bank of Montreal, acted as chairman pro tem., and Mr. W. S. Campbell as secretary. The meeting was only a preliminary one, general matters in connection with the idea being discussed, and a committee was appointed to open a list of membership. It is expected that about 200 manufacturers from the east end will become associated with the club, and that rooms will be opened. As soon as the list receives sufficient support another meeting will be held and officers will be elected.

At a meeting of the directors of the Lake of the Woods Milling Co., held on the 26th inst., in the offices of the company, it was decided that an interim distribution of 3 per cent. be declared on the common stock of the company, the same to be paid July 15th, 1905, to the shareholders

of record on June 30th, 1905. The declaration of the full dividend on the common stock for the year will be decided upon after the 31st of August, which is the end of the company's fiscal year. It was also decided that the company proceed to increase its elevator capacity in Manitoba and the North-West, where a number of up-to-date elevators will be constructed. The company's milling capacity is also to be increased, as the immediate erection of a new mill, with a daily output of 3,000 barrels, was decided upon at this meeting. The question of locating the mill was left to the president and general manager, and it is understood that if Winnipeg be chosen a second large mill may be built at a Georgian Bay port as soon as the other is completed.

An interesting visitor to this city last week was Mr. I. Hall Richardson, assistant editor of the Daily Telegraph, of London, Eng. He has come to Canada for the twofold purpose of looking into the condition of immigrants who were sent over here through the disposition of funds obtained by a subscription list, opened last winter by his paper, and also for the purpose of approaching the Government and prominent persons interested in immigration with a view to securing their aid for a proposed exhibition in East London next autumn of Canadian products, art work, manufactures, etc. Speaking about the proposed exhibition, Mr. Richardson explains that every year an exhibition is held in Whitechapel Art Gallery, which is in the heart of East London. Last year an exhibit of India was given, and it was attended by 1,250,000 persons of all classes, but was intended to educate the poorer classes of the East End. This year he wished that an exhibit of Canada might be held, for the ignorance prevailing among the masses regarding this country was astonishing; and there was no better way, he thought, than to let visitors to this free exhibit see for themselves what a country Canada is, and what are her possibilities.

Trade in wholesale circles during the past week has been on the quiet side. Remittances have shown some improvement during the week; also city collections. The condition of trade generally, however, is good, and the prospects are considered quite favorable. Call loans during the past week have been made at 4½ per cent., and a fair volume of mercantile paper is presented at the banks for discount at 6 to 6½ per cent.

Montreal, June 28th, 1905. "Mount Royal."

DRY GOODS NOTES.

The Panama hat is still popular in New York, and is shown in several new designs and weaves. Among the most distinctive novelties is the young man's mackinaw. The hat is a flat crown, flexible straw of the peculiar yellow characteristic of mackinaws, and built in the correct proportions of this season's hats, but with a very slightly wider brim to allow for the light roll. A leghorn made of the same material, and with similar braid as the women's leghorn, is shown with both flat and telescope crown. The Tibetan felts are the handsomest of the new styles shown in felt hats for outing purposes. They are built somewhat on the Panama shape, but with a slightly narrower brim, which curls high and close to a knockabout or Alpine crown at both the sides and back, and is worn straight in front.

A serious outlook for women is suggested by a recent reported incident in Pittsburg. Two young ladies appeared on the street wearing hoop skirts. The result was so much attention on the part of the crowd that they blockaded a street car line for half an hour, suspended business in a department store, caused a small panic, caused many men to suffer from stiff necks, and necessitated assistance from a detachment of police before the young women could regain the safety of their carriage. Once the hoopskirts were inside the store, the clerks stopped their work, left their customers, and joined the wide-eyed throng. The floor-walkers grew angry, and requested the young women to retire. They tried to do so, but could not. Their hoops, which were not the modern three-coil featherbone skirts, but regulation crinolines, interfered. Eventually, with the assistance of the police, they regained their carriage, and, finally, the safety of seclusion.

There is a great feeling in Paris for fancy feathers. The United States buyers have bought considerable quantities of coques. The line is also in fair demand for England. The outlook for steel ornaments and for embroideries is not encouraging. Ospreys will be more than ever in fashion. Chenille ombrée, and also gold trimmings have great prospects for the coming season. Sequins for all purposes will probably again be in fashion. An extraordinary demand prevails at present for ostrich and chiffon ruffles, with velvet ribbon streamers, the latter in "pierrot" shape. The demand for these came with a rush with the hot weather, and makers, taken by surprise, will surely not be able to fulfil all the orders. There is a proposal to bring out a special stamp for all French manufactured goods, so as to avoid in foreign countries the deception of the public. The millinery chamber syndicate especially complains, since labels bearing a made-up French name and Paris are put upon hats made elsewhere.

In both the wholesale and retail trades in Glasgow a quiet tone is reported ruling, and, so far as the former is concerned, firms are now in full preparation for the half-yearly balance. The further rise in cotton, and the corresponding reduction in spinners' margin of profit, have not helped the position, as hopes had favored some relief in prices of raw stuffs. For the most part, says the Drapers' Record, Glasgow houses do not believe in the rise, and they are inclined to hold back. Makers here are slow to benefit from the better tone of the Lancashire markets. Glasgow and Paisley houses engaged in the dress trade are finding business difficult, but in the lappet or white trade more movement is apparent. There is also more doing on Indian account, although, as Glasgow houses do a fine class trade, they are slacker than the Lancashire concerns. Spinners are enjoying a good time, and for the half-year the profits are most satisfactory. The silk and ribbon trade in Glasgow has been disappointing, although those well placed to feel the pulse of markets believe that an improvement will shortly become apparent. At the moment, the demand is centring on cheaper grades for linings and blouses, but from recent sampling there are indications of better descriptions being wanted. Ribbons in the cheaper grades are still being pushed.

* * *

MERCHANTS BANK OF CANADA.

The Annual General Meeting of the Shareholders of the Merchants Bank of Canada was held at the Head Office of the Bank, in Montreal, on the 15th June. Sir H. Montagu Allan, the President, in the chair.

The Directors beg to present to the Shareholders the annual statement of the Bank's business as at 31st May last.

It will be observed that the earnings have fallen somewhat short of the previous year. This has been due in large part to the generally lower rates of interest prevailing at New York and other loaning centres.

The Directors have nevertheless been able, through recoveries realized in some of the securities formerly written down, to add $200,000 to the Reserve Fund, in addition to writing $50,000 off banking premises and making the usual contribution to the Officers' Pension Fund, carrying forward a balance to the credit of Profit and Loss account of $73,197.20, which, they hope, will be gratifying to the Shareholders.

All respectfully submitted.

H. MONTAGU ALLAN, President.

STATEMENT.

The net profits of the year, after payment of charges, rebate on discounts, interest on deposits, and making full provision for bad and doubtful debts, have amounted to		$649,237 66
Recoveries from other securities.................... .		90,000 00
The balance brought forward from last year ending 31st May, 1904, was		18,959 54
Making a total of		$758,197 20
This has been disposed of as follows:—		
Dividend No. 72, at the rate of 7 per cent. per annum	$210,000 00	
Dividend No. 73, at the rate of 7 per cent. per annum	210,000 00	
		$420,000 00
Written off Bank Premises Account..................		50,000 00
Contribution to Officers' Pension Fund		15,000 00
Added to Rest..		200,000 00
Leaving a balance to be carried forward to next year of.		73,197 20
		$758,197 20

WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

After many months of negotiations, the Grand Trunk and its telegraphers have compromised on their differences. The company has agreed to raise their minimum wage over the whole system, and the men compromise as to the mode of paying for Sunday work.

Mercantile Summary

The suspension is announced of Louis L. Clark, of St. John, N.B., doing business as the Maritime Steam Lithographing Co. His liabilities are stated at $13,000, while his plant is covered by a bill of sale for $4,000, probably all it would bring at forced sale.

A firm in Paris, France, makes the offer to build a gas plant in Montreal at a cost of 7,000,000 francs. We do not know what steps will be taken by the council, but the proposition is likely to influence their decision regarding the negotiations with the local company.

John Sayre, general merchant, Buctouche, N.B., is offering to settle with his creditors at 10 per cent. of their claims. He was burned out on the 1st inst., without insurance, and claims to have lost $6,000. He shows liabilities of $2,500, and his creditors now have to suffer for his total disregard of ordinary business foresight and prudence.

On 20th June, the C.P.R. westbound Transcontinental train collided head-on with an eastbound stock train at Kalmar, a small station about 110 miles east of Winnipeg. Both trains were running almost at full speed and the shock of the impact was terrific. The engineer and express messenger were killed, and three others injured.

For some twenty odd years Wilfrid Lamoureux has been in the retail boot and shoe trade at Montreal, but not successfully. In 1896 he failed, and then compromised liabilities of some $20,000 at 40 cents on the dollar. Again in 1901 he arranged a settlement at 60 cents on the dollar, and now his assignment is announced.

An assignment has been made by Mrs. C. Pelletier, carrying on a general store business at Ste. Flavie Station, Que. It is understood the business has been carried on for the benefit of her son-in-law, Rosario Levasseur, who is employed as a baggageman on the Intercolonial Railway, and who was formerly unsuccessfully in business at Ste. Felicite.

M. Rothschild & Sons, who have of late been doing a general business at New Liskeard, Haileybury, North Bay, and other points in the Nipissing and Temiscamingue districts, are reported in embarrassed circumstances, and a meeting of their creditors is called for the 29th inst., in Montreal. It is expected that their liabilities will amount to about $40,000. They have evidently been in hard-up widespread shape for some time back.

A firm of general dealers in Port Hood, N.S., Smith & Wilson, lately reported embarrassed, are offering their creditors 50 cents on the dollar. They owe $2,400, and have apparent assets of about $3,900, of which sum $3,000 is in the shape of doubtful accounts due by miners.——An unexpected failure is that of R. S. Faulkner, for many years dealing in flour, seeds, etc., at Stellarton, N.S. He is said to owe some $12,000, while showing only about $1,300 in stock and accounts.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST EAST TORONTO.

Mercantile Summary.

R. Macfarlane & Co. Limited, Montreal, have been incorporated by the Dominion Government to act as general contractors, and manufacture sashes, doors, blinds, etc. Capital stock, $100,000.

Notice appears in the Canada Gazette of the granting of a charter to the Kakabeka Power Company, Limited, with a capital of $2,000,000. It will, as before announced, carry on the business of an electric power, heating and lighting company.

H. W. Bickell, J. C. Welly, and others, of Toronto, have organized under the name of the Automatic Train Stopping Company, Limited, a company with a capital of $250,000, to acquire the McPhee automatic railway signalling device, and all Canadian patents connected therewith. They will also deal in air compressors, electrical apparatus, etc.

The Canadian Seamless Wire Company, Limited, Toronto, capital, $50,000, has been incorporated. It will manufacture and sell plated and other wire and deal in gold, silver, and other metals required in the process of manufacturing such products. W. B. Gladding, of Providence, R.I., and D. W. Saunders, of Toronto, are among the charter members.

The failure of Max Genser, of Montreal, dealing in furniture, clothing, dry goods, etc., which he largely sold upon the instalment payment plan is one which is creating a considerable amount of unfavorable comment, as he claimed up to the last that his position was a good one, and he bought bills of goods, including jewelry and precious stones, regardless of price or terms up to within a few days of his failure. The liabilities, as at present figured, amount to about $30,000, but are liable to increase.

The Montreal and Boston Consolidated Mining and Smelting Company have sold out their mines and other properties to the Dominion Copper Company. The latter has authorized an issue of $1,000,000 of bonds, of which $700,000 are to be now issued at 90, with a bonus of 22 per cent. of its stock. The moneys realized from these bonds are to be used to pay the balance of the unpaid purchase price on Montreal and Boston properties, and for further working capital to develop the mines and complete the smelter.

The West Kootenay, B.C., Light and Power Company has made arrangements for a plant at Upper Bonnington Falls, that is expected, when completed in February next, to generate 24,000-h.p. at a cost of $1,000,000. This will be in addition to the plant at the lower falls, which generates 4,000-h.p., and is intended to supply the Boundary country, taking in Grand Forks, Phœnix, and Greenwood.

The Western Construction Company, Toronto, has received a Dominion charter empowering it to carry on a general contracting and construction business on railways, canals, telegraph and telephone lines, bridges, dry docks, elevators, etc. A. P. Murray of Montreal is a prominent man interested.

AChange in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Orders for the purchase and sale of stocks and bonds listed on the Montreal, Toronto, New York and London Stock Exchanges promptly executed.

A Great North-Western despatch from Sarnia, dated 23rd June, stated that a raft of four million feet, which the Reid Wrecking Company's tugs were trying to bring into the river, broke up at the foot of Lake Huron, and was swept down with the rapid current in the river. Only a small portion of the logs could be boomed again, and the remainder will have to be picked up along the shore where they drift.

Mercantile Summary.

Engineers employed on the Transcontinental Railway surveys through the Temiskaming district are reported to have made rich discoveries of oil just east of Lake Abitibi.

The efforts of Mr. Hill's railroad, the V.V. & E., to obtain entrance into British Columbia, have been crowned with success in committee at Ottawa, in spite of the strenuous opposition of the C,P.R. interests.

Practically the whole of the $6,000,000 bond issue for the new company called the Mexican Electric Light Company, Limited, in connection with the Mexican Light, Heat and Power Company, has been subscribed by Canadians. The interest on the bonds of the new company is guaranteed by the former.

The Ridout, Gilbert Company, Limited, has received an Ontario charter, authorizing it to manufacture and deal in furniture, railway appliances, tableware, crockery, rugs, etc., to buy lands and erect buildings. H. Rideout, of Rat Portage, Ont., is the company's attorney.

J. P. Swedburg has sold his Eagle Creek properties, near Nelson, B.C., to a syndicate, headed by W. H. Spencer, the price being stated to be $40,000. The vein is said to be well marked, and what little development work has been done already, demonstrates considerable value in the property. A large quantity of machinery is to be installed by the new owners.

The Canadian Northern has now taken over the Halifax and Yarmouth Railway, a line fifty-one miles in length from Barrington Passage to Yarmouth. It will form the western end of the Halifax and South-Western Railway, which is being built along the southern shore of Nova Scotia. When the link from Liverpool to Barrington is completed, it will form a new through line from Halifax to Yarmouth.

It is stated that the Dominion Government has appropriated $15,000 for the purpose of making experiments with the electric process of smelting ores and manufacturing steel. Experiments will take place at Sault Ste. Marie, and the Consolidated Lake Superior Company will furnish a building and a dynamo capable of supplying 400 electric horse-power for four months free of charge. All kinds of ores will be experimented with and important results are expected to be obtained. The system used will be the Heroult process, and Mr. Heroult will conduct the experiments.

According to a despatch from Pittsburg, Charles M. Schwab is to head a gigantic new rival to the United States Steel Corporation, which is now in course of formation. The Bethlehem Steel Company will be the big steel plant in the new combination, and options are said to have already been secured on ten other steel plants of lesser importance. The new concern already possesses coal lands, developed and undeveloped, in various parts. The combination will be effected under a New Jersey charter.

Mercantile Summary.

Guelph, Ont., ratepayers have voted in favor of a by-law to raise $55,000 for the extension and improvement of the city gas plant.

The Allan Line steamship "Virginian," accomplished last week the quickest trip by the St. Lawrence route so far recorded. Mails were delivered in six days and fourteen hours after time of starting.

A few days ago the Palmer Piano Company's factory, J. G. Gilchrist's planing mills, and Fairles Milling Company's warehouse, in Toronto, were badly damaged by fire, the loss altogether being $17,000; insurance about $6,800.

The manufacturers of stoves in Ontario, at a meeting last week in Preston, decided to draw up a scale of prices for their goods, this being a matter in which considerable difference has existed for some time past.

The Prince Edward Island Navigation Company will at the beginning of navigation, in 1906, get the contract for five years for carrying the mails between the mainland and Prince Edward Island. The company agree to put new and more powerful vessels on the route, in addition to their other vessels.

The Canadian Wholesale Druggists' Association held their annual meeting in Toronto last week, and discussed a number of matters affecting the interests of the trade. Officers were elected, as follows: Honorary president, Henry Lyman, Montreal; president, A. B. Evans, Montreal; vice-president, C. W. Tinling, Hamilton; second vice-president, W. Elliot, Toronto; third vice-president, H. W. Barker, St. John, N.B.; treasurer, W. C. Niblett, Hamilton; secretary, James Mattinson, London.

It is announced that the Canada Atlantic will pass under the control of the Grand Trunk Railway Company, September 1st. Mr. W. P. Hinton, passenger and freight agent of the Canada Atlantic, will be transferred to Montreal, and Mr. Morley Donaldson, general superintendent of the Canadian Atlantic, will retain the position of superintendent of the Canada Atlantic Railway division of the Grand Trunk, and perform the duties which are at present performed by Mr. E. J. Chamberlain, general manager of the Canada Atlantic. The G.T.R., it is understood, contemplates extensive improvements.

The annual auction sale of timber tracts in connection with the Quebec Department of Lands, Mines, and Fisheries, took place on 22nd June. The upset price of the limits put up was from 20 to 40 per cent. higher than last year, which caused the bidders to be careful and slow, but, notwithstanding, the sales were favorable to the Government, and 907 miles sold for $171,000, or an average of $190 per mile. One thousand four hundred and fifty-four miles of timber limits were sold at an average price of $165 per square mile. Mr. John Breakey secured most of the limits on the Upper Ottawa and Centre Gaspe Districts, which comprised the major part of the sale. The total amount realized was $396,645.

The Dominion School Supply Company, Toronto, has been incorporated. It will manufacture and supply school supplies and chemical apparatus. Capital, $40,000.

The Victoria Realty Company, Limited, Toronto, capital, $500,000 has been authorized under an Ontario charter, to carry on the business of a general land company.

The Robb Engineering Company, Amherst, N.S., has received an order for two 100-h.p. Robb-Mumford boilers from the Western Canadian Collieries, Blairmore, Alberta.

The Montreal Transportation Company's steamer "Westmount" unloaded at Kingston the other day a cargo of 130,000 bushels of oats in six hours and twenty minutes, which is considered a record for such work.

The tunnel built by the British Columbian Electric Railway Company, between Lakes Coquitlam and Beautiful, for power purposes, was officially declared open the other day, the waters having successfully been made to meet.

B. Carriere, in a general store way at Hawkesbury, Ont., has placed his affairs in the hands of Chartrand & Turgeon, accountants, Montreal, and is said to only show assets of about $1,400, as against liabilities of some $4,000. He was formerly a clerk, and started business for himself in 1899.

An important step in the steel industry of Canada was taken when the first rail passed safely through the new rail mill of the Dominion Iron and Steel Company, at Sydney, which has just been completed. The machinery, we understand, worked to the entire satisfaction of the experts and other officials present.

The will of the late Hon. James Sutherland has been filed in the Surrogate Court for probate, and disposes of an estate of $550,000. The executors are the Toronto General Trusts Corporation and Mr. H. A. Little, barrister. The bulk of the estate is bequeathed to relatives, with some bequests to charitable and religious institutions.

A contract for a new steamer for the C.P.R. will shortly be let. She will cost a quarter of a million, and be a wooden vessel. She will be built at the Victoria shipyards and probably ply alternately between Victoria and Seattle and to the north.

H. M. Dyllisby and O. E. Osphopp, of Chicago, are looking over the Lac du Bonnet water powers, with a view, it is said, of possibly developing them for the generation of electric power for Winnipeg.

It is announced by the Granby Company that a new shaft, to cost about $100,000, will be constructed at once on the Victoria in the copper-gold mines at Phœnix, B.C. It will be of three compartment size, and will be excavated by raising above the 400 foot level to the surface. It will be equipped with a crusher capable of handling 1,500 tons in ten hours. This will put the mine in shape to produce from 4,000 to 5,000 tons a day. The seventh and eighth furnace at the smelter, giving it a capacity of 2,700 tons a day, will be running July 1st. A ninth furnace may be possibly installed this year.

FREE VS. PROTECTED TRADE.

Never before, says the London Times, has the issue of free versus protected trade been placed in so sharp a light before the American people, and it is presumed that considerations of economy were not the only factor in inducing President Roosevelt and Secretary Taft to dictate the policy to be pursued by the Canal Administration. It was recalled that the vast increase of cost in the canal that would be necessitated by conferring a monopoly in its supplies upon American manufacturers could be rendered a formidable weapon with which to assail the fiscal system at present ruling in the United States; and in this respect the required purchase of two or three large steamers to be used for the canal would form an object-lesson in itself. The United States Government has been determined in its opposition to any form of national bounty to American shipbuilders. But to pay American shipowners double the price for ships for which these could be secured elsewhere would certainly be regarded by the American public as so much in the nature of a bounty as to be hardly distinguishable from it, and the reluctance of the Government to raise such an issue can be easily explained.

* * *

"RULE OF 4" IN MONEY.

"There is a rule regarding the numbering of United States currency," said a bank teller, "which if known and followed by the outside world might often be the means of detecting counterfeit money. The rule applies only to United States currency, and not to national bank notes.

"The Government prints its bills in series of 4, so that every piece of paper money turned out by the United States bears one of these check letters, A, B, C or D. One of these letters is always found in two places on a United States bill—in the upper left hand corner and in the lower right hand corner. The placing of the letter on the bill is not determined by chance, but by an infallible rule determined by the number of the bill. The rule is to divide the last two figures on the note by 4. Should the remainder be 1, the check letter must be 'A.' Should it be 2 the check letter is 'B;' 3, the check letter is 'C,' and 0, the letter is 'D.' Should this rule of 4 fail to work on any United States currency note, you may bet all you have that the money is bad. Some counterfeited bills are right as to their check letters, but a great many are not. So if the rule of 4 works, the bill may be bad, but if it doesn't it's surely bad."

* * *

UNITED STATES FINANCIAL CONDITIONS.

Henry Clews & Co., New York, in their weekly circular, dated June 24th, said:

The stock market has shown a better appreciation of the improved technical position outlined in these advices a week ago. And the week's developments have, if anything, added to the strength of this position—at any rate there has been what may be termed a general clearing in the financial atmosphere. The larger market interests have given evidence of quiet but persistent buying in anticipation of a substantial investment demand to follow the first of July disbursements, and have received additional incentive in this direction as a result of the improved conditions reported from the agricultural sections of the country. A large—almost a bumper—winter wheat harvest is now practically assured, and it would take an improbable combination of untoward developments in the spring wheat section to eliminate the wheat situation as a whole from the list of favorable stock market influences, in which, at the present time, it holds a commanding position. But it is the improvement in the great surplus crops—corn and cotton—that has been the most encouraging feature.

The termination of the Equitable Insurance controversy will remove the last of a series of influences under which the market has stood up with remarkable fortitude, showing that present holders of securities are not to be easily frightened into parting with them. Among these influences, most of which have now happily been removed, may be mentioned (1) the disquieting crop reports, (2) the Japanese and Russian War, (3) the war talk between France and Germany, (4) the prolonged liquidation by the professional element, (5) the attacks on the market by the bear combinations. A favorable feature is the improvement in foreign trade. This should have a measurable bearing upon the money trade supply of the near future in connection with the Continental funds that are loaned in this market on Stock Exchange collaterals.

Montreal Toronto

TORONTO MARKETS.

Toronto, June 29th, 1905.

Chemicals, Drugs, Etc.—Opium has gone up 5c. Quinine remains as last reported. In these staples, a fair trade for this time of the year is being done. Codliver oil is easier, owing to reports of heavier catch. Citric and tartaric acids are in demand. Camphor is a little on the dull side. Jamaica ginger is firm. Aloes also are firm. Bromides are about the same as before. Glycerine is very low in price.

Dry Goods.—The warmer and more seasonable weather has brought about an increased demand for many lines of dry goods, particularly those of a light dress goods character. The prices for all these goods, and indeed for all goods of a staple character, are quite firm. Bradford advices lately have been reporting advances in alpacas, mohairs, etc., due not only to the high price of raw materials, but to the increasing demand. Considerable interest is already being shown in the current Southern cotton crop. The acreage is said to be considerably smaller and the plants, according to recent reports, have not been growing well. In the meantime goods made of cotton are held as firmly as ever.

Flour and Grain.—Manitoba wheat has advanced materially, and the demand for Ontario wheat has grown in proportion. Holders of the latter are becoming firmer in their views. Flour is in somewhat full stock just at present, and ninety per cent. patents have sold recently at $4.30 in buyers' bags, eastern or western freights. Bran has fallen off in demand somewhat with the large increase in pasturage, but there is still a good demand for shorts. Oats have met with a quieter demand since the advance in price. Peas are scarce and wanted. Oatmeal has gone up with the advance in oats. It is now held at $4.75 in carload lots.

Fruits and Vegetables.—Receipts of strawberries have been unexpectedly heavy this week and prices dropped sharply. A good many also were wet, which further accentuated the downward tendency. Lemons are advancing, owing to the hot weather. Vegetables are fairly plentiful. New potatoes are easier in tone with heavier receipts. Beans are in good request. Prices may be quoted as follows: Strawberries, 5 to 7c.; cherries, basket, 50 to 60c.; California peaches, case, $1.50 to $1.75; California plums, case, $1.50 to $1.75; cantaloupes, each, $2.25; watermelons, each, 30 to 35c.; bananas, bunch, $1.25 to $2; do., red, $2.50; lemons, crate, $4.50 to $5; oranges, crate, $4 to $5; pineapples, crate, $3.25 to $3.75; tomatoes, crate, $1.50; cucumbers, hamper, $2.50; do., Canadian, doz., 75c. to $1; peas, basket, 50 to 60c.; potatoes, bushel 80 to 90c.; onions, Bermudas, $1.15 to $1.25; beans, basket, $1.25 to $2.

Hides and Skins.—Hides are slightly firmer, though quotations have not changed materially. Lambskins are coming in in fair quantities. The tone of the leather market is firm. No changes, however, have yet been settled on on a parity with the recent advance in hides.

Groceries.—Sugars of all grades made another decline yesterday following continued drops in the New York market. The dullness in the enquiry continues. In general lines it is about normal for this period of the year. Payments are average. There is little in the way of new features worth reporting.

Live Stock.—Export cattle continued quite dull at this week's market, owing to the drop in Chicago, but other lines showed more marked activity. For butchers', which were not in strong receipt, the demand showed considerable improvement, and prices were perceptibly firmer. For really good stockers, the enquiry was quite brisk. For good milch cows the demand is good. Calves shown at the market this week ranged of better quality than has been prevailing for some time past. Sheep and lambs are easier.

Provisions.—Prices of butter remain much as before, with only really choice goods in much request. Cheese keeps firm. Eggs are still quite high-priced, being comparatively scarce, but the demand also is less brisk. Pork products are unchanged, the market being in good shape.

⁂

The town of Dauphin, Man., has ordered from the Robb Engineering Company, Limited, Amherst, N.S., two 100-h.p. boilers and a 100-h.p. engine for the electric lighting plant, which the town is installing.

SWEET CAPORAL

CIGARETTES
STANDARD OF THE WORLD
SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, June 28th, 1905.

Ashes.—Only a limited volume of business is passing, and values show signs of further weakening. Quotations for first quality of pots range from $5.15 to $5.25, with seconds at about $4.70. There is a continued scarcity of pearls, and for these sorts about $7.50 could be realized.

Cements and Firebricks.—Business in cements may be called good, there being a steady demand in a jobbing way, though no exceptionally large contracts are reported. Quotations are steady at $1.80 to $2 for Belgian; English, $1.90 to $2; American and Canadian, $2.30 to $2.40, less the usual rebate for returned packages. Firebricks are quoted at $17 to $22 per thousand.

Dairy Products.—Another active week is reported in cheese receipts and shipments. The receipts reported for last week are reported at 97,261 boxes, as against 90,852 boxes for the same period a year ago, and 86,322 boxes were exported to Britain, as compared with 72.224 boxes for the same week a year ago. The shipments of butter were 11,810 packages, being 5,209 larger than at same date last year. As showing how completely Montreal has distanced New York as a cheese-shipping centre, it is interesting to note that last week's shipments from the latter port were only 1,033 boxes. Cheese values are a shade easier than a week ago at 9⅝ to 9¾c. for fine Western; Quebecs, 9¼ to 9½c. Quotations for butter are just about on a parity with those of last week; fine to fancy creamery ranging from 19½ to 20c.; good to fine, 19 to 19½c.; dairy, 16 to 16½c.

Dry Goods.—A return of almost cold weather early in the week has proved discouraging to retailers, but some wholesale movement is now noted in fall goods, deliveries already being made in some cases. Collections as a whole can only be called about fair. The Penman Manufacturing Co. announce an advance of about 10 per cent. in ladies' and golfers' sweaters, etc., but apart from this no changes in values are noted.

Groceries.—The movement in this line is just a moderate one. The only noteworthy feature as regards values is another decline in refined sugars, this time of only 5c. a cental, making the present factory figure for standard granulated $5, the range in yellows running from $4.50 to $4.85; Phœnix, $4.95. In teas there is nothing notably new. There is still some moderate demand for Valencia raisins, which are fairly low at 4½c. for fine off-stalk. Quotations for new pack of corn and tomatoes have not yet been made, but new peas are quoted in a jobbing way at 70c.

Hides.—Business rules on the slow side. Lambskins are still quoted at 25c. each, but it is expected they will be advanced to 35c. next week. Receipts of calfskins show a material falling off, and quotations are steady at 15c. for No. 1, and 13c. for No. 2. For No. 1 beef hides, dealers continue to pay 10c.

Leather.—A little more enquiry is reported from the boot and shoe manufacturers, and the British demand for splits, which has been very slack of late, shows some signs of picking up, some moderate lots going forward this week. There is an upward tendency in values, and some dealers claim to be getting 24½c. for selected lots of mfrs. No. 2 sole; slaughter sole is quoted at 27 to 28c., and oak sole at 29c.; Western splits, 21c.; Quebec, do., 17c.; junior splits, 16 to 16½c.; glove grain, 12c.; Scotch grain, 15 to 16c.; pebble, 12c.; buff is dearer at 13c. for medium, and 14c. for heavy; harness, 32c. for best.

Metals and Hardware.—In iron and iron products there has been little recent change. No. 1 Summerlee pig iron is quoted at about $19, with best brands of domestic at about similar figures. Bars are $1.75 in car lots, and $1.80 in a jobbing way; for nails, both wire and cut, $2.20 is still the figure, and wire is unchanged. Canada plates are quoted at $2.30 for fifty two's,, and galvanized Canadas, $3.85 to $3.90; black sheets, $2.15; Terne plates, $6.50; coke tins, $3.65, and $3.90 for charcoals, of standard brand and weight; galvanized sheets, $4.15. In antimony there is still further advance, from 11½ to 12¼c. being now asked; tin is steady at 32½ to

AGENCIES THROUGHOUT CANADA.

33c.; copper, 16 to 16¼c.; lead, $3.45 to $3.55; spelter, 6¼ to 6½c.

Oils, Paints and Glass.—The movement is slackening off considerably, and next month will be a quiet one. Turpentine has shown a marked decline, single barrels being now quoted at 93c. per gallon. Linseed oil is also easier at 52c. for raw, and 55c. for boiled in an ordinary way. Glass is held very firmly. Other lines present no new features.

Wool.—The market is a dull one, millmen being very light buyers. Some operators just returned from the North-West report having done very little in the way of buying wool there, owing to the high prices asked, namely, 18 to 20c., which are considered excessive. What little business is being done in Capes is at from 17½ to 20c. for ordinary grades; fine B.A., 35 to 40c.; B.A., crossbreds, 25 to 32c. Pulled domestic is quoted at about 30c., and farmers are said to be realizing about 25c. for new fleeces.

* * *

ASKING FOR TIME.

Every man should regard a time sale as a money loan. He would not care to ask his jobber for the loan of an amount of money equal to the value of the goods he buys on time. But he does the equivalent of that when he asks his jobber to extend his credit beyond the time for payment set by the terms agreed upon. This point is brought out very well in an article in the Iron Age: If the buyer were to go to his bank and borrow the money necessary to pay for the goods on the same time, he would not only have to pay the legal rate of interest, but a premium besides, and if he did not meet the obligation on its maturity would have to satisfy the bank that the account was good and collectible, and, of course, pay interest for the extended time. Does the salesman realize when he is closing a sale with a customer, that he is virtually lending that customer a sum of money equal to the value of the goods for the period that shall elapse before payment is made? And does the buyer realize that in asking for credit, be it for only ten days, he is asking the seller the favor of a cash loan? . . . A realization of this actual relationship between buyer and seller would lead to greater self-respect and firmness on the part of the seller, and, what is more important, fewer losses; while there is many a buyer whose attitude towards the seller would be vastly improved by a recognition of this homely truth, and who would steer his course clear of many a dangerous financial rock thereby. The seller is a partner with the buyer to the extent of his sale during the period elapsing until payment is made, and as such has a right to know the financial condition of his creditor. This sense of partnership is rarely recognized by either party to the sale.

* * *

THE POOR MERCHANT.

"I certainly have a snap," remarked a country merchant to an exchange. "The wholesale houses send me duns every month and draw on me at sight; but if I send a bill to a farmer he comes in swearing mad and quits trading at my store. While I am hard up for ready money, many of those who owe me are sending cash in advance to mail order houses. If I contribute money to any cause people say I am bidding for trade; if I don't they say I am a hog. Every day I am expected to dig up for everything that comes along, from a raffle ticket to a church fund by people who say I ought to do this because they do part of their trading here, but my friend, Montgomery Ward, neither buys raffle tickets, nor helps the church fund, and yet gets the cash in advance business; and if I were to circulate a subscription paper among the wholesale where we trade I would get the horse laugh proper. I sell a pair of pants, I must treat family to candy and cigars; if I buy load of potatoes I must do the same. Customers, who are able to pay hang on their money, while I am paying 10 per cent. at the bank to get ready cash. I have a big business during the hard times and poor crops from people who are willing to trade with me providing I can duplicate catalogue house prices and wait until after harvest for my money. My scales weigh too heavy when I sell sugar and too light when I buy butter. I am a thief, a liar, and a grafter. If I smile I am a soft-soapy hypocrite; if I don't, I am a grump. Yes, this is certainly a snap." And then he looked over $10,000 worth of book accounts, all good, and wondered how he could raise $350 to pay a sight draft due to-morrow.

A MADE-IN-STORE.

The Maritime Merchant has a bright idea for the development to its limits of the Made-in-Canada idea. It could be developed successfully, it admits, only in a town which has a number of manufacturers. "Let us," it says, "take Halifax, for example, and let us establish a store to handle only goods made in Halifax. It might be known as the "Made-in-Halifax" store. It would be finished in materials manufactured here, painted with Halifax paint, stocked with goods made in that city

MANAGER FOR CANADA:
B. HAL. BROWN.

and insured by insurance "Made-in-Halifax." The stock would include a great variety of things—clothing, boots, and shoes, paints, skates, bolts, and nuts, stoves, heating apparatus, cottons, rope, iron and metal goods of various sorts, spices, flavoring extracts, teas, coffees, foodstuffs of various kinds, lime juice, soaps, confectionery, biscuits, and a whole list of things too long to mention very much in detail here. We have mentioned these lines just as they have occurred to us, and we admit that they make up rather a mixed assortment. Possibly the mixed nature of a stock in which the number of articles would after all be somewhat limited, might be considered as militating against the success of the establishment. We would only say that it depends on the man trying the experiment and it will particularly depend, assuming him to have the ordinary qualities of a good storekeeper, on how he popularizes the idea. He would have to advertise pretty extensively at first, and by hammering away at the people with the argument that every purchase at his store helped a Halifax industry, he should be successful in getting people, before buying, to think first whether the article they want is made in Halifax; and of this they could satisfy themselves by consulting his catalogue."

* * *

BE SOCIABLE.

Is the merchant who "sticks" in his store all day long and leaves the store for his home, pursuing the right policy? It is more than likely, that many merchants have estranged customers because of seclusiveness—not to say exclusiveness. No doubt more than one customer is lost to the local merchant because the latter declines to take part in the social and public life of his town. For his own good a merchant should seek occasional diversion in social entertainment. This might be merely selfish, but he will be a better man, to say nothing about a better merchant, if he cultivates his social qualities. Getting away from selfish advantages to a consideration of the pecuniary, it is to a merchant's gain to meet as many of the people in his locality as he possibly can and as often. It cannot be denied that frequent association and closer acquaintanceship with the customer holds trade more firmly. The lodge, church, and social gathering all contribute to more friendly relations. This contributes to holding your trade.

In too many localities there has been a growing breach between the customer and the merchant. The latter learns that a customer, perhaps a farmer, has sent an order to some mail order house. The next time they meet the conversation is less friendly than it was formerly. This coldness increases until the early friendly relations are practically broken. Such practice as this is not diplomatic. The better method is to ignore the knowledge that you have about the customer. At least when in conversation with him, or if you are strong enough to have a frank conversation with him to do that. Make it frank, however, and under no circumstances exhibit a particle of ill will. Continued openness and friendliness will disarm the customer of his desire to debate the subject and will contribute at least to make him shy of patronizing catalogue houses. Meeting him and his family socially away from the store allows a cultivation of this feeling.—Exchange.

Test of Popularity:

(1) Low ratio of business lapsed, and
(2) High ratio of business gained.

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

has been noted for many years for its pre-eminence in these important respects, and to-day it

Leads all Canadian Companies

in the net amount of business **in force** in Canada, **gained** during the **last five years**, as shown by the Dominion Government Blue Books.

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve.
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00.

THE CANADA LIFE

holds Policy Reserves greater by $3,000,000 than the present Government requirement.

The business in force is three times as great as that of twenty years ago, while in the same period the Assets have increased four fold.

Each year with its increasing age, Canada's leading Life company

Shows Increased Strength.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.
